NEW YORK, July 13.-There seems to be no disposition in Wall street to look for anything but a narrow and tame traders' mar ket for some time to come, and the special movements in different groups of stocks have little effect upon the general list. The late advances among the Grangers were samples of this lack of power and the rise in the coal shares and their allied securities to-day was another. These movements influence the general temper of the list, but fail to encourage either advances or declines of note.

The failure to take action by the Western Traffic Association, although the interretation put upon the situation is that it leaves the association on the verge of dissolution, seems to be received in the East with indifference, and while the Grangers this morning showed a declining tendency there was no material loss in any of the stocks interested. The feature of the day's operations was the comparatively heavy buying of the Reading securities and the strength in the other coal stocks on light transactions. After the rise in Reading securities had about reached its limit the news of the defeat of the silver bill was made public and stimulated the buying movement in the general list and all the leading stocks reached their highest prices in the last hour. At that time the industrials became the prime favorites, Chicago Gas and Cordage preferred rising more than the others. The feat of the silver bill removes one of the uncertainties from the market and to that extent brightens the immediate future. The stimulus from this cause may be short-lived, but it will certainly have a deterrent influence on short sales in the future. The market closed quiet but firm to strong at the highest prices.

Railroad bonds were quiet, but the activi-

ity in the Reading issues gave the market a more animated appearance than usual of late and the total transactions were \$1,706,-000. The changes were again slight in most cases, but Reading Convertibles are up Government bonds were dull and steady.

GRAIN HIGHER,

Eut Provisions Decline Under Efforts of the Clique to Unload,

Chicago, July 13.—The bears oversold themselves to-day in wheat. When they tried to get the cereal back it was not to be had and a rapid advance of 11%c from the lowest point ensued, the market closing within 1/2c of the top and 1/2c over last night's figures. Hot winds in Kansas and night's figures. Hot winds in Kansas and Nebraska fanned the price of corn up till it closed at a net improvement of \$4c\$. An attempt to unload by the bull clique in provisions caused pork to finish at a loss of 1%c compared with last evening. Lard and ribs at the end were only slightly altered.

Wheat opened \$6c lower, and further declined \$6d\$\$4c; then railied to the close. The decline earry was due to weak and lower English cables, besides the receipts in the Northwest showed up larger, and the export clearances were only moderate. Later corn and provisions advanced. Continental markets came higher, there were reports of rain in the Southwest, and Bradsreet's reported a decrease of 1,841,000 bushels in the supply of wheat east of the Rocky Mountains, with stocks on the Pacific coast practically the same as last week. The defeat of the sliver bill was thought by some to also exert a strengthening influence.

Corn trading was mainly for local account. Opening figures were at \$6c\$ loss, and the market under rather free selling by shippers and elevator people declined \$6c\$ more, until the news of hot winds arrived from the West. One of the points which attracted attention was the fact that July corn in New York was only 5c over the Chicago price for this month, whereas the cost of lake and canal freights amounts to about Ic more than that difference.

The feature of the oats market was the great strength of July, which commanded \$6c more than that difference. Nebraska fanned the price of corn up till it

Parties to buy cash oats, which were scarce. The buil clique in provisions appeared to have the market in their hands. The general crowd were timid and hesitating and appeared to take it for granted that their chance for profit lay in the success with which they could guess the action of the manipulators. Just when corn and wheat received something to encourage them and wheat received something to encourage them and wheat, on a normal state of affairs in the provision market, there would have been a symmathetic advance in prices of hog products, the clique seemed selzed with a desire to liquidate, and the close was at about the lowest prices of the day.

There was a good demand for vessel room for Buffalo and Kingston, and rates firm. Shippers bid 2e for wheat and 1½c for corn to Buffalo.

Trading at the local stock call to-day was

confined to Duquesne Traction 5s, United States Glass common, Pleasant Valley Rail-way, Luster Mining Company, Pittsburg and Birmingham Traction and Union Switch and Signal, What interest there was in the market centered in Luster, Pleasant Valley and Switch and Signal. The former opened at 934 bid for a round lot, against 11 bid for 50 shares after the close yesterday, moved up to a sale at 12, fell off to 10 bid and reacted and closed quiet at 11@131/4. The stock did not appear to be very firmly intrenched in its closing position. A number of the brokers and traders were trying to feel the market in a manner that indicated a desire to sell a few shares, as well as a fear that offerings of any conse-quence would break the market below the quence would break the market below the peint at which they desired to sell. The bidding at 11 was not very enthsiastic, and it is probable a few orders to sell at best would have found the stock without support. It looked very much as if the short interest, which was not very extensive at best, had settled, and that a reaction to 10 or below was imminent. The stock is not widely distributed, however, and in the absence of any knowledge of the condition of affairs at the mines, its probable course is difficult of determination. The controlling clique can do as they please with it. At present it looks to be nothing but a gamble.

Course of the Tractions.

A small lot of Pleasant Valley Railway sold at 28%, and the stock closed at 27% asked, no bid. There was some talk, by those who supported it so strongly a short those who supported it so strongly a short time since, of a better demand and a probable advance, and one of those most prominent in the recent heavy trading declared he stood ready to take all offered "at the market." What this talk was based on was not disclosed. It might have been on something pertaining to the deal that is on between the P.V. and P., A. & M., but those interested in it who could be found denied any knowledge of anything new in the matter. Several of the most prominent projectors of the deal were out of town, and as they were also absent from the city yesterday, when it was said the finishing touches were being made, it is probable that nothing new has occurred lately and that the renewed inquiry, if there was any, was based on expectations of the announcement of the regular dividend after the close of business. If so, there should be a movement in the stock to-morrow (Thursday), as the dividend was duly declared.

Union Switch and Signal sold down to 15½, closing at 15@15½ and weak. "Charge the weakness to the labor troubles" was all the explanation that could be obtained. For some reason or other, probably because of a lingering recollection of the many fingers burned in its handling some years ago, the stock is not very much in favor. In certain quarters the sentiment is quite bearish, the feeling being that while the company is doing a good deal of work it is not making very much money. Pittsburg and Birmingham Traction was lower at 25½ sales and a close at 25½@25½. There is no accounting for the gradual decline in this stock, excepting by assuming that the profound mystery which has so long enveloped the dividend and other questions, has bred discouragement and something approximating disgust.

Duquesne traction 5s sold at 100½ and U. S. Glass common at 65½, the closing bids being 100½ and 65, respectively. Duquesne stock and bonds are said to be gradually stiffening, but if so the process is apparent only to close observers. It is claimed the most business.

Central traction was bid up time since, of a better demand and a prob-able advance, and one of those most prom-

Barring U. S. Glass and Switch and Signal little attention was paid to the miscellaneou list. Air Brake was not quoted at all, and the quotations established on the others by

the bids and others were altogether nomi nal.

Electric (old) was quoted at 18@18½. Pipeage was barely steady at 13@13½. Wheeling and Chartiers Gas were unchanged, and in the various other groups the old familiar figures were recorded.

Financial Notes. At the meeting of the Board of Directors of the Pleasant Valley Railway Company this afternoon the regular semi-annual dividend of 3 per cent was declared, payable

MONETARY.

The local money market continues to rule very quiet and easy at 5@6 per cent, the increased quietude being ascribed to the probable extension of the labor troubles. Eastern exchange and currency are practically unchanged, the former being abundant and the latter scarce.

HEAVY PURCHASING

On Homestead Account the Bulging Feature in Mercantile Lines-Grain Ruling Dull and Weak and Provisions Active and Strong at the Recent Advances-Canned Goods Decidedly Buoyant. WEDNESDAY, July 13.

Business is about as active in most lines as could reasonably be expected, considering the time of year and the uneasiness in the industrial world, and collections are also fairly satisfactory. So far as prices are concerned, the only positive tendencies are shown by provisions and breadstuffs, the former being decidedly buoyant and the latter weak and declining. The only feature of the markets to-day was continued heavy purchasing of groceries, provisions, potatoes, etc., on Homestead account.

CATTLE LOWER.

Hogs Firm and Sheep Steady-Receipts Unusually Heavy.

WEDNESDAY, July 13. Fair activity prevailed at the Central drove yards, East Liberty, this week, but while hogs and good sheep were steady to firm, the big receipts were too much for the market and material declines were established. At the close to-day there were n indications of better things next week, though it was thought receipts of cattle next Monday would show a failing off.
