REPORTS FROM ALL ALONG THE LINE

OFFICE OF THE DISPATCH, PHYSBURG, FRIDAY, June 3. RAW IRON AND STEEL-Depression still characterizes the market, but not to the extent that prevailed at the date of our last report. There are certain exceptions; for instance, there are buyers in the market for one or two big blocks of soft steel billets that if consummated will make a good sized hole in 49,000 tons. This indicates that leading consumers have made up their minds that it is a good time to invest, and that prices are not expected to rule below the present rates. Taking it all around the undertone of the market is certainly stronger, while leading iron men express more confidence in the future. There as been no decline in raw iron since our last, while the demand is on the increase for standard descriptions. It will be only fair to presume that after stock-taking and July repairs are completed the iron and steel trade will show more activity and better prices.

No Scale Trouble Expected.

The first matter of importance for the first of July will be arrangement of the wage scale for the coming year. It has been developed that the puddlers in the Amaignamated Association will insist on a new departure at the scale convention that meets on Thesday, June 7. They have entrasted the committee which will represent them with full power to the puddling rate for the coming year instead of again conferring with the manufacturers afterward. It is altogether probable that a slight reduction in the matter of puddling will be insisted upon, owing to the low price and depression in the iron trade. It is currently reported that an amicrable adjustment of wages, with but little change, except in the inatter above referred to, is anticipated as a result of the convention. suit of the convention.

A well-informed dealer has this to say:

A well-informed dealer has this to say: "Inquiries are becoming more numerous and sales show up reasonably well in the argregate, but prices are low and unsatisfactory with no immediate indication of anything better. The market is in buyers favor, notwith-standing the lact that current transactions are in excess of those a short time ago, and is ottat production has shown some decrease; factors which, under most circumstances, would result in a stillening of prices. While production is still in excess of constanders, would result in a stiffening of prices. While production is still in excess of consumerion the demand for from and steel products has not increased as rapidly as the capacity of the works; it is largely this disproportion between the Gemand and supply that causes low prices and gloomy feelings throughout the trade. Although present conditions are unsatis actory producers appear to have great confidence in the future.

Southern Iron Still a Disturber. outliern iron continues to be a disturb g factor and is pushing Northern competiors in certain markets. It is reported that w offers made by some of the Southern proaces a short time ago have been withwn, and there is not the demoralization in the quotations for the product of these al the present time."

NO CHANGE AT BIRMINGHAM.

Prices Yet Neminal and a Continued

Dearth of Orders. BIRMINGHAR, ALA., June 3.-[Special.]-There is no change in the local pig fron market. Prices are nominal and there is a arth o orders. The tron masters do not look for any improvement for some months ocume. All the furnaces are in blast except two or three which have shut down for repairs, and it is said upon excellent authorpairs, and it is said upon excellent author-y that most furnaces are making good reafts, notwithstanding the low prices and reat duliness. It is claimed that one of the riger lurnaces paid off \$50,000 of floating out with the profits for May. Found y No. 1 is being firmly held at about from a y No. 1 is being firmly held at about gland there is not much eagerness to busi-ness at the current prices and cheaper indes are not firm, and it is difficult to gate prices, as the figures, on large sales are jot made public.

A SEASON OF INACTION.

The Stercotyped Report of Condition of Trade Coming From Chicago. CHICAGO, June 8. - [Special.] - Rogers, Brown & Merwin say: Conditions reported ast week still govern in this market. The & Co., \$25; A. Garrison Foundry Company, resent is proving a season of comparative caption, armaces in various sections have c4, \$25; G. W. Schmidt, \$25; A. M. Byers & C4, \$25; Demmler Bros., \$10; John Herreache a limit in price below which man, \$10; George Reineman, \$10; L. Ruppel, ey decline to go, consumers large and \$10; M. M. Frey, \$5; Charles Drum, \$5; and taking the position that by waiting y will buy at a further reduction. Here of there large consumers are quietly con-acting for their season's requirements, but the most part buyers are holding off.
There is no change to report in the posi-increw.

tion of the various furnaces. On Lake Superior charcoal the feeling is gaining ground that prices are not likely to go below those now ruing; there is much less talk and expectation of seeing \$16 as an open price than was the case a month ago. Some buyers talk this, but others are making running contracts at regular market quotations.

FIGHTING FOR CONCESSIONS.

Cincinnati Dealers Report a More Active Inquiry in Some Lines.

Buvers on This Market for Good Blocks of CINGINNATI, June 3 - [Special.] - Rogers, Brown & Co. say: There is no change in the situation to report except, perhaps, a more active inquiry from the agricultural imple ment makers. Some quite large transactions have been closed in this line, but the main buying is yet to come. The general run of business is confined to small orders to supply immediate wants. Prices remain firm on both Southern and Northern brands. Buyers fight hard for concessions, but the cases are exceptional where they get them. The amount of iron offered is not as inrace as it was a few weeks ago. There is a pressure to sell in some quarters, but it is usually outside an lot from some obscure furnace. The standard brands are for the most part well sold, and are not offering further inducements than the generally quoted price. In Lake Superior charcoal iron there is more irregularity. Some holders who have had heavy stocks accumulated are selling freely at figures much below what the well-established and maileable and car wheel brands are offered at. Buyers have taken a fair portion of the former, and failing to get the latter at equal figures, are standing off in their purchases. At the same time there is quite a large business being done in this specialty. Some car contracts have recently bear its and inverse care. usiness is confined to small orders to supspecialty. Some car contracts have recently been let and have created corresponding de-

reorganization schemes of well-known plants. A marked illustration is the readiness with which the \$4,590,000 securities of the Barney & Smith Car Company was taken up by the public. Other similar reorganization schemes are talked of.

St. Louis Furnaces Holding Firm.

Sr. Louis, June 3.—[Special.]—Rogers, Brown & Meacham say: The condition of the iron market is practically the same as it has been for the last four weeks. Furnaces are holding firm, and will not accept orders for delivery during the balance of the year except at full prices. On account of the flood in the Mississippi river business has been very quiet here the last two weeks.

Unchanged at Philadelphia PHILADELPHIA, June 3 .- [Special.]-Rogers Brown & Co. say: The situation is unchanged, with only a limited demand, which is freely met. Small orders for early ship-ment are the rule, at former prices.

THE DIAMOND STREET DICKER.

Carson-Wilson Deal Put Through After **Eunning Against a Sawyer.**

NORTHSIDERS LOCATE AT SHADYSIDE

Mr. Wilson, the East End hotel man, has closed the deal for the property on the southeast corner of Penn and Dallas avenues, the price being \$55,000. Soon after negotiations were opened a hitch occurred which delayed proceedings for several weeks. Mr. Carson, the seller, accepted as part of the consideration a business block on a corner of Frankstown avenue and

Station street. All's well that ends well.

Sale of the Imhoff Property.

When a Pittsburger, for any reason, sells his home he generally buys another or builds one to suit his fancy. He seldom rents or leases. Early last week Mr. Frank Bissell sold his property corner of Penn and East End avenues, just beyond the city been let and have created corresponding demand for wheel froms.

The general situation is rendered a little mixed by the continued rains and complaints that are heard of damage to crops, lands and buildings. Should the weather be favorable from this time forward, however, the trouble will be largely remedied. There is no change in the money situation, which continues easy beyond precedent, with low rates of interest and accumulated funds at money centers. This condition of things creates a demand for industrial securities and rendered easy the financiering of large reorganization schemes of well-known to make room for an elegant modern structure. These and two or three other transactions which have not vet reached the surface, have stirred up a lively interest in an analysis. A marked illustration is the readilimits, to a society of ladies connected with feet. The house is a large brick containing 15 rooms but of no great value. It will be torn down to make room for an elegant modern structure. These and two or three other transactions which have not yet reached the surface, have stirred up a lively interest in real estate between East Liberty and Wilkinsburg.

From Allegheny to Shadyside, Benjamin Dangerfield, of Reymer Bros. has sold his residence property on Arch street, Allegheny, and purchased, through the agency of W. C. Stewart, a lot 50x180 on Bayard street, Shadyside, for \$3,400, upon which he will begin at once the erection of a fine brick residence. Mr. Thorney tion of a fine brick residence. Mr. Thornton, another Alleghenian, has secured a lot in the same district, which he, too, will improve with a handsome dwelling.

That Diamond Street Deal, A hint of a deal in Diamond street property was given in this column yesterday. The agents, Black & Baird, were not in aposition to disclose anything definite at the time on account of the pendency of another transaction on the same thoroughfare. The matter leaked out, however, but incorrectly in some particulars. The property sold is No. 34, lot 20x120, containing a house that has seen its best days, consideration \$30,000, and the purchaser is William Holmes, of Holmes & Sons, not John G., his brother, as reported. Nothing will be done with the

property until the settlement of the street widening question.

Yesterday's Building Permits.

Six permits were issued yesterday for seven improvements, aggregating, as estimated, \$18,800. HOME SECURITIES.

A FEW GOOD FEATURE; OFFSET LACK OF BUSINESS,

Big Jump in Bank Stock Cansed by the Death of a Creditor-Airbrake Continues to Swing Upward-Pleasant Valley Still on the Run.

Although business was light and narrow, there were several good features in the stock market yesterday.

M. and M. National Bank advanced \$3 a share on the announcement of the death of Robert Anderson. The firm of which he was a member failed 10 or 12 years ago. Among his creditors was the M. and M. Bank, to which he assigned a life insurance policy of \$200,000 as security. The bank is now in nosition to realize on this asset. The

Iron City National Bank was also a benefici ary in the same manner. Airbrake continued its upward movement being bid up to 120 at the last call without causing holders to relinquish their grip. The rise, as before stated, is due to the approach of the quarterly dividend period, reinforced by the knowledge that the com-pany has all the business in sight that it can conveniently handle, Pipeage and Luster finished better for the day. Pleasant Valley had no support and finished with a loss.

The weakness of this stock has been the The weakness of this stock has been the subject of remark for several days. Secretary Graham said yesterday: "I am not aware of any special weakness to-day. How do I account for the slump yesterday? It was an effort of a smart young broker to boom the Pittsburg and Manchester at the expense of the Pleasant Valley. By depreciating a few shares of stock in our company he thought there would be advance at once in Manchester. Where he go 50 shares of our stock to sell at 24 I do not know. When he offered 100 shares at 23½ he was making a bluff. I will take 1,600 shares at that figure and would be glad of the chance. The road is making money and everything is prosperous." Mr. Graham was not aware that the stock, a pretty big bundle, had again sold at 24, but his explanation is as good as any. The slump is evidently the result of manipulation of some kind.

Sales at first call were 100 Luster, b. 0, 30, at 93, 250 Pleasant Valley at 24, 10 Duquesne at 275, 100 Philadelphia Gas at 18. Third call was a goose 62g.

WALL STREET UNCERTAINTY MAKES A DULL AND VERY NARROW

MARKET IN STOCKS. Firm Undertone Presages a Big Rise Soon - Persistent Bear Attacks Upon Burlington and New England-Very Few Changes at the Close,

Y. & C. G. C.C.

NEW YORK, June 3.-The stock market today still displayed the uncertainty of the situation, and with limited transactions few movements of importance were seen, fluc-tuations, as a rule, being yet confined to the narrowest limits. A firm undertone was felt during most of the day, and with London selling in forenoon the bears were en bled to depress prices to a limited extent, but their uneasiness was demonstrated by the facility with which prices recovered even in the face of further gold shipments. While drives at stocks here and there in the list are continuous, the effect is hardly com-mensurate with the effort, and the rapid

mensurate with the effort, and the rapid recoveries point to a heavy upward movement when the bull interests get ready to move in the market.

To-day Burlington was subjected to the greatest pressure, and at lo'clock it showed a loss of over le; but other stocks failed to follow except in a desultory sort of way. Reading and St. Paul were prominent for their animation in the early trading, when most of the selling was done, but neither lost more than a small fraction. There were a few specially strong spots in the list, chief among which was Distillers, which again touched 50; and while Sugar reached par again it was held there for a short time only.

only.

The closing of the London market was the The closing of the London market was the signal for a cessation of the little activity seen during the forenoon, and duliness was accompanied by slowly appreciating prices without the development of any features worthy or note in the general list. Toward the close there was a drive made at New England, and that stock become a rival for Burlington in weakness. The sudden drops in New England and Sugar in the last hour caused a barely steady close, which was generally at about opening figures or small fractions better.

A SCARE IN WHEAT.

Pardridge Starts It Through His Buying SUPPLY OF DAIRY STUFF EXCEEDS Shorts Taking Fright-No Grain for Sale to Speak Of-Many Buying Corn, Expect inga Crop Fal'ure.

CHICAGO-A wild scramble in the wheat t to-day and a bulge of nearly 3c in prices was due to a covert attempt at purchasing by Pardridge. The crowd was evidently largely short, and when the buying began it was found that there was hardly any wheat for sale. This discovery only increased the anxiety to cover, resulting in something of a bear panic. Pardridge soon abandoned his idea of buying, but it was noticed that he was not seiling anything of consequence The report was current on the floor that the big operator was selling out securities the big operator was selling out securities on the local Stock Exchange in view of a possible squeeze in wheat and corn.

St. Louis was very bullish. In the local trade it looked as if a strong combination was working to put the shorts in a corner and start a big buli market. The trade seemed inclined to take the most unfavorable view also of the weather situation. The opening in wheat was at \$4% c for July, about ½c lower than last night, but there were very few resting places in the market after it was put fairly on the boil, and the price was several times run up and down in an acitated way between 55c and \$5% c after the bulge to 85c. The closing price was \$5% c, sellers.

the bulge to 86c. The closing price was 85%c, sellers.

The shorts in corn became anxious buyers when the scare came in wheat. They were helped wonderfully by a large element in the trade now talking 75c for corn on a possible crop failure. The advance was very sharp and strong. July, which opened unchanged at 48%c, went flying to 49%c; there was a drop of ½c to ½c later, when a final flurry put prices up to 50½c. There was a great deal of selling on the advance by the longs.

Strawberries at Their Best and Butter Very Low in Price.

The feature of the past week has been the decline in prices of dairy products. Country butter has been in supply far beyond the wants of trade, and prices are nominal. All under tancy goes begging for customers. A fair quality of country butter has sold this week in job lots as low as 10 cents per pound. Choicest creamery is now seiling at to cents per pound. Eggs are scarce and higher than at this time last week. Strawberries of choicest quality are comir freely and prices are at the lowest for

senson.

Home-grown strawberries will be due next week. Old potatoes are about at their end, and new stock is lower than it was last Saturday. Decoration Day brought strong demand for flowers, and prices were elevated, notwithstanding the fact that outdoor flowers are now at their best. At the Diamond Market fish stalls trade is reported light. Shad are almost at their end for this season. Soit shell crabs are now on the stalls. Spanish mackerel are now in good supply and fair demand.

The Drygoods Market. New York, June 3.—Trade in drygoods was without further development. The market seemed to show a better tone, and buyers were apparently more cheerful on account, doubtless, of the situation in their own branch of trude.
