Pale People, are well known, were pleased to have the opportunity of bearing testi-mony to the high character of Mr. Quant, and of verifying the story of his recovery from the terrible affliction from which he had for so long a time been a sufferer. Truly, the duty of the physician is not to save life, but to heat disease. The remarkable result from the use of Dr. Williams' Pink Pills in the case of Mr. Quant induced the reporter to make further inquiries concerning them, and he assertained that they are not a patent medicine in the sense in which that term is generally used, but a highly scientific preparation, the result of years of study and careful experiment. They have no rival as a blood build-er and nerve restorer and have met with unparalleled success in the treatment of such

liseases as paralysis, rheumatism, sciatica,

St. Vitus' dance; palpitation of the heart, that tired feeling which affects so many, and all diseases depending upon a watery con-dition of the blood or shattered nerves. Dr. Williams' Pink Pills are also a specific for troubles peculiar to females, such as suppressions, irregularities, and all forms of weakness. They build up the blood and restore the glow of health to pale or sallow cheeks. In the case of men they effect a radical cure in all cases arising from mental worry, overwork, or excesses of whatever

On further inquiry the writer found that these pills are manufactured by The Dr. Williams' Medicine Co., Schenectady, N. Y., and Brockville, Ont., and are sold in boxes (never in bulk by the hundred), and 50 cents box, or six boxes for \$2 50, and may be had of all druggists or direct by mall from Dr. Williams' Medicine Co., from either address. The price at which these pills are sold nakes a course of treatment comparatively inexpensive as compared with other remedies or medical treatment.

DENVER, Oct. 28.—The great National Convention of the W. C. T. U. held its first session in this city to-day. The time was occupied by the usual addresses of welcome and responses, reports of officers and the very interesting address of Miss Willard, the President. The following are the most striking points in the address: It has been stated by military experts that 40 well trained soldiers are able to resist 10,000 who have no discipline. If the tem perance army, compared with the great army of the world, is as small as this com parison—the figures being 40 and 10,000—would indicate, and no doubt it is, we must remember that those who have their hearts set as a flint, those whose eyes look straight on and who have caught step one with another so that they march in an unbroken host, must in the nature of things make mighty inroads on the great mobocracy of thoughtless, ignorant, carcless opponents, who, except when they are drinkers and sellers of drink, need but the arrest of thought to bring them to our ranks. It is for this reason that the woman's temperance movements are without a parallel and without a peer; but it does not expect to win through any sleight-of-hand. It does not expect to surprise the enemy by skirmishes or night attacks; but in the strong light of reason, conscience

States Claimed for Prohibition. South Carolina has shown its colors in a

Fair Woman as a Political Force. The recent national census has facts enough to furnish for temperance, labor and suffrage reforms for the next decade. I wrote recently to Hon. Carroll D. Wright, Commissioner of Labor, asking him to give me the number of women of foreign and native birth in the United States. The native birth in the United States. The answer showed the proportion of native to foreign born women is as six to one. We talk about the decadence of national spirit, the outerop in our legislation of foreign principles and purposes, but all the while we have in America a reserve force of native brain, opinion, education, patriotism, and we have neither the wisdom nor the statesmanship to utilize this mighty mass of power. To-day, in the homes of America, among its teschers and its working women, are the ballots for which our purblind statesmen imagine themselves to be looking.

AS INCURABLE The Remarkable Experience of Chas. Quant as Investigated

GREAT PLEA FOR FEMALE SUFFRAGE of a most remarkable-indeed, so remark able as to be miraculous-cure of a mos severe case of locomotor ataxia, or creeping paralysis, simply by the use of a popular remedy known as "Pink Pills for Pale Peo-N. Y., and Brockville, Ont. The story was to the effect that Mr. Charles A. Quant, of Galway, who for the last six or eight years has been a great sufferer from creeping paralysis and its attendant ills, and who had become utterly powerless of all self-help, had, by the use of a few boxes of the Pink Pills for Pale People, been so fully restored to health as to be able to walk about the street without the aid of crutches. The fame of this wonderful, miraculous cure was so great that the Evening Journal reporter thought it worth his while to go to Galway to call on Mr. Quant, to learn from his lips, and from the observation and testimony of his neighbors, if his alleged cure was a fact or only an unfounded rumor. And so, he drove to Galway and spent a day and a night there in visiting Mr. Quant, getting his story and interviewing his neighbors and fellow-townsmen. It may be proper to say that Galway is a pretty little village of about 400 people, delightfully located near the center of the town of Galway, in Sarafaith, it does expect to put to rout the armies of aliens—those aliens of appetite, ignorance and greed which form the only hope of whisky-makers and beer politicians. laws compelling the detention of drunkards within these frieddly wails, where work should be provided for them and every effort made to give them back to the self-control which they have thoroughly lost. It seems to me that it would be well to establish an institution of our own in which the entire management would be in the hands of competent women physicians who are philanthropists as well as specialists.

There is no object that we White Ribboners so much desire to photograph upon the brain of every voter as the American saloon. It is a larger picture in this country than it can be in any other, because we are the largest of republics. The most portentious factor in American polities is the saloon. The saloons in New York City control the votes of 40,000 ones, and these 40,000 constitute the balance of power, so that we have 20 men who can swing the vote of New York City; but as the city goes so does the State, and as the State goes so does the nation.

If we could we would do more. It is idle to say that the prohibition movement is not one of continual progress. We admit that we have passed the stage of enthusiasm and are now advancing with the sturdy steps of veterans. The Province of Manitoba, by a plebiscite, has recently declared by a large majority in favor of prohibition, and its Legislature is practically certain to pass a law to that effect.
