Wells Below the River Bed.

It is Colonel Roberts' idea to break the conduit in its first stage with two or more storage wells to be drilled in Six Mile Island. These wells being dug to a depth far below the river bed will add to the supply of filtered water, for it has been proven time and again that a well sunk close to the river bank will fill up from the river, and yet supply clear pure water when the stream from which it draws its water is at its muddlest. This has been shown in the well put down by the Monongahela Company on the Southside, and several other wells drilled under similar circumstances in this vicinity.

The water having been carried to the mainland from the island in a conduit is then to be pumped up by a small and inex-pensive engine to a reservoir 40 feet above low water in the river. In case Allegheny City is alone to be supplied Colonel Rob-erts thinks a reservoir covering an acre would be sufficient. From the reservoir of course the water could easily be taken in suitable mains to the city water works. In the reservoir the water would have another chance to deposit any deleterious substance remaining and would have the benefit of the action of sun and air before it passed on to the city. The filtering gallery, the storage wells and the whole service, in short, could be easily enlarged so as to supply Pittsburg as well as Allegheny, and Colonel Roberts firmly believes that everyone who investigates the subject fully and carefully will come to the conclusion that here is the best method to get pure water for both cities.

Intercepting Sewers to Be Built, One of the objections likely to be urged at once to the scheme is that the workhous sowers empty into the Allegheny a short distance above the point where it is pro-posed to locate the crib of the influent pipes. Colonel Roberts waves this objec-tion aside, and all others like it. Build an intercepting sewer to beyond the workhouse, and carry the sewage below Six-Mile Island as far as may be deemed necessary. In the same way inter-cepting sewers might be laid on the other side of the Allegheny if the increase of population renders it necessary, so as to give the river the best chance to purity itself for a few miles above the influent

pipes. Colonel Roberts is not sfraid of Allegheny water. He thinks it has been ma-ligned. The sewage of such small towns as dot its banks at wide intervals does not contaminate the water of the Allegheny till the gates of Allegheny City are reached. Barring oil the water is free from harmful matter at Six-Mile Island, and every year sees the oil refineries decaying and less oil get-ting into the river. No advantage is ap-parent to Colonel Roberts in going up the Allegheny river any further than the point named, as far as getting pure water is con-cerned. Separate the water from the mud at Six Mile Island and you have as good drinking water as anyone needs. The saving in money by retraining from long flights will be immense. There is no com-parison to be made between Colonel Rob-erts' scheme and the other plans, such as that in which it is proposed to lay mains to Indian creek, for the cost of the former would be thousands where the others would would be thousands where the others would involve millions.

CLEAN AT HERE'S ISLAND.

Mayor Kennedy of Allegheny Makes an I spection of the River.

Mayor Kennedy, of Allegheny, said last night that he had made a personal inspec-tion of the water and bed of the river at Herr's Island, and that the water there was clear and good, and that the pebbly bottom would afford an excellent filter when the crib for the influent pipe was sunk. He said he was surprised at the amount of filth that flows into the river, especially on the Pitts-burg side, and believes that the hilly conthe land along both sides

LIVING in England as compared to what it costs in America, by Henry Tuckley in THE DISPATCH to-morrow.

TYPHOID SPREADING.

Fifty Cases of the Fever at the Alleghen General Hospital.

There are 50 cases of typhoid fever at the Allegheny General Hospital, but none of them are considered dangerous. Miss Tildsley, superintendent of the hospital, said last night that an unusual number of typhoid cases are reported in the city and that most of the cases at the hospital came from the vicinities of Troy Hill and Spring Garden avenue. The cause, she believed, was due to

the low stage of water in the Allegheny river and the poor sanitary condition of the sewers and sewer drops on Troy Hill and Spring Garden avenue.

MR. GUJAUX WAS BONDSMAN.

He Was Not in a List of Arrested People Reported.

Yesterday the account of the arrest of some Huns and Belgians, charged with taking coal from the Pittsburg, Virginia and Charleston road, appeared in this paper. In the list of those arrested appeared the name of Peter Gujaux. This was a mistake. Mr. Gujaux was the bondsmen for the men, and through a misunderstanding with Alderman King the blunder was made. Mr. Gujaux is foreman of the Howard Plate Glass Com-pany and a reputable citizen. THE DIS-PATCH takes pleasure in making the correc

KRUPP'S guns at the World's Fair and something about the great works, in THE DISPATCH to-morrow.

tion.

Death Rate Decreased.

The report of the Bureau of Health for the week ending September 24 shows a total of 105 deaths. Of these six were caused by diphtheria, 10 by typhoid fever, eight by consumption and eight by choleraic troubles; 33 were under 1 year of age and only one was over 80. The annual death rate was 21.41 per 1,000, a slight decrease from the previous week's rate.

Broke the Mill's Record

Superintendent Dillon, of Carnegie's Thirty-third street mill, is accredited with having stated that on Thursday the mill put out more iron than ever before in its history. There were 13 heats 6 by 6 and 50 feet long. It is said that the Superintend-ent is in great glee over the improved con-dition of affairs. There are also fewer accidents reported than formerly.

Suits Against Sle

Attorneys John Wilson and S. J Graham yesterday filed precipes in suits against John O. Slemmons, the wholesale jeweler. The plaintiffs are Simons Bros. & Co., Kanasha Watch Case Company, of Wisconsin, and the Keystone Watch Case Company. Company.

A Case of Smallpox.

A case of smallpox was reported to the Board of Health yesterday from the house of W. H. Mounnes, on Oliver street, rear of Speer's brickyard, in the Thirteenth ward. The diseased victim was taken to the Municipal Hospital after an examina-tion.

DR. B. M. HANNA. Eye, car, nose and throat diseases exclusively. Office, 720 Penn treet, Pittsburg, Pa. 800

ONLY ONE BIDDER.

Controller Morrow Surprised the Fire Engine Order Goes Begging.

The time for receiving bids for the new fire apparatus advertised for by the Department of Public. Safety closes at 2 o'clock this afternoon. Two new first-class fire engines, a chemical engine, a hose reel and a hose wagon are to be purchased. At the time the Controller's office closed last night the only bid for fire engines was from the Manchester Locomotive Works, manufacturers of the Amoskeag engine. There were two bids for the chemical en-gine. The Manchester Company was the only bidder on the hose reel and James G.

Weir the only bidder for the hose wagon contract.

As the advertisement for proposals was worded so that all but rotary fire engines worded so that all but rotary fire engines could come in it is considered surprising that there have not been more bidders. The Controller thinks, however, that a couple of bids may tome in to-day before the time expires. It is not likely the con-tract will be let to-day, as Chief Brown was taken sick yesterday, and may not get out before Monday. before Monday.
