The dullness superinduced by the labor troubles continues to be the most marked feature of the market for local securities. It is difficult to engage the attention of bankers and brokers for any reasonable length of time unless one talks about the situation at Homestead, the cause of the lockout and the probable result, and it is therefore next to impossible to get any mews or gossip bearing on the market. The dullness however, fails to have any mate-	MONETARY.         The local situation remains unchanged.         Money is abundant and rosy at 566 per cent and the demand moderate. Currency is still scarce and commands a premium of 50c over eastern exchange. > Site for Another School House Wanted by the West End School Board-Sales and Current Gossip.

Pedder starts out with considerable business in sight. A member of the firm said yesterday that they were making satisfac-torn progress in a deal in the East End, involving about 45 acres and nearly \$250,-000. If successful, the land will be cut up into large lots for fine homes and put on the market. The probable purchasers are three or four wealthy gentlemen who have done a great deal in the way of improving and beautifying the East End.

Dickering for a School House Site,

The West End School Board is negotiating through Charles Somers & Co. for a piece of property, presumably with a view to the erection of an additional school house to meet the requirements of a steadily increasing population. It is understood the deal has reached an advanced stage, but for special reasons further information is withheld for the present.

Sales on Greenflold Avenue.

Business is not bad in the Greenfield ave-nue district. Peter Shields has sold 27 lots in his plan on this thoroughfare in the last 20 days, and also four of the 85 houses going up in the same quarter. The avenue has been graded and paving will begin before the end of the month. Work is progressing on the transfer station and bridge. The imbit the transfer station and bridge. The impression prevailing in some quarters that electric cars on this avenue run only on Sunday is incorrect. They run every day in the week from 6 A. M. to 10 P. M.

### Business on Mt. Washington.

The S. L. Boggs sub-division, on Mt. Washington, is building up quite rapidly. J. C. Reilly, the agent, has sold 17 lots there in a month, and houses have been started on nearly every one. Business in this quarter is contered on Boggs avenue, which is the most progressive street on the Mount. It is filling up with thrifty Ger-

maos.

### Lots at Pullo Sale.

John K. Ewing & Co. yesterday had a successful sale of building lots in the Mc-Naugher plan, Linden avenue, Tenth and Tweifth wards, Allegheny. The free con-cert given by the Great Western Band was a feature of the day. The sandwiches, coffee and ice cream at the free lunch table

intimated that such purchasing was for account of contracts for supplies for the militia to be quartered at Homestead. Col-lections were reported fair. Regarding prices few radical changes de-veloped. Breadstuffs continued to show ease in the absence of any urgent demand. The demand for four, however, was better, the presumption being that consumers were around to lay in supplies before the new wheat fours came on the market. The ease in grains was ascribed to lower prices in Chicago. Oats were offering there this morning 2c per bushel below last week's closing prices. await developments. The big decrease in the visible supply was a surprise to the trade and caused the rally in prices. The recovery was helped by indications of wet weather. The extreme break in the price of Septem-ber corn from the close Saturday to the low point to-day was 1½c. The receipts were away over the estimate at 340 cars, and the grading was the best of the year, with 106 cars of No. 2 corn on the tracks. The local stocks were increased 375,000 bushels, mak-ing corn of all kinds in Chicago exceed 4,000, 000 bushels, with the aid of the bear news the trade readily forced the bloom corn on the market, but it was less than 500,000 bush-els, and much less than expected. quotations in the forenoon. quotations in the forencon. L & N, was the weak point in the list, the pressure upon it being most severe in the early dealings, and at its lowest point it showed a loss of 1% per cent from its final figure of Saturday. How much of this sel-ling was for foreign account is a matter of conjecture, but there was a notable absence of support, and its price yielded readily for some time. On the other hand Burlington was inclined to respond to the improved prospects of the corn crop as indicated by the Government report and a fractional advance in the face of the general weakness resulted in the early dealings, but this gain could not be main-mined, and with the rest of the list it retired below the level of its first price. St. Paul dis-played some animation, but the only other feature was the weakness in Louisville and Nashville, and later in Union Pacific, fol-lowed by special movements in Cordage and the sugueinants and Western stocks, the last two being advanced 2 and 4 serent steady after one of the most uninteresting seedy after one of the most uninteresting seedy after one of the most uninteresting in there was the advanced in the main, but there was enewed inquiry for the Beeding issues, and all the juntor issues L & N, was the weak point in the list, the

CORDAGE AND S. & W. STOCKS ADVANCE

NEW YORK, July 11 .- The stock market seems still unable to escape from its dull

and listless condition, and to-day there was

the same insignificant trading, while the

fluctuations in the general list were even of

less importance than those of last week.

Sales for foreign account were the principal

isature in the making of prices, but while these were prominent only in the Louis-ville and Nashville, St. Paul and one or two other stocks, they, in the absence of any particular demand, served to give the whole list a

heavy to weak temper despite the favorable

nature of the Government crop report. This

latter influence, however, seemed to have

been fully discounted and no more than

served to check the declining tendency inaugurated by the sales for foreign account.

The indisposition to trade was never more marked, and apart from the few leaders the

whole market remained oppressively dull,

and without character throughout the entire

session, though sympathy with the active shares caused a heavy temper and drooping

Railroad bonds were quiet in the main, but there was renewed inquiry for the Ecading issues, and all the junior issues were largely traded in at advancing prices, though the gains were not of special im-portance except in a few of the inactive bonds. The market displayed no pro-nounced leature and the tendency was rather in the npward direction, no sympa-thy being shown with the decline in stocks. Burlington convertibles rose 1% to 108%, but can Francisco & lost 2 at 107. Other changes were generally insignificant.

were generally insignificant. Government bonds were dull and steady. Close of the list:

sequence of the pacific reports from up the Monongahela and the probability of a speedy restoration of affairs there to their normal condition, as a result of the ordering of the militia to the rescue, and it is reason-able to expect shat an improvement in trad-ing will follow a termination of the trouble. Trading on 'chan,c to-day was very light, and the proceedings, as a whole, almost en-tirely perfunctory. The items covered were Luster Mining Company, Duquesne Traction stock and bonds and Fhiladelphia Company. The latter dropped a little under the mar-keting of a few shares, but neither the sell-ing nor the course of prices carried any significance. The sentiment on the stock re-mains conservatively builtish. There is no reason why its price should decline and there are several why it should advance, the main one being of course, the declied improvement in the company's physical and financial condition. The friends of the stock declare it to be one of the best pur-chases on the list. People's Natural Gas and Fipeage continued to show istrength, from which the inforence was drawn that there was still nope in some quarters of an extra dividend. There was a little inquiry for Pennsylvania Gas at 10, but all the ocher members of the group were featureles. Duquesne Traction was somewhat stronger and the various street railway bond issues vere, and the inquiry on 'chanze was mea-ger. Central Traction appeared to be stronger, Pleasant Valley was all but neg-lected, and P. & Traction was off to 26 sked, no bid. Clitizens and Miscelaneous share, there was little or no change, ex-custing a slight stiffening in Laster, and a little softening in U. S. Glass, common. ### A Very Gluttonous Reptile

A very Giuttonous Reptile. Nuw CastLE, July 11.-[Special.]-Yester-day site moon workmen were engaged in harvesting in a field on the Young farm in Neshanock township. They came upon a black snake, which appeared to be in a stupefied condition. It was killed, and meas-ured 11 feet 3 inches, and at the largest part was nearly 20 inches in orcumference. In-side the snake were found the remains of two good-sized spring chickens and four toads.

at 25c bid and Howard Plate Glass at 100 nsked. A good deal of curiosity to know some-thing about the June receipts of the leading street rail way lines is manifested along the street. Officials are opposed to publishing such matters, however, and therefore noth-ing but estimates can be given. A gentle-man who keeps close tab on street railway matters furnishes the following figures, all being estimates excepting those for P. & B. Traction, which are official: Pittsburg & Duquesne Combine, \$70,000; Citizens' Trac-tion, \$60,000; Pleasant Valley, \$33,000; P., A. & M. Traction, \$35,000; P. & B. Traction, \$25,700; Central Traction, \$16,500. After the adjournment of the Citizens' directors meeting this atternoon, Mr. Magee told the writer that the receipts of the road for June, and for the six months of 1882, with comparisons, were read at the meeting, but that the only statement that he remembered was that the June receipts this year ex-cended those of June, 1891, by upwards of \$7,000.

Conductance and the second sec

some of the southern insurance companies will likely be wiped out of existence before long. The sentiment in favor of turning on the light is attaining such proportions that street railway officials here will soon be compelled to beed it, and do as they do in Chicago, Philadelphia, Boston and Balti-more-publish the receipts of their lines either weekly, monthly or quarterly. It is due all who are interested, and there is no good reason why it should not be done. The total exports of gold since January 1 amount to \$44,708,902, against \$71,006,721 in 1891, distributed as follows: Great Britatin, \$5 302,143: France, \$13,350,228; Germany, \$18, \$67,350; West Indies, \$6,379,352; Mexico, \$6,500; South America, \$1,042,343. All other coun-tries, \$10,500. The delay in extending rapid transit through and beyond the West End district and Chartiers township is said to be due to pany controls all the streets over which any new road would have to pass to reach the eity. The outcome of this state of affairs, it is expected, will be that the West End geo-ple will either make terms with projectors of other lines or extend their own into the territory indicated.
