President Weihe Says Many People Try to

President Weihe, of the Amalgamated As nociation, is kept busy these days, a large part of his time being taken up with the exvere brought ou by the Carnegie agents. "All the troops who have been relieved from duty at Homestead will be paid early this week," Adjutant General Greenland said yesterday. "The draft to pay the Fourteenth Regiment has already been forwarded to the proper authorities of that command. The other regiments will be paid promptly." several Pittsburg pawnbrokers had, during the week, visited the encampment and had purchased the pay of many of the soldiers for 85 cents on the dollar. The report created considerable indignation among the military authorities there. An investigation was at once instituted, but no soldier was found who would he had sold his admit Adjutant General Greenland said that if the pawnbrokers had gotten into camp and had purchased the pay of soldiers at a discount they will lose any money so advanged. "We will, on account of the rumor, which we have been unable to run down, take extraordinary care in paying the troops. We will, of course, send the State's draft to the captains of the companies."

A Move to Block the Brokers. The captains will deposit the drafts and will check against them, and every soldier will be required to sign the pay-roll in such a way that no second hand business can be practiced. The pawnbroker cannot recover any money unless he has established some agreement with the captains, and if the captains have entered into any agreement there will certainly be some cashiering.

Adjutant General Greenland arrived in camp yesterday morning. He spent the morning with General Wiley, and in the morning with General Wiley, and in the evening Generals Wiley, Greenland, Surgeon General Reed and Colonel Lamberton, of the Reading Coal and Iron Company, with a number of staff officers, visited Colonel Hawkins in command of the Provisional Battalion, on the Swissvale side of the river. The distinguished party enjoyed a delight ful evening together. They told stories, smoked Wheeling stogies and drank lemonade for several hours. During the visit Colonel Lamberton announced that his company employed about 25,000 men and that he would agree to give a place to every member of the National Guard who forfeited his position by responding to the State's call to go to Homesteau. This information was given to the boys still remaining in camp. It was gratifying to them all.

As an angler he had poor success, for a continuous sit on the banks for 83 hours failed to show that there was a fi-h within ten miles of his hook, Just down the bank a short distance was a man who was doing a big business. About a dozen lines were out in the river and the

man was pulling in the finny creatures at a rapid rate.

Mr. Schultz pulsed in his lines and decided to cast them near his lucky neighbor. The successful fisherman proved to be Lonny Long, the clerk of the Criminal Court. Instantly they recognized each other and fell upon each other's breasts. The councilman told the clerk that he could not catch anything and the clerk told the councilman not to be alarmed, as he had enough fish for both. As the sun disappeared behind the Western hills a boat, manned by two sunburned individuals, were seen rowing into the middle of the river with a string of fish 20 feet long hanging to the back end of the boat as a tiller. On close inspection the pell proved to be the councilman and clerk.

Mr. Schultz took half of the fish and came to town, while Clerk Long changed his bait to town, while Clerk Long changed his bait and moved further up the river.

Frances, aged 47, the eldest of the children, lived with her parents at No. 189 West End avenue, and occasionally went among the sick of the neighborhood as nurse. She and her mother were more like companions than parent and daughter, and her health, which had never been strong, was shattered by attending first her brother and latterly her mother.

Mrs. Fonner the remaining members of the family were startled by having Frances demand to be tied up or she would take her own life. The woman was pacified, and no more was thought of the matter until some few days later when the same strange request was made, this time with greater vehemence. From this on the

greater vehemence. From this on the woman began to exhibit peouliar symptoms and Dr. S. W. Boggs, of No. 102 Taggart street, was called in to attend her. The physician expre-sed grave doubts and treated his patient for melancholia. She did not confide in anyone for several days but then went to her sister Mrs. H. B. Deitrich of No. 202 West End avenue and declared she was continually possessed with a desire to end her life.

"She said she heard voices at all hours of the day and night telling her to commit suicide." continued Mrs. Deitrich, as she told a Disparch man of her sister's strange case last night. "I told her she should get rid of the idea, but received the reply that she was perfectly rational and realized fully that it was a condition of a diseased brain, but notwithstanding this, she was almost powerless to resist the inclination to kill herself. I called upon her one midnight and found her walking up and down the room in a state of intense agitation.

Placed Under Close Sarvelllance,

"She threw her arms around my neck and weeping bitterly asked me what she should do. 'Everybody is asleep but me,' she said, 'and I can do anything I want to with myand I can do anything I want to with myself and no one can prevent me.' I quieted
her and finally put her to sieep. The next
day she insisted upon being put in some
institution where she would be under
constant surveillance and she could be
prevented from doing herself the injury she
leared. We had an aversion to insane
asylums, and secured her admittance into
the Allegheny City Farm at Claremont.
Here she was getting along very nicely, and
we had made all arrangements to
take her into the country this week, as the
attending physician advised as much quiet
as possible and gave us some hope for her
ultimate recovery."

Yesterday morning the woman entered
one of the bath rooms at the home and deliberately wrapped the lower end of a rollertowl about her neck and then threw herself
down and was gradually strangled to
death. She made no outery and
her body was not discovered
until half an hour later. The Coroner was notified and will hold an inquest to-day. The
grandmother of the unfortunate woman,
aged \$2 years, is still living.

MYER IN TRAINING. What the Lightweight Does in Preparing

Billy Myer, who is to fight Jack McAuliffe, is working faithfully and thoroughly be-lieves that ne will win first money, \$9,000, September 5. Billy went into training July 5 weighing 148 pounds, and is gradually bringing himself down by the usual methods. In order not to weaken himself unduly he started slowly and has not yet really be

o'clock and after a brisk walk of two miles cats a light breakfast. Then he rests for half an hour before starting on the real work of the day. About 9 o'clock he begins a walk which lasts till nearly noon, when he is rubbed down either by his brother Eddie or James Bardell of Chicago, the lightweight wrestler, who are Billy's constant companions, though he is practically his own trainer. Billy eats heartly at dinner, but of course avoids pastry and everything that has a tendency to fatten. He is very fond of eags and has become a great vegetarian recently, but eats few potatoes. Dinner is followed by another rest, and then the work of the afternoon begins, and it is mighty hard work, too. The first half hour is devoted to exercise with the pulley weights, which strengthens the arms, chest, neck and legs. Then comes the wrist machine, a simple but ifigenious contrivance for limbering up the wrists and fingers. A roller three feet long and one inch thick is suspended like a trapeeze, but in such a manner that it turns easily; through one end a rope is fastoned, to which is attached a heavy weight. The wrist exercise consists in turning the roller and raising the weight, which is now about five pounds, but will be gradually increased. After twisting the wrist machine for half an hour Myers flies at the bag, and if McAuliffe could see how he hits it he might be tempted to withdraw from the match or buy a baseball mask, for those blows, if landed on an opponent's physiognomy, would spoil his beauty.

In the evening Myer takes a short walk, and at 9 or 9:30 he is in hed. He calls his present training play. When he gets fairly started, a couple of weeks from now, he will add a number of features, such as football, wrestling, rowing and sprinting. He hus lost only about four pounds, but could easily drop a dozen more if necessary. Myer seems to be in perfect condition even now, except as to weight. His dark skin is as clear as an infant's, his movements are like those of an India rubber man, and his muscular developme

A REVOLUTION NEAR ITS END.

nition and Can't Get Any More. NEW ORLEANS, July 31 .- [Specia:]-It is a notorious fact that most of the guns and ammunition being used in Honduras both by the revolutionists and the Govern ment party, have been sent from New Or-leans. More have been ordered from here but the shippers are finding it a difficult matter to get the con-traband goods there. Most of the steamship lines refuse to take them, saying that if they take guns to the revolutionists it will anger the Government: if to the Government it will anger the revolutionists, and as it is impossible to tell who will come out on top, the company carrying this kind of freight may get into trouble and injure its husiness.

its business.

J. B. Connors, of this city, agent for the Honduras Government, has a large amount of ammunition ordered which he cannot get to Honduras. It has been refused transportation. The United States authorities have refused to allow its storage in the Custom House, because of the danger, and the Collector ordered its removal and threatens to sell it. As ammu-nition in Honduras is running low and the troops can get none from here, the chances are the revolution will come to an end for lack of cartridges.

If the switch was clear he turned the white side, indicating that all was right and to come on.

The man was color-blind, and all day only guessed at which color he was signaling with. The result was many complications, and when two cars came on the switch together, the drivers would quarrel, both asserting they were right. Neither would give way, and the passengers were subjected to long waits. This was kept up all day causing a great deal of trouble and hard feeling.

Mr. Brewer thinks that Congress is not doing the right thing in refusing to pass the appropriation asked for the Fair.

"The Chicago people," he said, 'have already planked down \$11,000,000 to pay the expenses, and if Congress will not appropriate the \$5,000,000 the city will raise the balance of the money needed and bond the gate receipts, which ought to be about \$12,000,000. The rivers claimed the largest number of victims during the past month in the history of the two cities. The majority of the cases were those of young men who had gone into the rivers to bathe and were drowned. In several instances the bodies of the unfortunates were carried a considerable distance by the current before they were recovered. The rivers mave up 20 of the dead.

Despite all the warnings that people have had regarding the deadly oil can, 16 persons met their death in that frightful manner, during the past 30 days. These fatalities were almost exclusively among women who thoughtlessly poured oil into their stoves. The most pathetic case was that of Mrs. Thomas, who was burned to death and her home destroyed by fire. Her husband and children barely escaped with their lives. Deaths from heat and alcoholism reached 4. The month of July was an exception in the mills in consideration of the lact that not a single fatal accident occurred.
