A GOOD THING FOR BRADDOCK. The Building of a Bridge Across the Monor

gabela Exciting Much Interest The introduction in Congress by Congress man Dalzell of a bill providing for the construction of a bridge across the Monongahela just west of Braddock, should it become a law, will develop interests that will add immensely to the prosperity of Braddock. The bridge will provide a route for the Pennsylvania Railroad Company to get into Homestead, and the Carnegie Steel Company is greatly interested in the mat-ter of entering the Homestead mills with a direct process from their blast furnaces there. Such an improvement would create

some remarkable changes both in the affairs of the Pennsylvania and the Carnegie Steel Company.

ARRANGING FOR THE DAY OF SALE

Allegheny's Posteffice Commission Down

Arrangements for the sale of the old postoffice building are being completed and the old structure will be offered at public Mr. Bruce, in speaking of the matter, auction immediately after the new year. Postmaster McKean held a conference with the Treasury, at the Hotel Duquesne last night and they arranged the details for the sale of the property. All the papers, with transcripts of the deeds for the property, were forwarded to Washington three weeks ago, and Secretary Gear was empowered to arrange for the sale while here with the commission to select a site for the Alle-

gheny postoffice. There is likely to be lively competition for the old postoffice site. One large clothing firm in the city, it is said, has already filed a bid of \$400,000 for the property, and a syndicate of local capitalists has been formed for the purpose of buying it. It is also reported that the Pennsylvania Railroad Company will endeavor to secure the property with a view to making a union depot on the site at some future time. When the Government acquired the property it cost, building and all, about \$80,000. Mr. Gear said last night that the commission to select a site for the Allegheny postoffice had yesterday examined 12 different properties. He refused to say whether

a site had been determined upon. He be-lieved all the properties were held at exorbitant prices. He said that 27 different lo-cations had been offered for sale, but that only the 12 examined yesterday were suitably located. After ex-amining the properties the commission visited the assessors' office and secured data regarding the assessments. Several prom-inent property owners and business men were consulted regarding the prices asked for the locations examined, and the commission will, at their leisure, decide upoa one of the places for the proposed new post-

property that we will recommend," Mr. Gear said last night, "but we are sworn to secrecy, and we cannot say a word on the subject until after our report is submitted to Secretary Foster."

"The collecting of small accounts such as I have in my business has always been a great problem to me. About a year ago I conceived the idea of supplying the mail carriers with postal notes as being a way out of the difficulty. We by this means can reach about 70 per cent of our cus-tomers who by unnecessary delays and excuses keep large sums of money out of circulation. We have the man who has no bank account as well as the man who does not want to make out a check for a small amount to contend with. These small acin the aggregate the amount would sur-prise you. Then when we have to send 10 or 15 times after a small amount of a dollar or two the margin of profit is soon eaten up. If it were possible to get postal notes from the letter carriers our customers would be enabled to send the amounts to us by mail, and it would save a great amount of trouble and expense. Following out this idea, I wrote to Mr. Wanamaker. In reply I received a letter stating the suggestion warranted consideration and would have the same in due time. To me, and I think other merchants will join with me, such a move will be hailed as a solution of the
