I do not want any of my readers to buy ocks on the strength of this assurance, but whatever they hold as investments they ould, in my opinion, be very foolish to sell nearly because of the cholera. I have lived gh two of the most severe visitation is country has had of the scourge, and the present one is no worse than they ere, as it is not likely to be, the injury it all do will be very slight. The most serious Is no win be very signt. The most serious as will be that arising from the hampering foreign commerce by the enforcement of mrantime regulations and a failing off in a movement of passengers and goods at one, as well as abroad, caused by fear. multiration from Europe has already been opped, to the greating of the steamship pass ongaged in promoting it.

What I am particularly interested in withing is the effect the epidemic is going a have upon the Government finances. It hall his energy in staving off claims, e Secretary of the Treasury has paid out what the first two months of the cur-nut fiscal year a little more than he has kees in, and if the cholera, by diminishing it imparts of foreign goods, shall diminish customs receipts, the excess of expendi-te over income must go on increasing, esover income must go on increasing, et when the accounts hitherto de yed imperatively flemand liquidation.

Bound to Have a Bad Eff et.

The Secretary asserts that in case of emer gency in has the right of drawing upon the \$100,000,000 gold fund supposed to be reserved for the protection of greenbacks, but an ex-ercise of this right would produce an un

ercise of this right would produce an un-pleasant impression, to say the least, if it did not cause a run upon the Treasury gold. This leads me to remark, by the way, that my optimion of the redundancy of our paper currency is every day more and more con-firmed by facts. Here, at the beginning of Scotember, long after the harvesting of the groups, and in the face of a probable diminu-tion of imports of foreign goods, we are exporting gold in very considerable amounts without causing any financial stringency. This moves that the place of the gold shipped has been filled by paper, especially by the buillon more issued under the act of July, 1890 (of which \$10,000,000 are already out, and \$4,006. the sile of 000 are already out, and \$4000, more are coming every month. How ch better the West is supplied with cur-cy than it was is proved by the fact that syear, up to date, it has drawn from the year, up to date, it has drawn from the for the moving of the crops only \$7,000, senall bills, against \$14,300,600 for the esponding period of last year.
