[From the German of Schiller.] The Worth of Woman.

Honored be woman I she beams on the sight. Graceful and fair, like a being of light; Scatters around her, wherever she strays, Roses of bliss on our thorn-covered way : Roses of Paradise sent from above, To be gathered and twined in a garland of Love.

Man, on passion's stormy ocean, Tussed by surges mountain high, Courts the hurricane's commotion, Spurns at reason's feeble cry. Loud the tempest roars around him, Louder still it roars within, Plashing lights of hope confound him, Stun with life's incessant din.

Woman invites him with bliss in her smile. To cease from his toil and to be happy awhile; Whispering wooingly-come to my bower-Go not in search of the phantom of power-Honor and wealth are illusory-come! Happiness dwells in the temples of home.

> Man with fury stern and savage, Persecutes his brother man. Reckless if he bless or ravage. Action, action-still his plan. Now creating-now de troying; Ceaseless wishes toar his breast; Ever sinking, ne'er enjoying; Still to be, but never blest.

Woman, contented in silent repose, Enjoys in its beauty, life's flower as it blows, And waters and tends it with innocent heart; Far richer than man with his treasures of art; And wiser by far in the circles confined. Than he with his science and lights of the mind.

Coldly to himself sufficing, Man disdains the gentler arts, Knoweth not the bliss arising From the interchange of hearts. Slowly through his bosom stealin , Flows the genial current on, Till by age's frost congealing, It is hardened into stone.

She, like the harp, that instinctively rings, As the night breathing zephyr soft sighs on the strings Responds to each impulse with steady reply. Whether sorrow or pleasure her sympathy try; And tear drops and smiles on her countenance play. Like sunshine and showers of a morning in May.

Through the range of man's dominion Terror is the ruling word-And the standard of opinion Is the temper of the sword. Strite exults, and pity blushing, From the scene departing flies, Where, to battle madly rushing, Brother upon brother dies.

Woman.commands with a milder control-She rules by enchantment the realins of her soul, As she glances around in the light of her smile, The war of the passions is hushed for a while : And discord, content from his fury to cease, Reposes entranced on the pillows of peace.

An Elequent Effusion.

The following thrilling and soul-inspiring effusion of liberty and glory, is said to have been delivered by the commandment of a bare-foot company in the Hoosier State, shortly after re ceiving the false report that Mexico had declared war against the United States. The report may not be exactly verbatim, though it is evident the

"Men of blood and sons of Washington and that old hoss General Jackson! I want your attention. Lightnin' has bust upon us, and Jupiter has poured the ile of his wrath down the greasy shanks of the Mexicans. Thunder has broke loose and sliped its cable, and the mighty valley of the Mississippi reverberates the thou sand-tongued hissing of Santa Anna and the smaller ignorant fatius that revolves around the benighted and wooden leged pop-gun of the benighted and wooden leged pop-gun of the sense quanty of government of the benighted and wooden leged pop-gun of the sense quanty of government of the benighted and wooden leged pop-gun of the sense quanty of government of the benighted and wooden leged pop-gun of the sense quanty of government of the benighted and wooden leged pop-gun of the sense quanty of government of the benighted and wooden leged pop-gun of the sense quanty of government of the benighted and wooden leged pop-gun of the sense quanty of government of the benighted and wooden leged pop-gun of the sense quanty of government of the sense quanty of government of the benighted and wooden leged pop-gun of the sense quanty of government of govern

Citizens and sires on the bloody ground on which our fathers catawampously poured out their claret free as ile, to enrich the soil over which we now hover, and watch with hyena eyes:

Let the catamount of the inner varmint loose, and

MERCUR'S.

MERCUR'S. Citizens and sires on the bloody ground on prepare the chessy-cat of vengeance, for the long looked for day has arrived! The crockodile of the Mississpp has gone into his hole, and the sun that lit King David and his host, across the Atlantic Ocean looks down upon the scenes and drops a tear to its memory. Hosses I am with you! And while the stars of Uncle Sam and the strines of his country triumphantly wave in the breeze-whar-whar is craven, low-lived, chicken-bread, toad-hoppin," red mouth mother's son of ye what will not raise the beacon light of triumph-smouse the citadel of the aggressor, and press onward to liberty and glory! Whoop! H-u-r-ra-h! Whar's the enemy?

A BEAUTIFUL FIGURE.-Life is beautifully compared to a fountain fed by a thousand streams, that perishes if one be dried. It is a silver cord twisted with a thousand strings. that part if one is broken. Frail and thoughtless morrals are surrounded by innumerable dangers, which make it much more strange that they escape so long, than they always per-ish suddenly at last. We are encompassed with accidents every day, to crush the mouldering tenements we inhabit. Seeds of death are planted in our constitution by nature. The earth and the atmosphere whence we draw the breath of life, is impregnated with deathhealth is made to operate its own destruction. The food that nourishes the body contains the element of decay. The soul that animates it by a vivifying fire tends to wear it out by its own action. Death lurks in ambush along our paths. Notwithstanding this is the truth so palpably confirmed by daily examples before ur own eves, how little do we lay it to heart. We see our friends and neighbors perish among us, but how seldom does it occur to our thoughts that ours shall, perhaps, give the next fruitless warning to the world

A KIND ACT .- How sweet is the remembrance of a kind act! As we rest on our pillows or rise in the morning, it gives us delight. We have done a good deed to a poor man; we have made the widow's heart to rejoice, we have dried the orphan's tears. Sweet, O, how sweet the thought! There is a luxury in remembering the kind act. A storm careers above our heads, all is black as midnight-but the sunshine is in our own bosom—the warmth is felt there. The kind act rejoiceth the hear and giveth delight inexpressible. Who will e kind! Who will not de good? Who will not visit those who are afficted in body or mind?-To spend an hour among the poor and depressed.

" Is worth a thousand passed In pomp and case—'tis present to the last."

CENTRAL DRUG STORE.

HIS LAY RECEIVING, at the Central Point a few doors south of Montanya's Cash Store, di-rom New York, a fresh supply of DRUGS AND rect from New York, a fresh supply of DRUGS AND MEDICINES, which will positively be sold at city cost and charges. He assures the public that all work entrusted to his care will be well done, as he has thoroughly learned his and a standard or the standard of the standard or the standard or

his trade and is determined to render satisfa JOHN A. ESENWINE. Towanda, Uccember 39, 1844.

HE preceding figure is to represent the INSEN SIBLE PERSPIRATION. It is the great evac ution for the impurities of the body. It will be noticed that a thick cloudy mist issues from all points of the surface, which indicates the wonderful process going on within. This perspiration flows uninterruptedly when we are in health, but ceases when we are sick. It should be the care of every one to see that it is not checked.-Life cannot be sustained without it. It is thrown off from the blood and other juices of the body, and disposes by this means, of nearly all impurities within use The blood by this means only, works itselfpure. The language of Scripture is, "in theblood is the life." If it ever becomes impure, it may be traced directly to the internal medicines to cleanse it, as it always pur fies itself by its own heat and action, and throws off all the offending humors, through the insensible perspiration. Thus we see, all that is necessarry when the stagnant or infected, is toopen the pores, and it relieves itself from all impurity instantly. Its own heat and vi-tality are sufficient, without one particle of medicine, except to open the pores upon the surface.—Thus we see the folly of taking so much internal remedies. All practicioners, however, direct their efforts to restore the insensible perspiration, but it seems to be not always the proper one. The Thompsonians for instance, strems the Hy-ropathist strouds us in wet blankets, the Ho mopathist deals out infinitissimals, the Allopathist bleeds and doses us with mercury, and the blustering quack

gorges us with pills, pills, pills, pills.

But one object only is in view, viz: to restore the in sensible perspiration. If this can be done, they say, we will take care of the rest. It will be seen, therefore that all physicians understand alike what is necessary to recovery, how much they may differ as to the mod

f obtaining it.

To give some idea of the amount, and consequently the importance of the insensible perspiration, we will state that the learned Dr. Lewenhock, and the great Boer haave, ascertained that five-eights of all we received in to the stomach, passed off by this means. In other words if we cat and drink eight pounds per day, we evacuat

the counts of it by the inscusible perspiration.

This is none other than the used up particles of the blood, and other juices, giving place to the new and fresh ones, by carrying with it all the impurities within up to the surface. To check this, therefore, is to retain in the system five eights of all the virulent matter that acture demands should leave the body. nature demands should leave the body. And even when this is the case, the blood is of so active a principle, tha it determines those particles, to the skin, where they form scabs, pimples, ulcers, and other spots; but if it is di rected inwards, and falls upon the lungs, the conse

quences are generally fatal.

By a sudden transition from heat to cold, the por are stopped, the perspiration ceases, and disease beging at once to develope itself. Hence, a stoppage of this flow of the juices, originates so many complaints. It is through the surface that we imbibe nearly all our ills. It is stopping the pores, that overwhelms mankind with coughs, colds, and consumption. Nine-tenths of the world die from diseases induced by stoppage of the insensible perspiration. It is easily seen therefore, how necessary is the flow of this subtle humor to the surface to preserve health. It cannot be stopped; it cannot ever be checked, without producing disease. The blood and intestines must relieve themselves of all their worn out particles, and poisonous humors, and they must go

out particles, and poisonous humors, and they must go through the pores as nature designed.

Let me nak now, every candid mind, what course seems the most reasonable to pursue, and unstop the pores, after they are closed and let the perspiration flow, that the blood may relieve itself of its impurities? Woold you give physic to unstop the pores? Or would you apply something that would do this upon the surface, where the clogging actually is? Would not this be common sense? And yet I know of no physician who makes an internal application to effect it. The reason I assign is, that no medicine within their knowledge, is capable of doing it. Under these circumstances, I present to physicians and to all others, a preparation that has this power to the fullest extent.—It is McAllister's All-Healing Ointment or the World's Sulte. It has power to restore perspiration on the feet, on the head,

to the surface. It has power to cause all external sores, scrofulous hu-mors, skim discases, poisonous wounds to discharge their putrid matter, and then heals them.

It is a remedy that sweeps off the whole catalogue of

utaneous disorders, and restores the entire cuticle to it

It is a remedy that forbids the necessity of so many and deleterious drugs taken into the stomach.

It is a remedy that neither sickens, gives inconven

ealthy functions

great value is in restoring at one great results. Its juices when checked, or dissi ranged by cold or other causes. It preserves and defends the surface from all crangement of its functions, while it keeps open the channels for the blood to avoid all its impurities and dispose of all its useless particles. There is a connection narmony, and feasibility in all that defies contradiction. harmony, and feasibility in all that defies contradiction. It is a simple, but wonderful principle that preserves in healthy operation the entire mr chinery of our teing. It indissolubly holds together the surface and the internal viscers, the internal viscers and the surface. They are inseparably connected and cannot be displated. The surface is the outlet of five-eights of the falle and used up matter within. It is pierced with millions of openings to relieve the intestines. Stop up these pores, and death knocks at your door. It is rightly termed All-Healing, for there is scarcely a disease, external of internal, that it will not benefit. It will be found the most ternal, that it will not benefit. It will be found the most useful as well as the cheapest family medicine in the world. I have used it for the last fourteen years with success without a parallel. I have used it for all disease of the chest, consumption, liver, and the most dangerous of internal maladies. I have used it in cases of extreme peril and hazard, involving the utmost danger and re-aponsibility, and I declare before Heaven and man, that not in one single case has it failed to benefit, when the

patient was within the reach of mortal means.

I never, to my recollection had more than five or six among the thousands who have used it, say that it was among the thousands who have used it, say that it was not favorable to their complaint. On the contrary I have had hundreds return voluntarily, and in the warmest and most pathetic language speak in its praise. I have had physicians, learned in the profession; I have had ministers of the gospel, Judges on the bench, altermen and lawyers, gentlemen of the highest crudition and multitudes of poor, use it in every variety of way, and there has been but one vaice, one united privates a significant of the property of the private o there has been but one voice, one united, universal saying "McAllister your ointment is good."

Consumption.—Of all diseases, we find this the most important, and concerning which we meet with the most opposition. It can hardly be credited that a salve can ave more effect upon the lungs, seated as they are within the system. But we say once for all, that this ointthat the system. But we say once for all that this ointment will reach the lungs quicker than any medicines that can be given internally. Every body consents to the fact that if healing medicine, could be applied on the lungs, there would be great hopes of recovery. The difficulties to cost the realistic state. difficulty is to get the medicine there. Now the Salve has the wonderful virtue of er tracting the putrid hu ors from all external sores by causing them to discharge. In like manner it oper ates upon internal affections by driving all the impurities through the pores to the surface. Thus with consumption, if placed upon the chest, it penetrates directly to the lungs, separates the poisonous particles that are consuming them and ex-

extent. I used not say that it is curing persons of Consumption continually, although we are told it is foolish ness. I care not what is said, so long as I can cure se-veral thousand persons yearly. If this medicine was in the hands of some patent medicine brawlers, they would make an uproar through the country that would be in-

supportable. Strofula or King's Evil.—This disease is really inveterate, and hard to be subdued. It is generally seated in the sides of the neck, behind the ears and under the the sides of the next, bothed me are and under the chin, yet scarcely any part of the body is exempt. It sometimes falls upon the lungs and produces consumption. It is a dreadful circumstance, that this discuss is transmitted from parents to children. The Salve will extract all the morbid matter by causing the sores to discharge; and then let then the Solar Tincture be used to drive it to one point, which done, a continuate of the Ointment will completely remove this disorder. This is the safest and most effectual of any method. It should be adopted without a moment's besitation.

Erysipelas -This complaint arises from impurities being driven out to the surface by means of the insensible perspiration, and lodging in the cuticule, forms sores, pimples &c., it being of a caustic, acrid putrifying nature. It only requires that it should discharge its virulent particles through the skin, and the difficulty will If suffered to remain, and driven inwards it is

frequently fatal.

Let the Salve and Solar Tincture be used as in scrofula and the patient will soon get well.

Salt Rheum.—This is another obstinate disease but

can be cured effectually as the scrofula. There is no difficulty in this disease.

Head ache, Ear ache and Deafness.—The Salve has cured persons of the Head-Ache of 12 years standing and who had it regularly every week, so that vomiting often took place. It cured the wife of a man who laughed in my face for proposing such a cure, and who now would not be without it for the best farm in the State. If

any one will take the trouble to call I will give his name.

Desiness and Ear-Ache are helped with the like succeas as also Ague in the face. Cold Feet.—Consumption, liver complaint, pains in the chest or side, falling of the hair, one or the other

always accompanies cold feet. It is a sure sign of dis-ease in the system to have cold feet. Some persons are totally unable to get them warm, and endure much suffering thereby.

The salve will restore the insensible perspiration and

thus cure every case. It is infallible for this.

Asthma, Tightness of Breath.—If this disease is not nereditary and produced by the malformation of the chest, the salve will cure it.

Dyspepsia.—One would suppose a salve would not effect this disease much but the All-Healing Ointment will cure two sooner than any internal remedy will cure

ne.

Sure Eyes.—The inflamation and disease always lies back of the ball of the eye in the socket. Hence the utility of all remedies that are used upon the lids. The virtue of any medicine must reach the seat of inflamvirtue of any medicine must reach the seat of inflam-mation or it will do little good. This salve if rubbed on the temples will penetrate directly into the socket and infuse all its virtues upon the disorder. The pores will be opened, a proper perspiration will be created and the disease will soon pass off to the surface. How easy and how natural! It is as perfect and valuable as it is simple and oblicosobical.

easy and how natural! It is as perfect and valuable as it is simple and philosophical.

Sore Lips. Chapped Hands &c.—I sell a great deal of salve to Seamen, who say it is the only thing they can depend on to cure their raw hands, when exposed to the weather at sea. It acts like a charm in these cor plaints. Two or three applications cures.

Pumples on the face, freekles, tan, masculine skin, gross surface.—Its first action is to expel all humor. It will not cease drawing till the face is free from any mat-ter that may be ledged under the skin and frequently breaking out to the surface. It then heals. When there is nothing but grossness, or dall repulsive surface, it begins to soften and soften until the skin becomes as soft and delicate as a child's. It throws a freshness and blushing color upon the now white transparent skin that is perfectly enchanting. Sometimes in case of Freck-les it will first start out those that have lain hidden and een but seldom. Pursue the salve and all will soon dis-

The reason for this wonderful change in a lady's face is that it excites into natural and healthy activity the Insensible Perspiration, while it renovates and re news the surface, and leaves the skin in as lively and delivate a condition as the most fastidious could desire. It is put up in fine jars and beautifully scented on pur

pure juices, and a few days will see the patient well.

It is sovereign in these cases.

Piles .- The salve acts upon the piles as upon son eyes. There is an inflammation which must be drawn from the warts. The salve does this.

Hernia or Rupture.—This salve has cured some very around oldsores, upon the chest, in short, upon any part of the body, whether diseased slightly or severely. When the perspiration is restored, it has power to penetrate the lungs, liver, or any part of the human system, and to act upon them, if they be diseased, by separating the inflamed norbid particles therefrom, and expelling them to the surface.

least benefit.
Two shillings worth would satisfy any one, whether it would do good or not.

Illiac Passion or Griping of the Intestines.—This disease caused the death of the late H. S. Legare, Attorney General and acting Secretary of the United States It is the stopping up of the smaller intestines, and some times the twisting of them. It is brought on by a neglect of the daily evacuations, or from incarcerated Her-

Corns.-If the salve is used according to directions, people need never be troubled with corns—especially cut out by some tr velling mountebank who knows he is doing more muschief than he can possibly repair. A little of this ointment put on now and then will always keep them down.

Indeed there are few complaints that it will not bencfit. It is a Family Salve of untold value. As long as the sky rolls over one's head and grass grows upon the earth, it will be sought after, used and valued. As there is no mercurial substance in it, but composed en tirely of vegetables it gives no good ground for appre-
