THE MANAGEMENT OF THE CENSUS

Warner Miller's Nicaragua Canal Scheme

Is 6iven a Boost.

MORRONS ARE BEHAVING VERY WELL WASHINGTON, Dec. 4 .- The annual report of Secretary Noble to the President is

an interesting document, covering fully and in detail the operations of the Interior Department. The volume of work accomplished during the present administration is shown to greatly exceed that of any like preceding period in the history of the de-The following extracts cover features of the most general interest: The policy of making forest reserves in

the Western States and Territories has been greatly advanced during the past year. Six uch reserves have been created by Presidental proclamation, making an area of 3,252,200 acres. This policy will be further carried into effect and will be most beneficent and far-reaching in its results. The Secretary recommends that these forest preserves should receive protection from

Educational work among the Indians has been greatly increased and improved in efficiency. There has been an increase of over 18 per cent in attendance of children in the schools, the total for 1892 being 19,793 scholars. New Indian reservation boarding schools have been established during the present administration, and more are in progress, which, it is anticipated, will be opened soon. Non-reservation schools have also been established and others have been planned. Strict discipline has been en-forced and better education fostered.

Under the policy of Indian allotments, negotiations with 14 tribes during the present administration has resulted in the opening up for public settlement of nearly 26,000,000 acres of land. Other negotiations which are pending, will, when ratified, add 10,000,000 acres more. Allotments of lands in severalty to the Indians have been made in very large numbers.

What Was Done in the Census Office. The taking of the census in 1890 was recognized at the beginning as a most important and difficult task, but it has been accomplished. The census publications have been received with favorable indorsement

received with favorable indorsement throughout the civilized nations, and the work stands an acknowledged success and great scientific achievement.

The first year the Census Office was engaged in the work of organization, and preparing for the enumeration of the people. The official count of the population was announced in four months after the completion of the enumeration, and Congress was thus given a basis for a new apportionment nearly two years sooner than under any previous census. The population by minor civil divisions was given to Congress, complete, in December, 1891. The final report on nines and uning has been made; preliminary reports have been issued in agriculture: the tabulation of the acreage and production of cereals, the number and conditions of the Indians, the statistics of churches and religious denominations and o educational statistics have been completed and reported.

A mass of other statistics is now in process of completion, and much of it is already in the hands of the printer. With the ex-

cess of completion, and much of it is already in the hands of the printer. With the ex-ception of a sumil amount of work on vital statistics and ropulation and the statistics of bandlactories and agriculture all the regular work of the eleventh census is about complete. The farm mortuages report will be complete in about 12 months. The Secretary states that the work of the cological Survey has been carried on with coat efficiency. In the topographic branch 8,000 square miles have been surveyed dur-ing the past year, making a total of 600,000 mare miles surveyed up to the present

The Conduct of the Pension Office. It has been the policy of the Pension Office. as justice seemed to demand, to assign a larger portion of the official force upon original claims of those who were not receiving any pensions, than upon increase claims, and it is believed that if this policy be continued for two years longer the ad-

judication of the original claims of the office

current, and by that time the highest num-

current, and by that time the highest number of pensioners ever to be borne on the rods will have been placed there.

Under the provisions of the act of June 2, 1890, many claimants who were seriously dendled and living upon charity, but who could not establish service as the origin of disability, have been enabled to secure much needed assistance and financial relief. The results obtained through this legislation, and the great good it has done for the multitude of worthy claimants appears to have justified expectations of those who emacted it.

The Commissioner recommends the

enacted it.

The Commissioner recommends the appointment of an actuary to collate certain statistics relative to the question of the effect of army service upon the expectation of lives of soldiers and the probable duration of the pension roll which it is thought will be a valuable contribution to science. The estimates for the deficiency for this year are \$10,508,611, and the estimate for fiscal car engine June 20, 1884, 18,185,000,000. This enr ending June 20, 1894, is \$165,000,000. This based on careful consideration of all the

is based on careful consideration of all the factors entering into the question.

Under the direction of the Educational Bureau an effort has been made to propagate reindeer in Alaska through a lund subscribed by individuals, and the experiment promises to prove successful. The bureau lins issued building respecting former World's Fairs, the best method of preparing educational exhibits, etc., for distribution.

Utah, the Mormons and Polygamy. The Governor of Utah expresses his be-lief in the good faith and honesty of purpose of the Mormon leaders and the people, in their abandonment of polygamy, and their obedience to the laws of Congress on this subject. The Utah Commission seems this subject. The Utah Commission seems not to have so much confidence in the motive which compels observance of the law, but to believe that it is simply a suspension of the practice, under the authority of the Church, and that if it could be done law fully the authority of the Church would again be recognized, as revoking the cessation of the practice. But it is conceded that there is, with exceptional cases, a general recognition and observance or the law and the declarations of the efficials of the Church, and the proclamation issued under authority of the Church, seem to indicate the actthat the Mormon people have concluded to abandon forever the practice of polygamy.

polygamy.

An appeal has been made to the President for general amnesty for all Mormons who are under political disabilities by reason of are under political disabilities by reason of the majority polygamy. The for general amnesty for all Mormons who are under political disabilities by reason of violation of the law against polygamy. The pention pledges the people and the Church in distinct terms to loyal observance of the inw, and declares the devotion and loyalty of the people to the country and to the Government. One suggestive evidence of the decreasing power of the Church is the division of the people upon national party lines in recent elections.

A system of competitive examinations for promotion has been in operation in the department since January 1, 1892, under the President's order of December 2, 1891. The system has worked well and has resulted in securing better and more faithful service on the part of employes. Many employes in the various bureaus of the department have been promoted under the system.

As to the Nicaragua Canal Job.

As to the Nicaragua Canal Job. The progress of the work on the Nica-ragua canal has continued during the past year and some valuable feats of engineering have been accomplished, in the extension of the breakwater, and in the construction of the railroad across the swamp lands. Since the organization the company has expended for property, material and labor sticked 65 in cash, and \$3,192,000 in rull paid stock, and is obligated for \$6,855,000 of the first mortgage bonds, which latter are held by the Nicaragua Canal Construction Com-

The construction of the breakwater, re-The construction of the breakwater, referred to in the report of one year at , has resulted in the opening up of the channel into the port of San Juan, which had been closed for 30 years. The heaviest work on the whole line will be at what is called Eastern Divide, where immense beds of rock are to be romoved. The construction of the railroad to this point for the purpose of transporting the requisite machinery was one of the most difficult leats of the enterprise.

prise.
The Government of Nicaragua, by a communication in November, 1890, has officially recognized and declared that the canal common has more than complied with the provisions of the cession, and has thus formerly acknowledged and confirmed the company's title to the concessionary rights for a term of ten years in which to complete the canal. The secretary expresses the opinion that this enterprise is of the utmost importance

to the welfare of our county in either peace or wer, and should have most favorable recognition by Congress.

Aliska is virtually a thout an organized government. It is difficult to pusish perpetrators of outraces, and sinugglers infest the coast and debauch the natives. The Secretary recommends an appropriation for a steam police vessel to run along the coast and among the islands to which many fugitives escape.

The Report of the Secretary of War. Secretary Elkins' report says the army has maintained throughout the year its high standard of discipline and efficiency. He recommends a better organization of the infantry and a reorganizatian of the artil lery. He favors the revival of the grade of Lieutenant General. While the enlisted personnel of the army is, as a whole, very much better than at any time previous much remains to be accomplished in this ection before we can rest entirely sat isfied. Every possible effort has been made to secure the enlistment of desirable men. The recruiting service has been adminis-

The recruiting service has been administered with exceptional vigor and success. It is believed that our Indian wars are about at an end. The necessity of massing troops in the West no longer exists.

The importance of maintaining and improving the milities of the several States and the District of Commbis is generally admitted. The National Guard is the reserve force of the army. Attention is invited to the necessary appropriations for arming and equipping this reserve force. In 1898 the appropriations for the militia of the States was \$200,00. The highly improved arms and equipments of the present day cost for the same number of men more than treble what they did 88 years ago. The population of the country is using times what it was then, and the demand for these equipments has increased many times. An appropriation of only five times the amount appropriated in 1898 can hardly be considered extravagnut.

The plans or the War Department exhibit at the World's Columbian Exposicion are as nearly perfected as time and circumstaness will permit. All sections of the proposed exhibit are well in hand.
