Distilling and Cattle Feeding Touches Another High Point

THE BAILFOAD LIST IMPROVES

And the General Market Closes With Strong Tone Prevalent.

NEW ENGLAND ONE OF THE FEATURES

NEW YORK, Oct. 25. -The day opened on the Stock Exchange with a buoyant feeling, owing partly to a heavy purchasing movement in New England, which carried that stock up to 40 from 48 at the close vesterday. Subsequently the price ran off to 4634. The general railroad list improved 14 to 14 per cent, but subsequently reacted and left off practically unchanged from last night's figures. Reading, after selling off a fraction to 57%, advanced on animated dealings to 58%. A reaction to 58@5814 occurred later. Among the Industrials, Distilling and Cattle Feeding was the special attraction, ranging from 634 to 634 and closing at the latter, the highest price ever reached. American Sugar, Cotton Oil and other industrials advanced anywhere from 1/2 to 21/2 per cent and the only important reactions at the close were in General Electric, Sugar and National

were in General Electric, Sugar and National Starch, which receded ligits, from the highest. The market closed steady in tone. The Ev may Post says: To-day's stock market prices changed little chiefly because buying orders and selling orders at the market so generally matched each other. The few initial advances—in St. Paul, in Chicago Gas and conspicuously in New England—were made suddenly, and seemingly with a view to market for sales. In most of these stocks yesterday's bull manipulators were sellers. This frightened out the rank and file, and was followed by a few hours of duliness. New England declined steadily, with occasional spasmodic railies, each of which was givered by fresh lequidation. The general list proving immovable, the spectacle was greeted by Irean inquitation. The general hist proving immovable, the spectacle was presented of an advance in the Industrial stocks. Distilling certificates, last becoming the room traders' favorite, led this movement. Elsewhere fluctuations were novement. Elsewhere fluctuations were mail, and the whole market bore its usual press of professional manipulation

We have had a continuation of the built movement to-day, although fluctuations have again been confined largely to the Industrials, Chicago Gas. A. C. O., Lead, Sugar and D. C. & F. scored fair advances and showed a bold front in spite of considerable hquidation. The commission houses were conspicuously the buyers of the market and we are inclined to think that there was some liquidation done by traders and the Keene crowd. In spite of this, however, there are no signs of weakening in the general list and liquidation done by traders and the Keene crowd. In spite of this, however, there are no signs of weakening in the general list and offerings seem to be absorbed rapidly. Even the Gould stocks have now joined in the general advance, and if the Gould forces have joined issue with the Keene crowd the market will probably continue to advance until the buil feeling has been worked up to such a degree as to permit of more than partial liquidation. It must not be forgotten, however, that we have not had a steady advance of a fortnight without even a fractional set-back; some stocks, such as Chicago Gas and Distillers, have advanced in proportion. The outside interest is probably heavily engaged and while we do not anticipate any great stringency in money, the bank reserves are at a point where cantious men will prefer to go slowly and a reaction is possible at any time.—J. S. Bache & Co. to Oakley & Co.

CHICAGO 'CHANGE.

The Cereals Rule Rather Easy and Provisions Irregular. Cuttago, Oct. 25 .- The big increase in the visible supply of wheat last week seems likely to be followed by another next week, as the deliveries at primary points yesterday exceed the shipments by \$1,000,000 bushels and to-day they are in excess by 1,300,000 els and to-day they are in excess by 1,300,000 bushels. The recovery in prices late in the day was attributed to Bradstreet's report, which made an increase in stocks of 4,539.000 bushels East and a decrease of 416,000 bushels West of the Rocky Mountains—a net increase of only 4,303,000 bushels for both coasts. The opening was about 1/c under yesterday's close and further declined 3/c, then rallied 3/c, closing steady.

Corn was only moderately active and easier, influenced partially by fine weather, which, it was thought, would insure a continuance of liberal receipts, and also affected some by the weakness in whent. Another depressing feature was the big increase of the stock—of contract in store, which are now 5,23,000 bushels, against 4,259,000 bushels a week ago. Initial trades were at 4,20% decline afterward sagging off another 1/c on moderate offerings, the local crowd being more inclined to sell short; at the decline the demand improved greatly, but the market recovered 3,22% of the

break, changed some, and ruled steady at the close.

Outs in the cash market were dull and nexlected. This served to depress the speculative market, and pressure to sell carried down the price 16%. Later there

neglected. This served to depress the speculative market, and piessure to sell carried down the price 18% Later there was a fair recovery.

Provisions ruled strong, so strong that the bull clique imagined for a moment that October ribs could stand alone. They were quickly undeceived when they saw it tumble \$i per 100 in a minute or so and had to lift it again and carry it. Wright bought very heavily of January pork, his purchases on the call being reckoned to amount to about 10,000 barrels. He likewise took liberally or November pork and ribs. The International Packing Company sold November pork freely. Pardridge took a hand on the bear side of January pork and the Hatolys were seliers of lard. Prices had heavy and frequent fluctuations in pork, but the market was at its best toward the close. Lard was weak and closed lower than on the day before. Ribs closed 25c lower for October, 2½c off for November and 7½c higher for January. Pork at the close is from 12½ to ble over the final quotations of the day before.

BREAK IN AIRBRAKE

And a Recovery in Philadelphia Company the Features.

DUQUESNE A LITTLE WEAKER

and All the Other Leading Shares About Steady and Unchanged.

LOCAL AND GENERAL FINANCIAL NEWS

TUESDAY, Oct. 25. The local stock market was moderately active and interesting to-day, but in the main it was weak, though here and there a stock that has been weakest of late showed something akin to strength. In this class Philadelphia Company was prominent, with a recovery to 211/4 sales, a close at 211/4@ 21% and a bid of 21% for a small lot after the close. There seemed to be some pretty good orders in to buy and at the close it looked as if the 'stock would recover a fair percentage of its recent loss before the end of the week. Boston is nibbling around on the buying side again, it is said, and if anything develops to scare the shorts, which is said to be probable, the recovery will be very sharp. The conspicuously weak spot of the list was Westinghouse Airbrake, which sold down to 132 and closed at 130½ 131, the depressing influence being set forth below. Duquesne traction was also notably weak, selling at 28½ on call, at 28½ after call and with more offered at the same price. P. & B. traction was possibly somewhat firmer, but nothing else underwent any appreciable change. The list, as a whole had an unstable look, the only redeeming, features being the recovering tendency shown by Philadelphia Company and the steadiness in Luster, Switch and Signal and United States Glass.

Movements on 'Change. the buying side again, it is said, and if

Movements on 'Change. The first call was monopolized by Phila-delphia Company and Pleasant Valley rail-way, the former selling at 211-62114 and the latter at 25%, generally in small lots. Phillie subsequently sold at 211/@211/4, closing at 211/20211/4, and P. V. at 25% closing at 25/4 bid. P., A. & M. traction sold at 44% and more could have sold at the same price. Bemore could have sold at the same price. Between calls Airbrake sold at 132 and at the close it was quoted at 130½@131. Duqueene traction sold at 28½ at the third, Pcople's Pipeage at 15, and Chartiers Valley Gas at 12½. After the call 50 shares Duqueene traction sold at 28½ and 50 shares more were offered at the same figure.

Westinghouse Electric second pre'erred was quoted at 37,373½ and the scrip at 94,385. After the close one of the brokers offered to trade in Switch and Signal at 18½ either way.

way.
Unlisted street railway shares closed as follows: P. & B. traction, 243,@25; Duqueshe traction, 285,@285; P., A. & M. traction, 44% @44%

It developed to-day that the weakness of Westinghouse Airbrake was caused by an advertisement of the New York Brake Company, embodying a letter from Vice Presi dent Webb, of the New York Central Railroad Company. In this letter Mr. Webb says, among other things, that "there is no difference between the operation of the Westinghouse airbrake and the airbrakes of the New York Airbrake Company."

The Disparch does not think the investors in Airbrake have anything to fear from the New York Brake Company, and the Westinghouse people are serenely confident. The price of the stock may decline further as the result of sales by those who believe they can get their stock back at lower prices, but the price of the shares will have no effect on the dividend paying power of the company. It is a dangerous stock to short, as there is no telling what morning a short may wake up to find a 10 per cent dividend staring him in the face.

Mining Shares.

The story about Enterprise Mining Com pany, printed exclusively in THE DISPATCH. day, but the stock was not mentioned on 'Change. Friends of the company were in-clined to believe that the situation had been exnggerated and that Messrs. Crawford, Posey et al and their plant were all right. "George Crawford has had along and varied experience in the mining business," said one of them this afternoon, "especially the legal end of it, and they are not likely to take any steps in the dark. I think you will find they are all right and will continue to do a paying business at the old stand for some time to come."

A telegram was shown on 'Change during the last call, announcing the fact that the company had declared the regular monthly dividend of 2 per cent, or 10 cents per share, which is evidence that the company is still making a little money either on their own or some other property. exnggerated and that Messrs. Crawford,

which is evidence that the company is shift making a little money either on their own or some other property.

The Mining Lalustry and Tradesman, of Denver, just at hand, however, corroborates the Rico Actes, and calls Messrs. Crawford, Possey, et al. some very bad names, in conjunction with reference to shooting and penitentiary that are quite characteristic of the wild and woolly West.

The Yankee Girl, of Ouray county, Col., during its past fiscal year, sold 4,683 tons of ore, which averaged \$36 12 per ton, and the net result was a loss of \$33,596 50, or \$8 22 per ton. To meet the loss and provide for the inture, the company issued \$50,000 in bonds. The mine is looking better than it has for a year, and gives promise of again becoming a profit payer. A new discovery of rich ore has been made near the surface, about 200 feet from the shaft northeast toward the Guston, and it promises to yield well.

The Secret Service Division has discovered a counterfeit of the new issue of the & silver certificate, series 1886, check letter B 2255. W. S. Rosecran Register, James W. Hyatt Treasurer. The most marked difference between this note and the genuine, and a difference which will result in the detection of the counterfeit at a glance, is that the upper loop of the J in James, in the signature "James W. Hyatt," points directly between the D. C. after Washington in the genuine, while in the counterfeit is is about one-eighth of an inch to the left, or immediately under the letter D.

There ought to be enough money in this country to pueet all possible requirments. At the beginning of this month the amount of money in circulation—in the hands of the people—was about \$6,000,000,000, 785,000,000 more than at the beginning of October in 1891. Of late the Northwest has been drawing large amounts of currency from Chicago banks, and this is resulting in firmer rates of interest. Loans are made at 5 to 6 per cent. Grain shippers and carriers are large borrowers, and packers are asking for considerable assistance.—Chicago Tuses.

BUTTER IS BOOMING.

The Elgin Board Establishes Another Ad-Country.

TUESDAY, Oct. 25. As foreshadowed in this column yesterday Elgin butter quotations were advanced 1c per lb. at the meeting of the Elgin Board on Monday, and one result will be a corresponding advance here the latter part of the week. Prices are still too low, it is said, because they are below the parity of export, and as dealers here are only getting about one-third enough for their trade, it follows that the condition of supply and demand

justifies a still higher range.
All grades of roasted coffee were advance %c per lb. to-day and the market was quoted strong at the advance. Following is the last statement of the supply of Brazil coffee in stock and affoat: Total stock in New York, 185 189; total stock in Baltimore, 3,020; total stock in New Orleans, 26,682; total stock in United States, 214,881; affoat from Rio per steam to October 22, 205,000; affoat from Rio to sail October 23, 17,000; affoat from Santos per steam and sail to October 23, 1200. affoat from Europe to October 3, 1,000. Total, 557,861. Same time last year, 549,474.

"Potatoes are too low at 70@75c per bushel," said one of the produce commission men to-day. "Prices have advanced 3@ 4c per bushel in the country, and we must get 50@55o per bushel here or eise do business for nothing. It looks to me as if the market was going to be higher."

Apples seem to be on the eve of doing better. There is less poor stock on the market, the range of prices is not so wide and all stock is rather firmly held.

Eggs are steady, but poultry, while about unchanged in price, is easy under continued heavy receipts. strong at the advance. Following is the last

neavy receipts.

Everything in the line of grain, feed and they continues weak and depressed under Everything in the line of grain, feed and hay continues weak and depressed under heavy receipts.

Too much grain in sight and a too rapid accumulation in elevator stocks are causing continued weakness in prices. At last accounts the visible supply of grain cast of the Rocky Mountains was about 55,000,000 bushels of wheat, 12,170,000 bushels of corn, and 7,550,000 bushels of cats, an increase over the preceding week in each instance, the increase of wheat being about 4,000,000 bushels. The visible supply at the same time in 1890 was only 18,607,000 bushels of wheat and 3853,000 bushels of corn, while in the phenomenal year of 1891 the supply apparent was about 24,000,000 bushels less of wheat and about 4,000,000 bushels less of corn.
