Cholera the Marplot of Otherwise Encouraging Conditions

IN THE TRADE OF THE PAST WEEK.

A Brief Review of all the Principal Industries and Markets.

THE FAILURES AND RAILWAY NEWS

New York, Sept. 2.—R. G. Dun & Co.'s weekly trade review says: The industries were improving daily and prospects were brighter than ever, when the sudden alarm about cholera came to cause some hesitation. It is even said that the buyers from the South who had started for this city turned back because they were afraid of infection by quarantine here.

There is reason for the utmost precaution against importation of the disease, which national and city authorities are taking with creditable energy; but there is yet no ground for supposing that the pestilence will obtain a foothold here this season. In all other respects, business prospects are clearly better than a year ago, and nearly all accounts show actual increase in business.

Crop prospects are better, money is in greater demand but in ample supply everywhere and industries are producing more than ever before. Fear that exports may be curtailed by the pestilence in Europe has depressed the markets.

Wheat has dropped to 75¢ cents, the lowest point since 1883, and recovered only to a fall of 2¢ cents for the week. Corn has dropped 4¢ cents for the week, and is now at 30¢ cents. Cotton has advanced 1¢ cent, and is now at 12¢ cents. Sugar has advanced 1¢ cent, and is now at 12¢ cents. Rice has advanced 1¢ cent, and is now at 12¢ cents.

The Result of a Season's Condition. The greater part of these changes came from the unusual condition of the markets, for some time held up in spite of extraordinary stock and commodity prices. Exports in four days were 4,382,285 bushels, receipts only 153,413. Stocks of wheat on hand in this country equal two months' consumption and in Europe three months.

Manufacturers in this country have never been in better condition, on the whole, than that which reports all over the world. The textile branches are producing more and consuming more material than ever, and the demand has proceeded closely on the supply. Most woolen mills are running night and day to meet the demand. Cotton mills are crowded, while stocks of goods in sight are plentiful.

The iron and steel industries resume full production, though some mills are yet delayed by repairs. Demand for pig iron is very good, while mills are pushed for bar, sheets, and structural iron.

It is enough to say that the lumber manufacturers that sales at the three chief markets show the demand for lumber is 30,433,000 pounds of wood, against 28,000,000 last year, an increase of 23 per cent. Bow and shoe shipments are 10 per cent. per cent, and cattle receipts at the Western markets show an increase of 22 per cent for the week and 18 per cent for the year thus far.

The State of Trade in the Cities. At Pittsburgh the demand for finished iron is better and prices somewhat stronger. At Cleveland trade is good in roller products, machinery, hardware and groceries, and at Cincinnati trade is good in roller products, machinery, hardware and groceries, and at Cincinnati trade is good in roller products, machinery, hardware and groceries.

At Indianapolis the car movement is unprecedented and at Detroit business is fair and money in better demand. Better demand for money in better demand. Better demand for money in better demand.

At Milwaukee. Trade increases at St. Paul, Minneapolis with fine crop prospects, and lumber is very active with good prospects. At Omaha: satisfactory with heavy receipts of cattle and grain. At Kansas City, and strong at St. Louis, a general trade in all directions. At St. Louis, a general trade in all directions.

Business failures throughout the country during the past week are 237, representing 14 in the United States and 20 in Canada.

Broader's report says: Reports of timidity of buyers owing to the cholera "scare" have yet been received from the interior. At the West some effect is rumored with respect to fruit and vegetable trade, and importers of millinery, fancy goods, notions, dry goods and other German products expect delay and fungation of merchandise as this port, which points to higher prices, due to checked or damaged importations. There is some advance reported in prices of drugs. Threatened restriction of cotton and coal has depressed the market.

As indicated last week sugar is up 15¢ on raw and 10¢ on refined with some demand. Restricted German supplies of best sugar continue to arrive in small quantities. Shipments of staple dry goods, clothing, notions, millinery and hardware are going into the West. San Francisco imports of sugar, notions, millinery and hardware are going into the West. San Francisco imports of sugar, notions, millinery and hardware are going into the West.

Exports of wheat, including flour if wheat, from United States ports, for the week ending August 31, 1892, were 4,382,285 bushels, as compared with 3,541,509 bushels in the last week of August, 1891, with 1,576,000 bushels in 1890, with 2,292,000 bushels in 1889, and with 2,331,000 bushels in that week of 1888. Montreal exported 29,775 bushels of wheat and 2,200 bushels of flour.

The Woolen and Cotton Markets. Wool prices have touched bottom, dealers refusing concessions and manufacturers having secured ample stocks. Carpet wools are strengthened by cholera reports. Sales of cloths continue to exceed the output, but the first surplus since June 1 was reported last week. Men's wear wools are being ordered freely.

The principal factor in this week's stock speculation has been a disorganizing one. Apprehensions in regard to the cholera have dominated the situation. The tangible influence of infection to the country's export trade, with an accompanying derangement of foreign exchange, promises to have more effective than any hope will be the remote danger of the visitation of the epidemic. The nervous feelings induced by the state of affairs began to display themselves early in the week. Liquidation, especially in the manipulated specialties which have been leading the advance of prices, began to appear on Wednesday and Tuesday in which on Thursday almost attained the parity of a normal market. Foreign exchange suffered all around the list, although as might have been expected, the principal declines were in securities in which speculative activity and strength had created an excessive premium to their intrinsic value.

Other Influences Depress Wall Street. Apart from the influence in question it might be claimed that another very important element comes to enter with increasing force into the speculation. Whether the hardening of money rates and the prospect of a high and closer loan market during the autumn months would of itself have checked the manipulation and support which has kept speculation upon a bullish basis is an open question. Such a check, however, has been prevalent.

The steady decrease of the bank reserve, the outflow of money to the West, the indication of a low rate that have been current and above all the general tendency to scrutinize collateral for loans and to reject an undue proportion of values

SCROFULOUS HUMOR

Instant Relief, Sweet Sleep, Speedy, Restorative and Permanent Cure by Cuticura Remedies.

When about seven years old, my son was afflicted with a skin disease which was very distressing. The first appearance was little pimples around the neck, which gradually spread over the face and neck. The entire body, except head, was covered. He almost lost the use of his limbs, and was so light I could carry him about like an infant. Used all remedies I could find recommended in medical works for itching without benefit. Applied to different physicians, receiving temporary relief, but the disease was sure to return. I went for your pamphlet, read it, purchased a set of CUTICURA REMEDIES, and I am glad to say that I refer to see him sleep sweetly without any inclination to scratch. Less than two boxes of CUTICURA, one cake CUTICURA SOAP, and one bottle of CUTICURA RESOLVENT, performed a cure, with no return. It is now a strong, healthy boy of thirteen. We consider it a remarkable cure, as he had inherited scrofulous humor.

Mrs. H. E. BOWEN, East Otto, N. Y.

Cuticura Resolvent. The new Blood and Skin Purifier, internally to cleanse the blood of all impurities and poisonous elements, and Cuticura Soap, externally to cleanse the skin and scalp, and restore the hair, instantly relieve and speedily cure every species of itching, scrofulous, crusty, pimply, scrofulous, and hereditary diseases and humors of the skin, scalp and hair, from infancy to old age, from pimples to scrofula.
