TWO BOYS SADLY AFFLICTED. He Believes All Incurable Imbeciles Should Pe Removed.

NEED ANOTHER STATE INSTITUTION.

NOT A DOOR IS OPEN.

Chief Elliot Badly Puzzled Over a

Lawrenceville Freak.

The most extraordinary case ever presented to the Department of Charities turned up yesterday. It was that of the Reese family, living on Liberty street, near Main street. Humane Agent Samuel O'Brien called the attention of the Department to it. The father is a good, honest laborer at Carnegie's Thirty-third street mill. His wife, a good-looking and very intelligent woman, has half her body paraof malformation. The oldest is about 14 years. His limbs come out at the side nd are bent and twisted. He is partially paralyzed and his arms are so bent he cannot use them. He is able, however, to crawl about over the floor. He is feeble minded and cannot talk. The other child is 9 years old and less than 30 inches in height. His head is much larger than that of a full grown man.

Cannot Either Walk, Talk or Ser. He is an incurable imbecile and cannot walk or talk and is blind. The child is h alth and all the time it is awake it keeps its little legs going like the fan of a wind-It is this child they want the city to take charge of. Both children have to be

fed like babies.

The house is scrupulously neat. The mother says she cannot take care of both and asks that the city take care of one. Chief Elliot never had such a case to deal with before, and does not know what to do. The child cannot be placed in the nursery at the farm because it would ot do to put the child in with other chil-For the same reason it could not be into the school for imbecile chil-it Ellwyn. None of the hospitals would take it either. Chief Elliot said he to provide a State institution for deformed cuildren. There is no place where they can be sent now. Speaking of the case he

Would Be Humanity to Kill Imbeciles. "There is no door open to a case of this kind, and I will have to see what can be done. People may not call it Christianity but I believe it would be humanity to dispose of such children. It would not be murder. There are hundreds of persons in State institutions who are hopelessly insane. They are imbeciles for life. It would be humanity to allow them to juss away instead of keeping them here in misery. Here is this child, healthy and likely to live for years, will be a burden to himself and his relatives. I believe there should be a law permitting institu-tions to remove persons who have become topelessly imbecile or incurably insane.
When a person is in that condition I believe it is a sin to allow them to live and suffer. It would be humanity to take them

out of the world. 'I remember the case of Vincent Clark,

A Model Chicago Location. A syndicate of successful and wealthy Chicagoans have just arranged to put Shel-don Heights, a model residence location, on the market. Their reasons for delaying iving investors a chance to share in the rmous profits (which will result from e settling up and occupation of Sheldon Heights) is that their improvements have just been completed. It has taken a year's me and a large amount of money to ma cademize all the streets; lay stone sidewalks around every block; out pure water in every street; plant trees, and in fact make the model residence location of Chicago. This what has been accomplished with Sheldon Heights. Lots are now being sold upor prices and terms that make Sheldon Heights property the best possible purchase in Chi-calco real estate. The Opinions Differ-A. H. Logan Thinks It Will Produce Oil for Some Time-Mayor Lambing Believes It Is Ended, and the Price of Oll Will Advance,

Opinions differ as to the future of the McDonald oil field. Some think it is played out; others are sanguine that considerable oil remains to be tapped. A. H. Logan is one who holds the latter belief. Mr. Logan thinks the bulk of the oil has been secured, but he is convinced that Mc-Donald will continue to be an oil field for years to come. He doesn't look for gushers, but the production will be steady and

substantial.

Mayor Lambing, of Corry, who follows the oil business closely as a representative of the Ajax Engine Company, takes an opposite view. In discussing the subject yesterday, he said: "I look for better times in the oil country by October. I feel sure that the McDonald field has seen its best days; in fact, the great supply of oil is practically exhausted. The rank and file of oil men didn't make anything in this territory. Nodidn't make anything in this territory. No intelligent woman, has half her body paralyzed. They have four children, two of whom are perfectly formed, bright and very healthy. The other two are terrible cases be a wonder, I look for a big improvement in the price of oil. Lessening the produc-tion is bound to advance the rates. Then the Mellon pipe line to the seaboard will be finished in the fall, and this will put another buyer in the market, which will have its effect.

The Bear Creek Oil Company is building a refinery at Marcus Hook, Delaware county, to have a capacity of 7,000 barrels per day. We are furnishing them the machin-ery. This will be a source of competition that never existed before. The Bear Creek Company will get its supply of oil from the Mellon pipe line. There is no reason why the new pipe line should not carry from 15,000 to 20,000 barrels of green oil out of Allegheny county daily. If this is done it will help business greatly."

The Remington Typewriter Patents.

The Remiogion Typewriter Patents.

The press dispatches have recently referred to the decision of the United States Circuit Court in the suit brought by the Remington Typewriter Company against the agent of the Franklin Typewriter Company. The suit related to the use, in the typewriter, of more than one letter on a typebar with a vibratory platen. In his decision Judge Lacombe said:

"The validity of the second claim for the vibrating platen and mechanism to vibrate it is not sufficiently free from doubt to warrant a preliminary injunction. Were the manufacturers defendants in this case, it might be, in view of the short time that the patent is to run, that a preliminary injunction should be refused upon giving proper security."

One essential fact in the whole controversy should not be overlooked and that is that all claims to the patents under this invention expire in November of the Present year, and a representative of the Franklin Company said: "It seems a little late in the day for the patentees to seek the protection of the courts. It is evidently one of those cases in which the public may be congratulated that the law retuses to stifle competition."—New York Daily Tribune, June 23.

The First Special Seashore Excursion "I remember the case of Vincent Clark, a river engineer, who had both limbs burnlyzed. He lay in bed up at the Poor for six years. I knew him well, and ime I went to see him he would ask so mething be laid beside his bed that might do away with himself. He did thate any complaint about the way he can't cated, but he knew he could not be cared and would have to lie there and wait for death. He made the same request of everyone who came near him, and it would have been humanity to have granted his request."
