THE FIGURES SHOWING THE SHUTDOWN

Very Low Prices.

ISPECIAL TELEGRAN TO THE DISPATCH.1 NEW YORK, May 12 .- The Iron Age will

ray to-morrow: The production of pig iron has been still further out down during the past month. The condition of this branch of trade is shown in the following table, in which comparison is made between May 1 and April 1:

	Active furnaces	Active furnaces	Weekly capacity	Weekly capacity
		May 1.	gross tons April	gross tons May
Anthracite	84	81	36, 457	31,473
Coke	152	147	138, 116	132,318
Charcoal	44	40	10, 859	10,100
Total	250	-	155 467	177 884

While the weekly capacity of the active furnaces is now 7,576 tons less than on April 1, there has been an increase in stocks during the past month, at the furnaces reporting stocks to us, of 20,284 tons of anthracite pig, 7,859 tons of coke, and 31,369 tons of charcoal. The point is worthy of careful consideration, however, that nearly all consumers are now carrying light stocks in the yards, which is always the case on a falling market. The visible supply of pig iron throughout the country may therefore not be greatly in excess of the usual quantity.

The Clouds Fail to Break Away.

Max The clouds hovering over the iron market show no signs yet of breaking away. Re-ports from all the leading trade centers in-dicate a continuance of the depression in dicate a continuance of the depression in July MESS PORK. pig iron, with prices ruling in buyers' May... July Septembr favor. Inquiries are increasing, however, on every side, and the probabilities are that many heavy consumers will at an early day May July September SHORT RIBS, conclude that they are running no risk in covering their requirements for the remainder of the year.

Steel plates have been sold at very low prices by Pittsburg for delivery in Eastern Pennsylvania. Although the steel rail trade is generally reported quiet, the sales by all the mills during April ran up to a

trifle over 100,000 tons. The foreign markets are reported by cable from London, as follows: Warrants gener-ally have declined. A small business was done early in the week at firm prices, but reports of a probable early settlement gave courage to the "bear" interest later on, and free selling brought about a decline to 40s 3d for Scotch, 37s 334d for Cleveland, and 47s 734d for hematite.

A Heavy Decrease in Stocks.

Stocks in warrant stores have undergon a further decrease, the last reports showing a total of 467,000 tons Scotch and 98,000 tons Cleveland, indicating continued heavy withdrawals. Exports last month were 61,000 tons against 64,000 tons in April,

Pig tin has ruled irregalar, finally showing a net advance for the week of about 10s on a moderate volume of business. Outside speculation is quiet, but trade demand is good and supplies are light, giving holders decided advantage.

Copper has improved about 15s during the week. In tinplate there has been a fair business, but not sufficient to relieve the dull appearance that has existed for some time past. Fair orders reported placed in Swansea for light Bessemer squares at 12s, and all sizes at 12s 3d. Lower ternes also are in somewhat better request at 21s 9d for 10s@£10 per ton, with good demand. Exports last month were 39,000 tons, of which 31,000 tons went to the United States. The movement in April, 1891, was 52,000 tons. and 45,000 tons respectively. Stocks in Swansea amount to 243,000 boxes, against 265,000 boxes last year.

May wheat this evening is 30 up, and July 36. Corn is 36 higher: oats, pork and ribs are practically unchanged. There was no heavy trading in any of the pits. The delivery last evening of 600,000 bushels of wheat, said to come from elevator peo-ple, was expected to depress the May price at least. Instead, May sold at 34 to 36 premium over July. One explanation was that the wheat which the elevator men sent around was taken in by commission houses which had previously bought it in the pit on orders from the same men who were sending it out, presumably for its effect upon the market. The closing was about 36 under the opening, or the same as yesierday's closing. Prices advanced about 36 %, then declined 36 %, again advanced 36 and ruled quite strong. The weather continues to have considerable effect upon the market, if not the controlling influence. It has not been many years since it was next to impossible to let upstairs rooms in Pittsburg for business purposes, especially of a retail character, and this prejudice still prevails to a considerable extent, but is being gradually overcome by the scarcity of business stands. People are glad to get rooms almost anywhere.

Office buildings were suggested and brought into use by large corporations to enable them to concentrate their interests. To nave considerable energy of the market, if not the controlling influence. Holders of corn at the opening were afraid of a slump in case of bright weather, and shorts were reported. This made a sensitive market. The Weather Bureau showed rains protty general again over Kansas, Nebraska, Iowa and Illinois enriv. This started the market at an advance. Then a Price Current dispatch was circulated, saying the late corn erop prospects. This caused some sel-ing and a drop with wheat. Local operators who got short trying to start a break in July under 43c were quick to buy on a little raily, and there was a good recovery later. Oats, after opening firm, weakened with the other cereals on fine weather reports, but eventually recovered. Such was their beginning in Pittsburg. Expedition and economy were the results. The idea was adopted by others, and soon became popular, especially in districts of

The Drygoods Market.

NEW YORK, May 12 .- The demand for dry goods was about on previous lines. I seemed a little more quiet in accordanc with usual fluctuations. The improving tendencies were manifested, as lately noted Inquiry for goods and actual transactio nre widening out, but slowly. Cotton flan nels and wool flannels were tairly active.
