[CONTINUED PROM FIRST PAGE.] either be abandoned or firmly maintained.—
That they cannot be abandoned without a sacrifice of bads national honor and interest, is too

lear to admit of doubt. Oregon is a part of the North American con tinent, to which, it is confidently affirmed, the title of the United States is the best now in existence. For the grounds on which that title rests, I refer you to the correspondence of the late and present Secretary of State with the British plenipotentiary during the negotiation. The British proposition of compromise, which would make the Columbia the 'line south of forty-nine degrees, with a trifling addition of detached territory to the United States, north of that river, and would leave on the British side iwo thirds of the whole Oregon territory, inecluding the free navigation of the Columbia and all the valuable harbors on the Pacific, can never for a moment, be entertained by the Thired States, without an abandonment of their inst and clear territorial rights, their own selfrespect, and the national honor. For the in nation of Congress. I communicate herewith the correspondence which took place between the two governments during the late ne gouation.

The rapid extension of our settlements over our territories heretofore unoccupied; the addition of new States to our confederacy-the expansion of free principles, and our rising greatness as a nation, are attracting the attenfign of the Powers of Europe; and lately the doetrine has been broached in some of them of a " balance of power " on this continent, to check our advancement. The United States. sincerely desirous of preserving relations of good understanding with all nations, cannot in silence permit any European interference on the North American continent; and should any such interference be attempted, will be ready to resist it at any and all hazards.

Lis. well known to the American people and

to all nations, that this government has never interfered with the relations subsisting between other governments. We have never made ourwe have not sought their territories by con queats we have not mingled with parties in their domestic. struggles; and beloving our own form of government to be the best, we have never attempted to propagate it by intrigues, by diplomacy, or by force. We may claim on this continent a like exemption from European interference. The nations of America are equally sovereign and independent with those of Europe. They possess the same rights, independent of all foreign interposition to make war, to conclude peace, and to regulate their internal affairs. The people of the United States cannot, therefore, view with indiffer ence attempts of European powers, to interfere with the independent action of the nations or this continent. The American system of government is entirely different from that of Europp. Jealousy among the different so-vereigns of Europe, lest any one of them might become too powerful for the rest, has caused then anxiously to desire the establishment of sak all who wish to buy choice and good goods, to call what they term the "balance of power." It cannot be permitted to have any application on the North American continent, and especially to the United States. We must ever maintain the principle, that the people of this continent alone have the right to decide their own desti ny. Should any portion of them, constituting an independent state, propose to unite them-selves with our confederacy, this will be a question for them and us to determine, withou any foreign interposition. We can never consent that European Powers shall interfere to prevent such a union, because it might disturb the "briance of power" which they may de sire to maintain upon this continent. Near quarter of a century ago, the principle was distinctly announced to the world, in the annual message of one of my predecessors, that " the American continent, by the free and independent condition which they have assumed and maintained, are henceforth not to be considered as subjects for future colonization by any European power." This principle will apply with greatly increased force, should any European power attempt to establish any new colony in North America. In the existing circiimstances of the world, the present is deemed a proper occasion to reiterate and reaffirm the principle avowed by Mr. Monroe, and to state my cordial concurrence in its wisdom and sound policy. The reassertion of this principle, especially in reference to North America. is at this day but the promulgation of a policy which no European power should cherish the disposition to resist. Existing rights of every European nation should be respected; but it is due alike to our safety and our interests, that the efficient protection of our laws should be extended over our whole territorial limits, and that it should be distinctly announced to the worth as our settled policy, that no future European colony or dominion shall, with our consent, be planted or established on any part of the North American continent.

A question has recently arisen under the tenth article of the subsisting treaty between the United States and Prussia. By this article, the consuls of the two countries have the right to:sit as judges and arbitrators . in such differences as may arise between the captains and crews of the vessels belonging to the nation whose interests are committed to their charge, without the interference of the local authorities, unless the conduct of the crews or of the captain should disturb the order or tranquillity of the country; or the said consuls should require their assistance to cause their deligious to be carried into effect or sup-

The Prussian consul at New Bedford, in Juge, 1844, applied to Mr. Justice Story to carry into effect a decision made by him between the captain and crew of the Prussian ship Borussia; but the request was refused on the ground that, without previous legislation by Congress, the Judiciary did not possess the power to give effect to this article of the treaty. The Prussian government, through their minister here, have complained of this violation of the United States to adopt the necessary measures to prevent similar violations hereafter .-Good faith to Prussia, as well as to other naraises with whom we have similar treaty stipu-Intions, requires, that these should be faithfully observed. I have deemed it proper, therefore, to lay the subject before Congress, and to recommend such tegislation as may be necessary to give effect to these treaty obligations.

Be virue of an arrangement made between the Spanish government and that of the United States, in December, 1831, American vessels. since the twenty-ninth of April, 1832, have been admitted to entry in the ports of Spain, including those of the Balearie and Canary Is-In. c. & at. C. MERCUR.

MESSAGE OF THE PRESIDENT, Pratt's Grocery, and Eating House, Is in Belts & Montanye's Corner Block, Fronting the Public Square,

HERE everything may be found in his line of business, and a stove or two for sale when the cold season is over. Fresh AMBOY OYSTERS repulsily received here.

Next duor to Hall's Universal Establishment.

A Tinman tried, once on a time,
To do the business of a town:
Qouth he, I'll put it into thyme,

And write all opposition down.

This house is mine... I pay the rent...

How dare a Noble own one near? And Prait come in, I trow, full bent,
To run down Tin by selling Beer I
Here's at them all; good people, I
Sell pietins—not without a pie—
And pois—with tea and coffee tou— Withal a stove to cook them through-Pint-stopps—and liquor to put in. To make you feel tight in your skin, . Ready to break, or else to turn The corner, so its fun to learn Whate'er you went, you'll find it here, Except Dry Goods—they'll come next year;

Sheet Iron. candles, flour and pork, Fish, soap, tin, copper, and all work For most too small, I'll try it all— So give a call on do-all-Hall. TO PARENTS.

TO PARENTS,

Dr. Jayne's Carminative Balsam is a certain and speedy cure for Diarrhox, Dysentary, Cholera Morbus, Summer complaints with children, and all derangements of the stomach or bowels, caused by imprudence or error in diet. It has effected cures in the worse cases of these complaints—even where hope had almost fled—snatched a tender infant from an early grave, and called forth the exclamation, " it has saved the child." The Proprietor of this medicine begs leave to state—It is something of this medicine degs leave to state—at its someting which he has used extensively in private practice for a number of years, and believes that he saved many lives by its timely use. Every person afflicted with these complaints, are invited to try one bottle of it, which is warranted to give relief. Pamphlets containing full diections and certificates of cures to accompany each boile. Sold by A. D. MONTANTE, Towards, Pa.

I am alive and well this day! Thanks be to a merciful God, and your Expectorant: and now I come forward cheerfully to fulfil my promise.

For twenty long years had I been a constant sufferer from the effects of a hard, dry cough, pain in the breast, and difficulty of breathing; the last five of which, chills, and fevers, every spring and fall, added to my misery. I was worn away to a mere skeleton: with the greatest difficulty only could I get up and down stairs; my appetities was come, and my strength hely so far failed me, that officially only could I get up and down stairs; my appe-tite was gone, and my strength had so far failed me, that my friends were personaled I could survive many weeks unless I obtained relief. Indeed, sir, my situation was so perfectly miserable to myself, and so distressing to my family, that I felt willing to die, whenever it should lease the Master to take me home. But I heard of please the Master to take me home. But I heard of your medicine, and relief came. Yes! it proved the "Balm of Griead" to my poor afflicted body, Before I had taken ONE BOTTLE, I experienced a mitigation of all my symptoms, and to my great joy I found in the continued use of it the happiestrelief. In short sir, IT HAN MADE A PERFECT CURE OF ME—and I can truly say. I have no design to be below.

y say, I have no desire to be better. With everlasting gratitude, I am dear sir, your obliged riend. Man't Gill., Corner of Rose Street and Germantown Road, Phila

JOHN A. ESEN WINE.

Towands, December 30, 1844.

HE preceding figure is to represent the INSEN-SIBLE PERSPIRATION. It is the great evac SIBLE PERSPIRATION. Itis the great eva ation for the impurities of the body. It will be noticed that a thick cloudy mist issues from all points of the sur face, which indicates the wonderful process going or within. This perspiration flows uninterruptedly when we are in health, but ceases when we are sick. It should be the cure of every one to see that it is not checked.— Life cannot be sustained without it. It is thrown off from the blood and other juices of the body, and disposes by this means, of nearly all impurities within use.— The blood by this means only, works itselfpure. The language of Scripture is, "in the blood is the life." If it ever becomes impure, it may be traced directly to the stoppage of the insensible perspiration. It never requires any internal medicines to cleanse it, as it always puriies itself by its own heat and action, and throws off al the offending humors, through the insensible perspiration. Thus we see, all that is necessary when the blood is stanuot or infected, is toopen the pores, and it telieves itself from all impurity instantly. Its own heat and vitality are sufficient, without one particle of medicine, except to open the pores upon the surface.—Thus we see the folly of taking so much internal remedies. All practicioners, however, direct their efforts to restore the insensible perspiration, but it seems to be not always the proper one. The Thompsonians for instance, steams, the Hydropathist shrouds us in wet blankets, the Homopathist deals out infinitissimals, the Allopathist bleeds and doses us with mercury, and the blustering quack

gorge us with microry, and me bustering quoca gorge us with pills, pills, pills.

But one object only is in view, viz: to restore the in-sensible perspiration. If this can be done, they any, we will take care of the rest. It will be seen, therefore, that all physicians understand alike what is necessary to a recovery, how much they may differ us to the mode of obtaining it.

To give some idea of the amount, and consequently the importance of the insensible perspiration, we wastate that the learned Dr. Lewenhock, and the great Bo have, ascertained that five-eights of all we received into the stomach, passed off by this means. In other words, if we cat and drink eight pounds per day, we evacuate five pounds of it by the insensible perspiration.

This is none other than the used up particles of the

blood, and other juices, giving place to the new and fresh ones, by carrying with it all the impurities within up to the surface. To check this, therefore, is to retain n the system five eights of all the virulent matter that nature demands should leave the body. And even when this is the case, the blood is of so active a principle, that it determines those particles, to the skin, where they form scabs, pimples, ulcers, and other spots; but if it is di-rected inwards, and falls upon the lungs, the conseuences are generally fatal.

By a sudden transition from heat to cold, the pore-

are stopped, the perspiration reases, and disease begins at once to develope itself. Hence, a stoppage of this flow of the juices, originates so many complaints. It is through the surface that we imbabe nearly all our ills. It is stopping the pores, that overwhelms mankind

It is stopping the pores, that overwhelms mankind with coughs, colds, and consumption. Nine-tenths of the world die from diseases induced by stoppage of thusensible perspiration. It is easily seen therefore, how necessary is the flow of this subtle humor to the surface, to preserve health. It cannot be stopped; it cannot even be checked, without producing disease. The blood and intestines must relieve themselves of all their worn-

that the blood may relieve itself of its impurite a? Would you give physic to unstop the pores? Or would you apply something that would do this upon the surface. where the clogging actually is? Would not this be commakes an internal application to effect it. The reason I assign is, that no medicine within their knowledge, is capable of doing it. Under these circumstances, I precapable of doing it. Under these circumptances, part to physicians and to all others, a preparation that it is sovereign in these cases, has this power to the fullest extent.—It is McAllister's Pules.—The salve acts upon the piles as upon sore eyes. There is an inflammation which must be drawn from the parts. The salve does this.

This remody that netther steams, gives inconveni-ence, or is dangerous to the intestines.

This remedy is probably the only one now known, that is capable of producing all these great results. Its great value is in re-toring at once, the circulation of the juices when checked, or disarranged by cold or other causes. It preserves and defends the surface from all causes. It preserves and defends the surface from all derangement of its functions, while it keeps open the channels for the blood to avoid all its importies and disposit of all its useless particles. There is a connection, harmony, and feasibility in all that defies contradiction. It is a simple, but wonderful principle that preserves in healthy operation the entire machinery of our being. It indissolubly holds together the surface and the internal vicence the internal vicence the internal vicence. visceta, the internal viscera and the surface. They are inseparably connected and cannot be disjoined. The surface is the outlet of five-eights of the bile and used up matter within. It is pierced with millions of openings to relieve the intestines. Stop up these pores, and leath knocks at your door. It is rightly termed All-Healing, for there is scarcely a disease, external or internal, that it will not benefit. It will be found the most useful as well as the cheapest family medicine in the world. I have used it for the last fourteen years with success without a parallel. I haveused it for all disease of the chest, consumption, liver, and the most dangerous of internal maladies. I have used it in cases of extreme peril and hazard, involving the utmost danger and reponsibility, and I declare before Heaven and man, the not in one single case has it failed to benefit, when the patient was within the reach of mortal figures.

I never, to my recollection had more than five or six

among the thousands who have used it, say that it was not favorable to their complaint. On the contrary I have had hundreds return voluntarily, and in the warmest and most pathetic language speak in its praise. I have had physicians, learned in the profession; I have had minister of the country of the profession. nisters of the gospel, Judges on the bench, aldermen, and lawyers, gentlemen of the highest erudition and multitudes of poor, use it in every variety of way, and there has been but one voice, one united, universal voice saying "McAllister your ointment is good."

Consumption.—Of all diseases, we find this the most

Consumption.—Of all diseases, we find this the most important, and concerning which we meet with the most opposition. It can hardly be credited that a salve can have more effect upon the lungs, scaled as they are within the system. But we say once for all, that this ointment will reach the lungs quicker than any medicines that can be given internally. Every hody consents to the fact that if healing medicine could be applied on the lungs, there would be great hopes of recovery. The difficulty is to get the medicine there. Now the Salve has the wonderful virtue of extracting the putrid hunors from all external seres by causing them to dis more from all external series by causing them to unscharge. In like manner it operates upon internal affections by driving all the impurities through the pores to the surface. Thus with consumption, if placed upon the chest, it penetrates directly to the lungs, separates the poisonous particles that are consuming them and ex-pels them from the system.

It is the simplest and most rational process in creation if one has the medicine capable of doing it. The All-Healing Ointment possesses this power to the fullest

sumption continually, although we are told it is foolish ness. I care not what is said, so long as I can cure several thousand persons yearly. If this medicine was in the hands of some patent medicine brawlers, they would make an uproar through the country that would be insupportable. extent. I need not say that it is curing persons of Con-

ipportable. 1882: Scrofula or King's Evil.—This disease is really in veterate, and hard to be subdued. It is generally seated in the sides of the neck, behind the ears and under the chin, yet scarcely any part of the body is exempt. It sometimes falls upon the lungs and produces consumption. It is a dreadful circumstance, that this disease is transmitted from parents to children. The Salve will extract all the morbid matter by enough the sores to dis-charge; and then let then the Solar Tincture be used to drive it to one point, which done, a continuouse of the Ointment will completely remove this disorder. This is the safest and most effectual of any method. It should

the safest and most effectual of any method. It should be adopted without a moment's hesitation.

Expapelos—This complaint arises from impurittes being driven out to the auriace by means of the insensible perspiration, and lodging, in the cuticule, forms sores, pimples dee, it being of a constite, acrid putrifying nature. It only requires that it should discharge its virulent particles through the skin, and the difficulty will see of the state of the skin, and the difficulty will pass off. If suffered to remain, and driven inwards it is Let the Salve and Solar Tincture be used as in scro-

Let the Salve and Solar I incure be used as in scro-fula and the patient will soon get well. Salt Rheum.—This is another obstinate disease but can be cured effectually as the scrofula. There is no difficulty in this disease. Head ache, Ear ache and Deafness.—The Salve has

ored persons of the Head-Ache of 12 years standing and who had it regularly every week, so that vomiting often took place. It cured the wife of a man who laugh ed in my face for proposing such a cure, and who now would not be without it for the best farm in the State. If any one will take the trouble to call I will give his name Deafness and Ear-Ache are helped with the like suc

cess as also Ague in the face. Cold Feet.—Consumption, liver complaint, pains in the chest or side, falling of the hair, one or the other always accompanies cold feet. It is a sure sign of disease in the system to have cold feet. Some persons are totally unable to get them warm, and endure much suffering thereby.

The salve will restore the insensible perspiration and thus cure every case. It is infallible for this. Asthma, Tightness of Breath.-If this disease is not hereditary and produced by the malformation of the chest,

the salve will cure it. Dyspepsia.—One would suppose a salve would not effect this disease much but the All-Healing Ointment will cure two sooner than any internal remedy will cure

Sore Eyes .- The inflamation and disease always lies back of the ball of the eye in the socket. Hence the utility of all remedies that are used upon the lids. The virtue of any medicine must reach the seat of inflam mation or it will do little good. This salve if rubbed on the temples will penetrate directly into the socket and infuse all its virtues upon the disorder. The pores and infuse all its virtues upon the disorder. The pores will be opened, a proper perspiration will be created and the disease will soon pass off to the surface. How easy and how natural! It is as perfect and valuable as

it is simple and philosophical.

Sore Lips, Chapped Hands &c.—I sell a great deal of salve to Scamen, who say it is the only thing they can depend on to cure their raw hands, when exposed to the weather at sea. It acts like a charm in these com plaints. Two or three applications cures.

Pimples on the face, freekles, tan, masculine skin, gross-surface—the first action is to expel all humor. It will not cease drawing till the face is free from any matter that may be lodged under the skin and frequently breaking out to the surface. It then heals. When there is nothing but grossness, or dull repulsive surface, it begins to soften and soften until the skin becomes as and warranted to be well done. From a long eye soft and delicate as a child's. It throws a freshness and blushing color upon the now white transparent skin that is perfectly enchanting. Sometimes in case of Freckles it will first start out those that have lein hidden and seen but seldom. Pursue the salve and all will soon disappear.
The reason for this wonderful change in a lady's

face is that it excites into natural and healthy activity the Insensible Perspiration, while it renovates and renews the surface, and leaves the skin in as lively and delicate a condition as the most fustidious could desire. It is put up in fine jars and beautifully scented on pur pose for the toilet.

out particles, and poi-onous humors, and they must go through the pores as nature designed.

Let me ask now, every candid mind, what course seems the most reasonable to pursue, and unstop the pores, after they are closed and let the perspiration flow, there is not a tamily in the United States, that would consent to be without this salve a single day if they knew its balin in healing Burns alone. It extracts the pain and leaves the place withouts sear.

Quinsy sore throat. Influenza, Bronchitis .- There is not an internal remedy in existence that will cure these disorders as quick as the salve. It opens the poreon the neck and draws off all the inflammation and im-pure juices, and a few days will see the patient well. It is sovereign in these cases.

power to restore perspiration on the feet, on the head, around oldspres, upon the chest, in short, upon any part of the body, whether diseased slightly or severely. When the perspiration is restored, it has power to penetrate the lungs, liver, or any part of the human system, and to act upon them, if they be diseased, by separating the inflamed morbid particles therefrom, and expelling them to the surface.

This salve does this.

Fasimonable Tailoring!

EORGE B. BUNTING would respectfully into the public that he still continues at his old the wise to try it. It is a peculiar complaint, but it may be helped some, if not cured entirely. I three not the shadow of a doubt that it would cure thousands if the trial was made, who believe no medicine of the found in readiness to all work in his line in sight to the surface.

iamed morbid particles the surface.

It has power to cause all external sores, scrofulous humors, skin disease, poisonous wounds to discharge their putrid matter, and then heals them.

It is a remedy that sweeps off the whole catalogue of cutaneous disorders, and restores the entire cuticle to its healthy functions the stomach.

It is the stopping up of the Intestince disease caused the death of the late H. S. Legare, Attorney General and acting Secretary of the United States It is the stopping up of the smaler intestines, and some times the twi-ting of them. It is brought on by a neglect of the duily evacuations, or from incarcerated Hermia. The pains are awful, and unless help comes spec-

of Mr. Legare and all others under similar circumstances. Corns.—If the salve is used according to directions, people need never be troubled with corns—especially cett out by some it velling mountebank who knows he is doing more mischief than he can possibly repair. A little of this ointment put on now and then will slways keep them down.

efit. It is a Family Salre of untold value. As long as the sky rolls over one's head and grass grows upon the earth, it will be sought after, used and valued. As need medical aid. From his experience in the system there is no mercurial substance in it, but composed en- which he adopts, he flatters himself that the community tirely of vegetables it gives no good ground for appre-
