The market opened with unusual animation and at very irregular changes from last night's prices, but Reading was the only soft spot in the list and yielded a large fraction which, however, was atterward partially, recovered. The Gould stocks became the string features, but the grangers were prominent for strength and the whole list shared in the upward movement. New England, however, was over and later in the day the beas found it again, driving it down over 1 per cent. The industrials, which at first were very quiet, were brought up again by the spurt in Chleago Gas, but they also in the late dealings, when realizations were in the day the beast found it again. By the spurt in Chleago Gas, but they also in the late dealings, when realizations were in order, yielded to pressure, and some of them were materially depressed. The market all gave way toward the close and though most stocks still showed irractional gains for the day the wark at the concessions.

trading in railroad bonds was the The trading in railroad bonds was the largest seen in many weeks. The general market displayed a firm temper, but there were no marked advances, and Texas Pa-cific seconds even retired I per cent to 31%, the whole list feeling the late weakness in the share market. The close was rather heavy, in sympathy with stocks, but with-out pronounced tone. Government bonds were dull and steady. Close of the list:

Watson & Gibson to Oakley & Co.: "If Europe will turn in to buy, and if our home public catch the bull fever, we will have a market here that will surprise the oldest in-habitants. Then we shall no doubt find it difficult to restrain ourselves from turning too soon over to the bear side. Prices will pass values and leave them far behind, and those who early in the race think that prices and values should keep close together will lose money fighting the advance. It looks to us as if, barring a catastrophe, we were going to nave a very considerable rise. This our opinion. If we are wrong then we are wrong. ADVANCES ESTABLISHED

In Wheat, Corn and Provisions Despite Lack of Bull News.

Chicago, Aug. 23 .- While nearly everything opened lower on the Board of Trade to-day and there was an absence of much that was bullish in the way of news, the feeling sool turned strong and there was a general advance along the whole line. In wheat early everything in the way of news favored lower prices. Cables were lower and very dull, the receipts were unexpectedly large, not only here, but at all other points, and the statistical information was anything but bullish. The amount on ocean passage in-creased 512,000 bushels, the English visible increased 1 300,000 bushels and the stock of wheat and flour in the United Kingdom was reported at 54,568,000 bushels against \$1,248, reported at 54,565,000 bushels against 31,348,-000 bushels a year ago. The argregate re-ceipts at Chicaga, St. Louis and Toledo were 1,141,000 bushels against 744,000 bush-els for the same day last year, and all information tended to con-firm previous reports of a heavy win-ter wheat crop. These bear factors did start the market a trifle lower, but there was very

of late except on Westinghouse. Brokers and traders cannot afford to pass by West-inghouse any longer. It is easy to investi-gate the finances of this company. Boston has one active director, Mr. N. W. Bum-stead. The remarkable success of Mr. West-inghouse in surviving amid all the wreek-age and disaster of the past two years is a good guarantee that under more favorable circumstances he will please well those people who stand by him with their money. The rise in Westinghouse Elec-tric stocks is fully justified by the facts of the company's business. The rise will continue. These stocks are cheap. They are good purchases at current prices, or at any prices which will be attained for some time yet. The preferred is already aying 7 per cent, and will net about 6 per cent at86 a share. But that is not all. Be-side being a cumulative preference stock, it is entitled to share equally with the com-mon stock in any dividends above? per cent of the common. And as for the common, there is no use in saying now that a dividend will be declared at such or such a time. It is sufficient that the common; and by "farge" is meant not 7 per cent, but a great deal more. And the electric business is now on recover, people who view the electric business in its mechanical and commercial apertance dividend on the common; and by "darge or locomotives. Pittsburg is feeling in the declared at such or such a time, is is sufficient that the guara stable and permisent as the meanufacture of steam en-pering the meanufacture of steam en-pering or boom the store. The staburg is feeling in the meanufacture of steam en-pering the meanufacture of steam en-pering the meanufacture of steam en-pering or boom the store. The steam of will fol-low any builish lead of Boston."

National Laad.

President W. P. Thompson is quoted as follows: "I do not know of any extraordifollows: "I do not know of any extraordi-nary reason for the strength of our stocks in the market beyond the fact that perhaps in-vestors have been investigating the merits of the securities. I consider lead preferred as safe and profitable as any per cent security going. The earnings of the com-pany are steadily increasing and our output this year will apparently be the largest of any year since we have been in business. We have \$1,021,000 in one bank alone in this city. The National Lead Company handles one-eighth of the inseed of bus-iness, about one-quarter of the castor oil bus-iness, about one-eighth of the refining and parting of sliver and about one-eighth of the smelting. We have besides immense inter-ests in all of the different forms of lead for paints, glass workers, wire cloth manufac-turers, etc. As to the taking up of other enterprises or interests, I may say that we are pretty well rounded up. The right to use the bonds which was put in our charter merely as a precautionary measure, has been found to be unnecessary and has been withdrawn, so that there is not now and is not likely to be, a single bond upon the property." **Allegheny Valley.** nary reason for the strength of our stocks in

Allegheny Valley. The net earnings of the Allegheny Valley Railroad Company in June are given at \$87.-492. This is equivalent to an increase of more than \$29,000 over the corresponding more than \$29,000 over the corresponding month of last year. The improvement in this road is gratifying to the shareholders of the Philadelphia and Erie Company, which through the cutting down of the charges of the Allegheny Valley by reorganization and increased earnings is relieved of the liability of the agreement by which the Philadelphia and Erie, the Northern Central, and the Pennsylvania are jointly held for \$100,000 an-nual guarantee. As a holder of the Alle-gheny Valley securities the Philadelphia hand Erie is also benefited.—Philadelphia Succk-holder.

Drygoods.

Drygoods. New Yonx, Ang. 23.-Nothing new was dis-closed in to-day's demand for drygoods. The principal feature of new interest was the accumulation of evidence of increasing strength to the cotton goods market. All fabrics coming from print cloths and other gray goods of similar description are evidently going to be more and more scarce with the inevitable result of still higher prices. Agents have advanced the following: Allen's shirt plaids and prints. Yo: Allen's Turkey, 3%: Forest Mills 44 bleached cottons, 3%:

from Stanton avenue to a 50-foot street, for \$225, also, lot No. 37, in the plan adjoining the above for the same price, both on the easy payments plan.

STAPLES GENERALLY FIRM.

Grains Unfavorably Influenced by Large Re ceipts and Light Shipments-Dairy Pro ducts Firmly Held-An Upward Move ment in Eggs-Current Crops and Trade Gossip,

TUESDAY, Aug. 23. The local merchandise markets were more active to-day, and so far as the staples were concerned firmness was the rule, though there was a slight tendency toward weak ness in wheat and outs owing to the rather free arrivals of new crop consignments. In groceries strength prevailed, especially in coffee and sugars. Butter was firmer in consequence of the advance in Elgin which was exclusively noted in these colums, and in nearly all descriptions of merohandise excepting perishable stuff buyers had the best of it. Wheat has been unfavorably influenced

Wheat has been uniavorably influenced by the heavy receipts at primary markets, accumulating stocks and heaviness in for-eign markets, says a Western paper. The new crop of winter wheat is being marketed with much more freedom than was the case a year ago. Wheat is now so unusually cheap, nowever, that it would seem as if a reaction must occur, but the tendency is still downward on both sides of the Atlan-tic. Foreign computies are going to have oheap, nowever, that it would seem as if a still downward on both sides of the Atlan-tic. Foreign countries are going to have good crops of wheat and rye, and Europe is not likely to take our breadstuffs unless protes are low. The undertone is stronger for our than for wheat, and there are guile anumber of enthusiastie bulls who are con-fuent that prices are going much higher or going of wheat and there are guile and that prices are going much higher row of the screeptionally big crop of has proved the stronger of the stronger of the exceptionally big crop of the sear. It was planted from two to three would create a scare that would put prices proports and are likely to go higher. Pro-vent it are crop, but it will a best fail greatly short of the exceptionally big crop of has proports and are likely to go higher. Pro-vent it mes and they have been helped in the proports and are likely to go higher. Pro-vent it mes and they have been helped in the coustion of rains, the food gates of heaven reopened during the past week and the earth was again soaked with water. It be down the soil about the newly plowed stubbles, but did no harm to plant cause, the barter. The bulk of that out, how ever manal percentage of the rice crop so only a small percentage of the rice crop and the series in suce done no great the rice is mall become a serious matter." The packing or peaches in Bultimore has been seem to grow less every day instead of increasing. Not more than two or three of increasing. Not more than two or three
