BULLISH OIL REPORT.

The New Production Decreases, and an Increase in New Wells.

Little Change Reported in Upper Country Developments.

NEWS FROM THE LOCAL OIL FIELDS

The monthly oil report of field work in in the Pennsylvania oil producing districts is slightly bullish. There was a decrease of 1,502 barrels in new production, with an increase of 4 in the number of completed wells. There was an increase of 8 in the number of dry holes. The average size of the wells fell from 71½ barrels in August to 60 in September. In the upper country scarcely a change was visible in the completed work. It was all in the southwest.

The total number of drilling wells has decreased from 242 in August to 234 in September, but there is an increase of 24 in the number of new rigs.

The new production in the southwest fields in September amounted to 5,763 barrels. Of this McDonald furnished 2,733 barrels from 28 wells. Thirty-five wells were completed in the McDonald field, but seven were dusters.

Against this record Sistersville shows up with 34 completed wells, one dry, and a new production of 2,465 barrels.

In Washington, Brush Creek, Westview and Wildwood 13 wells were completed, and all were dry except the Gordon Oil Company's No. 2 Day, in the Washington field, which is a 6-barreler.

Three dry holes were drilled at Crafton, the number of dry holes. The average size

pany's No. 2 Day, in the Washington field, which is a 6-barreler.

Three dry holes were drilled at Crafton, three small producers in the Montour district, one duster, and a 29-barrel well at Mt. Morris, a two-barrel well at Hoorstown, and one 30 and one 40 barreler at Venice. One of the 'ig_est wells record'd is the Flaggy Mendow Oil Company's on the J. C. Straight farm at Mannington, which is given at 500 barrels. A two and a three-barrel well were also mished up in this field. Four dusters was the month's record at Macksburg.

There are now 214 wells drilling and rigs completed in the southwest district. Sixtynine of these are in the McDonaid field, 63 at Sistersville, 20 at Mannington, 12 at Mt. Morris, 11 at Brush Creek and the others scattering.

scattering.
There was an increse of five in Ohio wells during the month and a decrease of 1,891 barrels, or from 14,799 to 12,908 in new production. The new work is a stand off.

In Jay county, Ind., the new production was increased from 465 to 1,669 barrels. There is an increase of 21 in drilling wells and rigs.

SISTERSVILLE BOOMING.

Its Daily Production Is Now Over 17,000 Barrels, and Increasing - Old Wells Revived by Nitro-Glycerine at McDonald, Midway.

The Sistersville field is attracting more attention at present among the oil men than any other locality in which operations are being carried on. Things are booming at that place, to use the expression of a machinery man who came up yesterday, and the boom has been largely brought on by the recent big strikes in the field.

The production of the pool is estimated a 13.500 Parrels, exclusive of the following

The production of the pool is estimated at 13,500 harrels, exclusive of the following wells: The Island il Company's No. 13acob Turl, which is making 35 barrels an hour; Twichell & Hershberger's No. 5 Stewart, which is doing 60 an hour; the Millers Run Oil Company's No. 7 Stewart, 20 an hour; and Jones & Tennut's No. 4 McCoy, which is parting out 50 barrels an hour.

These wells have a combined daily output of 3 900 barrels, which, if added to the 13 500 given for the balance of the wells, would bring the total production up to 17 460 barrels, or almost as much as the whole of the McDonald field is now producing.

Jones & Tenant's No. 5 on the Taibot farm was reported last night to be in the sand and showing for a good well.

J. R. Knox's well on the Mitchell property, below town, was 28 feet in the limestone yesterday, and had struck a good win of gas. It is down 1,568 feet. They expect to get the sand at 1,600 feet.

The remains of Theodore Davis, who was hursed to death at the pipe line station Thursday evening, were brought to Pittsburg yesterday. They will be taken to Mercur, his former home, for interment. He was a widower, and leaves two sons.

A rig at a well belonging to Forsythe & Brenneman, which had just been rigged up for pumping, was also burned Thursday evening by flames from the pump station.

Reviving Old Wells at McDonald. The estimated production of the McDon-ald field went up from 20,000 to 20,500 barrels yesterday. Two new wells were added to

the list of those in the gauges. Greenlee & Forst shot their No. 5 Marshall for the first time, and at the office of the firm yesterday it was reported to be making 38 barrels an hour. They reported their No. 7 Marshall to be doing 35 barrels an hour, but in the pipe line gauges it is given at 22 bar-

in the pipe line gauges it is given at 22 barrels.

The Forest Oil Company's No. 6 on the John Nickwen farm was reported to be 15 feet in the Gordon sand, and will not be better than a 36-barrel well. Their No. 9 Herron, back of Noblestown, and No. 3 McClelland, east of Oakdale, are due in the fifth sand the first of the week.

The Woodland Oil Company's No. 3 on the Crawford farm, two miles southwest of McDonald, is no good in the fifth sand, but is making 50 or 60 barrels naturally from the Gordon, in which it will be shot.

In the northeastern end of the McCurdy field the Ruppert Oil and Gas Company drilled its No. I James Moore into the fourth sand yesterday, and at first they thought it was going to be a gasser, but in a few hours it began to spray oil, and last night had drilled itself in and was making eight barrels an hour.

The Forest finished up its well on the

rels an hour.

The Forest finished up its well on the Getty farm at Coraopolis this week. It will make only a five-barrel well. Their No. 6 on the D. K. Clever farm is due next week. In the Garvin pool south and west of Callery Junction their Maeder farm well will make

60 barrels a day. Activity Around Midway.

There is considerable activity just now in the Midway pool, located two miles west of McDonald. The oil is obtained in the Gor-

Royce, Hallowell & Meldren's No. 1, on the McBurney farm, is making 50 barrels a day naturally. They intend to shoot it next week. They are starting Nos. 2 and 3 on this farm. Meidren & Co. are starting a well on

the Kriss preperty.

Smith & Co. a old well on the Taylor farm is still making 25 barrels a day naturally, and they are drilling a well on the McBurney property.

Harold & Co.'s first well on the Robbins lease is doing 40 barrels a day, and they have commenced to drill No. 2 on this farm.

Two Butler County Wells.

Guckert & Steel are down 800 feet in their No. 1 Gardner, in the Garvin pool, southwest of Callery Junction. They will commence to rig up Monday at Camp Run, near the Beaver county line, five miles west and north from Harmony. They are rigging up a well at Powhatan, O., ten miles below Wheeling, on a northeast extension of the Sistersville field.

"I contracted a severe cold to which I paid little attention, expecting it to disappear naturally. It did not go away, however, but kept getting worse till it seemed to attack every part of my system.

"I had catarrh of the head, n ose and throat. My head was racked with distressing pains. My nose and head were stopped up at times, and caused considerable hawking and spitting. The catarrh finally extended to my bronchial tubes and stomach. I had terrible pains in the chest and in the right side.

"My stomach was in an awful condition. I had no appetite, and, when I forced myself to eat, my food lay like lead, causing a heavy bloated up feeling with belching of gas. My bowels were out of order, in fact, I was sick all over, and my condition became so bad that I thought I could never be cured. I lost flesh and strength steadily.

A COAL MINER'S STATEMENT,

Illustrating the Effects of Irritating Particles of Dust and Exposure to the Damp and Foul Air of the Mines.

Although chronic catarrh in this climate Although chronic catarrh in this climate is nearly always caused by neglected colds, occasionally the exciting cause is traced to irritating particles of dust and exposure to foulair, as of coal mines, factories, etc. This form of catarrh is due to particles of fine dust being carried in the air inspired, inhaled from the mote-laden atmosphere in shops, mines, factories, etc., and to which stonecutters, cutlers, coal miners, brassworkers, nailers, sawmakers, etc., are liable.

liable.

This at times so often affects the system that the patient, before he is aware of it, suffers from almost total nervous prostration and debility, due to depicted and vitiated blood, as well as the local trouble caused by the irritating particles of dust fiying in the air, and needs careful and general constitutional treatment as well as treatment directed to the local affment.

Mr. John Horan, a coal miner, who lives at Woodville, P. O., a little hamilet 10 miles distant, on the Washington branch of the at woodville, P. O., a little namiet 10 miles distant, on the Washington branch of the Panhandle Railway, says: "I had been troubled off and on for several years, and doctored from time to time with little or no benefit, till finally I grew so bad I became seriously alarmed about my condition, and felt that I would have to have immediate relief or give up my work. I ached all over nearly all the time, and my body felt as sore as if it had been pounded with a club. I had a constant pain over my eyes and through my temples, and my eye-balis ached and pained me away back into my head. I also had shooting pains through my chest to each shoulder blade, pain and soreness in the small of my back, over the region of my kidneys, and pain shooting down the legs to the knees, with at times a numbness and pricking sensation, as of needles jagging me.

me.

"My nose and throat were constantly stopped up with a sticky, tenacious mucus and I would often hawk out little chunks of hard stuff as black as coal. My ears were also affected by roaring and hissing sounds.

"The appetite became affected and nothing I ate seemed to agree with me. After eating, my stomach would swell up like a drum, and I was troubled with belching of gas, palpitation of heart, dizzy and smothering sensations, etc.

palpitation of heart, dizzy and smothering sensations, etc.

"Although I slept sound, my sleep was troubled with horrid dreams, and I worked all night in these dreams, and awoke in the morning tired, unrefreshed, sore and aching all over.

"I shall always bless the day I was directed to Drs. Copeland, Hall and Byers, for they have done for me what no other doctors could do—they have cured me safe and sound, and now I feel like a new person. I have no aches or pains, eat and sleep well, and awaken in the morning rested and anxious for my daily work. I shall never forget what they have done for me."

WOMAN'S TROUBLE.

General Weakness, Pain, Distress and Ex-General Weakness, Pain, Distress and Exhaustion—Results of Catarrh.

Many women to-day suffer pain and are weak and nervous without knowing the cause. Their work greatly fatigues them and they cannot eat well. At night they rest poorly, and in the morning feel wholly unfit for the duties of the day. In short, they are miserable from general impairment of health, besides enduring pain and distress hard to fully describe. Many such cases are the result of catarrh, which affects the whole system, and they find quick and certain relief from treatment fitted to the case.

the whole system, and they find quick and certain relief from treatment fitted to the case.

Such an instance is reliated below by Mrs. Melina Eardiey, No. 1354 Second avenue, city. Said she:

"I had been troubled so long that I almost despaired of ever getting relief much less a cure; but thanks to the careful and skillful treatment of Drs. Cepeland, Hall and Byers I have received both relief and cure. I was troubled so with headaches that sometimes I felt that I would go out of my head, pains all over forehead, through temples, on top and in back of head and back of neck. My neck would become sore and stiff with a constant desire to draw it backward to obtain relief from the strain.

"I couldn't sleep at night, couldn't lay in bed, I was nervous and restless, with a constant dread hanging over me, and was as tired and sore all over in the morning as if I had been beaten with a club.

"I had but little appetite and what little I ate caused a bloated and uncomfortable feeling. I got so I vomited aimost every meal and toward the last I both vomited up blood and passed blood from the bowels. I lost fiesh and strength steadily, night sweats came on and altogether I was in an almost hopeless state.

"Drs. Copeland, Hall and Byers cured me of all my distressing allments and I feel that I cannot speak too highly of the kind and careful attention given me by these skillful physicians."

Drs. Copeland, Hall and Byers treat successfully all curable cases at 65 Sixth avenue, Pittsburg, Pa. Office hours, 9 to 11 A. M., 2 to 5 P. M. and 7 to 9 P. M. Sundays, 10 A. M. to 4 P. M. B. & B. NECESSITY WEARY

To the Orient in order to see the slow, plodding, primitive Turkish way of producing that one great necessity to modern American comfort, Turkish Toweling. The "STAR and CRESCENT MILLS" have made it possible to bring Turkey's industry-that part of it-to America.

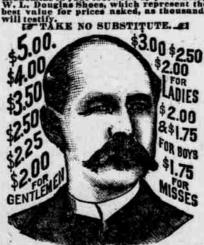

Yes, here we have right at home—under the very shadow of the Stars and Stripes-HAGOPPAS MARDIROSIAN, a native Armenian, giving a practical demonstration of the plodding Turk-style of producing Tow-ELS a hundred years ago! Slow and tedious, slow and tedious. The very motion of his method bespeaks the lethargy of the nation and of the time.

But what of this exhibit inside the store? Alert, aggressive America—Allegheny the particular city, Boggs & Buhl the exclusive locality, where Century American genius and grit have made it-as MODERN MERCHANDISING METHODS show how it's done. The swift, flying threads; the clickity clack, clackity click of shuttle and loom, chatter of Yankee pluck and ingenuity, and all around heaps of Snowy Whiteness pile high-ten yards to one made by Hagopos Mardirosianas the friction, health-glow producing agency falls in soft, absorbent Towels ready for use, at prices making it possible to pick up Towels at such trifling

cost as that all may enjoy the luxury. * Failure to see this Novel In-DUSTRIAL EXPOSITION is to miss seeing one of the most interesting sights in fabric-producing

machinery. SATURDAY MORNING 8 O'CLOCK IT BEGINS.

TWO AND TWO MAKE FIVE.

"No, they don't!" cries one.

"Yes, they do!" cries another.

"Rubbish!" says a third.

In facing a fact it is just as well to stare it squarely in the face. Two and two do not make five any more than a merchant can do an honorable, profitable business if he makes a practice of giving \$1.25 worth of goods for \$1. Any sensible reader of this advertisement knows this.

DOLLAR FOR DOLLAR—When we began business in Pittsburg six weeks ago, and stocked our wareholds with the best Furniture, Carpets and Home Furnishings that money could buy or experienced taste select, we adopted DOLLAR FOR DOLLAR as our basis for business.
