## An African's Revenge.

The following thrilling tale has been translated in the Roston Journal from a of Alter Gul. The scene is laid in Gaudaloupe. It is merely necessary to premise that Alter Gul is a favorite Smiles shone on his countenance, but deadly hatred rankled in his heart.

"When Alter Gul had nearly reachthad already risen, and the lofty heights of La Souffraire threw her shadows to a great distance across the valleys below. As he was about entering a sort soon after heard, the flapping of wings over his head, and, on looking up, saw one of those large birds called Secretaries, or Man-of-war birds common in the tropical climates which having already descried the serpent, was making large circles in the air, but approach-

The huge bird extended one of his wings, and with a longing eye on the serpent, advanced to the conflict; but his wary antagonist watched his movements, and with quick motions of his body to the right and left, evading his attacks, until finding his mode of warfare would not long avail him, he at length darted at the bird, and vainly attempted to fix his poisonous fangs in body, and crush him in his coils. But the Secretary caught him in one of his claws, and with furious blow of his beak fractured his skult. The serpent struggled violently for a few momentsbut resistance was useless; and he was soon stretched lifeless before his victorious enemy.

But ere the bird had time to enjoy his victory, the report of a musket was heard, and the Secretary in his turn lay dead by the side of his venomous antagonist. Alter Gul turned his head and saw Theodore standing on a rock above him, with a fowling piece in hi

#### Accuracy of Memory.

Accuracy of recollection is obviously of peculiar importance at the bar; but the profession has sometimes exhibited surprising instances of the faculty. Lord. Eldon spoke of chief Justice de Grey's powers of memory as extraordinary .-De Grey suffered so much from the gout that he used to come into the court with his hands wrapped in stennel. He thus could not take a note. "Yet I have know him," said Lord Eldon, "try a cause that lasted nine or ten hours, and then, from memory, sum up all the evidence with the greatest correctness .-When counsel offered any intimation of his accuracy, his answer was, "I am sure I am right: refer to your short-hand writer's notes; and he was invariably found to be right." A similar faculty is possessed by that very distinguished person, Lord Lyndhurst.

We have known some persons in the world who, gliding quietly through life, have floated on the stream of time, like a boat on the waters of a broad and tranquil river, carried on by the unruffied tide of prosperity, and lighted to their sively threw her hands before her, and journey's end by the cloudness sun of tried to rise-but she could not. The to hold its course through storms, and to set in blacker darkness than which gave it birth. But long continued joy loses pent. In a moment he was lost among its first zest, and uninterrupted sorrow its first poignancy; habits robs even misery of its acuteness; and one that is long endured brings along with it the power of long endurance. It is the sudden transition from joy to sorrow that is the acme of human suffering, adding the bitterness of regret for past enjoyment to all the pange of present distress.

ANNEXATION .- The Baltimore Republican relates the following, which actually took place in that city, a few days since:

"Well, miss-," said a Democrat to a Whig lady, "I suppose you have read both of Mr. Clay's letters on the annexation of Texas?"

"Yes, I have."

"As I heard you profess yourself delighted with his first letter, what do you now say, -are you in favor of are infinitely more common; and if suffered to annexation?'

IMPORTANT INFORMATION.

T is a prevailing opinion among the enlighted Physicians of our country, that Cancer is a mass of living animalcule, which have taken up their abode in the human system. No matter how small, or how low in the scale of animated nature, the individual composing Cancer may be, they were so tenacious of existence, that the knife or the most powerful caustic, are the only means by which they can be removed.

When permitted to remain, they never fail to multiply and spread to neighboring parts, committing the most frightful depredations, until death comes to the relief of their victim . -Worms in children, may be considered somewhat analagous. If they are less fatal, they remain, produce consequences scarcely less alarming. If the testimony of medical writers is to be relied upon, they often produce mania, apoplexy, epilepsy, palsy, convulsions and many other diseases equally dangerous, and often faone of the most obdurate diseases, with which physicians have to contend, while worms are easily dislodged by proper remedies.

MERRICK'S VERNIFUGE, has proved one of the most valuable medicines ever offered to the public for destroying worms in children. Hundreds of cases might be enumerated, where it has produced the happiest results. It is a syrup, and therefore easily administered to children. Price 25 cents per bottle.

THE POCAHONTAS PILL.

Is the present age, when "Patent Medicines" are so numerous, and their properties so unblushingly eulogized by their respective proprietors, it becomes necessary for the public (to guard against imposition) to require some authentic evidence of their sanative properties.

The Pocahontas Pill is not offered as an an tidote for all the diseases to which flesh is heir. We merely purpose to show, by the successive publication of certificates, voluntarily offered that their present popularity is well founded; and, that as a purgative medicine, they have proved pre-eminently beneficial. These Pills are compounded according to the rules of medical science, are entirely vegetable, and may be safely given to cleanse the stomach, purify the blood, remove inflammation, and correct the morbid secretions, without regard to age, sex or
