weakness in spots. Among these Reading and New England were conspicuous. Apart from these stocks Atchison was the only one showing any animation or weakness of moment. The support was also withdrawn from Sugar later in the day and a substantial setback was given its price. The strikes counted for little in the making of prices and the announcement by many influential firms who have been prominent in the gold movement that they did not expent to ship any at present acted as a sustaining power in railroad shares, and the foreigners were inclined rather to purchase than to sell securities. The market on the whole displayed a firm undertone and resisted the influence of the declines. The close was firm, though again dull at something better than the lowest points.

Railroad bonds continued to show a steady decrease in volume of business and

the changes in quotations are confined to the most insignificant fractions. To-day the Reading issues were weakest, closing down
1 per cent, while Virginia Midland
stamped 4s lost 2 at 81. The only advance
was 1 per cent in the Wisconsin Central
lsts to 92. Transactions of the day were only \$770,000 with no featurelof any kind. Government bonds were dull and easier.

The New York Evening Post says: "Though the market to-day was fluctuating and irregular, and marked by declines to a degree, it was, on the whole, a more normal market than yesterday's. It was simply gaining its equilibrium after the forced efforts than ave been made to advance prices within the last few days in the lace of conditions largely unfavorable. It is probable that some traders were taught to base their operations too largely on predictions made by bull operators in the industrials.

"Jay Gould returned to the city last night from his Western trip, and his friends say he is in good physical health. The advance in Missouri Pacific was on buying by traders who think his return will be followed by a movement in that stock."

A DAY OF SLUMPS.

The Railroad Strike Causes Big Declines in

the Chicago Markets, Chicago, Aug. 12.—The strikes at the East caused general selling of grain and hog products this morning and everything ruled lower. The wheat market opened weak, but before it dropped into the state of utter demoralization which characterized it about the middle of the session, it had a half hour of comparative steadiness. The frost which the speculators were troubled about yesterday did not materialize this side of the region of perpetual snow. That was the first disappointment encountered by the bulls when they looked over the routine budget of the early news. Foreign markets were easier, but Liverpool advised a fair de-mand existing at the reduced quotations. Later in the day a cable to a New York Later in the day a cable to a New York bouse reported red winter wheat 2d lower at Liverpool, and the most extreme weakness of the day followed the receipt of the latter dispatch. The continued heavy movement of winter wheat, indicating an increase in the visible supply of 2,500,600 bushels or possibly more, was one of the features of the situation which was being discounted by the local for the features of the

possibly more, was one of the features of the situation which was being discounted by the break in prices to-day.

The opening price for September was 77c, but the crowd were mostly sellers at that. The tendency was downward, but not very decidedly so during the first half hour. It began to go off very fast, commencing about 10:30 o'clock and kept up on that line until about noon, closing weak with a loss of \$\frac{1}{2}c_c\$, the bottom figure of the day.

September corn at the opening sold at 52\frac{1}{2}c_c\$, an advance of \$\frac{1}{2}c_c\$, but active realizing by holders and a poor demand soon put it down to 51\frac{1}{2}c_c\$. There was some bullish news and corn capies were up 1d, but prices here is alled to respond. Complaints of drought from Kansas, and a dispatch from Beatrice, Neb., said that corn around there had only a lew ears. A telegram from Louisiana, Mo., said that the ground in that section was hard and dry and that corn had been injured by the dry weather. Later there was reaction and the close was only \$\frac{1}{2}c_c\$ of from yesterday's.

Oats were steadler than might have been day's.

WEAKNESS THE RULE

The Railroad Strike Causes Drooping Speculative Markets.

LOCAL STOCKS BARELY STEADY. Electric Advances Sharply, Reacts and Closes on a Recovery.

PHILADELPHIA CO. A LITTLE HEAVY

FRIDAY, Aug. 19/ Weakness characterized the speculative markets East and West to-day, the railroad strike at Buffalo being the responsible inluence. It was fifteen years ago this summer that the railroads had to face such a strike as is now in progress in Buffalo. Then the strike was begun by the employes of the Baltimore and Ohio, spread to the entire Pennsylvania Railroad system and the result was the consumption by fire of 3,825 loaded and empty freight cars and 123 ocomotives. As these were figured the loss to the companies was a little matter of \$4,000,000. The city of Pittsburg was forced to bear the costs, which were assessed upon the county of Allegheny and the county was compelled to issue bonds to meet the losses due to lawlessness. "It looks very much," says an Eastern paper, "as if Buffalo losses due to lawlessness. "It looks very much," says an Eastern paper, "as if Buffalo and Eric county were going through a kinderparien school to show that employes are not owners. It is unfortunate that this trouble cannot be settled at once. If the men were in the right the question would be entirely different. But when they propose to take the chances of committing the crime of incendiarism and arson they put themselves out of the pale of civilization and are subject to the extreme penalty of the law for such crimes, which means imprisonment for life. The effect upon values of railroad securities dealt in on the Stock Exchange is really unimportant. Never before was there a time when stocks were so firmly held and the spirit of riot and vandalism so rampant. It is true that the advance which was just about to be inaugurated has for the moment been checked. When the strong arm of the law has been extended, peace restored, and conditions assumed their normal sway—which will be shortly—the upward course of the market will be resumed, and the generally prosperous condition of the country reflected in increased activity and strength in corporate securities." Though the effect on railroad securities may be unimportant, the strike was undoubtedly the cause of the slumps East and West, and, to a certain extent, it had a depressing influence locally. It was quoted by some of the brokers as partly responsible for the comparative apathy and heaviness on the local bourse, and predictions of better things were qualified so as to cover all unfavorable developments at the storm centers of the industrial world.

That Western Electric Railroad. Work upon the electric railroad that is to Journal of Commerce, of Chicago, has begun, and will be pushed vigorously. It is claimed that this road, which follows an air-line to the great reducing of the distance as com the great reducing of the distance as compared with other railroads, will bring the two cities within three hours of each other. Wonderful as this seems, it is likely to be accomplished. Such a road will mark an era in railroading and, if fully successful, will be initiated in other parts of the country. Such a system would transport passengers from Chicago to New York in 16 hours and revolutionize existing modes of travel. Electricity is yet in its infancy and has yet an important figure to cut in the advancement of mankind.

PLANS PLENTIFUL.

Another Plan Adjoining Highland Park Placed on the Market-Property Near the Park Very Firm'y Held-Reports

From the Building Inspector and Agents.
A new plan of lots adjoining Highland Park has been placed on the market by Reed B. Coyle & Co. The property is known as the Logan tract, and comprises 15 scres of ground fronting on Negley avenue.

The new plot is called the Highland Place plan, and contains 76 50x125-foot lots.

The agents report that the sale of five lots has already been consummated, and negotiations for the sale of several others are at present under way. This property is a very level tract, and being adjacent to Highland Park will undoubtedly make a very pretty spot for a home. Mr. Cayle said: "These lots are to be sold as quickly as possible, as the owners are desirous, for various reasons, of having the pian closed out at once, and as we are selling the lots at low prices I think we will have little or no trouble in closing them out at an early date."

Property in this locality has enhanced in value wonderfully within a short time, and several new plans of lots have been laid off in the immediate vicinity.

Building Permits. The agents report that the sale of five lots
