NEW YORK, Aug. 13.-The stock market

to-day was of the usual half holiday char-

acter, little disposition to trade being ap-

parent, and that which was transacted

being of the purely professional variety.

No commission business of importance was

done, and with all the larger operators

barometer the trade movement was more than 6 per cent smaller than that of the previous week, though 19.5 per cent larger than that of the corresponding week of 1891. Some of the wholesalers continued to mourn the absence of a number of their cash customers of Homestead and Braddock, and intimated that they were limiting credits so far as those particular sections were concerned, but they acknowledged that things looked brighter, and expressed the belief that trade on all accounts would gradually begin to broaden from the middle of August until the autumn movement was at its height. So far as prices were concerned their course favored sellers. Breadstuffs ranged higher; coffee advanced by per bis sugar advanced by the products were firm and active with clear and dry were firm and active, with clear and dry sait sides &c higher; choice creamery butter was elevated &c per ih, with pro-pects of a further advance, and Ohio cheese was &c higher at the close. With respect to the advance in coffee it is intimated by good authorities that it is not likely to be permanent. The visible supply of coffee is nearly twice as large as a year ago this time, which influence must soon assert itself. The firmness was caused by a scarcity of spot roasting gindes. There is an abundance to arrive, however, and when it reaches the market a change in the temper of the market from strength to weakness is almost certain to be witnessed. At least, so says one of the oracles.

Gossip 'bout the Crops. The past week has marked an absence of rains in nearly all regions of the West, says the Cincinnati Price Current. Some local showers have given partial relief, but this has occurred only in a limited degree. The esult is that it has been more severely pre-udicial to the growing corn than any pre-

judicial to the growing corn than any pre-vious week since the crop got under head-way. It is true that much the larger propor-tion of the area has not yet suffered to a great extent, but the needful advancement in development has had more or less of a check, and in some portions of the Missouri-Valley region the injury has become posi-tive and permanent, while in many other localities the situation is bordering on con-citions of impairment which can only be calities the situation is bordering on contions of impairment which can only be certed by very prompt relief by rainfall, be general average condition of corn is not high as previously. In the Northwest the ter information concerning wheat is sometal less favorable than previously as a lole. Severe hallstorms have occurred durg the week over quite an extent of count. Returns relative to cats indicate disaphiment more frequently than otherwise, depoint to light weight of this grain. The Hady Trade Bulletin, of Chicago, has applied its monthly report of the available cas of breaustuffs, including stocks as resed by the Liverpool Corn Trade News and mestic crop authorities. This report says: a agreemate supplies in the United States I Canada, in Europe and on passage rost. I was about 10 as so

The elevator extiputes the yield at 60,000,000, while the wantkee and St. Paul and Chicago and thwestern Ballway experts place it at 50,000 and 50,000,000 bushels respectively. London special estimate places the Ruswhels erop of 1802 at 190,000,000 bushels, inst 178,000,000 bushels has 1980,000 and 304,000,000 bushels that or 1889 at 304,000,000 bushels.

Grocery Trade Notes.

Full standard Jersey and Delaware goods were sold at 90c in New York Friday, and more offered at the same price. About a week ago 25½ was realized.

Samples have been received in the East of new packed Maryland canned corn. The goods were thin and hard, and theretore would not pass. Some lots might be nad at 29c for prompt delivery.

Latest reports from the East state that the catch of fish suitable for packing American quarrer oil sardines has been very poor thus far. Fish ran mostly to large sizes and are not abundant.

Primal markets have been pretty well cleaned of canned lobster in flat tins, and export demand is saic to be good for both lound and \$5 pound tins. The former are realizing \$2.242.30 laid down in New York.

One of the periodical sweeps of syrups has been made, including \$,000 barrels for export and \$2.00 for home use, albout the entire supply of New York and Philadelphia or balance of month, and there is an effort being hadde to get the Boston supply. This strengthens the position again, assisted by an advance in gincose to 2.05c per pound.

EVERYTHING CLOSES STRONG.

News Generally Bullish and Grain and Provisions Advance.

CHICAGO, Aug. 13.-The weakness which had been the conspicuous feature of the market was lacking at the opening to-day, and the result of the day's trading is that everything dealt in on the Board of Trade is higher than at the close yesterday. This fact is due in part to a natural reaction from the recent declines and in part to the news of the day. The trading, however, was gen-erally light. Wheat exhibited a conspicuous undertone

of strength, considering the volume of trading, which was small. This undertone £30.000.

Wheat exhibited a conspicuous undertone of strength, considering the volume of trading, which was small. This undertone was supported by the improvement manifested in the cables, liberal exports from both coasts, the bullish purport of Beerbohm's estimate of the world's wheat crop, the receipis here being under the estimates and reported heavy cold rains in certain sections of the Northwest. The opening sales exhibited an improvement of ½c over yesterday's closing prices, and the fluctuations during the whole of the session were confined to ½c range, the market closing with a rain of ¾c. There were some sales at the opening at 77½c for September, but at the same time there were buyers at 78c, and a good deal changed hands at the latter and very little at the former price at the time referred to. The price held for a matter of half an hour at 78c or better, and then took a dip to 77½c, after which it remained for a long time at 77½c, with very little offered for sale and just as little wanted, closing firm at 78c.

The corn market was very firm at the opening, September touching 38c in the first rush to fill the early orders. There were some sales at the same time at 53½c, but 32½c and 33c were more generally current. The latter price was also the closing quotation, but it was being offered at that. The recovery was due to some uneasipess regarding the approach of colder and perhaps freezing weather in some of the more northern counties where corn is grown and to the good demand which was reported from the cash crowd. The latter, more than the possibility of frost in the corn country in August, was the more probable explanation of the change in sentiment which caused the market to wind up at about its highest point. The stock of corn in Chicago is said to be chiefly owned by J. Bryant and he is no bear on the article. He looks for 65c for the counts and of the grown and to the frequency of the rise. Armour's brokers were taking everything that was offered at the improved prices, and that caused a complete churge

The Great American Hog

Is welcome abroad once more, and abroad he may go. As long as Lard was a requisite in every kitchen, the Great American Hog was highly esteemed at home; but now that modern science has introduced

the new vegetable substitute for Lard, poor Piggy's occupation's gone.

The reason for this is threefold. COTTOLENE is cleaner, healthier and much more economical. A trial has convinced thousands as to this. It will convince any "convincable" person. Will you be convinced?
