HEAVY LIQUIDATION,

Coupled With Bear Operations, Continue to Depress Prices.

SUGAR LEADS IN THE SELLING.

And Heavy Pressure is Frought to Bear Against Reading.

NIPPER AND MANHATTAN PROMINENT

NEW YORK, Sept. 16.-The stock market to-day was still subject to heavy liquidation, which was supplemented here and there by the efforts of the bears. There was no material decline in the general list. The execution of stop orders for the last two days has been the principal source of weakness in the market, and it is hoped that they are now pretty well cleaned up. The professional element, however, is still enlisted on the bear side, principally because of the unfavorable nature of the surface conditions, including the cholers, continued selling for foreign account, the probability of further gold exports, as well as dearer money, and also because of the apathy of the investment public. To-day npathy of the investment public. To-day the liquidation in Sugar was continued during the forencon and the apparent artifude of the manipulators of this stock gave much encouragement to the short sellers in the railroad list, but only Reading was the subject of any particular pressure.

At the opening there was a rather urgent demand for the shorts, which was stimulated by higher figures from London and buying orders by the foreign houses in several of their favorites. With the exception of some weakness in Northern Pacific preferred and some wide and rapid fluctuations in Manisattan, there was little of interest in the market and it began to take its old appearance of dullness and stagnation, which even the raid on Reading failed to check. The cholera news was, on the whole, rather encouraging and late in the day the shorts again covered freely.

The market closed quiet but firm to strong, with most stocks at the best prices of the day and with all at better figures than yesterday.

FROST IN CORNFIELDS More Influential Than Wild-Eyed Reports

About Cholera. CHICAGO, Sept. 16 .- Cornfields spotted with frost proved more influential to-day than wild-eyed reports about cholers. Yesterday's drop in wheat was practically recovered, the price of December showing a gain over the closing price of the day before of %c. Corn also made a slight gain in price, being worth 3/c per bushel more than it was M hours ago. Pork advanced 20c, lard from

5 to 10c, and ribs from 5 to 73c. Outside b to loc, and rios from 5 to 75c. Outside orders are still smail.

Wheat opened stronger, mainly on the resovery of the trade from the depression caused yesterday by cholera canards. A good deal of the wheat thrown overboard was then bought back. Later in the day the market rave way to a limited extent on report that cholera had made its appearance in Philadelphia and the rumored failure of a lank in London, but a reaction set in and a fairly strong feeling provided. During the last ten minutes there was quite a bulge on some good buying by Counselman and Bloom and covering by those who had waited for a break to 75c, which did not come. waited for a break to 75c, which did not come.

Corn started strong at about %c advance from the closing figures Thursday, a natural 228,000 bushels. Shipments—Wheat, 228,000 bushels, corn, 80,000 bushels.

reaction from the undue selling pressure late yesterday. The trade also felt a little more bullish over the private advices from the corn belt. The weather map showed no frost last night except in the Dakotas. The later signal report from Washington indicated cooler weather and possible frost tomorrow miorning in northern portions of Ohio, Indiana and Illinois, but warmer weather for Iowa, Nebraska and Minnesota. The latest Prime bulletin said the past 14 days set corn back instead of maturing it, that the country is overrem with weeds and much of the corn will be in danger as late as October 1. This class of news added to the firmer feeling, and further advanced prices. The receipts of 300 cars and the estimate of 400 cars for Saturday checked the advance. The oats market was quiet and steady to firm within a narrow range.

The provision market extract firmer and higher and the advance was well maintained during the session.

Continued Strength. LCCAL AND GENERAL FINANCIAL NEWS

FRIDAY, Sept. 16. There were more weak than strong points in the local stock market to-day, but the changes in most instances were lacking in significance and the market as a whole showed no positive or decided tendency. No pressure of consequence was brought to bear against the leaders of the list, but there was very little support offered and many prices naturally responded to the feeling of uneasiness and uncertainty prevalent whenever attempts were made to execute selling orders. The market at present is influenced by the shadow of the cholern scare and its course in the future will be regulated more or less by the course of the scourze. The stocks that continue to advance, however, are evidently proof against shadows and fears. Nothing can shake them excepting the substance of calamity.

The Westinghouse Electric Company, says the Eoston News Purcau, has just finished a 760-horse power motor for the Brooklyn Railway Company. The cost was about \$4,200, and the price received \$15,000. This net profit was possible because of the mechanical knowledge of Mr. Westinghouse. If a second experiment had been necessary it is calculated that its cost would have been \$9,000, and on a third nearly the amount received.

The Bank of England has not in 12 years been in so strong a position as it is to-day, when its reserve is over 50 per cent. The reserve has been growing steadily from week to week, and it has become more and more difficult to sustain outside rates.

Western Union rumors touching the new issue of stock have already started. One of these is that a resolution will be introduced at the annual meeting, October 12, to distribute \$1,00,000 stock free. A director of the company says it will take from four to six weeks to prepare the new stock and decide upon the terms of issue.

It is said to be an official statement that the Sugar Trust is earning over \$150,000 net per *!av. That would be at the rate of about \$47,000 000 per year, a sum calculated to excite the interest of both the shareholders and consumers.

A FEW DEALS OFF

For the Present Because of the Fear of Cholera Spreading - A Little Gossip, Many Building Permits and a Number

FRIDAY, September 16. The uncertainty which has afflicted various lines of business in consequence of the cholera scare is beginning to make itself felt in the realty market. An illustration of this fact was shown to-day. A deal involving \$35,000 was to have been closed this evening and undoubtedly would have been consummated had not the report that cholera had reached Philadelphia been received. A rentleman interested in the sale while on his way to sign the final papers learned of the rumor through the issue of an extra edition of an evening paper and positively refused to purchase the property, declaring the deal off for the present. This is but one of the many instances of the

Mr. James W. Drape has just returned from Chicago, whither he has been as the representative of a wealthy syndicate, carrying on negotiations in a very important transaction, involving from \$200,000 to \$300,000, in which the papers have been signed and delivered. Rumor says that Mr. Drape may move to Chicago at the request of a few heavy capitalists of that city. The gentleman is non-committal on the subject, though he intimates that overtures have been made with that end in view.

W. A. Herron & Sons, instead of "W. A. Hesson & Jones," sold the lot 24x100 feet on Madison avenue, Thirteenth ward, for \$500. The seller pays for the expense of improving the street. They also sold lot No, 44 in John I. Williams' plan, Millvale borough, fronting 35 feet on North street, but irregular in shape, for \$200.

FRIDAY, September 16. The usual Friday activity characterized the local merchandise markets, with the general tone of trade strong. No features of consequence developed, however, to supplement the ones exclusively presented in the last report. The only really weak spots are found in provisions and fruits, and in these lines lower prices are probable. The articles that have advanced of late,

The articles that have advanced of late, notably sugar, coffee, cheese, syrups, molasses and timothy seed, are firmly held and promise to be higher.

The New Orleans Fruit Auction Company are working to establish a branch house in Pittsburg. Their idea is to get one of the produce commission houses to introduce the feature as a sort of a side issue. Bulger, Wilbert & Co. are considering the advisability of reconstructing their storeroom so as to enable them to take up the idea, and if they do so there will be regular daily, trithey do so there will be regular daily, tri-weekly, semi-weekly or weekly auction sales of fruit, as the season and supplies

BESSEMER SALES RESTRICTED. crap Strong and Old Iron and Steel

AN UPWARD MOVEMENT IN SKELP IRON

Fails Fcarce.

FRIDAY, Sept. 16.

The demand for certain descriptions of iron and steel shows signs of further improvement so far as the volume of business is concerned. The improvement in values, so far, has failed to reach expectations. At many points steel plants are taking the place of puddling furnaces, whose days certainly seem to be numbered. The reason is very plain-steel for many purposes is not only preferable but cheaper. Take, for instance, skelp, of which hundreds of thousands of tons are used annually; we note sales of wide grooved iron at \$1 62\(^1\)2 per cwt; wide grooved steel, \$1 50; the difference is a handsome profit. The same remarks are equally applicable to numerous other articles. It is only a question of time when puddling will be a thing of the past.

The Outlook Encouraging. The middle of September has to a certain extent sustained the anticipations of the iron trade as to a slight revival of fall busi-ness. While there has been only a limited number of heavy transactions made public this week quotations show no material number of heavy transactions made public this week quotations show no material change. There is an undercurrent of feeling as to the immedia e future that is encouraging to producers. Most of the options on iron and steel which were given some weeks since have been taken up and commissions are not as readily secured. These facts, taken in connection with the action of the leading producers in refusing business which would have been accepted a short time since, have had the effect of imparting strength to the market is as satisfactory as could be expected, but consumers, recognizing that there will be a fairly active business during the balance of the year contend that the capacity of the furnaces is so great that competition for orders will have the effect of preventing any sudden increase in prices. Consumption of all grades of pig from is now heavy and the output more nearly approximates the demands from the various consuming industries. On the whole the present situation is one in which manufacturers find much that is encouraging, although consumers, while closely watching the conduction of the market, are generally purchasing on short deliveries generally preclassing on short deliveries generally purchasing on short deliveries generally purcha ket, are generally purchasing on short de-liveries except in instances where odd lots can be picked up at prices that are regarded

as satisfactory.

Course of Prices and Sales.

Structural material is very firm, the advance previously noted being maintained and a further one demanded. Steel beams readily command 2c at mill, and for immediate delivery 2 1-10c to 21/4c. Pig iron production shows a material de-crease in August. The total decrease in

crease in August. The total decrease in weekly production was 1.987 tons. The reduction of all kinds from July 1 to August 1 was 11,289 tons. The reduction of weekly production since March 1, the period of greatest production in 1892, is 37,222 tons. The production for September is the smallest since June, 1891.

Gray forge is firmer; certain holders ask an advance. Bessemer is steady, though not active. The demand for steel billets has fallen off. In muck-bar prices have been maintained. Old iron and steel rails are firm; offerings light. Scrap material is held at higher prices.

SOME BUSINESS AT CHICAGO. The Buying Movement Fully in Line With

the Season's Demands.

CHICAGO, Sept. 16 -[Special.]-The buying movement now in progress is of reasonable proportions and fully in line with that comnon to this season of the year. During the past week there have been some good-sized sales closed, these being divided between Northern and Southern cokes. On the latter class of metal prices are somewhat more firm than has been the case during the past firm than has been the case during the past 60 days, and furnaces in the Southern district are now declining business at figures which were readily accepted last month. This action is owing to the fact that the leading companies have contracted a large amount of business and are in no pressing need of new orders. Consumers consider this attitude as simply temporary, and are unwilling to believe that any stiffening in prices can be maintained. The most encouraging feature of the market is the continued heavy consumption in every department of business.

ment of business.

There is practically no business going on in Lake Superior charcoals outside of carlots and sales of 50 or 100 tons for prompt ship-ment. Ohio soft froms are in moderate de-mand, but on these considerable variation of price exists, on account of the choice be-

Money in Chicago.

There is still a strong demand upon the banks for accommodations with consider-able inquiry for funds for operations later able inquiry for funds for operations later in the fall. Rates sustain themselves at 5 to 6 per cent in view of the general borrowing. The main call is from city patrons. The country is neither drawing very largely upon its balances at this center nor asking aid in the way of loans. On the other hand, money continues to come in from the tributary region to be invested in commercial paper. The stagnation in bonds begins to be a subject for gossip, Winatever the current of speculation or investment in securities, it is almost wholly in stocks. There is still a free flow of sliver dollars to the crop centers. Merchants report collections prompt as at any time this year.—Chargo Inter Ocean.

PARKERSBURG, Sept. 16.-[Special.]-This morning Miss Carrie Cook, of this city, daughter of S. S. Cook, a wealthy citizen, and granddaughter of Daniel A. Neil, President of the Ohio River Railroad, was quietly married to Edward Gray, of the firm of Jones & Laughlin, Pittaburg. The affair was a quiet one. The couple left for Pittaburg soon after the wedding.
