MONEY THROWN AWAY

In Attempts of an English Army Officer to Work on Our Census.

SOME INTERESTING TESTIMONY

Brought Out at Yesterday's Hearing of One of the Clerks.

CONGRESS TO WORK LONGER HOURS

WASHINGTON, May 21.-The Census Office investigation was resumed to-day, and J. Fraise Richards, a discharged clerk from the division of wealth, debt, taxation and local government, in the Census Office. testified to what he regarded a large number of instances of mismanagement and waste of public money in the division.

The chief, whose name was T. Campbell Copeland, had been an officer in the English army, and conducted the office as he would an English convict station, lecturing the force in a class and hectoring them. Owing to his lack of knowledge of our institutions, he gave directions to ascertain various impracticable things, which took up the time of clerks, and after a waste of money, had to be abandoned. For instance, he caused an exhaustive examination to be made of all State laws, to ascertain how many of the States had laws for the imprisonment of mothers of illegitimate children until they revealed the name of the child's tather He estimated that \$25,000 or \$30,000 had been thrown away in printing worthless papers on one subject. The section relating school statistics, after the expenditure of \$35,000 or \$40,000, a lot of material collected under the supervision of Mrs. Ellen H. Walworth, was thrown away.

Thousands of Dollars Wasted. L. C. Herr, of Minneapolis, who suc-

ceeded Mrs. Walworth, estimated the waste at \$38,000 in a conversation with witness. A large quantity of printed material found its least \$100,000 had been wasted in the Ostensibly as a benefit for a deservine

soman, but really for the glorification of the chief, the clerks were kept posing for two or three hours while an artist went through and took pictures of the employes Illustrate a magazine article prepared by Mr. Copeland on the work of his division. witness related a trouble which occurred over the publication of an article criticising Copeland as an alien and incom-Copeland lectured the division for and, selecting the widow of a captain in the Union army, accused her of its author-ship, and endeavored to get information from her. There was trouble between witness and Mr. Copeland over it, and witness placed an American flag inscribed "Protecion to American Industries" on a platform

in his office, as a protest against Mr. Cope-One Way to Get Statistics.

Witness was next assigned to the agricultural division. He found that when enumerators returned statistics stating that n farmer produced so much sugar, the clerks were told to alter the schedules and put in so much molasses, as it must be assumed they also produced molasses. Also, if a factory returned molasses, sugar was to be inserted. He protested that this was mannincturing statistics, and the farmers at least ought to be corresponded with if there was to be a semblance of reliability.

The testimony of the witness showed that
be had had considerable trouble in the office, and finally he was dismissed.
