PRISONS AND THE ORDERS FOR SIBERIA

(CORRESPONDENCE OF THE DISPATCH.)

ST. PETERSBURG, Oct. 23. CAME TO Russia fully armed for contact with the police. I have letters from Mr. Byrnes, the superintendent of the police of New York City, recommending me to the protection and confidence of the policeman of Russia.

These letters have been of value in giving me an insight into the police systems of this nation, which is said to have the best regulated and the most perfect police system of the world.

The head of the third section or the detective service of this capital, together with the Chief of Police, control all matters relating to the sanitary and political conditions of the city.

Petersburg. Filled away in the pigeon holes of their offices is the record of every suspected person in the empire and their system is such that they can turn in an instant the electric light of police investigation on the record of almost any man in the world.

And still one might travel all over Russia and hardly know that the police exist. Outside of complying with the passport regulations, which are attended to by the managers of the hotels, you do not meet the police more here than in any other European city.

Police Do Not Molest Travelers. I am convinced that the traveler who needs his own business will go about it without fear or travel just as he would in any part of Europe.

The military and the police work together in Russia and the Chief of Police can call in the Cossacks to help him. The chief of the third section here is practically the Governor of the city.

guard elixir to bolster up his waning health. The present Chief of Police is a fierce-looking man of about 40, who is a more pompous man than Gresser was and who does matters in a business way.

Two Thousand Guard St. Petersburg. The police force of St. Petersburg consists of 2,000 men. The city is divided up into 42 police districts and each district has a police station, with which is connected a separate color from those of the other stations.

The 2,000 policemen of St. Petersburg wear uniforms. There are tens of thousands of other men employed by the police who dress in citizens' clothes, and every house in St. Petersburg has its police agent and spy.

The streets are well kept. These dvorniks have a sort of trade union among themselves and they are governed by a chief, and this chief is a member of the police and, to a certain extent, responsible for the actions of the dvorniks.

It is the same with theaters. One here in St. Petersburg had not as many exits as the police considered necessary. The manager was playing a big engagement when he received an order from the police to remedy this defect and make the house safe.

Women Must Get Husbands' Permission. The passport bureaus are all under the police. Every man and every woman in Russia must have a passport, and if they move from one place to another or from one house to another this passport must be used by the police.

The political campaign has been one of education. So has our fall trade proved an education to the public of what constitutes really cheap furniture.

A Famous Chief of Police. The military and the police work together in Russia and the Chief of Police can call in the Cossacks to help him.

carried mine constantly in my left breast pocket. I have never had it called for, however, but it is, I am told, necessary if one would get checks cashed at the banks or letters at the postoffice.

The Police Do Not Get Rich. The policemen of Russia are not very well paid and salaries are very low throughout the Russian Empire.
