Mrs. Caudle's Curtain Lectures.

Mr. Caudle has been to Greenwich Fair.

Hem! So, Mr. Caudle; I hope you enjoyed yourself at Greenwich. I know it very well, sir: know all about it: know more than you think I know. I thought there was something in the wind. Yes, I was sure of it, when you went out of the house, to-day; I knew it by the looks of you, though I didn't say anything. Upon my word! And you call yourself a respectable man, and the father of a family! Going to a fair amongst all sorts of people-at your time of life. Yes; and never think of taking your wife with you. Oh no! you can go and enjoy yourself out with I don't know who; go out and make yourself very pleasant, I dare say. Don't tell me; I hear what a nice companion Mr. Caudle is: what a good tempered person.-Ha! I only wish people could see you at home, that's all, But so it is with men. They can keep all their good temper for outof-doors-their wives never see any of it. Oh dear! I'm sure I' don't know who'd be a poor woman'!

"Now, Caudle, I'm not in an illtemper: not at all. I know I used to be a fool when we were first married; I used to worry and fret myself to death when you went out; but I've got over that. I wouldn't put myself out of the way now for the best man that ever trod. For what thanks does a poor woman get?-None at all. No. it's those who don't care for their famionly wish I could bring myself not to care for mine.

"And why couldn't you say, like a man, you were going to Greenwich Fair when you went out? It's no use you're saying that, Mr. Caudle: don't tell me that you didn't think of going; you'd made your mind up to it. Pretty games you've had, no doubt! I should like to have been behind you, that's all. A man at your time of life!

"And I, of course, I never want to go out. Oh no! I may stay at home with the cat. You couldn't think of taking your wife and children, like any other decent man, to a fair. Oh no; vou never care to be seen with us .-I'm sure many people don't know you're married; how can they? Your wise's never seen with you. Oh no; , anybody but those belonging to you!

"Greenwich Fair indeed! Yes,and of course you went up and down the hill, running and racing with nobody knows who. Don't tell me; I know what you are when you're out, ed to be Prince o'er death and hell. You don't suppose, Mr. Caudle, I've WRead ye not, in The Book of the unforgotten that pink bonnet, do you ?-Not I won't hold my tongue, and I'm upon Tiberas' rugged mane and it was not a foolish woman.—It's no matter, stilled? sir, if the pink bonnet was fifty years ago-it's all the same for that. No: heaven distil, fragrant flowers, the burstand if I live for fifty years to come, I ling buds, the blessed air, is untold wealth never will leave off talking of it. You to the hard browed and the bronzed meought to be ashamed of yourself, Mr. chanic. Rich coffers bring a snare, time was to come over again that's all; I wouldn't be the fool I have

had your fortune told by the gypsies? You needn't have wasted your money, I'm sure I can tell you your fortune, Mr. Caudle. And it would be no matter-none at all-if your wife and children didn't suffer with you.

" And you must go riding upon donkeys-you didn't go riding upon donkeys? Yes; it's very well for you to say so; but I dare say you did. I tell you, Caudle, I know what you are when you're out. I wouldn't trust any of you-you especially, Caudle.

"Then you must go in the thick of the fair, and have the girls scratching your coat with rattles! You couldn't help it, if they did scratch your coat? Don't tell me; people don't scratch coats unless they are encouraged to do it. And you must go in a swing too. You didn't go in a swing? And I'm a foolish woman to think so, am I?-Well, if you didn't, it was no fault of yours; you wished to go, I've no doubt.

" And then you must go into shows? There-you don't deny that. You did go into a show. What of it, Mr. Caudle? A goed deal of it, sir. Nice crowding and squeezing in those shows, I know-pretty places! And you a married man and the father of a family. No. I won't hold my tongue? It's very well for you to threaten to get up. You're to go to Greenwich Fair, and race up and down the hill, and play at kiss in the ring. Pah! it's disgusting, Mr. Caudle. Oh, I dare say you did play at it; if you didn't you'd have liked, and that's just as bad; and you can go into the swings, and shows, and hide my head under the clothes and be wives. ashamed of myself.

"And what is most selfish-most mean of you, Caudle, you can go and enjoy yourself, and never so much as bring home to the children a gingerbreadnut. Don't tell me that your pocket was picked of a pound of nuts! Nice company you must have been in to have your pocket picked.

"But I dare say I shall hear all about you were dancing at the Crown-and or "spoken for."

Anchor. I should like to have seen you.-No; I'm not making myself ridiculous. It's you that's making yourself ridiculous; and everybody that knows you, says so. Everybody knows what I have to put up from

"Going to a fair indeed? At your

"Here," says Caudle, "I dozed off, hearing confusedly the words-hillgypsies-rattles-roundabouts-pink bonnet-swings-nuts."

Nobility of Mechanics.

Toil on, thou sun burnt mechanic. God has placed thee in thy lot, perchance, to guide the flying car that whirls us on from scene to scene, or friend to friend; bind down the warring waves of ocean, tempest tost, or chain the red artillery of heaven.

Toil on! Without thy power, earth, though her sands were. one vast Pactous of gold, would be a waste of tinselled tears and glittering grief, and want and wo, and splendid misery, gleam out indicates the wonderful process going on withfrom all her treasured mines. Rich soils in. This perspiration flows uninterruptedly would perish in their richness, and the fruits of seasons changing, die engathered from the harvest.

Toil on! Jehovah was a workman, too. "In the beginning God created this means, of nearly all impurities within use. heaven and earth," and from confused The blood by this means only, works itself chaos sprang this perfect world, the perfect workmanship of the eternal, uncreated Power. Up rose the mighty firmament, and back the sullen surges swept, submissive tamed, each to their several bounds. And then he set great lights the glorious sun to bless the day; the timid moon to wear at night the mildest lustre of the radient orb. He painted heaven with mingled blue and white, and in the vaulted arch a modest hes, who are the best thought of. I star peeped out, seeming, by the majesty of sun and moon, like a stray lily breathing on its lore of meek and blushing loveliness, in the gay tints of opening bud and rich voluptuous blossom.

Wondering, there dawned another, and a third, 'till clustering, clinging to the spacious canopy, they read, in the mals, the Allopathist bleeds and doses us with calm waters of the sea, the story of their radient loveliness. From thence assured, they fear no sun nor mgon, but faithfully distil their pensive light. Old ocean tost her crescent spray, and from her hidden depths creatures of life came up, and flew above the earth; winged fowls and birds, and flying fish, and the great whale, dark emperor of the sea.

And God created man! Six days he labored and the seventh he reposed; while from the sea, the earth, the air, and all that in them is, went up a chorus of ecstatistic praise to God, the first, eternal architect.

Toil on, sun-burnt mechanic; heard ye of him whom babbling Jews despise? The manger-born of Nazereth? Exalttaught apprentice, who laid his hand

Toil on! Drink from the dews that Caudle. Ha! few wives would have canker and heart corrosion. God's been what I've been to you. I only wealth is yours, a wealth to which de- Hence, a stoppage of this flow of the juices,

cavina a l is vanity and dross. Toil on! Proud peer and prince, and pedant; sage, statesman, and priest, now "Going to a fair? and I suppose you claim the tribute of a tomb, which fain would drive away the worm; and splendid eloquence and mocking tears are shed and spent above the dust which lies as common as the plebian herd. The grave is the great leveller. Blest grave! Grave of the tanned mechanic! A spirit speaks from thence, and willing ears may learn some task, which monuments of gold have not a power to teach. Proud man-learned man-go sit above that tomb, and weep to think that when old time shall tire, the sun go out with weariness and your chivalry. above the wreck of matter and crush of worlds,' the handiwork of God's own nobleman shall live, immutable as time, while time his entire holds, eternal as eternity.

Rules for Young Men.

Never marry a woman who cannot make a shirt, or get a meals of victuals. Such a woman would keep a man poor all the days of his life.

Marry not a woman who apes the lady by an exhibition of pride; because she will be eternally scolding if she does not get every thing she wants.

Never marry a woman who thinks herself better than any one else; because it shows a want of sense, and she will have but few friends.

Marry not a woman who is fond of spinning street yarn? because such a woman will not be contented at home, and consequently she will make a most miserable wife.

Never marry a woman who is in the habit of slandering her neighbors, and giving ear to all the gossipping she hears. Such women keep themselves and their neighbors in a constant ferround abouts. If I was you I should mentation, they make the worst of

> Interesting to Ladies .- It was decided in a breach of promise case the other day in England, that an unmarried semale, aged 32, is not a girl, but rities and dispose of all its useless particles. girl" is then out of place.

travelling in the Western States says, there is not a lady west of Alleghanier it to-morrow, I have no doubt, sir, over the age of 15, who is not married

HE preceding figure is to represent the INSENSIBLE PERSPIRATION. It s the great evacuation for the impurities of the body. It will be noticed that a thick cloudy mist issues from all points of the surface, which when we are in health, but ceases when we are

sick. It should be the care of every one to see that it is not checked. Life cannot be sustained without it. It is thrown off from the blood and other juices of the body, and disposes by pure: The language of Scripture is, "in the blood is the life." If it ever becomes impure, it may be traced directly to the stoppage of the insensible perspiration. It never requires any internal medicines to cleanse it, as it always purifies itself by its own heat and action, and brows off all the offending humors, through all the offending humors, through the insensible perspiration. Thus we see, all that is necessar ry when the blood is stagnant or infected, is to open the pores, and it relieves itself from all impurity instantly. Its own heat and vitality are sufficient, without one particle of medicine except to open the pores upon the surface.—
Thus we see the folly of taking so much internal remedies. All practicioners, however, direct their efforts to restore the insensible pers piration, but it seems to be not always the proper one. The Thompsonians for instance, steams, the Hydropathist shrouds us in we blankets, the Homopathist deals out infinitissi mercury, and the blustering quack gorges us

with pills, pills, pills. But one object only is in view, viz: to restore the insensible perspiration. If this can be done, they say, we will take care of the rest. It will be seen, therefore, that all physicians understand alike what is necessary to a recovery, how much they may differ as to the mode

of obtaining it.

To give some idea of the amount, and consequently the importance of the insensible perspiration, we will state that the learned Dr. Lewenhock, and the great Boerhauve, ascertained that five-eights of all we received into the stomach, passed off by this means. In other words, if we cat and drink eight pounds per day, we evacuate five pounds of it by the in-sensible perspiration.

This is none other than the used up particles of the blood, and other juices, giving place to the new and fresh ones, by carrying with it all the impurities within, up to the surface. To check this, therefore, is to retain in the system five eights of all the virulent matter that nature demands should leave the body. And even when this is the case, the blood is of so active principle, that it determines those particles, to the skin, where they form scabs, pimples, ulcers, and other spots; but if it is directed inwards, and falls upon the lungs, the consequences are generally fatul.

By a sudden transition from heat to cold, the pores are stopped, the perspiration ceases, and disease begins at once to develope itself .originates so many complaints. It is through the surface that we imbibe nearly all our ills. It is stopping the pores, that overwhelms mankind with coughs, colds, and consumption.

Nine-tenths of the world die from diseases induced by stoppage of the insensible perspiration. It is easily seen therefore, how necessary is the flow of this subtle humor to the surface, to preserve health. It cannot be stopped; it cannot even be checked, without producing disease. The blood and intestines must relieve themselves of all their worn-out particles, and poisonous humors, and they must go through

he porce as nature designed. Let me ask now, every candid mind, what course seems the most reasonable to pursue, and unstop the porcs, after they are closed, and let the perspiration flow, that the blood may relieve itself of its impurities? Would you give physic to unstop the pores? Or would you apply something that would do this upon the surface, where the clogging actually is? Would not this be common sense? And yet I know of no physician who makes an internal application to effect it. The reason I assign is, that no medicine within their knowledge, is capable of doing it. Under these circumstances, I present to physicians and to all others, a preparation that has this power to the fullest extent-It is McAllister's All-Healing Ointment or the World's Salve. It has power to restore perspiration on the feet, on the head, around old sores, upon the chest, in short, upon any part of the body, whether diseased slightly or severe-

ly. When the perspiration is restored, it has power to penetrate the lungs, liver, or any part of the human system, and to act upon them, if they be diseased, by separating the inflamed morbid particles therefrom, and expelling them to the surface.

It has power to cause all external sores, scrofulous humors, skin diseases, poisonous wounds to discharge their putrid matter, and then heals

It is a remedy that sweeps off the whole catalogue of cutaneous disorders, and restores the entire cuticle to its healthy functions. It is a remedy that forbids the necessity of so many and deleterious drugs taken into the

stomach. It is a remedy that neither sickens, gives inonvenience, or is dangerous to the intestines. This remedy is probably the only one now known, that is capable of producing all these great results. Its great value is in restoring at once, the circulation of the juices when checked, or disarranged by cold or other causes. It preserves and defends the surface from all derangement of its functions, while it keeps open the channels for the blood to avoid all its impua young woman. The phrase "old There is a connection, harmony, and feasibility in all that defies contradiction. It is a simple, Girls.—A person who has been thy operation the entire machinery of our be-It indissolubly holds together the surface and the internal viscera, the internal viscera and the surface. They are inseparably connected and cannot be disjoined. The surface

scarcely a disease, external or internal, that it | pain and leaves the place without a scar. will not henefit. It will be found the most useful as well as the cheapest family medicine in the world. I have used it for the last fourteen liver, and the most dangerous of internal maladies. I have used it in cases of extreme perd and hazard, involving the utmost danger and

of mortal means. I never, to my recollection had more than five or six among the thousands who have used it, say that it was not favorable to their complaint. On the contrary I have had hundreds return voluntarily, and in the warmest and most pathetic language speak in its praise: I have had physicians, learned in the profession; I have had ministers of the gospel, Judges on the bench, aldermen and lawyers, gentlemen of the highest erudition and multitudes of poor, use it in every variety of way, and there has been but one voice, one united, universal voice saying " McAllister your ointment is good."

man, that not in one single case has it failed to

Consumption. Of all diseases, we find this the most important, and concerning which we meet with the most opposition. It can hardly be credited that a salve can have more effect upon the lungs, seated as they are within the system. But we say once for all, that this ointment will reach the lungs quicker than any medicines that can be given internally. Every body consents to the fact that if healing medicine could be applied on the lungs, there would be great hopes of recovery. The diffi-culty is to get the medicine there. Now the Salve has the wonderful virtue of extracting the putrid humors from all external sores by causing them to discharge. In like manner i operates upon internal affections by driving all Thus with consumption, if placed upon the chest, it penetrates directly to the lungs, separates the poisonous particles that are consuming them and expels them from the system:

It is the simplest and most rational process in creation, if one has the medicine capable of doing it. The All-Healing Ointment possesses this power to the fullest extent. I need not say that it is curing persons of Consumption continually, although we are told it is foolishness. I care not what is said, so long as I can cure several thousand persons yearly. If this medicine was in the hands of some patent medicine brawlers, they would make an uproar through the country that would be insupporta-

Scrofula or King's Evil.-This disease i really inveterate, and hard to be subdued. It s generally seated in the sides of the neck, behind the ears and under the chin, yet scarcely any part of the body is exempt. It sometimes falls upon the lungs and produces consumption. It is a dreadful circumstance, that this lisease is transmitted from parents to children.

The Salve will extract all the morbid mater by causing the sores to discharge; and then let then the Solar Tincture be used to drive it to one point, which done, a continuance of the Ointment will completely remove this disorder. This is the safest and most effectual of any method. It should be adopted without a mo ments hesitation.

Erysipelas - This complaint arises from impurities being Jriven out to the surface by means of a caustic, acrid putrifying nature. It only equires that it should discharge its virulent particles through the skin, and the difficulty will pass off: If suffered to remain, and driven nwards it is frequently fatal. Let the Salve and Solar Tincture be used a

n scrofula and the patient will soon get well. Salt Rheum .- This is another obstinate disase but can be cured effectually as the scrofua. There is no difficulty in this disease.

Head ache, Ear ache and Deafness .- The Salve has cured persons of the Head-Ache of 12 years standing and who had it regularly every week, so that vomiting often took place. It cured the wife of a man who laughed in my face for proposing such a cure, and who now would not be without it for the best farm in the State. If any one will take the trouble to call will give his name.

Deafness and Ear-Ache are helped with the like success as also Ague in the face.

Cold Feet.—Consumption, liver complaint, pains in the chest or side, felling of the hair, one or the other always accompanies cold feet. It is a sure sign of disease in the system to have cold feet. Some persons are totally unable to get them warm, and endure much suffering thereby.

The salve will restore the insensible perspi-

ration and thus cure every case. It is infallible for this.

Asthma, Tightness of Breath.-- If this discase is not hereditary and produced by the malformation of the chest, the salve will cure it. Dyspepsia.—One would suppose a salve would not effect this disease much but the All-

Healing Ointment will cure two sooner than any internal remedy will cure one. Sure Eyes .- The inflamation and disease always lies back of the ball of the eye in the sock-

el. Hence the utility of all remedies that are used upon the lids. The virtue of any medicine must reach the seat of inflation or it will do little good. This salve if rubbed on the temples will penetrate directly into the socket and infuse all its virtues upon the disorder.—

The pores will be opened, a proper perspiration

Nos. and the disease of which they were cured.

Thomas Moshier. 179 Ninth-st—week back be created and the disease will soon pass | W W Way, cor. King and McDonough sts—
to the surface. How easy and how natuwill off to the surface. How easy and how natural! It is as perfect and valuable as it is simple and philosophical.

Sore Lips, Chapped Hands &c.—I sell a great deal of salve to Seamen, who say it is the It acts like a charm in these complaints. Two

or three applications cures.

Pimples on the face freekles, tan, masculine all humor. It will not cease drawing till the face is free from any matter that may be lodged under the skin and frequently breaking out to the surface. It then heals. When there is comes as soft and delicate as a child's. It throws white transparent skin that is perfecily enchanting. Sometimes in case of Freckles it will first but seldom. Pursue the salve and all will soon

lady's face is that it excites into natural and purpose for the toilet.

up matter within. It is pierced with millions, fill a book. I suppose there is not a family in of openings to relieve the intestines. Stop up the United States, that would consent to be affection of the liver; W Graham, 19 Hestera without this salve a single day if they knew its — pain in the side; E Hamel, 19 Norfolk-states the cutaneous eruntion: H Bingham 841 states

Quinsy sore throat, Influenza, Bronchitis.

There is not an internal remedy in existence that will cure these disorders as quick as the years with success without a parallel. I have salve. It opens the pores on the neck and used it for all disease of the chest, consumption, draws off all the inflammation and impure juices, and a few days will see the patient well. It is sovereign in these cases,

Piles.—The salve acts upon the piles as up responsibility, and I declare before Heaven and on sore eyes. There is an inflammation which must be drawn from the parts. The salve does

benefit, when the patient was within the reach Hernia or Rupture,-This salve has cured ome very bad cases of rupture, and although it might not all, yet it would be wise to try it.-It is a pecular complaint, but it may be helped some, if not cured entirely. I have not the shadow of a doubt that it would cure thousands if the trial was made, who believe no medicine of the least benefit.

Two shillings worth would satisfy any one, whether it would do good or not.

Worms If parents knew how fatal most medicines were to children taken inwardly, they would be slow to resort to them. Especially mercurial lozenges," called "medical lezenges," "vermifuges," pills, &c. Even were it possible to say positively that worms were present, it is not safe. The truth is, no one can tell, invariably, when worms are present. Of course the remedy is not applicable to the complaint. Now let me say to parents, that this salve will always tell if a child has worms.— Let it be rubbed on the neck and chest, to keep them from going up, and then down on the bowels and they will soon leave. It will drive every vestige of them away. This is a simple and safe cure. No injury can come of it in any way. But should it be cholic, inflation of the bowels, or gripe of the intestines, it will effectually cure them as the worms.

There is probably no medicine on the face of he impurities through the pores to the surface. the carth at once so sure and safe in the expul-

sion of worms. It would be cruel, nay wicked, to give internal doubtful medicines, so long as a harmless, certain, and effectual external one could be had.

Cholic, Pain, or Inflammation of the Bowels .- Let the salve be rubbed in and heated with the fire or hot flat irons, and all pains and difficulty will soon cease.

Swellings of the joints, or weakness, or any affection of the bone, nothing is so good for as this salve.

Poisons.-I never knew anything so good as this salve. It causes the poison to discharge immediately, and leaves not the slightest cause of alarm. Poisons by nails, bites of animals, or burns, it removes when nothing else will. Toilet .- I have it done up in fine order for

the dressing case. Although I have said little about it as a hair restorative, yet I will stake it against the world! They may bring their oils far and near, and mine will restore the hair two cases to their one. These are no idle words, for I am ready to back it with any reasonable amount.

Old Sores, Mortification, Ulcers, &c .- There s no effectual way of curing these, but drawing off the putrid matter. To merely dry it up awould only endanger one's health more. That some sores are an outlet to the impurities of the system, is the only reason, because they cannot pass off through the natural channels of the Insensible Perspiration If such sores are healed up, the impurities must have some other outlet, or it will endanger life. This is the reason why of the insensible perspiration, and lodging in it is impolitic to use the common salves of the the cuticule, forms sores, pimples &c., it being day in such cases. For they have no power to day in such cases. For they have no power to open other revenues, to let off all this morbid matter, and the consequences are always fatal. This salve will always provide for such emergencies. There need be no fear. It is perfect.

Broken Breast.—Persons need never have a broken breest. The salve will always prevent

it, if used in season. Liver Complaint .- Personshaving this complaint frequently have eruptions of the hands, face and other parts, and never once thir k that it arises from the liver. Their utter inability to remove these irruptions, proves their misapprehension of the disorder. Such must use it first on the feet, then wear it on the chest, and the

difficulty will soon go away. Illiac Passion or Griping of the Intestines. -This disease caused the death of the late H. S. Legare, Attorney General and acting Secretary of the United States. It is the stopping up of the smaller intestines, and sometimes the twisting of them. It is brought on by a neglect of the daily evacuations, or from incarcerated Hernia. The pains are awful, and unless

help comes speedily, the sufferer soon dies. The All-Healing Ointment would have saved the life of Mr. Legare and all others under similar circumstances.

Corns .- If the salve is used according to dir cons, people need never be troubled with orns-especially cut out by some travelling mountebank who knows he is doing more mischief than he can possibly repair. A little of this cintment put on now and then will always keep them down.

Indeed there are few complaints that it will not benefit. It is a Family Salve of untold value. As long as the sky rolls over one's head and grass grows upon the earth, it will be sought after, used and valued. As there is no mercurial substance in it, but composed entirely of vegetables it gives no good ground for apprehension. We have full certificates, from all the per-
