SEVERE PRESSURE ON THE COALERS

NEW YORK, Aug. 29.-The bank statement Saturday, while having little or no effect at the time of issue, upon further study shows that the funds of the banks are being depleted at a rapid rate and borrowers are now looking for an almost certain advance in money rates in the fall. This condition was the moving influence in the stock market to-day with the usual result of extreme duliness in the general market and special activity accompanied by falling quotations in the few stocks in which the bears were encouraged to attack. Among these Louisville and Nashville, Reading, Missouri Pacific and Pacific Mail followed each other, but as a rule the losses were confined to fractional amounts, the last named being the only important exception. The bulls in St. Paul were encouraged by the apparent proximity of a dividend, which hope the statement for July greatly encouraged, and that stock offered a stubborn resistance to the depressing influences, actually showing a gain of % per cent at one time. Notwithstanding the severe pressure brought against Reading, the decided bull talk upon Lackawanna and Delaware and Hudson served to restrain the selling of the chief member of the coal group and the inconsiderable success met

group and the inconsiderable success met with led to abandonment of the effort after noon. The advance was the result of operations of the traders, and they, taking their cue from the weakness of Louisville and the industrials, ceased to buy and later sold freely when it became evident that liquidation by the cliques was in progress.

All the last hour the bears became more aggressive and tried not only Reading, but Louisville, Canada Southern, New England, Sugar and some specialities, all of which yielded materially, and the lowest prices of the day were made just before the close. The pressure upon Reading was severe in the afternoon and the transactions reached very large figures in comparison with the trading in the rest of the market, but Pacific Mail, which was subjected to a severe drive just after noon, scored the heaviest loss of the day.

The market closed fairly steady after a slight rully, but at or near the lowest prices.

The market closed lairly steady after a slight rally, but at or near the lowest prices. Railroad bonds were again very dull and in the main displayed a heavy tone, but the final changes of note are quite irregular, though losses exceeded the gains. The trading reached only \$861,000, with no activity in any portion of the list.

Government bonds were dull and steady. Close of the list:

# GRAIN IS STRONGER.

And Provisions Rule Firm Under the In finence of Higher-?riced Hogs. CHICAGO, Aug. 29.-Wheat had a strong opening to-day and made a considerable gain, but all the advance was not held. The strength was due to a number of bullish factors, including stronger cables, a partial recovery of the trade from the cholera panic and a general impression that the Vienna Congress report was likely to prove

a bullish one; but the principal strength Tas found in the news from the Northwest.

Reports from there showed that it had rained continuously for the past 24 hours and that farmers were apprehensive of great damage to the crop. It was also said that a cold wave was behind the rain storm and that a dangerously low temperature was probable. The inspection sheet also went far to confirm the reports of the poor quality of the wheat in the Northwest which have been so general of late, as out of 40 cars of new spring wheat only seven cars were up to the contract grade.

new spring wheat only seven cars were up to the contract grade.

There was good buying from the start, partly for the long account and partly to cover shorts, and as there was not much offered firmness was the general rule. Later on the large increase in the visible supply and some reason to believe that the early bullish news from the Vienna Congress was not well founded the market lost a good deal of what it had gained. The information, as originally circulated, purported to be a disoriginally circulated, purported to be a dis-patch from Vienna reporting the decrease in the world's wheat supply this year at 227, 900,000 bushels and the increase in the rye corp 200,000,000.
Corn was firmer on reports of cold weather in the Southwest and was also sympathetically affected by the strength in wheat.

There was no pressure to sell, and with a good demand from shorts and a fair amount of buying for the long account, the feeling was generally strong and prices averaged considerably higher.

Oats were quiet and firm, principally in sympathy with the strength in corn and wheat.

Oats were quiet and firm, principally in sympathy with the strength in corn and wheat.

Hog products were more active and higher; the liquidation was less pronounced and the buying was more liberal, while the strength in grain also helped to make a strong market for provisions, as did the comparatively light receipts and higher prices for hogs.

Cash quotations were as follows: Flour steady and unchanged. No. 2 spring wheat, 769,76%; No. 3 spring wheat, 676,690; No. 2 red, 769,76%; No. 2 corn, 51%; No. 3 white, 330, 350. AIRBRAKE AND CABLE STRONGEST.

Nothing on the List Shows Anything Like Positive Weakness.

COMPLETE VIENNA WHEAT ESTIMATE

MONDAY, Aug. 29. Neither activity nor dullness characterized the market for local securities to-day, and it was neither active nor strong. It was a sort of a neutral market-some of the brokers and traders moving cautiously as if it was full of weak points, and the others moving with equal caution as if it was full of strong ones. So far as noteworthy changes were concerned, however, gains were in a majority, but they were very few, being confined to Airbrake and Underground Cable. Pleasant Valley railwav, Switch and Signal, Central Traction and People's Pipeage continued to show weakness, but they underwent little change from last week's closing prices. All the others were about steady. News and gossip commanded a premium.

Regarding Switch and signal a little apprehension was expressed in some quarters that the suit of the company against the Johnson hension was expressed in some quarters that the suit of the company against the Johnson Company, testimony in which is being taken in London, would terminate unfavorably, while others were confident the home company would win. It will be remembered that Judee Acheson decided against the Union Switch and Signal Company, when the case came up in the East some time since, but gave the company permission to amend its papers. The case is simply this: The Union Switch and Signal Company bought the patents under which it is operating from the owner, an Englishman, through an agent. Subsequently Mr. Johnson, who, at the time of the purchase, was in the employ of the Union Switch and Signal Company, and who presumably saw a flaw in the transaction, purchased the patents outright from the owner direct, and organized the Johnson Company. When sult was brought by the Union Switch and Signal Company against the Johnson Company for infringement, it was not, and is not now, defended that the Union Switch and Signal Company against the Johnson Company did not purchase the patents and pay for them, but the defense was, and is, that the agent who first sold the patents had no authorized to sell them outright; that he was authorized to sell them only for a royalty. According to these facts and the decision of Judge Acheson, the Johnson Company appears to have the legal standing of the case and the home company the equities. It is claimed for the latter that its papers were defective when Judge Acheson's decision was rendered, and that since they were amended its position has been impregnable. Anyway, the attorners of the company, it is said, are quite confident of winning.

The firmness of Philadelphia Company under rather liberal offerings was one of the features. It looks as if something of an effort was being made to get it down, but it appears to be pretty firmly fixed at 23 with a promise of being higher. Its improved condition has made it many new friends, and so far as the supply of gas is concerned it is getting into a st Company, testimony in which is being taken

company expectations are more than being realized.

Opinions regarding an increase in the company's dividend rate in October are divided. Some say the company should not increase the rate until a handsome surplus has been built up. Others say that at the present rate of earnings the company is able to increase the rate from 4 to 6 per cent per annum and still have a good round sum to add to surplus. There are probably just as good, if not better, arguments in favor of an increase as against it. The stockholders deserve and should receive all they can get in the way of dividen is consistent with consorvative financial management.

There was a little goostip current on Underground Cable, but there was nothing particularly fresh in it. Airbrake was also talked of in the old gossipy way of big earnings, monopoly, etc. Cable, it was said, was booked for 90 and Airbrake for 150.

Pleasant Valley showed a tendency to droop to a parity with P. A. & M. Trace. Pleasant Valley showed a tendency to droop to a parity with P. A. & M. Traction. It will undoubtedly soon be traded for P., A. & M., and it should not be any higher than the stock it is to be surrendered for. Considering the probable stock dividend on P. V. and the manner of trading, its parity with P. A. & M., which is at 44 bid, is 52.

There was no trading on the local floor in Westinghouse Electric second preferred. There were sales in Boston just be ore the close at 37% and 37%.

Others were unchanged and featureless.

The Complete Vienna Estimate.

The Complete Vienna Estimate. [BY CABLE TO THE DISPATCH.] LONDON, Aug. 20.—[Coppright.]—The Hungarian Minister of Agriculture published at Budapesth, Saturday, his estimate of the world's crops, surpluses and requirements, and, according to his figures, Europe will require to import something over 170,000,000 bushels of wheat this crop year from North America, India and Australia and other exporting countries. These estimates are at porting countries. These estimates are at variance with those published to-day at the international grain market at Vienna. For example, the Hungarian estimate for Russian wheat is for a larger crop than last year, while the Vienna estimate gives a

lower percentage than last year. Through the courtesy of Messrs, Walter Delmar & Co. we are enabled to give the complete Vienna estimate for wheat in percentages; Austria, 110; Hungary, 102; Prussia, spring 86, winter 103; Saxony, spring 107, winter 114; Upper and Lower Bavaria, 125; Bavaria and Hesse Palitinate, spring 100, winter 120; Baden, 100; Wurtemberg, spring 98, winter 99; Mecklinberg, 110; Denmark, 103; Norway and Sweden, 165; Italy, 75; Switzerland, 117; Holland, 100; Belgium, 102; France, 94; Great Britain and Ireland, 91; Servia, 105; 94; Great Britain and Ireland, 91; Servia, 100; Egypt, 80; Roumania, 130; Russia—Podolia, 75; Bessarilia, 25; Central, 62; Northern, 80; Cherson and Ekaterina, 80; Courland and Livonia, 100; Poland, 100. To provide for changes in the line, particularly in the neighborhood of Youngstown, O., and making important improvements, the Pitsburg and Western proposes to issue the remaining \$1,500,000 of bonds authorized under the second mortgage of 1891. It will be necessary in order to issue these bonds to increase the capital stock an equal amount, and a meeting of the stockholders to take action in the matter has been called for October 14.

The september divident list at Boston looks rather lean by comparison with that of March last, the total being \$4,810,404, arainst \$6,850,759 then. A year ago they were also considerably larger, \$8,760,540. This shows a net failing off in dividends of over 20 per cent in the Boston list.

The London Statist in its current issue references its opinion that a material further fall in silver is at hand.

The decline in Western Uniod puzzles the bulls on that stock exceedingly. They banked upon the advance continuing to 105 at least, and its failure to do so has discouraged if not disgusted them over much. We hardly think this is the time to throw over long holdings of Western Union, as there is something good in store for the patient holder—unless Mr. Gould is inclined "to bite off his nose to spire his face."

The Boston Commercial Bulletin says that on Tuesday a well defined deal was made between prominent Boston gentlemen and "Deacon" White to considerably advance Westinghou

#### MONETARY.

As a rule local conditions are without a shadow of change. Money is abundant and easy at 5@6 per cent, the demand is only fair, and Eastern exchange and currency are trading even. There is plenty of evi-dence tending to show that operations in all lines of business will be materially extended during the coming month, and in all prob-ability a more active market will prevail, ability a more active market will prevail, Some talk is heard of hardening rates East and West, but none of the authorities are apprehensive of tight money this fall.

A BIG SALE PROBABLE. Large Tract of Land on Pertysville Ave.

nue Likely to Change Owners Before Long-A Number of Prominent People After It-Building Permits and Sales. The Watson property, located near the terminus of the electric line on Perrysville avenue, Allegheny, a tract comprising about 150 acres, will, it is said, be sold in October next. The owners have not definitely decided as yet whether they will sell or clear up the incumbrances and hold the property, but in all probability it will be sold. There is a plan of lots laid off on a portion of the tract fronting on Perrysville avenue, and as realty in this locality has enhanced in which contains the con anced in value greatly within a year or so,

hanced in value greatly within a year or so, the proceeds of a sale would foot away up in the thousands of dollars.

Two gentlemen constituting a firm of very prominent drygoods merchants and a cashler of one of Allegheny's national banks are said to be negotiating for the purchase of the property at the prent time, but so many compilications are in the way that a private sale is hardly probable. If, however, a public sale occurs these gentlemen will undoubtedly be the highest bidders. The reasons for the apparent anxiety of the three gentlemen mentioned to purchase the tract and the disposition to be made of it should they become the owners are not

nown. It is also intimated that the rural section of the large plot, which comprises the greater portion of the land, might be purchased by Allegheny City for park purposes. The place would certainly make a beautiful spot with little improvement, as the natural scenery in some places is really grand, and a magnificent park would be the result of comparatively little labor and cost.

A Through Run for One Fare. An inconvenience that has been causing dissatisfaction to property owners and residents beyond the second toll house on Perrysville avenue, Allegheny, has been remedied, as from to-day on through cars will be run by the Pleasant Valley Company from Sixth avenue to the terminuz of the road. Heretofore a change of cars was necessary at Charles street for persons going beyond that point and two fares charged. Now that a through run is made and a single fare charged, property along the line will undoubtedly look up a little. Bullding Permits.

CREAMERY BUTTER BUOYANT.

sales on the Eigin Board at 25c-Grain Weak and Flour on the Verge of a Decline-Corn Syraps Advanced in This Market-Eggs Higher and Potatoes

MONDAY, Aug. 29. Sales of creamery butter were made on the Elgin Board to-day at 25c and the market was quoted very strong at the price named. This will not cause much of an advance here, if any, but the advices regarding the situation indicate that prices will be higher. Consumption is running neck and neck with production, and as long as such a condition prevails a buoyant mar-ket may be looked for.

Grain is tending downward, wheat, corn and oats being lower. Millers will not pay more than 76c for new No. 2 red wheat, and more than 76c for new No. 2 red wheat, and they refuse to pay much, if any, more for old No. 2. They are pretty well stocked up. Flour is weaker, and an early decline in quotations is probable.

Posttoes are doing better. Stocks have been pretty well reduced, receipts are comparatively light and the demand is improving as the season advances.

Grapes are coming in freely, but the demand is light and prices are lower. The crop promises to be an unusually large one.

Apples promise to be much nigher. The Canadian crop will be short and foreign crops are failures.
