Mr. Jay then quotes this sentence from Mr. Cleveland's letter: "We will rely upon the intelligence of our fellow country-men to reject the charge that a party is planning the destruction of or injury to American interests, and we know that they cannot be frightened by the spectre of im-possible free trade," and remarks that Mr. Cleveland omitted to refer to the all-im-portant fact that the Democratic conven-tion had spoken definitely on this point, and that a resolution in concurrence with Connecticut and New Jersey. Senator Aldrich will awake the echoes in Connecticut. He will then come to New York, Hon. Tom Fitch, the California orator, has been booked by Chairman Hahn for one speech in New Jersey, one in Connecticut, and four in New York. Hon. tion had spoken definitely on this point, and that a resolution in concurrence with the views expressed by him had been pre-sented and rejected, and that a substitute expressing opposite views had been adopted. Mr. Jay concluded as follows: Richard Guenther, of Wisconsin, is to speak in New Jersey and New York, General George A. Sheridan has been sent to New Hampshire, and ex-Lieutenant-Governor

R. P. Kennedy, of Ohio, to Michigan. Mr. Jay concluded as follows: That omission by Mr. Cleveland in his let-ter of all reference on the action of the con-vention to the tariff plank, has perhaps led to a similar omission in your own speeches, an omission that may be recretted, as de-priving us of your candid opinion on this leading feature of the Democratic platform and of your reasons for approving such a radical and revolutionary change in our pational policy. Chairman Hahn is better provided with speakers than his opponent, Bradley B. Smalley, at National Democratic headquarters. Mr. Smalley could not furnish a delegation of applejack Democrats with the

desired speakers to-day.

Mr. Carter's friends are busy most of the day circulating among Republican bankers and others collecting the sinews of war to be used in New York, New Jersey, the two Virginias and Connecticut, Indiana. The contributions have been mest liberal, and the promises for the last two weeks of the campaign have been still more munificent. It will be remembered that the high water mark set at the beginning of the campaign was for \$2,-100.000. This limit will be reached cer-

hinly by November 1. Chairman Carter to-day received a letter from Kentucky which said that the chances there over the general result were doubtful, to say the least, and that if the State did not go Republican the Democratic majority would be very largely reduced. This year is the first in the State's history where the vote is by secret ballot. Interesting Data About State Banks William C. Huoy, a prominent Philadelphia banker, was a visitor at headquarters to-day, and gave some interesting data upon State banks before the war, and the losses that individual holders of the currency always suffered. Regarding the present system he said: "Since the Republican party has been in power we have had the best currency in the world, and no man has lost a dollar by discount or failure of any national bank. We have to-day a per capita of \$27, which is as much as England, Germany and Italy combined, and more than any country in the world except

radical and revolutionary change in our national policy. With Mr. Cleveland's views and action in regard to civil service reform I found my-self in accord, when I had the honor of serving, by his appointment, on the Civil Service Commission of this State. But in the tariff plank, which he has accepted, I see great danger to the cause of civil service reform, for it substitutes the decision of a Democratic convention, without the slight-est regard to the ruling of the constitution, and the gladsome light of jurisprudence.

The present difficulty has been greatly magnified in Tory quarters. Sir William Vernon Harcourt, Chancellor of the Exchequer, is said to be resolute against the release of any of the dynamite prisoners, while Mr. Asquith favors the granting of mnesty to many of them, though even he resitates to favor the general pardon of all he dynamiters. The Difficulty Probably Not Serious. The Liberals ridicule the idea that there is any serious dissension over the matter. Besides it is beliaved in independent ciris any serious dissension over the matter. Besides it is believed in independent cir-cles that Mr. Asquith, who is young and ambitious, is not likely to jeopardize his newly-won position, to which six months ago he had no suspicion of attaining, by serious opposition to any solution of the dynamite problem which had received the general approval of his colleagues. According to reports from Radical cen-ters, one item of the Newcastle programme is certain of execution. Sir William Ver-non Harcourt has decided that the next budget, which he intends shall be thorough-ly democratic, shall include proposals pro-viding for a "free breakfast table," by the abolition of the duties on tea, coffee and ecces, the resulting reduction in the reve-nue to be met by increased taxation of land. Such a scheme would give immense satis-faction to the working classes, which have for a long time been agitating this subject. The recent manifestations of mutiny, coming one a-top of another in crack regi-ments like the Guards and the Thirteenth Hussars, are creating a feeling bordering on eonsternation throughout the country and causing a general outery for a thorough in-quiry into the cause of what appears to be widespread discontent. tures were nearly all made outside the terri-torial water boundary. This is explained by the fact that the scalers, sceing the Russian cruisers approaching, sailed out and the cruisers chased them. Only vessels whose logs, charts, etc., proved they had been scaling in Russian waters were seized. The conduct of the Russian officers was blameless. The British fiag was not insulted. The crews of the captured vessels were well treated, but when they became quarrelsome and insulted the Russian officers, order had to be re-stored by force of arms.

The Men Not Alone to Manne. Letters published in the newspapers from soldiers, some of whom still belong to dis-contented regiments, force the belief that the officers are greatly to blame. It is asserted that many officers of the Life Guards are quite ignorant of their duties, rarely attend drills and are obliged to have subordinates near them on field days to tell them the word of command to give. Soldiers have and Dibert attempted some of his fancy word of command to give. Soldiers nave even been known to execute movements without commands from their officers in order to save the credit of the troops. Yet the same officers when they inspect troops, rooms and stables find the most stupid and most trivial faults and impose extreme multiplication the moldiers for their all

publishment on the soldiers for their alleged remissness. Little interest is shown in yachting circles in regard to the proposed race for the American cup. This spathy is chiefly due to the fact that Lord Dunraven's challenge emanates from himself and with
