

PROS AND CONS OF THE COMING BATTLE BETWEEN CORBETT AND SULLIVAN.

THE CHANCES OF BOTH MEN

A Chief Reason Why the Champion Is Likely to Defeat the Californian.

JEWETT'S SPRINTING RECORD.

The Wonderful Performances of Nancy Lunan and Hal Leiter.

LOADING FEATURES OF BASEBALL.

Almost the only topic that is discussed in sporting circles nowadays is the coming battle between John L. Sullivan and James J. Corbett. Judging from the interest manifested in the event, it will be one of the most exciting glove contests that have ever taken place in this or any other country.

During the last few days there have been columns written about the "big battle." Everybody who is in any way particularly identified with sporting affairs has taken about the affair and made a "prediction," and the date of the contest is getting so near that to-day I propose to say something about the probable result of the contest.

A day or two ago I was reading the opinion of 200 or more of the most prominent sporting men on the contest now under discussion. It was remarkable how large a number "tipped" Corbett as the winner, and it was also very amusing to note the number of rounds some of the predictors stated would be necessary to finish the contest.

Duncan E. Harrison is one of the best writers about the "big battle." Everybody who is in any way particularly identified with sporting affairs has taken about the affair and made a "prediction," and the date of the contest is getting so near that to-day I propose to say something about the probable result of the contest.

Domick McCaffrey, in a long statement published in an Eastern paper, displays the effect of his conclusions are more the effect of emotion than good reasoning. He stood in front of Sullivan and said he was certain that Sullivan would win in four rounds. I mention these as samples, and also to show that in the majority of cases outside influences interfere and cause some men to say what they don't believe.

Sullivan resolves to do the same what will result be? There will be no contest, and if Sullivan presents himself in the center of the ring I am fully persuaded that he will be the victor. Sullivan will be a repetition of the Corbett and Jackson burlesque, but give the contest to Sullivan.

If Corbett was a thoroughly game man I am inclined to think that he would defeat Sullivan under any circumstances, but his lack of that genuine pluck that makes great fighters detestable is his downfall. He has a fine physique, but he is not a fighter. He is a good boxer, but he is not a fighter. He is a good boxer, but he is not a fighter.

The Other Two Contests. Everything is going finely along for the contests between Myer and McAuliffe and Dixon and Skelly. So far there has not been much speculation on the events, chiefly because the big event is overshadowing the other two.

Dixon is in excellent condition according to latest reports, and it is needless to say that Dixon and his friends are just as confident of their rights as they are of their ability to defeat, depend upon it Skelly will be a real winner.

There is no doubt that the heavy speculation about the Myer and McAuliffe contest is an informed that McAuliffe is in fine fettle, and while it is very risky, I venture the opinion that he will win if he enters the ring with his friends say he is all right at present.

I have a great respect for Myer, and his victory over Carroll was his own doing. But the Myer and McAuliffe contest is an informed that McAuliffe is in fine fettle, and while it is very risky, I venture the opinion that he will win if he enters the ring with his friends say he is all right at present.

There has been lots of talk about the Washington team, but the fact is that the team is not as good as it is reported to be. The team is not as good as it is reported to be. The team is not as good as it is reported to be.

INTO ANCIENT CHINA.

Eli Perkins Finds the Celestials at Work in the Old Ways.

NO PROGRESS IN CENTURIES.

The Wheelbarrow the Popular Vehicle in Shanghai Chinatown.

PHOTOGRAPHING A WOMAN'S FEET

(CORRESPONDENCE OF THE DISPATCH.) SHANGHAI, JULY 21.

I found Shanghai divided into three settlements, first the English and American settlements, built up like Liverpool palatial brick buildings, then the French section with smooth clean macadamized streets and two storied Chinese houses, mostly occupied by Chinese merchants and artisans, and lastly the old walled city which they call Chintown.

When you go to Chintown you have to walk. The streets are only about six feet wide. The only vehicle that can pass these streets is the big wheeled Chinese wheelbarrow. On this you will see loads of iron, stones, and sometimes two little footed women with clumps of feet hanging helplessly over the wheelbarrow.

As we pass through Japan into China we find that the Chinese, like the Japanese, seldom use horses for transport. Immense loads in jirikshas and two-wheeled wagons, but the Chinese use the wheelbarrow. A Chinaman will wheel half a ton clear across the city of Shanghai for 10 cents.

In this old Chinese town, the old city in Shanghai around which a wall was built a thousand years ago, we see all the industries carried on in the most primitive style. Here is a man pounding copper into a tea-kettle, logs are being sawed by hand, and hand looms are weaving silk. Carpenters, blacksmiths and masons work for \$2.50 a week and subsist on rice and a little peanut oil.

The Chinese tailor will make a ladies dress of suit clothes for \$5 cheaper than any other nation on earth. Hundreds of tourists find themselves out in China. They use English goods and pay Chinese wages. English goods are sold at a profit of 100 per cent. Chinese goods are sold at a profit of 20 per cent.

NOTES AND QUERIES.

Pittsburg Has Many Pigeon Fanciers of High and Low Degree.

INCOME OF ENGLAND'S QUEEN.

Origin of the Popular objection to May as a Wedding Month.

HOW ENGLISH PARROWS CAME HERE

(WRITTEN FOR THE DISPATCH.)

Many people of refinement and intelligence in Pittsburg keep a few pretty pigeons as pets. There are possibly a hundred or more, a prominent band of the kind on the East End has his lot of fancy Pouter and Fantails, and every morning and evening with clock-work regularity this gentleman seeks his pigeon loft to enjoy the odd pranks of his pets, feed them and see to their comfort.

Another man—a painter living on the Pennsylvania road—has a still larger collection, comprising some very rare and valuable fancy pigeons, Carriers, Pouters, Fantails, Turbans, Owls, Tumblers, Trumpeters, Swallows, Barons, Antwerp, and nearly all the choicest varieties known as fancy pigeons. This gentleman has a collection representing many hundred dollars invested. Pigeons that cost from \$10 to \$100 per pair are among this collection.

Still another man, living at Dallas station, owns a flock of long distance Antwerp Carrier pigeons which he now is training westward, expecting to reach the town of Antwerp, Belgium, in about 20 days. He has his birds in his loft bred from flocks of 800 and 1,000 miles, and many of them have to be shut in, because they would fly back home to their former owner if they were permitted their liberty.

One fancier in Baltimore erected some time ago a pigeon house costing \$7,000, and his flock of Short-face Tumblers represented a money value of \$2,000 to \$4,000. This man is one of the leading merchants in Baltimore, and he has been a fancier for many years.

We have had a discussion as to the number of generals there have been in our army, will you enlighten us on it, and if you refer to all the officers entitled to be called "generals" who served in the army, we can't give you much light. There were 330 Major Generals and Brigadier Generals in the United States Army at the end of the war, and probably as many in the Confederate Army. Then there were others before the war, and there have been 100 or so since the war was over.

Clature means the closing, the shutting up of anything. The word was originally French, and is applied now only to proceedings taken in a parliamentary body to put an end to a debate. The previous question is a species of clature. The word was brought into use in the British Parliament in 1713. Until that time there was no rule to prevent a member from talking a year at a time; and the Irish members prevented anything from being done by talking, talking, talking.

What is meant by the word "clature"? During the closing of the House of Representatives in 1892, it was suggested that the House should be closed by a vote of 2/3. The word was originally French, and is applied now only to proceedings taken in a parliamentary body to put an end to a debate.

What is the Income of Queen Victoria? She gets an income of £330,000 a year, equal to about \$1,200,000, and as Duke of Lancaster about \$250,000, equal to about \$250,000. Her private investments are believed to be considerable, though Mr. Henry Labouchere, who sat in the Parliamentary Commission which investigated her business methods at her request, says that they are much less than is usually supposed. The total, however, is \$250,000 to be her for her "privy purse," or the salaries of her "household" she gets \$131,250 and for her expenses \$172,500; for the whole, she has \$303,750. She gets less than any other monarch in the world.

What is the difference between a Minister and a Consul? A minister to a foreign country represents his country in that to which he is accredited. He is a public officer, and he is in the residence, wherever he may go in that country, being considered as part of the country from which he comes—he cannot be "detrit" in any other country.

THE PEOPLE OF HAVANA.

Their Subjection to Spanish Regime Has Had a Real Effect.

Here at our very door lies the Island of Cuba, a country as strange and foreign to our own as is any portion of Southern Europe or the South Sea Islands.

What is the meaning of the word "Home-Steader"? The word is compounded of the Anglo-Saxon home, the secret or sacred place of a family, and stead, from the Anglo-Saxon stede, a place; so the word means the home-place of the family. By our land laws a homestead is a tract of land 160 acres in extent, given to a bona-fide settler by the Government on condition that he shall reside upon it and cultivate it for five years. The word "Home-Steader" is a term of the word, seemingly, for the one who homesteads only to heads of families or possible heads.

Why is there a popular objection to getting married in May? The idea that May is an unlucky month for weddings is as old as the time of the Romans, for Ovid, who lived about the time of Christ, speaks of it. The belief had its origin, probably, in the fact that during the month of May the weather is so hot that the young men and women of the time would fly back home to their former owner if they were permitted their liberty.

What is a "Jiminy" such as burglars use? The name sounds mysterious. A jimmy is simply a short crow-bar; a sectional jimmy is one in sections of any one foot in length, which are joined together to make it of the necessary length. One end of this jimmy is turned up a little more than the end of the ordinary crow-bar. The jimmy is an example of a simple lever.

Who was the greatest General of the civil war? The most successful, of course, was Grant; but the ablest strategists and most skillful handlers of men were General Sherman, General Lee, General Grant, and General Sherman. Sherman was the greatest General of the war, and he was the one who won the war.
