My Sigters. BR INCLIA WELDY. Like flowers that softly bloom together, Uson one fair and fragile stem, Mingling their sweets in sunny weather, Le strange, sude hands have parted them, So were we linked unto each other, & 2.3 Burch eistere, in our childish hours, For then our food and gentle mother To us was like the stem to flowers.

She was the golden thread that bound us In one bright chain together here, ... Till Death unloosed the chord around us, And we were severed far and near, The Eonrel's stem, when broke or shattered, Must cast its blussoms to the wind, Yet round the buds, though widely scattered, The same soft perfume still we find.

And thus, although the tie is broken. That linked us round our mother's knee, The memory of the words we've spoken. When we were children light and free Will like the perfume of each blossom, Live in our hearts where'er we roam, As when we slept on one fond bosom, Man : And dwelt within one happy home.

I know that changes have come o'er us : . Swect sieters, we are not othe same, ·· For different paths now lie before us, And all three have a different name : And yet, if sorrow's dimming fingers Have shadowed o'er each youthful brow, So much of light around them lingers-I cannot trace those shadows now.

Ye both have those who love ye only, Whose dearest hopes are round ye thrown; While like a stream that wanders lonely, Am I the youngest, wildest one. My heart is like the wind that beareth Sweet scents upon its unseen wing-. The wind that for no creature careth, \* Yet stealeth sweets from every thing.

It hath rich thoughts forever leaping Up, like the waves of flashing seas, That with music still are keeping. Soft time with every fitful broeze. Each leaf that in the bright air quivers, The sounds from hidden solitudes, in And the deep flow of far-off rivers, And the loud rush of many floods-

All these, and more, stir in my bosom Feelings that make my spirit glad Like dew-drops shaken in a blossom; And yet there is a something sad Mixed with those thoughts, like clouds that have Above us in the quiet air, Veiling the moon's pale beauty over Like a dark spirit brooding there.

But, sisters, these wild thoughts were never Yours, for ye would not live like me To gaze upon the stars forever-To hear the wind's wild melody; Ye'd rather look on smiling faces, And linger round a cheerful hearth, Than mark the stars' bright hiding places As they peep out upon the earth.

But, sisters, as the stars of even Shrink from Day's golden, flashing eye, And, melting in the depths of Heaven, Veil their soft beams within the sky, So shall ye pass, the joyous-hearted, The tond, the young, like stars that wane, Till every link of earth be parted, To feem in Heaven one mystic chain.

### The Origin of the Prairies.

In lately passing through the prairie country we were at some pains in searching for geological facts by which to account for the for mation of these vast level plains and their destitution of timber. The result has satisfied us that they were once covered with water, either as the bottoms of lakes, running streams, or in the same manner as the everglades of Flori-The upper stratum is loose sand or da loam, such as forms the bottom of lakes and rivers or contiguous marshes; the next is sand, clay, and pebbles of large size, bearing evidence of having been rolled about by the action of the water, and deposited by their present position by the same agency. Large numbers of fossil shells, of fresh water formation, are found in every direction or stratum. Besides these, large erratic blocks of granite, sometimes many feet in circumference and many tons in weight, and other transported fragprairies; and, on the southern shores of the parallelism.

The only rational mode of accounting for the appearance of these transported fragments. as no formations of a similar nature exist south of the great lakes, appears to us to be through the agency of water and ice. During the submergence of the vast fields, when the lakes must have disembogued themselves through the Gulf of Mexico, these huge boulders, were caught up by the ice, firmly imbedded in it. and driven off by the northern blasts or stream into a more southern climate, and when the ice melted in the spring, they were deposited. where they are now found. This is to us the only means of accounting for their appearance, as well as parallel furrows in the rocks on the southern shores of the lakes. By what agency this state of affairs was changed, whether by the upheaving of the prairies from the action of internal fires, or their gradual filling up by the annual deposition of the loose detritus washed down by the stream or deposited from the melting ice, it is useless to speculate .-But as the whole of the illuvial lands of the valley of the Mississippi are of comparatively recent formation, it is not improbable that the waters of the great lakes washed the bases of the hills on both sides of the Mississippi, and that the whole intervening space now so fertile fruitful, was then a dark rolling stream liquified mud. To us it appears that the whole west is the richest field for the geolo gist in the world, and none more so than those ortions of the country lying between the lakes and the Ohio.

TRUTH .- A parent may leave an estate his son, but now soon may it be mortgaged! He may leave him money, but how soon may iche squandered. Better leave him a sound constitution, habits of industry, an unblemished reputation, a good education, and an inward abhörrence of vice, in any shape or form; these cannot be wrested from him, and are better than thousands of gold and silver.

IL. Paints & Glass, we keep constantly on hand a very large stock of all kinds and will very low for cash.

WELLES & SATTERLEE.

Pratt's Grocery, and Eating House, Is in Betts & Montange's Corner Block, HERE everything may be found in his line of business, and a stave or two for sale when the cold season is over. Preak AMBOY OYSTEKS re-

y tereived here. Next door to Hall's Universal Establishment. A Tinnian tried, once on a time, To do the business of a town: Qual he, I'll put it into rhyme, And write all opposition down.
This house is mine—I pay the rent—How dare a Noble own one near? And Pratt come in. I trow, full bent, To run down Tin by selling Beer ! Here's at them all; good people, I Sell pie-tins-not without a pi and pots-with ten and coffee too-Withal a stove to cook them through-

Pint-stoups—and liquor to put in. To make you feel tight in your skin,. Ready to break, or clse to turn The corner, so its tun to learn The corner, so its tun to learn.

to the public generally that he is now receiving a very large and well selected assortment of STOVES, such as Cross' pa-

HE preceding figure is to represent the INSEN-SIBLE PERSPIRATION. It is the great evac-uation for the impurities of the body. It will be noticed that a thick cloudy mist issues from all points of the sur-face, which indicates the wonderful process going on within. This perspiration flows uninterruptedly when we are in health, but ceases when we are sick. It should be the careful grays one to see that it is not checked. the care of every one to see that it is not checked .-Life cannot be sustained without it. It is not enceked.—
Life cannot be sustained without it. It is thrown off
from the blood and other juices of the body, and disposes by this means, of nearly all impurities within use.—
The blood by this means only, works itselfpure. The
language of Scripture is, "in theblood is the life." If it ever becomes impure, it may be traced directly to the stoppage of the insensible perspiration. It never requires nov internal medicines to cleanse it, as it always puri es itself by its own heat and action, and throws off all the offending humors, through the insensible perspiration Thus we see, all that is necessarry when the stagnant or infected, is toopen the pores, and it relieves itself from all impurity instantly. Its own heat and viexcept to open the pores upon the surface.—Thus we see the folly of taking 20 much internal remedies. All practicioners, however, direct their efforts to restore the nsensible perspiration, but it seems to be not always the proper one. The Thompsonians for instance, steams, the Hydropathist shrouds on in wet blankets, the Homopathist deals out intimitissimals, the Allopathist bleeds and doses us with mercury, and the blustering quack gorges us with pills, pills, pills.

But one object only is in view, viz: to restore the in-sensible perspiration. If this can be done, they say, we will take care of the rest. It will be seen, therefore, that all physicians understand alike what is necessary t recovery, how much they may differ us to the mode

To give some idea of the amount, and consequently importance of the insensible perspirat a, we will tate that the learned Dr. Lewenhock, and the great Boeraave, ascertained that five-eights of all we received in o the stomach, passed off by this means. In other words,

if we cot and drink eight pounds per day, we exacuate five pounds of it by the insensible perspiration.

This is none other than the used up particles of the blood, and other juices, giving place to the new and fresh ones, by carrying with it all the impurities within up to the surface. To check this, therefore, is to retain in the system two eights of all the virulent matter that nature demands should leave the body. And even when this is the case, the blood is of so active a principle, that it determines those particles, to the skin, where they form scales, pimples, ulcers, and other spots; but if it is directed inwards, and falls upon the lungs, the consequences are conventing fatal. quences are generally fatal.

By a sudden transition from heat to cold, the pores It is stopping the pores, that overwhelms mankind with coughs, colds, and consumption. Nine-tenths of the world die from diseases induced by stoppage of the insensible perspiration. It is easily seen therefore, how necessary is the flow of this subtle humor to the surface, to preserve health. It cannot be stopped; it cannot even be checked, without producing disease. The blood and intestines must relieve themselves of all their worn-

and intestines must relieve themselves of all their wormout particles, and porsonous humors, and they must go through the pores as nature designed.

Let me ask now, every candid mind, what course seems the most reasonable to pursue, and unstop the pores, after they are closed and let the perspiration flow, that the blood may relieve itself of its impurities? Would you give physic to unstop the pores! Or would you apply something that would do this upon the surface, where the clogging actually is? Would not this be common sense! And yet I know of no physician who makes an internal application to effect it. The reason I assign is, that no medicine within their knowledge, is capable of doing it. Under these circumstances, I present to physicians and to all others, a preparation that the proper interest the patient well. power to restore perspiration on the feet, on the head, uround oldsores, upon the chest, in short, upon any part of the body, whether diseased slightly or severely. When PHILADELPHIA, December, 1994.
To Dr. D. Jayne-Dear Sir—The astonishing and militor order, morocco, calf and coarse boots and shoes; allous beneficial effect your valuable EXPECTO.

Ladies' Gaiters, shoes and slips; children's do.; gent's gaiters and pumps, &c., &c.

10HN W. WILCOX, PHILANDER SAGE.

Of the body, whether diseased slightly or severely. When the perspiration is restored, it has power to penetrate the ungs, liver, or any part of the human system, and to act upon them, if they be diseased, by separating the inflamed morbid particles therefrom, and expelling them of the shadow of a doubt that it would cure thousands if the surface.

It has power to cause all external sores, scrofulous hu mors skin diseases, poisonous wounds to discharge their putri) matter, and then heals them.

It is a remedy that sweeps off the whole catalogue of

cutaneous disorders, and restores the entire cuticle to its healthy functions

It is a remedy that forbids the necessity of so many

and deleterious drugs taken into the stomach. It is a remedy that neither sickens, gives inconveni

ence, or is dangerous to the intestines.

This remedy is probably the only one now known, that is capable of producing all these great results. Its great value is in restoring at once, the circulation of the juices when checked, or disarranged by cold or other causes. It preserves and defends the surface from all derangement of its functions, while it keeps open the channels for the blood to avoid all its impurities and dispose of all its useless particles. There is a connection, harmony, and feasibility in all that defies contradiction. It is a simple, but wonderful principle that preserves in healthy operation the entire machinery of our being. It healthy operation the entite machinery of our being. It indissolubly holds together the surface and the internal indissolubly holds together the surface and the surface. They are viscers, the internal viscers and the surface. They are inseparably connected and cannot be disjoined. The surface is the outlet of five-eights of the bile and used up matter within. It is pierced with millions of open-ings to relieve the intestines. Stop up these pores, and death knocks at your door. It is rightly termed All-Healing, for there is scarcely a disease, external or in-ternal, that it will not benefit. It will be found the most useful as well as the cheapest family medicine in the world. I have used it for the last fourteen years with success without a parallel. I haveused it for all disease of the chest, consumption, liver, and the most dangerous of internal maladies. I have used it in cases of extreme peril and hazard, involving the utmost danger and responsibility, and I declare before Heaven and man, that not in one single case has it failed to benefit, when the patient was within the reach of mortal means.

A QUANITY OF LUMBER will be sold for cash by private sale at the residence of the late Patrick Commings. Also, a very valuable two-horse farm Wal GON, but a short time in use—it cost about \$80, an will be sold for \$45, on approved security at 6 months credit. A set of double FAIN/ESS, with chains and whippletrees, for \$12—an excellent BOAT, for \$5—an will be disposed of on a credit.

There are several tons of superior HAY, and a quantity of Oata, which will also be sold for cash, where the

saying "McAllister your ointment is good." Consumption .- Of all diseases, we find this the most mportant, and concerning which we meet with the most opposition. It can hardly be credited that a salve can bave more effect upon the lungs, scated as they are within the system. But we say once for all, that this ointment will reach the lungs quicker than any medicines that can be given internally. Every body consents to the fact that if healing medicine could be applied on the lungs, there would be great hopes of recovery. The difficulty is to get the medicine there. Now the Salve bas the wonderful virtue of extracting the putrid hu-more from all external sores by causing them to dismore from all external sores by causing mem to dis-charge. In like manner it operates upon internal affec-tions by driving all the impurities through the pores to the surface. Thus with consumption, if placed upon the chest, it penetrates directly to the lungs, separates the poisonous particles that are consuming them and ex-

the poisonous particles that are consuming mem and ex-pels them from the system.

It is the simplest and most rational process in creation, if one has the medicine capable of doing it. The All-Healing Ointment possesses this power to the sallest

extent. I need not say that it is caring persons of Consumption continually, although we are told it is foolish ness. I care not what is said, so long as I can cure several thoursnot persons yearly. If this medicine was in the hands of some patent medicine brawlers, they would not a negret through the country the rould had make an uproar through the country that would be in-

supportable.

Scrofula or King's Evil.—This disease is really in veterate, and hard to be subdued. It is generally ceated in the sides of the neck, behind the ears and under the to the steel of the feed, it when the body is exempt. It sometimes falls upon the lungs and produces consumption. It is a dreadful circumstance, that this disease is transmitted from parents to, thilten. The Salve will extract all the morbid matter by causing the sores to disease is extract at the motion maker by causing the sores to dis-charge; and then let then the Solar Tincture be used to drive it to one point, which done, a continuance of the Ointment will completely remove this disorder. This is, the safest and most effectual of any method. It should

be sdopted without a moment's hesitation.

Eryspelas—This complaint arises from impuritues being driven out to the surface by means of the insensible perspiration, and lodging in the cuticule, forms sores, perspiration, and roughing as the Catedine, forms some, pimples dec, it being of a caustic, acrid putrifying an ture. It only requires that it should discharge its virulent particles through the skin, and the difficulty will pass off. If suffered to remain, and driven inwards it is

requently futal. Let the Salve and Solar Tincture be used as in scre

fula and the patient will soon get well.

Salt Rheum.—This is another obstinate disease bu can be cured effectually as the scrofula. There is no

Head ache, Ear uche and Deafness .- The Salve ha cured persons of the Head-Ache of 12 years standing and who had it regularly every week, so that vomiting often took place. It cuted the wife of a man who laughed in my face for proposing such a cure, and who now would not be without it for the best farm in the State. If any one will take the trouble to call I will give his name

any one will take the trouble to call I will give his name.

Deafness and Ear-Ache are helped with the like success as also Agor in the face.

Cold Feet.—Consumption, liver complaint, pains in the chest or side, falling of the hair, one or the other always accompanies cold feet.

It is a sure sign of disease in the system to have cold feet. Some persons are totally unable to get them warm, and endure much suf-

fering thereby.

The solve will restore the insensible perspiration and thus cure every case. It is infallible for this. Asthma. Tightness of Breath.—If this disease is not hereditary and produced by the malformation of the chest,

the salve will cure it.

Dyspepsia.—One would suppose a salve would not effect this disease much but the All-Healing Omitment will cute two sooner than any internal remedy will core

Sore Eyes .- The inflamation and disease always lies back of the ball of the eye in the socket. Hence the util-ity of all remedies that are used upon the fids. The virtue of any medicine must reach the seat of inflammation or it will do little good. This salve if rubbed on the temples will penetrate directly into the socket Enos Tomkins, and infuse all its virtues upon the disorder. The pores will be opened, a proper perspiration will be created and the disease will soon pass off to the surface. How easy and how natural! It is as perfect and valuable as

it is simple and philosophical.

Sore Lips., Chapped Hands 4c.—I sell a great deal of salve to Scamen, who say it is the only thing they can depend on to cure their raw hands, when exposed to the weather at sea. It acts like a charm in these con-

plaints. Two or three applications cures. Pimples on the face, freekles, tan, masculine skin, gross surface,—Its first action is to expel all humor. It will not cease crawing till the face is free from any matter that may be lodged under the skin and frequently breaking out to the surface. It then heals. When there is nothing but grossness, or dull repulsive surface, it begins to soften and soften until the skin becomes as By a sudden transition from heat to come the policy are stopped, the perspiration ceases, and disease begins soft and delicate as a child's. It throws a tresmess and at once to develope itself. Hence, a stoppage of this blushing color upon the now white transparent skin that is perfectly enchanting. Sometimes in case of Freek-transparent skin that is perfectly enchanting. Sometimes in case of Freek-transparent skin that is perfectly enchanting. Sometimes in case of Freek-transparent skin that is perfectly enchanting. seen but seldom. Pursue the salve and all will soon dis-

The reason for this wonderful change in a lady's face is that it excites into natural and healthy activity
the Insensible Perspiration, while it renovates and renews the surface, and leaves the skin in as lively and delicate a condition as the most fastidious could desire. It is put up in fine jars and beautifully scented on pur-

pure juices, and a few days will see the patient well.

overeign in these cases. Piles.-The salve acts upon the piles as upon sor for the parts. The salve does this.

Herola or Rupture.—This salve has cured some very

least benefit.

Two shillings worth would satisfy any one, whether t would do good or not.

Illiac Passion or Griping of the Latestines .- This disease caused the death of the late H. S. Legare, Atorney General and acting Secretary of the United States It is the stopping up of the smaler intestines, and some times the twi-ting of them. It is brought on by a neglect of the daily evacuations, or from incorrected Herina. The pains are awful, and unless help comes specials. Towarda, May 14, 1845.

of Mr. Legare and all others under similar circumstances. orns .- It the salve is used according to directions. people need never be troubled with corns—especially out out by some tr velling mountebank who knows he is doing more mischief than he can possibly repair. A little of this ointment put on now and then will always keep them down.

Indeed there are few complaints that it will not benefit. It is a Family Salve of untold value. As long as the sky rolls over one's head and grass grows upo the earth, it will be sought after, used and valued. there is no mercurial substance in it, but composed entirely of vegetables it gives no good ground for appre-

We have full certificates, from all the persons whose names are here given, but not having room for them, we merely give their names, Nos. and the disease of which they were cured.
