Nearly Two Per Cent on a Sharp Demand From the Shorts.

READING'S RISE CULMINATES.

But L. & N., C., B. & Q., Mop, Whisky and Sugar Score Gains.

LACKAWANNA ALSO MOVES UPWARD

NEW YORK, Sept. 26.—The stock market to-day still showed a narrowing tendency, but the reactionary temper of Saturday had entirely disappeared and the covering of shorts went on uninterrupted, though the demand was transferred from Reading to Northern Pacific preferred and others. The trading to-day was strictly professional, but the uniformity of the upward movement attested the strength of newly aroused prudence on the part of the shorts. Northern Pacific preferred was lifted nearly 2 per cent and other favorites from 1/4 to 11/4 per cent, but with the satisfaction of the early demand the market sank again into extreme dullness, relieved here and there by spurts of activity and strength among the leaders.

As a rule the opening gains, which extended to 1/4 per cent, were slowly increased throughout the greater portion of the day. Louisville, Burlington, Distillers and Missouri Pacific were most prominent after Northern Pacific for strength, but late in the day Sugar was subjected to a short spurt,

J. S. Bache & Co. to Oakley & Co.: "The only weak stock to-day was Reading: the bulls had a good chance to dispose of some of their stock during the tremendous rise, and they were wise enough to take advantage of this opportunity. The sentiment is working this market, promises higher prices, but we believe in selling stocks on rallies.

A BULLISH SENTIMENT

Prevalls on the Chicago Board of Trade,

and Prices Advance. CHICAGO, Sept. 26 .- Wheat opened this morning at Saturday's closing price, grew firm, gradually selling up lc, and held much firm, gradually selling up ic, and held much of the advance. There was not much in the news that could be regarded as very bullish, but on the contrary there was a good deal that made the advance unexpected. Cables were strong and Liverpool higher, and the Indian ship-ments only 200,000 bushels against 550,000 bushels the week previous, but this was offset by the big receipts in the Northwest, 1,712 cars, the liberal arrivals at primary points, the moderate exports from the seaboard and the heavy increase in the visible supply, but the sentiment of the trade was bullish. The other pits were all firm, corn and provisions being strong and higher, and this, with the local trade, made shorts disposed to cover. There were some breaks on the way up, but the general feeling was firm.

firm.

Corn was easier at the start on favorable weather, but soon turned strong on good local buying and considerable talk of colder weather with the sharp upturn in provisions and advanced a large fraction, then eased off some but held fairly steady.

Hog products started strong and for a time the market showed a buoyant feeling, but later most of the advance was lost. Ribs were higher early, shorts hidding October up to \$10, but when this spurt was over they fell to \$3.05. The clique who have control of the October deal allowed a number of shorts to settle at the advanced prices and sold some, taking a heavy profit. The market closed with an advance of 22% of or October, so barrels; wheat, 68,800 bushels, barrley, \$2,000 bushels.

LOCAL STOCKS FIRM. 100 shares Westinghouse Electric 2d pfd......

Trading Moderately Active, With the Drift of Prices Unward.

A BIG ADVANCE IN AIRBRAKE.

Flectric Stocks Also Reach a Higher Plane

of Value. GAS AND OTHER SHARES WELL HELD

MONDAY, Sept. 26. The tone of the speculative markets East and West to-day was more bullish than otherwise, though no pronounced demonstration was made by the contingency in favor of higher prices and the day's operations resulted in few marked gains. London was prominent on the buying side on the New York Exchange, but the shorts were the most active buyers and they went to such lengths that they were thought to have pretty nearly covered their lines in many of the leading shares. Mr. Keene was conspicuously in control of the market, however, and, despite
the elimination of a good percentage of the
short interest, his utterances were bullish
and he confidently predicted higher prices.
On the Chicago Board of Trade the week
opened with a steady to strong tone prevalent and with the indications promising improvement in both trading and prices.

On the Local Board.

Do the Local Board.

Trading in local stocks opened dull and closed moderately active. The strength apparent at Saturday's close not only held without impairment over Sunday but became more marked as the day wore away, and was most noticeable in the final dealings, being partially reflected in gains of more or less consequence in a number of the leading shares. The stocks traded in on Change were P. & B. traction, Philadelphia Company, Westinghouse Electric second preferred, Union Switch and Signal, People's Pipeage, Pleasant Valley Railway, Luster Mining Company and Westinghouse Electric unassented.

P. & B. traction sold at 25 and closed at 25%26. The first sale of Philadelphia Company was at 22% seller opening of the books, and subsequent sales were at 22% regular. Westinghouse Electric second preferred was stronger, selling readily at 38 and closing at 38238%. Union Switch and Signal was also firmer, though it failed to close un to Saturday's final quotations. The sales of the stock were at 18% and the close at 18%26 18%, against a close Saturday at 18%26 18%, and Electric dnassented was higher at 23 sales and bid.

Airbrake moved up to 141% bid on the announcement of the regular quarterly dividend, and Citizens traction and Central traction were fractionally higher on a continuance of the improved demand noted at the close of last week.

The close of Philadelphia Company was a shade under the highest at 23% bid for 10

week.

The close of Philadelphia Company was a shade under the hignest at 22% bid for 10 shares and 100 offered at the same price. Dividends and Interest.

As foreshadowed in these columns the directors of the Westinghouse Airbrake Company have declared the regular dividend of 5 per cent and a special dividend of 5 per cent, both payable to stockholders of record October 10. Transfer books will close October 1 and reopen October 11.

The Standard Underground Cable Company announces the regular quarterly dividend of 1½ per cent, payablo October 15.

Transfer books will close October 10 and reopen October 18.

The Chartiers Railway Company has declared a semi-annual dividend of 4 per cent, payable on and after October 1.

The coupons of the Pittsburg, Akron and Western Railroad first mortgage gold bonds due October 1 will be paid on and after that date at the German National Bank of Pittsburg. directors of the Westinghouse Airbrake

It was stated on 'Change during the last call that P. & B. traction would pay a dividend of 1½ per cent next month.

Why Bank Deposits Decrease, The New York Evening Post explains the important changes in the recent statements of the New York associated banks as folbanks has decreased \$36,500,000, and the loan account, which naturally follows the movement of deposits, has falten off \$24,000,000. Taken in connection with the westward Taken in connection with the westward shipment of currency, people have been leaping to the conclusion tont the supply of leanable funds in New York is being heavily contracted. But nothing of the kind is true. A glance at any of the last four bank statements will show how very far the week's total interior shipments of currency failed to account for the total shrinkage in deposits. Last week, for instance, when interior shipments barely exceeded a million dollars, deposits fell off more than \$11,090,000. The fact is that the bulk of this money withdrawn from the clearing bouse banks has not been withdrawn from New York at all. Most of the decrease came from the calling in by trust companies of their own bank deposits. The purpose of such withdrawal by the trust companies was of course to lend out the money themselves at a higher rate of interest."

London Buys Pensy.

London Buys Pensy. The Philadelphia Stockholder says: It now transpires that of the Pennsylvania shares purchased in the local board during the past week, with the result of advancing the market price about 2 per cent, a considerable amount was taken for English account. The amount was taken for English account. The incident is probably one of the effects of the impression President Roberts made abroad. It furnishes another refutation of the charges made by the enemies of the Pennsylvania Railroad Company, that the English holders of the company's securities are dissatisfied. The shares are now in the open market commanding a price equivalent to a fraction above the last quotation for those of the New York Central.

The New Week in Realty Circles Opens With the Closing of Some Good Deals-Agents Report an Unusually Brisk Inquiry—Gossip and Latest Sales. MONDAY, Sept. 26.

The realty market opened up in a rather brisk manner to-day, and from the indications, this week will be a very busy one in realty circles. Several deals were closed to-day, the details of which are withheld for the present. They will undoubtedly cause considerable comment when made public, considerable comment when made public, as they are very important transactions. Other large sales are under way, and new plans are being prepared for the market.

The inquiry for property of all kinds is reported by some of the agents as exceeding any they have ever experienced during their career in the business. The more settled condition of industrial matters and the subsidence of the cholera scare are given as the cause of the noticeable improvement.

Current Gossip. Current Gossip.

but no radical price changes were established.

The past week has been generally favorable for the corn crop. In some regions the ripening process has been slow, but for the most part has been encouraging. The light frosts of last week in various localities were not harmful to the crop, but generally calculated to quicken the ripening and to improve the condition with reference to possible severe irosts a little later on. Taken altogether, it has been a good week for the corn crop, and the average position is more secure and assuring, without furnishing elements favoring enlarged estimates of yield. It is evident that a large proportion of the corn crop of the West is now practically secure from injury from frosts, or nearly so.

Recent rains over a large area in the West have been avorable to the incoming wheat crop, facilitating the completion of plowing and seeding, and germination where seeding has been accomplished. In many places the early seeding already shows growth. The crop has a good start. It is noticeable that the Southern portion of the spring wheat belt is giving increasing attention to autumn buying, under the encouraging results of recent years in this particular.

The demand was light at the copening, and indications pointed to a decline in prices, particularly on common grades, as buyers of all classes were refusing to operate excepting at concessions, and early sales reflected a slight disposition on the part of sellers to meet the views of buyers. As fairly illustrating the condition of the market, the best bid that could be secured for a load of Indiana cattle that cost \$3.75 per cwt was \$5.50. Up to \$3.90 o'clock no orders for exporters had been received. Some of the opening transactions were as follows:

COL SMEED'S WILL QUESTIONED.

His Daughter Says if He Left One, It Was Gotten From Him by Design.

OMAHA, Sept. 28.—The question as to who is entitled to the property of Colonet Eben C. Smeed, the well-known Union Pacific engineer who died August 24 in Philadelphia, is raised in the county court. Mrs. Jeannette R. Nichols was present when he died, R. Nichols was present when he died, and afterward followed the remains to Kansas, where they were interred. It was reported that the Colonel had left his property to Mrs. Nichols and had cut off his daughter, Mrs. Kate Smeed Cross, of Emporia, Kan., without a shilling. The daughter of the departed railroad man has filed a petition in the Probate Court of Douglass county, in which she alleges that when Eben C Smeed died he had personal property of the value of \$12,000 located in Douglass county; that she was his daughter and only helr at-law, and that when he died he left no will by which his property was bequeated to any person.

he left no will by which his property was bequeated to any person.

The petitioner further alleges that since the death of her inther a Mrs. Jeannette E. Nichols has appeared on the scene, claiming to hold a will which was executed by the late Coronel Smeed during his life, in which she is the beneficiary. The petition further alleges that Mrs. Nichols was a designing woman, and that it she holds a will it was secured through the influence of her designs practiced upon the deceased just prior to his death, and therefore is not a will which could be considered in any court. Judge Eller has placed the petition on file and has cited Mrs. Nichols to appear September 30 to answer the petition and to tember 30 to answer the petition and to bring her will to court.
