NUGGETS OF NEWS FROM THREE STATES

(SPECIAL TELEGRAN TO THE DISPATCE.) WILLIAMS GROVE, PA., Aug. 29.-The initial day of the Williams Grove Inter-State picnic presages the usual success of this popular gathering of the grangers. A large quantity of machinery is in position on the ground, but the area covered is not as great as before the action of the manufacturers of harvesters and binders in deciding not to exhibit their productions at exhibitions of this character. The varieties of agricultural implements displayed are, however, greater than at any time since the picnics of the Pennsylvania State Grange were started, nearly 20 years ago.

The live stock display is the finest in the history of the organization. Among the exhibitors are Messrs. Lord and Aiken, of New York, who have each two carioads of blooded horses on exhibition. W. M. Benninger, of Northampton county, has a large number of fine Holstein cattle in the grove, and the Walter Brothers, of Chester, have contributed several carloads of Jersey cattle and other live stock to the exhibition, Ample preparations have been made for the accommodation of the large crowds expected during the week in the event of avorable atmospheric conditions.

The most notable thing of the opening

day of the exhibition was a speech by Mas-ter Rhone, who announced that while the grangers of Pennsylvania were desirous of maintaining cordial relations with manufacturers, they should insist on arbitration as to the fixing of prices of agricultural products and agricultural implements. When wheat was selling at 75 cents a bushel, the average price now received, binders which command \$130 apiece should be reduced in price to \$75, representing the relation which the price of the grain sustained to that of the machinery mentioned at the close of the War of the Rebellion. In the event of the refusal of the manufacturers of binders and other agricultural machinery to arbitrate, as suggested, a lock-out of a year, if necessary, was urged as a means to accomplish the desired reduction. Master Rhone expressed dissatisfaction with the alleged high rates of interest

charged by banks for the loan of money to farmers, and suggested an arrangement by which banks could not exact more than the percentage of profit made by farmers off their products, which he placed at 2 per cent. He favored the repeal of the national tax on banks of issue and the establishment of mortgage banks by the Pennsylvania Legislature and the furnishing by the State of the necessary currency (in imitation of the national Government) to the value of 90 per cent of the mortgages.

The State Grange was represented to be in a Sourishing condition, and as gradually enlarging its membership. During the past year 150 new granges were organized, com prising, in the aggregate, between 6,000

A Letter That Partly Explains the Cause of a Murder and Suicida,

EAST PALESTINE, O., Aug. 29,-It is now clearly shown that the murder of Joshua Hoffmaster was premeditated, having been planned several days beforehand. They have been in the habit of dumping all refuse from cars into the river above the waterworks. The

result is that the people have been com-plaining about the bad water.

The railroad company was warned, but did not heed the warning, and only last Sunday, it is reported that they dumped a lot of refuse into the river. IN THE GORDON Two Wells Southwest of McDonald Barren in That Stratum.

BIG GASSER EAST OF OAKDALE.

Sistersville Runs Are Averaging Over 10-000 Barrels a Day.

NEW BERRA GRIT POOL MAY BE OPENED

There were few interesting developments in the oil fields yesterday. Two wells which had been showing for small producers in the Gordon sand on Saturday proved to be valueless in that stratum.

Sistersville is the point at which the great activity of a year ago has now beep oncentrated, although there is liable to be a sudden spurt at Undercliffe, three miles northeast of Sharpsburg, around Patterson & Sohn's Kessler farm producer. There are from 15 to 20 wells being drilled

on the Pinhook anti-clinal, east and south of Verona on the Allegheny Valley Railroad, for gas, and there is a string of test wells going down across the northwestern part of Allegheny county. Outside of these points there is very little new drilling being done.

An Ohio operator, Mr. Elves, who was in Pittsburg vesterday, stated that few strings of tools are running or rigs going up, except in the Woodville field, north of

In the McDonald field the big wells seemed to have taken a drop on the gange pole on Sunday. There are now only two wells reported as doing 20 barrels an hour. These are the Royal Gas Company's No. 1 Mark Robb, and Greenlee & Forst's No. 6 Marshall. The Forest Oil Company's No. 2 Gregg was reported at the offices of the company to be making only 15 barrels an hour, and the Sinclair Oil Company's Nos. 1 and 2 on the Kirk farm, in the Meise hollow, had fallen off to less than 20 an hour, and both were dropped from the list of big ones.

Notwithstanding these declines the esti-

mated production of the field is given as 18,000 barrels, but this is due to the fact that a number of the old wells which were down to 5 and 6 barrels an hour were shot and brought up to 15 and 18 barrels an hour.

The Campbell Well Declining.

The Forest Oil Company's No. 7, on the Mrs. Campbell farm, in the Meise Gordon sand pool, south of Willow Grove, which came in at 35 barrels an hour Saturday, was doing from 18 to 20 barrels an hour yesterday. It is declining much quicker than the other big wells which were struck in that The No. 5 on the Gladden farm, located

southwest of McDonald and belonging to Greenlee & Forst, was a failure in the Gordon sand and was in the fourth yesterday. They will drill it to the fifth. The Devonian Oil Company's No. 3 on the W. B. Moorhead farm in the same region was almost dry in the Gordon and is being put down to the lower sands. Greenlee & Forst's No. 2 on the Noble heirs' farm was cased Saturday. Their No. 7 on the Marshall farm, south of Noblestown, is down 600 teet and they intend to start No. 3 on the Kirk farm, located in the Main hellow this week.

Meise hollow, this week.

The Moore Oil Company's test well on
the Oak Ridge Coal Company's property,
located about half a mile east of Oakdale, which was dry in the Gordon sand, has struck a big vein of gas in the fourth sand. It was the intention of the owners to drill it down to the fifth, but now they are considering the advisability of stopping the drill and selling the gas to local consumers. The Forest Oil Company's well on the Devine farm, in the extreme northeastern

part of the McCurdy field, was reported last evening to be almost through the fourth Eighth—Inventions to be free to all; the inventors to be remunerated by the nation.

Ninth—Progressive income tax and tax on inheritances; the smaller incomes to be

Big Runs From Sistersville, SISTERSVILLE-The pipe line runs from this field are surprising even the operators in it, and those who claim to be most familiar with the output of the wells.

There are many who have been crying down the field, and pressging that the bottom would soon fall out of it. They cannot get around the fact that the pipe lines are handling a large amount of Sistersville oil. The bears on the field based their judgment on the rank decline of the walls in the town the rapid decline of the wells in the town the rapid decline of the wells in the town which were pounded down in a bunch, and could scarcely be expected to hold out for any length of time.

For Friday, Saturday and Sunday the runs from the field aggregated 31,068 barrels, or an average of 10,366 barrels a day, which is more than half the production of McDonald, and from less than one-sixth the

number of wells. This is a remarkably big showing for a field in which none of the wells have made over 1,000 barrels a day, and which has been so recently developed.

Apple, Mercer, Patty & Co. expect to get into the sand this week at their No. 3 on the Ephram Wells farm, below the town, and they have the rigs up and will soon com-mence drilling at Nos. 4 and 5 on the same

Apple, Mercer & Elyea's No. 1 on the Michael farm, half a mile southeast of the Wells farm, may reach the sand this week. J. W. Shay & Co. had a rig, the rods, tubing and cable located on the Namer property, destroyed by fire Saturday even-ing. While they were cleaning out it made open flow and in a moment the rig was

There seems to be a possibility that a new Berea grit pool may be opened up near Corning, O. It is located 30 miles southeast of Lancaster, O., and about 50 miles due west of Marietta. There are now two pro-ducing wells drilled, in each of which an unusually amount of good sand was found. Mercer & Co., of Pittsburg, have started to drill a third well. The Zanesville Natural Gas and Fuel Company, in which A. J. Mercer is one of the heaviest stockholders, expects to com-plete a well this week on the Fink farm, in the Fairfield, O., county gas district. They have already put down several wells, each of which has had a pressure of 700 pounds and better to the square inch. They are preparing to pipe the gas to Zanesville, a distance of 36 miles.

The estimated production was 15,000; stock in the field, 50,000.
