Hans Schaffer. and As

THA BUTCH MOBT AND TRCE, STRET WOED OF IT. Hans Schaffer was a Dutchman, In Jerry born and bred; Where peaches are so plenty, And all the mud is red.

> His father was a Dutchman, Likewise his mother too ; And his uncles, sunts, and cousins-Faith were not a few !

Hans wore the real Dutch breeches Dutch was his coat and hat; So was his umb-er-ella-But I wont speak of that.

His shoes and his knee-buckles, His collar and his vest, And his linsey-woolsey stockings,

Were Dutch, like all the rest. Hans Schaffer he got married, Having nothing else to do;

His wife-may heaven rest on her !--She was a Dutchman too. But ah ! poor mortal creature,

It happened that she died, About a week or two before The nuptial knot was tied.

And all the people mourned her-"Twas very right they should ; Yes, all Han's wife's relations Of tears shed quite a flood.

"Well, what of Hans ?" you query ; What's that to you or me ? He's living still in Jersey, And there we'll let him be.

The Farm of Moant Vernon.

Washington was passionately fond of Agriculture. Its improvement was ever with him an object of paramount regard. Virginia can boast of few sons to whom her agriculture has been more indebied ; who assisted in promoting her interests to a greater extent, or with e manifestation of a more ardent and patronizing zeal. The following account of his farming operation will serve to exhibit the Father of his country (the man first in war. first in peace, and first in the hearts of his

Mount Vernon, contained ten thousand acres of land in one body, equal to fifteen square miles. At was divided into farms of convenient size, at the distance of one, two, three, four and five miles from his mansion. These farms he visited every day in pleasant weather, and was constantly engaged in making experiments for the improvement of spriculture .-Some idea of the extent of his farming operations may be from the following facts. In 1787, he had five hundred acres in grass ; sowed six hundred scres of onts ; seven hundred scres in wheat; and prepared as much corn, barley, pofatoes, beans, reas, &c., and one hundred and fifty acres in turnips. His stock consisted of one hundred and forty horses, one hundred and twelve cows, three hundred and thirty-five working oxen, heifers and sheep. He constantly employed two hundred and fifty hands, and kept (wenty-four plough going during the whole year, when the earth and the weather would permit. In 1788, he slaughtered one bundred and fifty hogs weighing eighteen thousand five hundred and ninety unds, for the use of his family, besides the provisions for the use of his negroes.

BEAUTIFUL ILLUSTRATION -A happier instance of the wonderful character of the Bible and the facility with which even a child can answer the greatest questions, and solve the sublimest mysteries, was perhaps never given than at an examination of a deaf and dumb institution, in London. A little boy was asked, in writing, Who is ade the world I He took the chalk, and wrote underneath these words: " In the beginning, God created the heavens

and the earth. he clergyman then inquired, Why did Christ come into the world ? A smile rested upon the countenance of the little fellow, as he wrote-

The Ocean and a Volcano in Strife.

When the torrent of fire precipitated itself nto the ocean, the scene assumed a character of terrific and indiscribable grandeur. The magnificence of idestruction was never more perceptibly displayed than when these antagoforth its burning billows to meet the mightiest of oceans. For two score miles it came, rolling. tumbling. swelling forward, an awful agent of death. Rocks melted like wax in its path; forests crackled and blazed before its fervent heat; the very hills were lifted from their primeval beds, and sank beneath its tide. or were borne onward by its waves : the works of man were to it but as a scroll in the flames; nature shrivelled and trembled before the irresistible flow. Imagine Niagara's stream above the brink of the falls, with its dashing, whirling, tossing and eddying rapids, madly raging and hurrying on to their plunge, instantaneously bursting into fire. a gory-hued river of fused minerals; the wrecks of creative matter blazing and disappearing beneath its surface: volumes of hissing steam arising ; smoke curling upward from ten thousand vents, which gave utterance to as many deep toned mutternge, and sullen, confined, and ominous clamorings, as if the spirits of fallen demons were struggling against their final doom ; gases donating and shricking as they burst from their prison house ; the heavens lurid with flame ; the atmosphere dark, turgid and oppressive; the horizon murky with vapors, and gleaming with the reflected contest ; while cave and hollow, as the hot air swept along their heated walls, threw back the unearthly sounds in a myriad of prolonged echoies. Such was the scene, as the fiery cataract, leaping a precipice of fifty feet, poured its flood upon the ocean.

The old line of coast, a mass of compact, indurate lava, whitened, cracked and fell. The waters recoiled, and sent forth a tempest of spray; they foamed, and lashed around and over the melted rock; they boiled with the heat, and the roar of the conflicting energies grew fiercer and louder. The reports of the exploding gas were distinctly heard twentyfive miles distant. They were likened to discharges of whole broadsides of heavy artillery. Streaks of the intensest light glanced like lightning in all directions; the outskirts of the burning lava as it fell, cooled by the shock. vas shivered, into millions of fragments, and borne aloft by strong breezes blowing towards the land, were scattered in scintillant showers far into the country. For three successive weeks the volcano disgorged an uninterrupted burning tide, with scarcely any diminution, into the ocean. On either side, for twenty miles, the ocean became heated, and with such rapidity, that on the second day of the junction, shes came'ashore dead in great numbers at Keau, fisteen miles distant. Six weeks later. at the base of the hills, the water continued

The Genesee Farmer gives this brief sumnary of the native countries of our most familiar plants :

Islands.

The potatoe is a native of South America. nd is still found wild in Chili, Peru and small and bitter. The first mention of it by European writers, is in 1588. It is now spread over the world. Wheat and rye originated in Tartary and Siheria, where they are still indigenous. The only country where the

oat is found wild in Abvennia, and thence may be considered a native. Maize or Indian corn a native of Mexico, and was unknown in Europe, until after the discoveries of Colum-The bread fruit tree is a native of South hus. Sea Island, particularly Otaheite. Tea is found a native no where except in China and Japan, from which country the world is supplied. The cocoa nut is a native of most equinoctial countries, and is one of the most valuable trees, as food, clothing and shelter are Elastic Web, Common. and Quilted Saddles, afforded by it. Coffee is a native of Arabia

GIENTERAL JELLEGIFION.

PROCLAMATION. THEREAS, by an act of Assembly of the Com-monwealth, entitled, "An act relating to the election in this commonwealth." it is enjoined upon me o give public notice of such election to be held, and al-o the enumeration in such notice what officers are to be so the e nistic elements met in deadly strife. The elected, I, JOHN N. WESTON, High Sheriff of the mightiest of earth's magazines of fire poured county of Bradford, do hereby make known and give no county of Bradford, do hereby make known and give no-tice to the electors of said county, that a GENERAL ELECTION will be beld in said county, on TUES DAY, the 14th day of October in the several districts in said county, to wit :

In Albany, at the school house in the north distric near the house of W. Wilcox. In Asylum, at Jacob Frutchey's

Ê

In Athens, at E. S. Matthewson's. In Armenia, at Wrightman Pierce's. In Burlington, at Ad'n M'Kean's. In Canton, at Benj. Coolbaugh's, In Columbia, at James Morgan's. In Durell, at S. S. Bradley's. Franklin, at Wm. Des In Granville, at the school house, No. 1, at Granville

In Herrick, at Wm. Durand's. In Litchfield, at R. Park's. In Leroy, at the school house in Leroy. In Monroe, at J. P. Smith's.

Harness; Carpet Bags,

THE preceding figure is to represent the INSEN. SIBLE PERSPIRATION. Jus the great evacuation for the impurities of the body. It will be notices

that a thick cloudy mist issues from all points of the sur-face, which indicates the wonderful process going on within. This perspiration flows uninterruptedly when we are in health, but ceases when we are sick. It should be the caro of every one to see that it is not checked.-Life cannot be sustained without it. It is thrown of The blood and other juices of the body, and dispo-ses by this means, of nearly all impurities within use.— The blood by this means only, works the fipure. The language of Scripture is, "in the blood is the figs." If it ever hecomes impure, it may be traced directly to the stoppage of the insensible perspiration. It never requires any internal medicines to cleanse it, as it always puri-fies itself hy its own heat and action, and throws off all the offending burners, through the inschildegreprinting. Thus we see, all that is necessary when the blood is stagnant or infected, is toopen the pures, and it relieves itself trom all impurity instantly. Its own heat and vi-tality are sufficient, without one particle of medicine, except to open the pores upon the surface,-Thus we see the folly of taking so much internal remedies. practicioners, however, direct their efforts to restore the insensible perspiration, but it seems to be not always the proper one. The Thompsonians for instance, steams, the Hy-ropathist shrouds us in wet blankets, the Homopathist deals out infinitissimals, the Allopathist bleeds and doses us with mercury, and the blustering quack

gorges us with pills, pills, pills. But one object only is in view, viz: to restore the in-sensible perspiration. If this can be done, they say, we will take care of the rest. It will be seen, therefore, that all physicians understand alike what is necessary to a recovery, how much they may differ us to the mode of obtaining it. To give some idea of the amount, and consequently

the importance of the insensible perspiration, we will state that the learned Dr. Lewenhock, and the great Boerhaave, ascertained that five-eights of all we received in to the stomach, passed off by this means. In other words, if we eat and drink eight pounds per day, we evacuate five pounds of it by the insensible perspiration. This is nong other than the used up particles of the blood, and other joices, giving place to the new and

field one, and other julices, giving place to the new and fresh ones, by carrying with it all the implyrities within up to the surface. To check this, therefore, is to retain in the system five eights of all the virulegit matter that nature demandighebould leave the body. And even when this is the case, the blood is of so active a principle, that it determines those particles, to the skin, where they form scales primeles pleaves and other spote. but if it is discabs, pimples, ulcers, and other spots; but if it is directed inwards, and fails upon the lungs, the consequences are generally fatal.

By a sudden transition from heat to cold, the nores are stopped, the perspiration ceases, and disease begins at once to develope itself. Hence, a stoppage of this flow of the juices, originates so many complaints. It is through the surface that we imbibe nearly all our ills. It is stopping the pores, that overwhelms mankind with coughs, colds, and consumption. Nine-tenths of the world die from diseases induced by stoppage of the

insensible perspiration. It is easily seen therefore, how necessary is the flow of this subtle humor to the surface, to preserve health. It cannot be stopped ; it cannot even be checked, without producing disease. The blood and intestines must relieve themselves of all their wornout particles, and poisonous humors, and they must go

arough the pores as nature designed. Let me ask now, every candid mind, what course seems the most reasonable to pursue, and unstop the ores, after they are closed and let the perspiration flow, that the blood may relieve itself of its impurities ! Would you give physic to unstop the porces ! . Or would you apply something that would do this upon the surface, where the clogging actually is ! Would not this be common sense ?; And yet I know of no physician who makes an internal application to effect it. The reason I makes an internal application to effect it. The reason I assign is, that no medicine within their knowledge, is capable of doing it. Under these circumstances, I pre-sent to physicians and to all others, a preparation that has this power to the fullest extent. It is McAllister's All-Healing Ointment or the World's Salre. It has power to restore perspiration on the feet, on the head, around oldsores, upon the chest, in short, upon any part of the body, whether diseased slightly or severely. When the perspiration is restored, it has power to penetrate the

extent. I need not say that it is curing persons of Continually, although we are told it is foolish ness. I care not what is said, so long as I can cure so veral thousand persons yearly. If this medicine was in people need never be troubled with corns the hands of some patent medicine brawlers, they would cut out by some travelling mountebank who has make an uproar through the country that would be in supportabl Scrofula or King's Evil .- This disease is really in

veterate, and hard to be subdued. It is generally seated in the sides of the neck, behind the cars and under the chin. vet scarcely any part of the body is exempt. It sometimes falls upon the lungs and produces consump-tion. It is a dreadful circumstance, that this disease is transmitted from parents to children. The Salve will extract all the morbid matter by causing the sores to discharge ; and then let then the Solar Tincture be used to drive it to one point, which done, a continuance of the Ointment will completely remove this disorder. This i This is the safest and most effectual of any method. It should a adopted without a moment's hesitation

Erysipelas -This complaint arises from impurities being driven out to the surface by means of the insensible being oriven out to the surface by means of the insensible perspiration, and lodging in the cuticule, forms sures, pimples &c., it being of a .caustic, acrid putrifying na-ture. It only requires that it should discharge its vi-rulent particles through the skin, and the difficiently will pass off. If suffered to remain, and driven inwards it i

equently fatal. Let the Salve and Solar Tincture be used as in scro-

fula and the patient will soon get well. Salt Rheum.—This is another obstinate disease but can be cured effectually as the scrofula. There is no lifticulty in this disease. Head ache, Ear ache and Deafness.-The Salve has

cured persons of the Head-Ache of 12 years standing and who had it regularly every week, so that vomiting often took place. It cured the wife of a man who laughed in my face for proposing such a cure, and who haugh would not be without it for the best farm in the State. If any one will take the trouble to call I will give his name Deafness and Esr-Ache are helped with the like suc

cess as also Ague in the face. Cold Feet.—Consumption, liver complaint, pains in the chest or side, falling of the hair, one or the other always accompanies cold feet. It is a sure sign of disease in the system to have cold feet. Some persons are totally unable to get them warm, and endure much suffering thereby.

The salve will restore the insensible perspiration and thus cure every case. It is infallible for this. Asthma, Tightness of Breath.—If this disease is no ereditary and produced by the malformation of the chest, the salve will cure it.

Dyspepsia.—One would suppose a salve would not effect this disease much but the All-Healing Ointment will cure two sooner than any internal remedy will cure

Sure Eyes .- The inflamation and disease always lies back of the ball of the eye in the socket. Hence the util ity of all remedies that are used upon the lids. The virtue of any medicine must reach the seat of inflam mation or it will do little good. This salve if rubbe on the temples will penetrate directly into the sucket and infuse all its virtues upon the disorder. The pore will be opened, a proper perspiration will be created and the disease will soon pass off to the surface. How easy and how natural ! It is as perfect and valuable a t is simple and philosophical. Sore Lips, Chapped Hands 4c.-I sell a great deal

of salve to Seamen, who say it is the only thing they can depend on to cure their raw hands, when exposed to the weather at sea. It acts like a charm in the

plaints. Two or three applications curcs. Pimples on the face, freekles, tan, masculine skin, gross surface.—Its first action is to expel all humor. It Arrow ro will not cease drawing till the face is free from any mat-ter that may be lodged under the skin and frequently Antimo Aquafort Aqua am breaking out to the surface. It then heals. Whe there is nothing but grossness, or dull repulsive surface, it begins to soften and soften until the skip becomes as Brimstor Blue Vit soft and delicate as a child's. It throws a freshness and blushing color upon the now white transparent skin that is perfectly enchanting. Sometimes in case of Freek-Bayterry do Balsam i heait will first start out those that have lain hidden and do seen but seldom.- Pursue the salve and all will soon dis-Barbado Balsam b

pear. The reason for this wonderful change in a lady's Blood ro face is that it excites into natural and healthy activity Blue pill the Insensible Perspiration, while it renovates and renews the surface, and leaves the skin in as lively and Black dr delicate a condition as the most fastidious could desire Barley F It is put up in fine jars and beautifully scented on pur-Bateman pose for the toilet. Bugundy Burns .- Life can always be saved if the vitals are

Durns.—Life can always be saved if the vitals are not injured. I have so many testimonials for the cure of this complaint that I could fill a book. I suppose there is not a family in the United States, that would consent to be without this save a single day if they knew its balm in healong Burns alone. It estracts the African Campho Chamon pain and leaves the place withouta scar. Quinsy sore throat. Influenza, Bronchitis.-There Corrosiy Cochine

is not an internal remedy in existence that will cure these disorders as quick as the salve. It opens the pores on the neck and draws off all the inflammation and im-Canthari Coc. inu pure juices, and a few days will see the patient well. Carbona dø

s sovereign in these cases. Piles.—The salve acts upon the piles as upon sore Piles.eves. There is an inflammation which must be drawn Colocynt

from the parts. The salve does this. Hernia or Rupture.-This salve has cured some very Chlorule bad cases of rupture, and although it might not all, yet it Dragon's would be wise to try it. It is a peculiar complaint, but

The All-Healing Ointment would have tay Mr. Legare and all others under similar Corns .- If the salve is used according to dom is doing more mischief than he can possibly repailed in this ontment put on now and then will a keep them down.

ep them down. Indeed there are few complaints that it will will but efit. It is a Family Salve of untold value. A as the sky rolls over one's head and grass grown the earth, it will be sought after, used and valued there is no mercurial substance in it, but compostirely of vegetables it gives no good ground for

the theft was proved against him. Haroun orther of the youth came before the Khalif in great distress, and said "Oh, Khalif of the age, cut not off that hand which the Almighty has formed and gifted." Haroun replied, " It is by the order of the Almighty, who prescribed this punishment (Koran) that I cut it off." The old woman replied "Oh, Khalif. my strength and support are dependant on that hand which you are cutting off." "Cut it off." said Haroun. "for if I let him escape his just punishment. I shall be of the number of the transgressors." " Oh, Khalif." said the old woman. " you have many sins for which you implore forgiveness night and morning ; include this among them." The Khalif as pleased with her wit, and pardoning her son, dismissed her happy and contented.

IDLE VISITS .- The idle levy a very heavy tax upon the industrious, when by frivolous visitations they rob them of their time. Such persons beg their daily happiness from door to door as beggars their daily bread, and like them, sometimes meet with a rebuff. A mere gossip ought not to wonder if we evince signs that we are used of him, seeing that we are indebted for the honor of his visit solely to the insupportable load of ennui, and then sallies forth to distribute it amongst his acquain lances.

by a strict attention to business, to merit a share of public patronage. El.KANAH SMITH & SON. Towanda, May 21, 1845.

BOOT & SHOE MAKING.

WILCOX & SAGE have associated themseve in the Boot and Shoe Making business, in the $\forall \Psi$ in the Boot and Shoe Making business, in the borough of Towanda, and may be found at the old stand of S. Hathaway, lately occupied by Elkanah Smith, near I. H. Stephens' Exchange Hotel, where they solicit a share of public patronage. They intend, by a careful selection of stock, and by attention to the interests of

their custom of slock, such by attention to the interests of their customers, to make as nest and durable work as can be manufactured in this portion of the country. They keep constantly on hand, and will manufacture o order, morocco, calf and coarse boots and shoes; Ladies' Gaiters, shoes and slips; children's do.; gent's gaiters and pumps, &c., &c. JOHN W. WILCOX,

PHILANDER SAGE. Towanda, May 14, 1845.

lungs, liver, or any part of the human system, and to act upon them, if they be diseased, by separating the in-flamed morbid particles therefrom, and expelling them flamed morbid particles therefrom, and expelling them to the surface.

It has power to cause all external soges, scrofulous humore, skin discases, poisonous wounds to discharge their putrid matter, and then heals them. It is a remedy that sweeps off the whole catalogue of

cutaneous disorders, and restores the entire cuticle to its healthy functions. It is a remedy that forbids the necessity of so many

and deleterious drugs taken into the stomach. It is a remedy that neither sickens, gives inconvenience, or is dangerous to the intestines.

This remedy is probably the only one now known, hat is capable of producing all these great results. Its that is capable great value is in restoring at once, the circulation of the

juices when checked, or disarranged by cold or other causes. It preserves and defends the surface from all causes. It preserves and defends the surface from all derangement of its functions, while it keeps open the channels for the blood to avoid all its impurities and dis-pose of all its useless particles. There is a connection, harmony, and feasibility in all that defies contradiction. It is a simple, but wonderful principle that preserves in healthy operation the entire machinery of our being. It indissolubly holds together the surface and the internal vincera, the internal viscors and the surface. They are insecarably connected and cannot be disjoined. The inseparably connected and cannot be disjoined. The surface is the outlet of five-eights of the hile and used up matter within. It is pierced with millions of openings to relieve the intestines. Stop up these pores, and leath knocks at your door. It is rightly termed Alldeath khocks at your door. It is rightly termed All-Healing, for there is scarcely a disease, external or in-ternal, that it will not benefit. It will be found the most useful as well as the cheapest family medicine in the world. I have used it for the last fourten years with success without a parallel. I have used it for all disease of the chest, consumption, liver, and the most daugerous of internal maladies. I have used it in cases of extreme card and beard investign the utmost dauger and reperil and bazard, involving the utmost danger and re-peril and bazard, involving the utmost danger and re-sponsibility, and I declare before Heaven and man, that not in one single case has it failed to benefit, when the patient was within the reach of mortal means.

I never, to my recollection had more than five or six wands who have used it, say that it was not favorable to their complaint. On the contrary I have had hundreds return voluntarily, and in the warmest and most pathetic language speak in its praise. I have had physicians, learned in the profession; I have had mihad physicians, learned in the profession; I have had mi-nisters of the gospel, Judges on the bench, aldermen and lawyers, gentlemen of the highest eradition and multitudes of poor, use it in every variety of way, and there has been but one voice, one united. universal voice saying " McAllister your ointment is good." *Consumption.*—Of all diseases, we find this the most important, and concerning which we meet with the most opposition. It can hardly be credited that a salve can have more effect upon the lungs sended as then one with

KINGSBERY 4 CO, at their old stand one educor south of the "Atheas Holel," have just plendid assortment of Paucy and stanle Dry fixed. more from all external sores by causing them to dis-charge. In like manner it operates upon internal affec-tions by driving all the impurities through the pores to the surface. Thus with consumption, if placed upon the chest, it penetrates directly to the lungs, separates the poisonous particles that are consuming them and ex-

pels them from the system. It is the simplest and most rational process in creation, What do you imply by " capitary attraction : Ringlets and bandelets. it may be helped some, if not cured entirely. I have least benefit.

Two shillings worth would satisfy any one, whether it would do good or not.

Worms .- If parents knew how fatal most medicines were to children taken inwardly, they would be slow to resort to them. Especially "mercurial lozenges," call-ed "medical hzenges," "vermifuges," pills, &c. Even were it possible to say positizedy that worms were pre sent, it is ot safe. The truth is, no one can tell, inra-riably, when worms are present. Of course the remedy is not applicable to the complaint. Now let me say to permet that this can safe a safe a start parents, that this salve will always tell if a child parents, that this salve will always tell if a child has worms. Let it he rubbed on the neck and chest, to keep them from going up, and then down on the bowels and they will soon leave. It will drive every vestige of them away. This is a^esimple and safe cure. No injury can come of it in any way. But should it be cholic, inflation of the bowels, or gripe of the intestines, it will ef-

fectually cure them as the worms. There is probably no medicine on the face of the earth t once so sure and safe in the expulsion of worms. It would be cruch nay wicked, to give internal doubtful medicines, so long as a harmless, certain, and effect-usl external one could be had.

Chulic, Pain, or Inflammation of the Bowels .-- Let the salve be rubbed in and heated with the fire or hot flat irons, and all pains and difficulty will soon cease. Swellings of the joints, or weakness, or any affectio of the bone, nothing is so good for as this salve.

Poisons .-- I never knew snything so good as this salve. It causes the poison to discharge immediately, and leaves not the slightest cause of alarm. Poisons by nails, bites of animals, or burns, it removes when no thing else will.

Toilet .-- I have it done up in fine order for the dressing case. Although I have said little about it as a hair restorative, yet I will stake it against the world ! They may bring their oils far and near, and mine will restore the hair two cases to their one. These are no idle words for I am ready to back it with any reasonable amount.

Old Sores, Mortification, Ulcers, &c .- There is no efour sores, morrigization, overs, etc.—) here is no el-ectual way of curing these, but drawing off the putrid-matter. To merely dry it up would only endanger one' health more. That some sores are an outlet to the im-purities of the system, is the only reason, because they cannot pass off through the natural changels of the *In*sensible Perspiration If such sores are healed up, the impurities must have some other outlet, or it will endanger life. This is the reason why it is impolitic to use the common salves of the day in such cases. For they have no power to open other revenues, to let off all this mo bio power to open other revenues, to ter on all into mor-bid matter, and the consequences are always fatal. This salve will always provide for such emergencies. There need be no fear. It is perfect. Broken Breast.—Persons need never have a broken broast. The salve will always prevent it, if used in sca-

Liver Complaint .- Persons having this complaint frequently have eruptions of the hands, face and other parts, and never once thit k that it arises from the liver Their utter inability to remove these irruptions, proves their misapprehension of the disorder. Such must use it first on the feet, then wear it on the chest, and the

difficulty will soon go away. *Illiac Passion or Griping of the Intestines.*—This disease caused the death of the late H. S. Legare, At-torney General and acting Secretary of the United States. It is the stopping up of the smaller intestines, and some times the twisting of them. It is brought on by a neg-lect of the daily evacuations, or from incarcerated Hernorth door.
