Make a small deposit on what you select and we will put it away for you until the holidays. Those who come earliest get the first pick.

UNCLE SAM'S PURSE.

Treasurer Nebeker's Annual Report Tells Just What Is in It.

THE DEBT IS \$40,000,000 BIGGER

At the End of June, 1892, Than It Was at the Same Time Last Year.

PECULIAR MOVEMENTS OF GOLD COIN WASHINGTON, Nov. 27.-The Treasures of the United States, Hon. E. H. Nebeker, has submitted to Secretary Charles Foster his annual report. The net ordinary revenues of the Government for the fiscal year were \$354,937,784, a decrease of \$37,674,tail as compared with the year before. The net ordinary expenditures were \$345,023,330, n decrease of \$10,349,354. The surplus revenues were thus cut down from \$37,239,-762 to \$9,914,453, including the public debt. The total receipts for the year were

\$736,401,206, and the expenditures \$684,019,-Considered with respect to the effect upon the Treasury, the receipts are divided into two general classes, of which the first, comprising the ordinary revenues, the receipts from loans and the deposits for the retirement of national bank notes, increases for the time the cash available for the United States and the Government; while the second, arising from the issue of gold, silver and currency certificates, United States notes and Treasury notes, tends to swell the assets of the Treasury, but does not affect the

available balance. Interest Amounting to \$14,000,000. For the first of these classes the figures show an excess of \$88,000,000 of expenditures over revenues in 1891, and one of upward o \$27,000,000 in 1892. In the second class there was an excess of nearly \$69,000,000 of receipt in the former year and one of \$80,000,000 in the latter. As compared with 1891 there was a saving of upward of \$14,000,000 of interest,

out of which a surplus was realized, not withstanding the cutting down of the reve withstanding the cutting down of the revenues by legislation.

On June 30, 1891, there stood charged to the Treasurer on the books of the Register a balance of \$726,222,382. Adding thereto the revenues of the year from all sources gives a total of \$1,462,623,625 to be accounted for. Out of this was disbursed by warrant a total of \$58,019,290, leaving a balance of \$778,694,339 charged to the Treasurer on June 30, 1892. In addition, there were other liabilities arising from the postal revenues, from the deposits to the credit of disbursing officers, from the per cent fund for the redemption of lational bank notes and from various other sources. These, together with sums of money collected but not yet charged to the Treasurer on the books of the department, brought the total liabilities up to \$777,54,945 at the former date, and to \$815,631,638 at the latter.

Analyzing the true condition of the Treas bry, and setting aside the trust funds, the reasurer shows that there was a working minnee of cash and deposits in banks amounting to \$207,110,451 at the beginning of the year, and to \$165,718,150 at the end. Of the former amount, \$119,000,000, and of the latter, \$114,500,600 was gold. The success which has attended the efforts of the de-partment to maintain a strong gold reserve is considered satisfactory, in view of the

lisbursements, mount of the public debt is given as 5 351 on June 39, 1891, and \$1,56*,464,144 1892. The loans resting on the credit nived States were cut down from 1890 to \$365,215,840, while those secured posits in the Treasury increased 8540, 19 | 851 to \$620,245,304. on 8340,191031 to 8620,245,304.

Let was a gratilying improvement in a condition of the debt produced by the duction of the interest-bearing loans, the inversion of instured bonds into others yable at the option of the Secretary of easily and the extinction of a consideration of the loans payable on demand, he total net reduction of \$7,587,719 in these has was effected by the application of the characteristics because its of the very amounting to 10.000,000, together with upward of

00 000 taken from the cash in the treas-According to the revised statutes, the total According to the revised statutes, the total stock of money of all kinds in the country June 20, was \$2.374.334,049, an increase of \$50.500.000 in the year. By eliminating that part of paper currency which is purely representative, consisting of certificates of deposit and Treasury notes, the effective stock is found to have been \$1,753,953,745, an increase of \$70,000,000.

Concerning the Movements of Gold. The monetary history of the past year, however, has been peculiar, both in the nts of gold, which have been in creased, and the other changes that commonly occur with the changes of the seas ons, but have this year been less marked. The increase of the effective stock of money from September to September was only \$50,-

Discussing the changes in the amount and composition of the money stock, the Treasurer finds that the increase which marked fiscal year was the result of the pro-tion of nearly \$17,000,000 in gold in excess instrial consumption; a fresh issu of the industrial consumption; a fresh issue of \$5,000,000 of national bank notes, together with the change in the stock of silver. Of the aggregate stock of money at the end of the fiscal year, \$771,352,318 was in the Treasury and mints, leaving \$1,601,881,736 in the hands of the people. The holdings of the Treasury locreased \$50,000,000, and the amount in circulation \$100,000,000 during the \$100,000,000.

Figures are given to show that each year during the last ten there has occurred in January a more or less dimunition of the gold reserve of the Treasury, averaging early \$10,000,000, which has been succeeded in February by a tendency toward recov-ery, It is shown that the drain has oc-curred yearly in the face of a gain of gold both to the Treasury and to the country.

How the Gold Reserve Is Depleted. It thus appears that the depletion of the reserve is the consequence of the increase of the circulation of gold certificates, and this, it is shown, grows out of the difficulties which the Treasury encounters in the re-

which the Treasury encounters in the return of the notes and silver certificates of small denominations which were sent out in the autumn for moving the crops. The movement sets in strongly after the 1st of January through the sub-treasures, whence the notes, being more or less worn and of denominations unsuited to city use, are sent to Washington for redemption. The shipment, redemption and destruction of the old notes and the issue of new, take time. Before the Treasury can make the conversion the sub-treasuries are drained and the Treasury has nothing but gold certificates to send them. In this way, gold reserve suffers until a working balance of other material can be got to ether.

The issues of United States paper currency amounted to \$376,786,583, exceeding those of any previous year. Of the whole amount \$296,000,000 took the place of like hinds and amounts destroyed, while \$78,000,000 consisted of fresh issues. The Treasurer remarks that it would seem to be the proper policy to make provision for the periodic changes, which appear to be natural, both in the amounts and the denominations of the paper currency required by the people. Partly in consequence of the improved condition of the coins themselves, and partly as the result of a more liberal plan of distribution, the Treasury between June 30, 180, and September 30, 1892, reduced its holdings of fractional silver by no less than 57,000,000.

57,000,000 More Silver to Leave the Treasury. A still further reduction is expected to be rentized in consequence of the recoinage proposed for the remainder of the current year, and in particular from the manufacture of the Columbian half dollars. There

are of the Columbian half dollars. There has been a slight decrease in the amounts of counterfeit silver coins and paper currency presented at the Treasury, and the larger tant legislation is contained in the most of Congress, approved July 28, 1892 which provides that all national bank notes is seed to or received by any national bank shall be redeemed as provided by the revised statutes, 'not withstanding such notes have been lost or stolen from the bank was here been lost or stolen from the bank a isoff statutes, 'not withstanding such notes that have here been lost or stolen from the bank and put in circulation withou the signsture of upon the forged signature of the president or vice president nad cashier." The immediate effect of this emettment is to provide for the redemption of certain incomplete notes which had been issued by the Treasury Department to the hanks whose title they bear, but had been stoken and put into circulation before havstolen and put into circulation before hav-ing been signed by the bank officers. In connection with earlier provisions, this inclinent makes redeemable all impres-

ions of the genuine bank note places known a be extent. More Bond Securities in the Banks There was an increase of over \$20,000 and States bonds held for the security

national bank circulation, and a decrease of \$10,000,000 in the amounts held as security for public deposits. A total addition of \$1,684, 000 was made to the par value of the securi-ties composing the Pacific Railroad sinking-funds. In proportion to the volume of national

In proportion to the volume of national bank notes in circulation the redemptions continue heavy, having amounts to upward of \$69,000,000 in the fiscal year. A change of the regulations has been made, by which fragments of notes, valued by the Comptroller of the Currency at less than face, are received unconditionally from the holders at the certified valuation.

The Treasurer closes by calling attention to the labors of the commission appointed to investigate the methods of safe and vault construction, with a view to improving the vault facilities of the department. The Treasurer urges that prompt steps be taken to carry their suggestions into effect.
