FIRE AND BRIMSTONE.

Neighbors Object to the Fumes From an Asphaltum Works,

A bill in equity was filed yesterday by the Franz Brick Company, Limited, V. Gessler and others, against the Pittsburg Asphaltum Company, Limited. The defendant's works for the manufacture of asphaltum, it is stated, are located near Wittmer station on the Pittsburg and land in proximity to them. They allege that the defendant company uses brimstone and refuse from oil refineries, and the smoke and fumes from them are charged with sulphur and other poisonous substances. These substances, it was alleged, settle on the ground and destroy vegetation, fruit, grain, etc., and are also injurious to the health. In consequence they ask for an injunction to restrain the defendant company from con-tinuing the operation of its works unless some arrangement is provided to prevent the poisonous fumes.

CORRESPONDENCE OF THE DISPATCH. CHICAGO, Dec. 24.-Dr. Rudolf Seiffert, the eminent physician, who has for 26 years been connected with the great Alexian Brothers' Hospital of Chicago, and who is now chief of the first medical department in that institution, has been making a series of remarkable experiments with Dr. Koch's remedy for consumption.

As a result of Dr. Seiffert's careful and patient work, kochine is the accepted speeific in the hospital for tuburculesis of the lungs and an antidote for the excretious poison of tubercular bacilli. Moreover, in all the cases reported by him there are strong evidences that the effect of kechine is not immediately exhausted, but remains in the circulation ready to combat and destroy fresh invasions of the bacilli and their poisonous exerctions.

He said that he had only been in the hospital four weeks, and that he had had three severe hemorrhages within a short time of each other before he had commenced the treat-ment, and had not been able to make the slightest exertion. Dr. Kauffman stated that he would probably be discharged the next day as convalescent. There were others that were making equally satisfactory progress, and who promised soon to be able to go out into active life once more.

Kachine assists in these processes and ren-ders them independent of favorable external surroundings, which the great masses of the victims of the hydra-headed monster disease are unable to obtain.
