wrecking of the bank, but the secret where that money went to was jealously guarded as ever. It is clear that the two millions of dollars which disappeared in the wrecking went into the pockets of some one. Of that money a large share was composed of public funds, and all of it was money intrusted to an institution under governmental supervision.

The fact that Senator Hill took part in celebrating the centenary of the Declaration of Independence may occasion surprise in view of the Senator's well-known dislike to anything like independence. But the independence which the Senator assisted in commemorating was the independence of 1776, and anything more recent in that line could not command that machine politician's approval.

The policy of repression adopted by the anti-Harrison bosses is forcing that element to show its hands, and may eventually make Blaine realize that silence is not golden at all times. LADY HENRY SOMERSET daintily speaks of America as "the happy country of the larger hope."

NOT AN IMPROVEMENT. The recent declaration of that organ of most conservative financial interests, the Financial Chronicle of New York, in favor of repealing the national tax which prohibits the circulation of bank notes issued by the Federal Reserve Bank, has caused a general following of the lead in quarters where it would be least expected.

THE BLAINE REVIVAL. The persistent attempt of the anti-Harrison element to force the nomination of Blaine is at once a measure of the strength of the public sentiment for the Secretary of State and an indication of the desperate straits to which the opponents of the President to use Blaine in defeating the reelection.

OUR special telegrams, reflecting the position of affairs on both sides, leave no doubt that the anti-Harrison men have organized to the best of their ability to boom Mr. Blaine's nomination and stamper the convention for him. Their work is apparent in the appearance of reports that the Secretary will accept a nomination for Blaine.

IT is probably correct, as stated in our dispatches, that all the engineers of this movement ask of Mr. Blaine is that he shall hold his peace till the convention acts. If he falls in with their wishes to that extent there is a good chance that Ohio, Pennsylvania and New York will be added to the Blaine campaign.
