Saturday half holidays side prices. Demand for choice creamery season in this industry. Trade was quiet The bank statements wave had no influence one way or another in a case against the buying of their specialties by both London and Chicago, especially the latter. Chicago orders to buy were in the market in force, and St. Paul was once more the leader of the market, both in activity and strength, though the other Grangers followed closely. There was a sharp slamp in New England in the early trading, but its loss of 1 per cent had no influence of note, though the pressure by the bears on the rest of the list caused fractional concessions for the time being, which, however, were soon recovered when the market once more began its up-ward march. A few specialties, like Manhattan, Wheel-ing and Lake Erie and some others made marked gains, but the movement of the day was in the Grangers. The close was active and strong at the top figures. The trading reached 170,021 listed and 8,853 unlisted.
