Advices from operating officers of the Rock Island Company to its office in this div are that current reports of the strike of telegraph-ers upon the company's lines are in the main grossiy exagerated, and that the company is experience-ing no inconvenience in transacting its business. The principal buying of the stock was by firms who would presumably not for those largely interested in the prop-erty. Their purchases are, it is understood, based upon the fact that the latest exten-sions of the system have become more than series and the fact that the catest exten-sions of the system have become more than series a substantial benefit from the reor-ponization of the Minneupolis and St. Louis halfroad. the dealings in Western Union were on a

NEW YORK, Dec. 9.- The stock market was all one way to-day and that in an upward direction. A majority of the traders left the street yesterday in a decidedly bearish of mind, the fear of gold exports hav induced them to go short of the active lway and industrial stocks. Distilling

It is reported from a very reliable source that the Duquesne Traction Company will extend its line via Bryant street to the Morningside district and along Morningside avenue as soon as the bridge which is to span Haights run is completed. Mr. John Peoples, of Lawrenceville, claims to have obtained evidence upon the strength of which he can begin suit for the posses-sion of a tract of land of considerable value lying within the boundaries of McKeesport. He claims that his cousin, Samuel Edmund-son, who owned much of the territory on which a portion of that city now stands, deeded some of the land to certain heirs, but that the iand to which he now proposes to lay claim was not mentioned in the bequests referred to. He therefore insists that the Edmundson heirs should have it. The prop-erty in question is valued at \$200,000. Building Permits. Three-lo cases..... Five-lb cases. Ten-lb cases. Mess pork, hevvy... FRIDAY, Dec. 9. The iron and steel trade has developed no particularly new feature during the past week. The approach of the end of the year tends to restrict purchases to immediate

wants, and consumers, who did not place orders during October for their requirements into the new year, are showing great caution in making contracts for any ma-terial in excess of their present wants, unless more satisfactory terms than those now in force can be secured. Since many of the leading producers have either sufficient orders on their books to carry them along into the new year, or have reduced their stocks to a favorable point, there is considered to be no advantage in stimulating business by concessions on quoted rates. The furnacemen point to the heavy consumption of all forms of iron and steel as

The key to the situation appears to be the present relative position of production and consumption, and both sides await the report of the condition of the furnaces at the close of November. The future course

of the market, therefore, appears to depend largely on the activity among the general pig iron consuming industries of the coun-try and the rate at which the production of crude iron continues during the closing weeks of the old year.

The reasons for this may be (l) that there is not a great deal of iron on hand and (2) that the present schedule of freights will expire on the Sist, and soliers are unwilling to commit themselves to important enrage-ments until they know for certain what it will cost to deliver. So far as renards pig iron, therefore, it is not to be wondered at that business is duil, althourn, in the mean-time, the duliness proves nothing as to the general character or probable course of the market. To all intents and purposes it is a waiting market and it is almost impossible to say for certain which side will have the advantage 60 days hence." Values Rather Weak.

Chicago, Dec. 9.-[Special.]-Rogers, Brown and Merwin say: The Chicago market is sharing the usual quiet of December. There ure but few large transactions pending, or in sight, but small orders are numerous, and these are distributed among both large and medium sized consumers, showing a need of further stock to cover their consumption up to the first of the year. The current demand is divided between Northern and Southern cokes and softners, charcoals being inactive. Reports have been published that in the

Chicago district the Southern iurnaces, gen-erally, are cutting prices; that they are under the necessity of forcing sales, and that the tone and firmness which have been conspicious features of the market of all soc-tions for the past two or three months, have again given way to weakness and demorali-zation. A care of research indicates that there is no ground forsuch reports, and that the ruling conditions are entirely different from those described. With the exception of three or four of the smaller Southern com-panies, representing in all four or five stacks, there has been no cutting of prices in Chi-engo or the Northwest. With the exception of the number mentioned, all are in good condition; they have been selling their pro-duct faster than made, and to-day are hold-ing firmly on a basis of \$10. The fears that were entertained in Lon-don of an immediate collapse in silver val-ues appear to have vanished. Silver securi-ties have strengthened during the last two days, rupee paper closing yesterday $\frac{3}{2}$ bet-ter on the day; it has again risen $\frac{3}{2}$ in-day. It is predicted that the failure of the Inter-national Monetary Conference will have no effect on the London Stock Exchange. Most of the securities held in London are gold obligations, and it is reasoned that the more silver falls in value the more people there will be to invest in gold securities. An increased supply of commercial bills will prevent shipments of gold by Satur-day's European steamers. Firms who gen-erally export gold say they will not send any, but may possibly ship some by the Ger-man steamer on Tuesday next. Three stock calls without a transaction beats the record this year. Three stock calls without a transaction beats the record this year. It is said that the 50 advance on the daffy output of the Whisky Trust, 20,000 unlions, means an increase in net earnings of \$12,000 dafiy. This for 300 working days in the year would indicate an increase in the vearly earnings of \$3,600,000, bquivalent to a dir-dend of 10 per cent on the total amount of Distillers' cartificates outstandin.. This is in addition to present earnings which are at metry was shown in the general market seemed due almost entirely to professional specialtion, the bears being the power the have been attacking prices whenever the proceedings look dull or heavy, but for some time past have only succeeded in los-ing their own stock and putting prices to a higher level when they endeavored to re-trieve their position.
