The Tidal Oil Company, which recently purchased the bulk of Greenlee & Forst's leases in the McDonald field, has rurnished a set of magnificent offices at Noblestown, and will make that point its headquarters for all of its off business in Pennsylvania. Reports from its upper country property will be forwarded to Noblestown, and from thence to the home offices of the company in New York. Yesterday the officers of the company made locations for Nos, 6 and 7 on the Gladden farm, half a mile south of McDonald. The Noblestown office will be in charge of John L. Hunker, and Mr. Jones, recently with the Forest Oil Company.

STRONG TO BUOYANT

Bears Try to Depress the List but Score a Signal Failure.

THE TRUSTS LEAD THE ADVANCE

And Are Followed by the Low-Priced Shares and the Specialties.

A FIRM CLOSE AT THE HIGHEST PRICES

NEW YORK, Nov. 22 .- The market, after a comparatively quiet opening and various attempts on the part of the bears to depress the list, became strong and buoyant, Operations in the leading railway stocks were on a small scale, and the fluctuations, as a rule, were confined within narrow limits. As a result of the bearish demonstrations, prices at one time showed a decline from yesterday's closing of 1/2 to 3/4. Subsequently the losses were more than recovered, New England rising 11/4, Reading and Burlington and Quincy % and the others % to % per cent. While these changes were in progress there were some decisive movements in the specialties and industrials, these being, in fact, the leaders in the day's operations.

Wheeling and lake Eric common scored a rise of four points and St. Paul preferred

Wheeling and lake Eris common scored a rise of four points, and St. Paul preferred moved up one on tree purchases. Among the other low-priced shares that were prominent in the dealines were Colorado Coal, Chesapeake and Ohio, Green Bay and Winona, Kansas and Texas, and Ohio Southern, which rose ½ to 1½ per cent. Manhattan Elevated soid up to 1½, Laclede Gas preferred 1. Chicago and Eastern Illinois common 2% and Louisville, New Albany and Chicago 1½ per cent. Eric common declined from 26½ to 25½ and the preferred from 62½ to 58. Near the close the common recovered to 26½ and the preferred to 60½. The greatest advance was scored by National Cordage common, which sold up 2½ in the regular way to 130½ and to 141, "under the rule." The purchase of a small amount "under the rule" was due to a lailure to deliver the stock. Distilling and Cattle Feeding advanced 2½ to 68½. American Sugar 2 to 110%, and Chicago Gas 1 to 97½. United States rubber common was leverish, decling the for 45 to 45 calling to 45 and treet. States rubber common was leverish, declining from 45 to 45%, rullying to 45, and renering to 44. J. S. Bache & Co. to Oakley & Co.: "Sugar and whisky led the rallies—the former on the rumor that the next dividend would be advanced and the latter on the covering of a line of 5,000 shares. The short interest is said to be very heavy in this stock, and manipulation is putting it up in hopes of queezing the shorts. The stock will be advanced until these people cover, and then it will be a sale, as we hardly think it is worth what it is selling for at present. Reading will be a sale, as we hardly think it is worth what it is selling for at present. Reading was favorably affected by the rumor that the New Jersey Htlgation against the combine, which was set down for Friday, will be postponed again, and there was also some talk that an understanding had been reached and the suits would be peaceably settled. We think the short interest will be made to cover to-morrow morning and produce a further raily, but unless Europe bays stocks to-morrow gold will go forward on Saturday, and this will probably bring about a reaction again."

Wheeling & L. E., p'd 63 606 63 635 625 PROVISIONS SLUMP.

And the Cereals Show a Slight Drooping Tendency.

CHICAGO, Nov. 22.-Cudahy & Wright today disposed of a considerable portion of their holdings of pork and ribs. A slump of 85c in pork, 25c in lard and 17%c in ribs was largely a result of their action. Pork and

largely a result of their action. Pork and largely a result of their action. Pork and larged at the close had recovered 12½c of the decline and ribs 5c. The grain markets were dull after the first hour of session and closed a shade lower than yesterday.

Wheat opened a shade higher, influenced chiefly by the decrease in the amount on passage and the free exports from the seaboard, but the free deliveries in the Northwest and reports that the deliveries would only be restricted by the scarcity of cars, made a weak feeling. Another thing used to depress the market was the reports that the friends of the anti-option bill were preparing to push that measure through Congress as soon as that body convened. Cables were also weak, and in some positions lower. All this, in connection with the exceeding dullness and narrowness of the trade, promoted a decline. The visible supply was the largest on record. The market recovered somewhat on the small receipts estimated for to-morrow.

Corn was extremely slow and the market boost featureless. The weakness in wheat

range of \$\frac{1}{2}c\$ in fluctuations. The close was easy at \$\frac{1}{2}c\$ decline from yesterday for May and at a loss of \$\frac{1}{2}c\$ for December.

The provision market opened weak and at considerably lower than yesterday's closing prices. The hog receipts were heavier than had been looked for by as many as 9,000 head. The market for hogs was described as firmgarly and weak and lower later. The Liverpool market was quoted is higher for lard and firm for meats. Wright was one of the beaviest sellers of ribs early. He disposed of about 1,000,000 pounds and gave up Gudahy & Co.'s name on his sales. He and Cudahy were both sellers of January and buvers of May pork.

Freights were quiet, with little demand for vessel room at 2½c for wheat and 2c for corn to Buffalor some of the large boats are laying up rather than accept present rates.

TUESDAY, Nov. 22. Trading in local securities was again moderately active on 'Change to-day, but he market was quite narrow and developed few features of real importance. P. & B. traction was stronger under a continued good demand; Citizens traction was weak early and fractionally stronger later and Luster and Union Switch and Signal gained small fractions. United States Glass common was bid up to 66%; Airbrake was steady to firm at 132 bid; Underground Cable was held at the usual range, 75@76; gas shares were barely steady and others were featureless. The character of the buying of P. & B. traction was quite encouraging to those who are working for higher prices. Considerable of the stock was picked up at 243/@243/ regular and 25 buyer-90, and there was a market for several hundred shares at 24%. At least one broker had an order for 000 shares at that price. A good deal of gossip was indulged in about the showing made at the annual meeting of the Citizens Traction Company, and the tenor of it all indicated that the figures presented had made a very good impression indeed, particularly those with reference to the cost of operating the road. A number of little things, and one or two pretty big ones, of which some of the street people were contignt, were not brought out by such figures as were obtainable for publication; but the report read will soon be sent out to stockhoiders in pamphlet form, and it may be that the few points on which some appear to be belonged will then be satisfactorily explained. There was also a little gossip relative to a shortage of gas in certain portions of the city, but it was lacking in definiteness and was apparently without effect.

town of McDonald, is as rich as that to the northeast.

In the territory which is now known as the old McDonald pool, the rich belts were long and exceedingly narrow. At no place had they a width of more than a few hundred feet, and outside of these rich belts the territory was not remarkable for big wells. For every gusher there were from 12 to 20 small wells drilled, but the astonishing feature of the field was the fact that the first wells were in nearly every case the big ones.

First Test Wells No Good. ales on the Elgin Board at a Decline of Cent From Last Week-Coffee Excited and Strong-An Active Movement in Poultry-Grain Somewhat Firmer, Tupenay Nor 99

On the Elgin Butter Board yesterday sales of creamery butter were made at a decline of le from last week's prices, and a corresponding decline will occur here the latter part of the week. Creamery had reached a point where consumption was diverted to country butter, and a reaction in the former was inevitable.

the trade in general had become disgusted with that locality and declared that it was no good. Later developments have proven the contrary.

One of the owners of the Reed farm well, which was drilled nearly a year ago and showed a little oil, stated yesterday that another well would probably be started on this farm soon, but to the east of the first one. This well is almost a mile and a quarter southwest of the Sc.tt farm, and a few hundred feet west of a 45-degree line from the big Scott wells. The general coffee market is excited and strong. The latest reports from the growing crop at Rio and Santos is that the crop is not only small, but that there must be a is not only small, but that there must be a great scarcity of labor in gathering it. The laborers that have been in that part of the country, and were the main dependence for gathering the coffee crop, were largely Italian and Portuguese, and they have found the climate too much for them, and have gone farther south to escape the heat. This has leit many of the coffee plantations without laborers for harvesting the crop. The latest reports are of a very firm market, with prices higher. The feeling in the New York market is very firm, following this firmer position in the producing countries. The demand for consumption has been great for the past six or eight months, and the stocks on hand are actually small. Strong opinions predict a still further advance.

vance.

There was a very liberal movement in poultry to-day, with turkeys most active. Live turkeys sold at 11@12c per 1b, and dressed at 14@17c, according to the way they wore dressed, full dressed, nicely packed stock bringing the outside price. Chickens and ducks were in fair demand and geese were rather slow. A slightly higher market is predicted for Wednesday, though the indications pointed to heavy receipts. Grain is firm and flour weaker and dealers say there is bound to be an early advance in flour.

The many improvements which have been under way for some months past in the pretty borough of Ben Avon are about completed. Four and one-half miles of thoroughfare have been opened up, graded and widened. Sidewalks have been laid, and, in fact, the borough has been improved in general.

It is reported that the Woods estate will erect 60 more houses in the West End, making a total of 100 dwellings to be built by this estate. Twenty of the houses are already in various stages of construction.

The paving of Penn avenue, Wilkinsburg, Table 10 this long sought for improvement by residents of Wilkinsburg, quite a number of new houses will be erected. Major J. M. Schoonmaker will erect 18 dwellings at once.

Drygoods.

Drygoods.

New York, Nov. 22.—While the demand for drygoods has abated in accordance with the more or less full supplies seapred by the larger class of buyers, there confinues to be presented for cottone especially a good volume of demand from others in the trade who have yet to cover future wants. Agents to a considerable degree endeavor not to make sales too far ahead, but goods have reached a point of remarkable scarcity with the inevitable consequence of higher prices, Agents to-day made the following price changes: All Atlantic cottons were placed "at value." Amory sterling advanced 5 per cent; Utica wide sheetings on the basis of 28½ for 104 styles, and New York mills wide sheetings also on the basis of 28½ for 104 goods. Medium and fine 38-inch bleached goods have a further upward tendency.
