Lafayette Hall was crowded last night for Franzis Murphy's meeting. About 100 piedges were signed. The meeting was full of interesting experiences. A man half tull of liquor jumped up at one stage of the proceedings and proposed three cheers for Mr. Murphy as dhis work. The cheers were not given, but the whole audi- ence applauded loudly. The man then said he believed in the sincerity of the men in the movement, and he walked up to the stage and handed Murphy \$5 to help cover the expenses. He also put on a blue ribbon and signed the piedge, but his name was withheld from publication. William Malone, a Noted Criminal, Died "here Yesterday. AS HE EXPIRED HIS PLACE WAS FILLED To-day there are more prisoners in the Western Penitentiary than were ever con- fined there since the institution was located in Western Pennsylvania. On a slate ly- ing in the office of the prison last night were inscribed these words: "The popula- tion of the Western Penitentiary to-day is 876." On inquiry it was found that this was the largest number the prison rolls ever contained. A peculiar thing about the make-up of this little imprisoned world is that there are only 23 female inmates. In the past year there have been but four deaths. The last man to leave the prison by this route was William Malone, who died yesterday. He was one of the 16 men confined in the hospital department, and since his admission there, eight years ago,	addresses, in which they professed their ability to stay sober through the influence of the Murphy pledge. "Shorty" Long was one of these, having signed last Satur- day. J. M. Kelly spoke. He said he recog- nized two classes of people in these meet- ings-those who came for sympathy and those who came in sympathy with the work. Both were wanted, needed and welcomed. Mr. Kelly, Mr. Murphy and Prof. Weeden went to Mansfield yesterday after- noon, held a good meeting and secured about 100 pledge signers. Mr. Kelly be- came interested in one of the men in at- tendance, who wanted to go to the Keeley Institute, and he provided him the means and took him there last night. LIEE A SPRING DAY. Yesterday's Warm Weather Almost Beach- ed the Becord of 21 Years. The unusually warm weather yesterday was the source of much comment for this time of the year. A visit to the Weather Bureau developed the fact that it is not un- usual, although the thermometer seldom	than 20 years will be judicially passed upon, and the county courts will be re- quired to determine whether or not the Mayor has power to direct the head of the police department in regulating or sup- pressing any crime or evil. Mayor Gourley yest erday submitted an answer to the letter sent him by Chief Brown the day previons. The Mayor's letter is constructed substantially on what is alleged to be the law and the ordinances. It is a pointed, interesting document. "There is nothing lett for me to say." Mayor Gourley remarked yesterday in an- swer to a question regarding his course should Chief Brown continue to disregard his suggestions. "There is no longer any reason for shifting about in this matter. There must be action," the Mayor want on. Will Take the Matter to Court. His Honor refused to say what he contemplated doing to guarantee action. His advisers, however, are confident that he will invoke the power of the courts in the matter within a reasonable time. How Much Time Is Spent.

The male prisoners are engaged each day making brooms, mats, hosiery and shoes, while the women manufacture shirts and underwear, and see that all wearing apparel is kept in proper shape. The penitentiary exchanges its products with the West ludies for the material used in making mats. There is also a good deal of the stuff disposed of in the far Western States. The

Putlman Palace Car Company buys mats from the penitentiary. Every evening at 5 o'clock the prisoners quit work, and by 6 o'clock they have fin-ished their supper. Three nights a week the inmates are allowed two hours to spend in their own enjoyment. At these times they are allowed to break the intense quietude of prison life by music, writing or reading, or in any manner they wish. There is a great diversity in the way these pleasure hours are used. In every cell candles are burning, and under their glare many can be seen reading or writing. t has been freely charged that all efforts heretofore to maintain rates in the bituminous coal trade west of Pittaburg have been thwarted by the attitude of the Columbus. Hocking Valley and Toledo Railroad Company. This company has professed to be willing to make agreements to main-tain rates, but has said that it could not control its producers. It is expected that the recent discussion will re-sult in the formation of an agreement among the local producers in which event the Hocking Valley will no longer have an excuse for creating disturbances of rates. The main provisions of the proposed agreement, as telegraphed from New York, are to form an independent association among the producers of coal on the line of each spect to an ordinance that has been assumed to be the law for almost a quarter of a cen-tury, and has been acted upon by you and your predecessors in hundreds, if not thou-sands, of cases, and is the very law under which you have suppressed, and are to-day suppressing, "unlicensed public dance houses" and "houses and places where intox-locating liquors are sold without license." railroad company, the association to regulate the apportionment of coal among its members and to place each member under a bond which will exact a heavy penalty should they violate any of the agreements of the association, the associa-tion to elect a reprentative to a central organization, the central organization to make all sales and to allot to the association on each railroad an amount in propor-tion to their tonnage in 1893. The Executive Council of the Supreme Lodge of Solon adjourned at 12 o'clock last night. After the benediction had been pronounced and the members left the hall Rev. W. R. Covert made a startling announcement. He said 16 of the officers were to be proceeded against criminally.

Mr. Covert would say little about the matter. He said there had been a conspiracy my some of the officers to rob the order, but the scheme had been learned in time and Solon was saved about \$100,000. For several weeks a detective has been in tricts for use in emergency. Dr. W. W. Cole, medical examiner for the order, last night handed in his resignation. He said that he had voluntarily resigned. It is alleged, however, that he was asked to resign.

Narratives of an Encounter.

A combat and attempted murder growing out of the disagreement among the Supreme Lodge officers of the Order of Solou was reported yesterday in sensational form. Rev. William R. Covert is quoted as authority for the story, which was to the effect that for the story, which was to the check that on Tuesday evening A. S. Mundorf and Benjamin Beatty, ex-Secretaries of the Supreme Lodge, had gotten into a dispute in the executive chamber. Mundorf, it was alleged, struck Beatty in the face with his fist and had picked up a heavy chair and was about to hit Beatty with it, when Mr. Covert, who was standing by, "interfered and prevented a murder," according to his own statement. Mr. Covert also claims that Mundorf threatened to shoot him. As attorney for the Order of Solon, Mr. Covert is quoted as shying he intended to prose-cute Mundorf for embezzlement and assault with intent to kill.

Mr. Mundorf and R. J. Godfrey both deny these statements absolutely. They are de fendants in suits of conspiracy and ember slement in connection with the Solon busi ness which comes up in court to-day, and accuse Mr. Covert of publishing sensational stories about them in order to influence the jury against them.

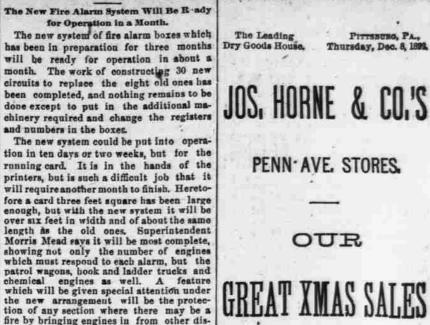

The Story of the Other Side,

They were seen in Mundorf's office in the Yoder building last night. Their wives and a sister of Mundorf were with them, having read the story printed. The ladies had been frightened at the account and feared their husbands might be in jail. Mundorf's father, a well-known Southside citizen, came in later and demanded to know what the story meant he too having hear fright. the story meant, he, too, having been fright-

Mundorf admitted that he had on Saturday last threatened to strike Beatty at a be late, but bearing before a committee, because Beatty insinuated he was a liar, but it was only a bluff and no blows were struck or in-tended. He claims he was not at any meeting Tuesday and did not see Covert in the evening.
