May 5.

LOST!
On the 26th April, on Main street, between Mr. Conklin's and the Watering Trough, a Black Silk Lacc VEIL. The finder is requested to return it to this office or **GEORGE BOWMAN.**
Towanda, May 5, 1845.

THE preceding figure is to represent the **INSENSIBLE PERSPIRATION.** It is the great evacuation for the impurities of the body. It will be noticed that a thick cloudy mist issues from all points of the surface, which indicates the wonderful process going on within. This perspiration flows uninterruptedly when we are in health, but ceases when we are sick. It should be the care of every one to see that it is not checked. Life cannot be sustained without it. It is thrown off from the blood and other juices of the body, and disposes by this means of nearly all impurities within us. The blood by this means only, we can use itself pure. The language of Scripture is "in the blood is the life." If it ever becomes impure, it may be traced directly to the stoppage of the insensible perspiration. It never requires any internal medicine to cleanse it, as it always purifies itself by its own heat and action, and throws off all the offending humors, through all the offering humors, through the insensible perspiration. Thus we see, all that is necessary when the blood is stagnant or infected, is to open the pores, and it relieves itself from all impurity instantly. Its own heat and vitality are sufficient, without one particle of medicine, except to open the pores upon the surface.—Thus we see the folly of taking so much internal remedies. All practitioners, however, direct their efforts to restore the insensible perspiration, but it seems to be not always the proper one. The Thompsonians for instance, steams, the Hydropathists shrouds us in wet blankets, the Homopaths deal out infinitesimal doses, the Allopaths bleed and doses us with mercury, and the blustering quack gorges us with pills, pills, pills.

But one object only is in view, viz: to restore the insensible perspiration. If this can be done, they say, we will take care of the rest. It will be seen, therefore, that all physicians understand alike what is necessary to a recovery, how much they may differ as to the mode of obtaining it.

To give some idea of the amount, and consequently the importance of the insensible perspiration, we will state that the learned Dr. Levenhook, and the great Boerhaave, ascertained that five-eighths of all we received into the stomach, passed off by this means. In other words, if we eat and drink eight pounds per day, we evacuate five pounds of it by the insensible perspiration.

This is none other than the used up particles of the blood, and other juices, giving place to the new and fresh ones, by carrying with it all the impurities within, up to the surface. To check this, therefore, is to retain in the system five eighths of all the virulent matter that nature demands should leave the body. And even when this is the case, the blood is of so active a principle, that it determines those particles, to the skin, where they form scabs, pimples, ulcers, and other spots; but if it is directed inwards, and falls upon the lungs, the consequences are generally fatal.

By a sudden transition from heat to cold, the pores are stopped, the perspiration ceases, and disease begins at once to develop itself.—Hence, a stoppage of this flow of the juices, originates so many complaints. It is through the surface that we imbibe nearly all our ill.

It is stopping the pores, that overwhelms mankind with coughs, colds, and consumption. Nine-tenths of the world die from diseases induced by a stoppage of the insensible perspiration.

It is easily seen therefore, how necessary is the flow of this subtle humor to the surface, to preserve health. It cannot be stopped; it cannot even be checked, without producing disease. The blood and intestines must relieve themselves of all their worn-out particles, and poisonous humors, and they must go through the pores as nature designed.

Let me ask now, every candid mind, what course seems the most reasonable to pursue, and unstop the pores, after they are closed, and let the perspiration flow, that the blood may relieve itself of its impurities? Would you give physic to unstop the pores? Or would you apply something that would do this upon the surface, where the clogging actually is? Would not this be the common sense? And yet I know of no physician who makes an internal application to effect it. The reason I assign is, that no medicine within their knowledge, is capable of doing it. Under these circumstances, I present to physicians and to all others, a preparation that has this power to the fullest extent.—It is **McAllister's All-Healing Ointment** or **World's Salve.** It has power to restore perspiration on the feet, on the head, around old sores, upon the chest, in short, upon any part of the body, whether diseased slightly or severely. When the perspiration is restored, it has power to penetrate the lungs, liver, or any part of the human system, and to act upon them, if they be diseased, by separating the inflamed morbid particles therefrom, and expelling them to the surface.

It has power to cause all external sores, scrofulous humors, skin diseases, poisonous wounds to discharge their putrid matter, and then heals them.

It is a remedy that sweeps off the whole catalogue of cutaneous disorders, and restores life to entire cuticle to its healthy functions.

It is a remedy that forbids the necessity of so many and deleterious drugs taken into the stomach.

It is a remedy that neither sickens, gives inconvenience, or is dangerous to the intestines. This remedy is probably the only one now known, that is capable of producing all these great results. Its great value is in restoring the circulation of the juices when checked, or disarranged by cold or other causes. It preserves and defends the surface from all derangement of its functions, while it keeps open the channels for the blood to avoid all its impurities and dispose of all its useless particles.—There is a connection, harmony, and feasibility in all that defies contradiction. It is a simple, but wonderful principle that preserves in healthy operation the entire machinery of our being. It indissolubly holds together the surface and the internal viscera, the internal viscera and the surface. They are inseparably connected and cannot be disjointed. The surface is the outlet of five-eighths of the bile and used

up matter within. It is pierced with millions of openings to relieve the intestines. Stop up these pores, and death knocks at your door.—It is rightly termed All-Healing, for there is scarcely a disease, external or internal, that it will not benefit. It will be found the most useful as well as the cheapest family medicine in the world. I have used it for the last fourteen years with success without a parallel. I have used it for all disease of the chest, consumption, liver, and the most dangerous of internal maladies. I have used it in cases of extreme perid and hazard, involving the utmost danger and responsibility, and I declare before Heaven and man, that not in one single case has it failed to benefit, when the patient was within the reach of mortal means.

I never, to my recollection had more than five or six among the thousands who have used it, say that it was not favorable to their complaint. On the contrary I have had hundreds return voluntarily, and in the warmest and most pathetic language speak in its praise. I have had physicians, learned in the profession, the bench, aldermen and lawyers, gentlemen of the highest condition and multitudes of poor, use it in every variety of way, and there has been but one voice, one united, universal voice saying "McAllister your ointment is good."

Consumption.—Of all diseases, we find this the most important, and concerning which we meet with the most opposition. It can hardly be credited that a salve can have more effect upon the lungs, seated as they are within the system. But two say once for all, that this ointment will reach the lungs quicker than any medicines that can be given internally. Every body consents to the fact that if healing medicine could be applied on the lungs, there would be great hopes of recovery. The difficulty is to get the medicine there. Now the Salve has the wonderful virtue of extracting the putrid humors from all external sores by causing them to discharge. In like manner it operates upon internal affections by driving all the impurities through the pores to the surface. Thus with consumption, if placed upon the chest, it penetrates directly to the lungs, separates the poisonous particles that are consuming them and expels them from the system.

It is the simplest and most rational process in creation, if one has the medicine capable of doing it. The All-Healing Ointment possesses this power to the fullest extent. I need not say that it is curing persons of Consumption continually, although we are told it is foolishness. I care not what is said, so long as I can cure several thousand persons yearly. If this medicine was in the hands of some patent medicine brawlers, they would make an uproar through the country that would be insupportable.

Scrofula or King's Evil.—This disease is rarely inveterate, and hard to be subdued. It is generally seated in the sides of the neck, behind the ear and under the chin, yet scarcely any part of the body is exempt. It sometimes falls upon the lungs and produces consumption. It is a dreadful circumstance, that this disease is transmitted from parents to children.

The Salve will extract all the morbid matter by causing the sores to discharge; and then let the Solar Tincture be used to drive it to one point, which done, a continuance of the Ointment will completely remove this disorder. This is the safest and most effectual of any method. It should be adopted without a moment's hesitation.

Erysipelas.—This complaint arises from impurities driven out to the surface by means of the insensible perspiration, and lodging in the cuticle, forms sores, pimples &c., it being of a caustic, serid putrifying nature. It only requires that it should discharge its virulent particles through the skin, and the difficulty will pass off. If suffered to remain, and driven inwards it is frequently fatal.

Let the Salve and Solar Tincture be used as in scrofula and the patient will soon get well.

Salt Rheum.—This is another obstinate disease but can be cured effectually as the scrofula. There is no cure in this disease.

Head ache, Ear ache and Deafness.—The Salve has cured persons of the Head-Ache of 12 years standing and who had it regularly every week, so that vomiting often took place. It cured the wife of a man who laughed in my face for proposing such a cure, and who now would not be without it for the best farm in the State. If any one will take the trouble to call I will give him name.

Deafness and Ear-Ache are helped with the like success as also Ague in the face.

Cold Feet.—Consumption, liver complaint, pains in the chest or side, falling of the hair, one or the other always accompanies cold feet. It is a sure sign of disease in the system to have cold feet. Some persons are totally unable to get them warm, and endure much suffering thereby.

The salve will restore the insensible perspiration and thus cure every case. It is infallible for this.

Asthma, Tightness of Breath.—If this disease is not hereditary and produced by the malformation of the chest, the salve will cure it.

Dyspepsia.—One would suppose a salve would not effect this disease much but the All-Healing Ointment will cure two sooner than any internal remedy will cure one.

Sore Eyes.—The inflammation and disease always lies back of the ball of the eye in the socket. Hence the utility of all remedies that are used upon the lids. The virtue of any medicine must reach the seat of inflammation or it will do little good. This salve if rubbed on the temples will penetrate directly into the socket and infuse all its virtues upon the disorder.—The pores will be opened, a proper perspiration will be created and the disease will pass off to the surface. How easy and how natural! It is as perfect and valuable as it is simple and philosophical.

Sore Lips, Chapped Hands &c.—I sell a great deal of salve to Seamen, who say it is the only thing they can depend on to cure their raw hands, when exposed to the weather at sea. It acts like a charm in these complaints. Two or three applications cures.

Pimples on the face, freckles, tan, masculine skin, gross surface.—Its first action is to expel all humor. It will not cease drawing till the face is free from any matter that may be lodged under the skin and frequently breaking out to the surface. It then heals. When there is nothing but grossness, or dull repulsive surface, it begins to soften and soften until the skin becomes as soft and delicate as a child's. It throws a freshness and blushing color upon the now white and sallow skin that is perfectly enchanting. Some times in case of freckles it will first start out those that have lain hidden and seen but seldom. Pursue the salve and all will soon disappear.

The reason for this wonderful change in a lady's face is that it excites into natural and healthy activity the Insensible Perspiration, while it renovates and renews the surface, and leaves the skin in its lively and delicate condition as the most fastidious could desire. It is put up in fine jars and beautifully scented on purpose for the toilet.

Burns.—Life can always be saved if the vitals are not injured. I have so many testimonials for the cure of this complaint that I could

fill a book. I suppose there is not a family in the United States, that would consent to be without this salve a single day if they knew its value in healing Burns alone. It extracts the pain and leaves the place without a scar.

Quinsy sore throat, Influenza, Bronchitis.—There is not an internal remedy in existence that will cure these disorders as quick as the salve. It opens the pores on the neck and draws off all the inflammation; and impure juices, and a few days will see the patient well. It is sovereign in these cases.

Piles.—The salve acts upon the piles as upon sore eyes. There is an inflammation which must be drawn from the parts. The salve does this.

Hernia or Rupture.—This salve has cured some very bad cases of rupture, and although it might not all, yet it would be wise to try it.—It is a peculiar complaint, but it may be helped some, if not cured entirely. I have not the shadow of a doubt that it would cure thousands if the trial was made, who believe no medicine of the least benefit.

Two shillings worth would satisfy any one, whether it would do good or not.

Worms.—If parents knew how fatal most medicines were to children taken inwardly, they would be slow to resort to them. Especially "mercurial lozenges," called "medical lozenges," "vermifuges," pills, &c. Even were it possible to say positively that worms were present, it is not safe. The truth is, no one can tell, invariably, when worms are present. Of course the remedy is not applicable to the complaint. Now let me say to parents, that this salve will always tell if a child has worms.—Let it be rubbed on the neck and chest, to keep them from going up, and then down on the bowels and they will soon leave. It will drive every vestige of them away. This is a simple and safe cure. No injury can come of it in any way. But should it be cholera, inflammation of the bowels, or gripe of the intestines, it will effectually cure them as the worms.

There is probably no medicine on the face of the earth at once so sure and safe in the expulsion of worms.

It would be cruel, nay wicked, to give interloper doubtful medicines, so long as a harmless, certain, and effectual external one could be had.

Cholera, Pain, or Inflammation of the Bowels.—Let the salve be rubbed in and heated with the fire or hot flat irons, and all pains and difficulty will soon cease.

Swellings of the joints, or weakness, or any affection of the bone, nothing is so good for as this salve.

Poisons.—I never knew anything so good as this salve. It causes the poison to discharge immediately, and leaves not the slightest cause of alarm. Poisons by nails, bites of animals, or burns, it removes when nothing else will.

Toilet.—I have it done up in fine order for the dressing case. Although I have said little about it as a hair restorative, yet I will state it against the world! They may bring their oils far and near, and mine will restore the hair two cases to their one. These are no idle words, for I am ready to back it with any reasonable amount.

Old Sores, Mortification, Ulcers, &c.—There is no effectual way of curing these, but drawing off the putrid matter. To merely dry it up would only endanger one's health more. That some sores are an outlet to the impurities of the system, is the only reason, because they cannot pass off through the natural channels of the Insensible Perspiration. If such sores are healed up, the impurities must have some other outlet, or it will endanger life. This is the reason why it is impolitic to use the common salve of the day in such cases. For they have no power to open other revenues, to let off all this morbid matter, and the consequences are always fatal. This salve will always provide for such emergencies. There need be no fear. It is perfect.

Broken Breast.—Persons need never have a broken breast. The salve will always prevent it, if used in season.

Liver Complaint.—Persons having this complaint frequently have eruptions of the hands, face and other parts, and never once think that it arises from the liver. Their utter inability to remove these eruptions, proves their misapprehension of the disorder. Such must use it first on the feet, then wear it on the chest, and the difficulty will soon go away.

Ulcer Passion or Gripping of the Intestines.—This disease caused the death of the late H. S. Legare, Attorney General and acting Secretary of the United States. It is the stopping up of the smaller intestines, and sometimes the twisting of them. It is brought on by a neglect of the daily evacuations, or from incarcerated Hernia. The pains are awful, and unless help comes speedily, the sufferer soon dies.

The All-Healing Ointment would have saved the life of Mr. Legare and all others under similar circumstances.

Corns.—If the salve is used according to directions, people need never be troubled with corns—especially cut out by some travelling mountebank who knows he is doing more mischief than he can possibly repair. A little of this ointment put on now and then will always keep them down.

Indeed there are few complaints that it will not benefit. It is a Family Salve of untold value. As long as the sky rolls over one's head and grass grows upon the earth, it will be sought after, used and valued. As there is no mercurial substance in it, but composed entirely of vegetables it gives no good ground for apprehension.

We have full certificates, from all the persons whose names are here given, but not having room for them, we merely give their names, Nos. and the disease of which they were cured.

GENTLEMEN.
we are just opening 20 pieces, different styles, plain and striped double and single milled Cassimeres. Broadcloths and Sattinets, all colors and qualities; Summer Cloths, for men and boys to wear, by the piece or less quantity—bleached and brown sheetings and shirtings; suspender, elastic vest backs, &c.

100 doz. Palm leaf hats, 20 doz. Leghorn do., 5 cases Fur do., white, drab and black.

A very heavy stock of Groceries, Hardware, Crockery, &c. &c.

We are prepared to sell at wholesale or retail, and will do so low, (if not a little lower) than the same qualities can be bought at any store within 100 miles of this place, for ready pay. And by way of encouraging the honest and industrious "tillers of the soil," we will exchange any of our goods for Good Butter, or Produce of almost any kind. Those, therefore, who have wisely come to the conclusion that it is not good policy to get in debt to the merchants, will be enabled to exchange the products of their labor for all articles necessary to their comfort and convenience.

Yours in haste,
W. H. BAIRD & CO.
Towanda, May 5, 1845.
