dered by the settlement of the difficulties between the Reading and its employes and the sharp and general upward movement in the list sufficiently demonstrated the character of the greater portion of the selling of the last few days. There was a halt also in the decline in Western Union, accompanied by some recovery in its price, and while the stock failed to properly respond to the appouncement of the increase in the capital, the buying was good and its net gain of moment. The bears, however, while submitting to the setback which they affect to believe is only temporary, did not change their ground in the least, still laying stress upon the prospects of dearer money with a continuation of gold shipments and the other uniavorable factors in the situation. That they did not lack the courage of their convictions was shown by a sharp drive at Northern Pacific preferred and the 5 per cent bonds which depressed the stock

nearly 2 per cent.

The general list was still narrow and in the main featureless, though displaying a firm temper almost throughout the day, which was aided in some degree by the strength shown in the industrials, among which Distiflers was conspicuous by a large business and a rise of nearly 2 per cent. The grangers still presented a stubborn front to the pressure brought to bear, but there was less animation in them, and as a rule small fluctuations.

The improvement in the morning was led by Reading and the opening in that stock

was marked by heavy trading and some excitement, the stock selling at from 55 to 1551, on different sides of the crowd. The animation soon subsided, however, and the stock made but little further progress, though the list after the opening advances,

though the list after the opening advances, which extended to I per cent, made further slight gains when the upward movement was checked and no further advance was made during the day except slight tractions here and there and a sharp rise in Distiliers which reached nearly 2 per cent.

The drive at Northern Pacific preferred weakened the rest of the list to some extent, but there was no concession of note until the last hour, when it became known that the cholera had at last actually obtained a foothold in the city, and there was a mad rush to get out of everything. Prices a mad rush to get out of everything. Prices broke badly under the pressure, while the market became extremely active, the trans-actions in the last 45 minutes exceeding those of any other hour of the day. There was evidence of an effort to cover, and some stocks did rally slightly, but as a rule the last prices of the day were the lowest, and the market closed active, feverish and ex-cited at the decline.

cited at the decline.

The final changes were generally small losses, but Northern Pacific, preferred, is down 235. Lead 135. Sugar 135, and Rock Island, Alssouri Pacific, New England and Electric each I per cent.

Enthroad bonds were stimulated by the attimation in stocks somewhat, but there was still little animation or feature of note in the market, and jou sales of \$1,211,000 the changes are as insignificant as usual. Texas Pacific seconds displayed some strength, but the Northern Pacific 5s were weak in connection with the drive at the stock and connection with the drive at the stock and fell away I per cent.

Corn Seesaws Rapidly, Closing Weak, and

Everything Else Sympathizes, CHICAGO, Sept. 14,-For fickleness and excitement the corn pit to-day took the palm. Instead of a big advance the cereal, comparcel with last night's prices, shows a loss of 5c. Wheat is from 16th 1ch higher; oats are off from 16th 1c. Provisions closed at declines of about 56 5c. The news of cholers in New York City came after exchange hours and must be reckoned with to-mor-

ow.

It was, first of all to-day, a question of yest or no frost. Then it was a quesfrost of he frost. Then it was a question of frost or he frost. Then it was a question of damage or no damage to the crop. The trade expected damage from frosts in many sections of the corn belt. They bought corn heavily on the predictions yesterday. The weather map this morning did not show extremely low temperatures, and a few private dispatches

In oats there were numerous periods of by the longs to sell and the increased offerings finally created weakness.

There was a light trade in provisions, and prices, after fair action early, kept in very narrow limits. The feature of the early market was weakness caused by the very heavy hog movement. From this there was a very good recovery, entirely in sympathy with the excited and higher corn market on frost predictions. When corn weakned late in the day products weakened again.

Freights were steady with a lair demand for vessels at 2½c for wheat; sold 2½c for corn to Buffalo.

PHILLIE'S DIVIDEND UNCHANGED. Luster's Capital Stock Will Be Increased Before Long.

AIRBRAKE CONTINUES TO ADVANCE

WEDNESDAY, Sept. 14. Cholera news depressed the New York stock market to-day. The market opened strong as the result of the settlement of the troubles between the Reading Railroad and its employes, and ruled strong on buying by London and the shorts until about 2 P. M., when demoralization set in consequence of the announcement by the Board of Health that there had been several deaths from Asiatic cholers in the city during the preceding 24 hours. Under this influence nearly everything broke more or less and the close was at the lowest. The news did not reach Pittsburg before the close of the local board, and it remains to be seen what effect it will have here. It cannot well help being depressing, and it is possible that previous calculations regarding the im-mediate future of the market will have to be

Phillie's Dividend. The directors of the Philadelphia Company met in regular session at 4 o'clock this afternoon and declared the regular quarafternoon and declared the regular quarterly dividend of 1 per cent, payable October 1. Transier books will be closed September 20 and reopened October 2. A statement of the earnings of the company for the quarter, as well as a few figures showing its financial condition, will accompany the checks for the dividend, and it is believed these will show that the reports regarding the ability of the company to pay a nigher rate were well founded. It is understood that some of the directors were in favor of an increase, but were finally won over to the side of the advocates of the old rate. After the meeting Treasurer Caldwell stated that the members of the board were unanimously of the Treasurer Caldwell stated that the members of the board were ananimously of the opinion that the dividend rate ought not to be increased at present. It is stated semi-officially that the earnings for the quarter will compare favorably with those of any similar period since the organization of the company. That an excellent statement will be made is certain.

Luster Mining Company. The Board of Directors of the Luster Mining Company held a regular meeting this afternoon, but no action was taken on the matter of calling a special meeting of the stockholders to vote on a proposition to in-crease the capital stock of the company. crease the capital stock of the company. It is officially stated, however, that the meeting will be called before long. On this subject Score-tary Miller talked to The Disparon as follows: "There has been more or less talk about an increase for some time past, and it will probably uitimately be made, but the directors are evidently in no hurry about it, as the matter did not even come up for consideration at this afternoon's meeting. The plant represents ten times as much as the capital invested, and would sell any day for several times as much."

Westinghouse Electric. According to the Boston News Bureau a Boston gentleman, who has just made a thorough investigation of the Westinghouse Electric Company with Mr. George Westing-hoose, Jr., says it is about time to state facts hoose, Jr., says it is about time to state facts regarding the enormous business the company is doing. He says its business is upon a cash basis; its percentage of net earnings greater than any company doing a like business; that its goods have the preference over all others, and that prospects are that it will double its present business inside of six months. The company has perfected new inventions which it will put upon the market shortly. The gentleman further says that it is out of the power of competing companies to force a consolidation, as those in control of the stock to-day would not sell out at double present figures. This same gentleman says that if his statements are doubted he stands ready to take a committee composed of the financial editors of the Boston dailies to the works of the Westinghouse Company and allow it to publish the result of its observations and investigations.

Course of the Local List, Trading on 'Change to-day was rather owever, though Westinghouse Airbrake, at 1394@145, was the only stock in which a noteworthy gain was established. The shares traded in were La Noria Mining Company, Duquesne traction, P. A. & M. traction, Westinghouse Electric second preferred and Philadelphia Company. W. I. Mustin arrived home from his Western trip this morning, as The Disparch said he would, and received a hearty welcome when he put in an appearance on Change at the last call. He signalized his appearance by bidding Westinghouse Electric massisted up to 21. In talking of his trif Mr. Mustin said Scattle was located right in the center of the richest country on earth, but that money was badly needed to develop it. "A lender can get 10 and 12 per cent in Scattle with gilt-edged collateral security," said he, "and any one can take a few thousand dollars there and make a comfortable living lending money."

dollars there and make a comfortable living lending money."

The Philadelphia Stockholder says that at the meeting of the Western Union's Executive Committee "it was decided to increase the capital stock to an even \$100,000,000, but the terms upon which it is proposed to put out this eleven or twelve millions of new stock were not made known. They will be withheld, doubtless for some time yet for the purpose of making them available for service in the stock market. Already there are in this connection intimations that the stock will be put out on privileges decidedly favorable to the present here."

FIVE THOUSAND AN ACRE

For a Ten-Acre Tract in the Eighteenth Ward-it Will Be Subdivided Into Large Lots-The Avondate Place Plan Nearly Closed Out.

WEDNESDAY, Sept. 14. Another large sale of East End acreage has been consummated, Skivington, Pedder & Co. selling for Joseph Loughrey to a prominent East End capitalist a tract in the Eighteenth ward, comprising about ten acres, for a price approximating \$50,000. The property will be subdivided into large building lots, fronting on Morningside avenue, Jancey and Chislett streets, and will be placed on the market in a few days. It is predicted by those who are in a position to know that a short time will develop an active demand and higher prices for property in this vicinity. Messrs, Skivington, Pedder & Co. report the prospects as very favorable for the closing of three other deals in the East End and other suburban acreage tracts, aggregating \$90,000. Residence Properties in Demand,

Mr. Edwin Powell sold six more lots in the Avondale Place plan, East End, fronting on Homer street and Avondale Place, for \$70 per foot front. This sale almost closes this plan, as but few more lots remain to be sold, and Mr. Powell claims that within 30 days and Air. Powell claims that within 30 days the last lot of the few remaining will have been sold. On almost all of the lots sold a dwelling has either been erected or one is in course of construction, showing the wonderful amount of building that has occurred in these tew months. Many fine dwellings are being erected in and about Avondale Place, and the many heretofore vacant spots in various portions of the East End are being improved in a like manner.

A Good Sale on South Avenue.

MERCANTILE TRADE GOOD.

Hand-to-Mouth Policy Discontinued and Buyers Are Beginning to Lay in Good Stock-Staples Gradually Drifting Upward-Collections Easy.

WEDNESDAY, Sept. 14. Trade reports to-day noted a fair volume of business in progress, with orders steadily growing in number and importance. The hand-to-mouth policy which prevailed last month has been discontinued, and as the drift of prices of most staples is upward, a disposition is shown by city retailers and all others dependent upon this center for supplies to lay in good stocks. The Exposupplies to lay in good stocks. The Exposition is helping business somewhat, the improvement in the iron and steel and allied trades is a stimulating factor, collections are easy and the prevalent tone is one of cheerfulness and confidence. The possibility of a prolonge d visitation of cholera is about the only cloud on the business sky, and even this is practically growing smaller. According to the percentages furnished by the Government the crops of the United States may be estimated at 450,000,005 bushels of wheat, 1,650,000,00 bushels of conts, 30,000,000 bushels of rye and 48,000,000 bushels of barley.

The available supply of breadstuffs in Europe, affoat, and in the United States and Canada on September I was equal to about

rope, afloat, and in the United States and Canada on September I was equal to about 15,737,000 bushels, against 122,983,000 bushels on August I, and 112,472,000 bushels on September I, 1891.

Recent crop report conclusions: General condition favorable. No killing frost yet. No corn matured to amount to anything. Spring wheat harvested. Disappointing crop. Winter wheat plowing weil along. Seeding promises to be seasonable. Recent rains very timely.

The senson for watermelons is over. Receivers that it difficult to sell those on handand they advise that no further shipments be made.

be made.

Hay products are droopy. As usual at this season of the year, the demand is falling off.

Breadstuffs continue barely steady, but good authorities are looking for higher prices.
