Till from its nourishing stem it is riven. Labor is worship!"—the robin is singing; " Labor is worship." -- the wild bee is ringing; Listen! that eloquent whisper upspringing Speaks to thy soul from out nature's great heart. From the dark cloud flows the life giving shower; From the rough soil blows the soft breathing flower; From the small insect, the rich coral bower; Only men, in the plan ever shrinks from his part.

More and more richly the Rose-heart keeps glowing,

Labor is life !- Tis the still water frieth; Idleness never despaireth, bewaileth ; Keep the watch wound, for the dark rust assaileth;
Flowers droop and die in the stillness of noon.
Labor is glory — the flying cloud lightens; Only the waving wing changes and bughtens; Idle hearts only the dark future frightens; Play the sweet keys, wouldst thou keep them in tune

Minhor is rest from the sorrows that greet us; Rest from all petty vexations that meet us, Rest from sin-promptings that ever entreat us, . Rest from world-syrens that lure us to ill." Work-and pure slumbers shall wait on thy pillow; Work-Thou shalt ride over Caro's coming billow; Lie down not wearied 'neath Wo's weeping willow; Work with a stout heart and resolute will!

Droop not, the' shame, sin and anguish surround the Bravely fling off the cold chain that both bound thee! Look to you pure Heaven smiling beyond thee ! Rest not content in thy darkness-a cloud ! Work-for some good-be it ever so slowly! Cherish some flower, he it ever so lowly! Labor! All labor is noble and hely;-Let thy great deeds be thy prayer to thy God!

The Bright side of Humanity.

There are good men everywhere. There äre men who are good for goodness' sake. In obscurity, in retirement, beneath the shadow of ten thousand dwellings, scarcely known to the world, and never asked to be known there are good Men; in adversity, in poverty, and temprations, amid all the severity of earthly trials, there are good men, whose lives shed brightness upon the dark clouds that surround them. Be it true, if we must admit the sad truth, that many are wrong, and persis in being wrong: that many are false to every holy trust, and faithless toward every holy affection; that many are coldly selfish, and meanly sensual; yes, cold and dead to everything that is wrapped up in their own little earthly interest, or more darkly wrapped up in the veil of fleshy appetitites. Be it so: but I thank God that this not that we are obliged to believe. No: there are true hearts amid the throng of the false and the frithless. There are warm and generous hearts, which the cold atmosphere of surrounding selfishness never chills; and eyes unused to weep for personal sorrow, which of unused to weep for personal sorrow, which oftenused to weep for personal sorrow, which of-ten overflow with sympathy for the sorrows of others. Yes, there are good men and true plaid Cloaking, Gala plaids and plaid Lining very cheap at WELLES & SATTERLEE'S. others. Yes, there are good men and true men; I thank athem; I bless them for what they are. God from on high doth bless them; and nowhere in the record are these' words more precious or strong than those in which it is written that God loveth the righte ous once. Such men are there. Let not their precious virtues be distrusted. As surely and as evidently as some men have obeyed the calls of ambition and pleasure, so surely and so evidently have other men obeyed the voice of conscience, and . chosen rather than to suffer with the people of God, than to enjoy the pleasure of sin for a season." Why, every meek man suffers in conflict keener far than the contest for honor and applause. And there are such men, who, amid injury and insult, and misconstruction, and the appointed finger, and the scornful lip of pride, stand firm in their integrity and allegiance to a loftier principle, and still their throbbing hearts in prayer, and hash them to the gardle are suited by the most of the principle. New Blacksmithing Establishment. Coach work and Edge Tools.

FERHE preceding figure is to represent the INSEN SIBLE PERSPIRATION. It is the great evac SIMILE PERSPIRATION. Its the great evacuation for the impurities of the body. It will be noticed that a thick cloudy mist issues from all points of the surface, which indicates the wonderful process going on within. This perspiration flows uninterruptedly when e are in health, but ceases when we are sick. It should be the care of every one to see that it is not checked.— Life cannot be sustained without it. It is thrown off Life cannot be sustained without it. It is thrown off from the blood and other juices of the body, and disposes by this means, of nearly all impurities within use.—The blood by: this means only; works itselfpure. The language of Scripture is, "in theblood is the life." If it ever becomes impure, it may be traced directly to the stoppage of the insensible perspiration. It never requires any internal medicines to cleanse it, as it always purincently the insensible perspiration, and throws off all its property and action, and throws off all es itself by its own heat and action, and throws off al the offending humors, through the insensible perspiration. Thus we see, all that is necessary when the blood is see the folly of taking so much internal remedics. All practicioners, however, direct their efforts to resture the insensible perspiration, but it seems to be not always the proper one. The Thompsonians for instance, steams, the Hydropathist shrouds us in wet blankets, the Homopathist deals out infinitissimals, the Allopathist bleeds and doses us with mercury, and the blustering quack

gorges us with pills, pills, pills, bills.

But one object only is in view, viz: to restore the insensible perspiration. If this can be done, they say, we will take care of the rest. It will be seen, therefore, that all physicians understand alike what is necessary to a recovery, how much they may differ as to the mode of obtaining it. To give some idea of the amount, and consequently

the importance of the insensible perspiration, we will state that the learned Dr. Lewenhock, and the great Boerhaave, ascertained that five-eights of all we received in-

hasve, ascertained that five-eights of all we received into the stomach, passed off by this means. In other words, if we est and drink eight pounds per day, we evacuate five pounds of it by the insensible perspiration.

This is none other than the used up particles of the blood, and other juices, giving place to the new and fresh ones, by carrying with it all the impurities within up to the surface. To check this, therefore, is to retain in the system five eights of all the virulent matter that nature demands should leave the body. And even when this is the agest the blood is of a series a viriousle, that this is the case, the blood is of so active a principle, that it determines those particles, to the skin, where they form scabs, pimples, ulcers, and other spots; but if it is directed inwards, and falls upon the lungs, the conse-

quences are generally fatal.

By a sudden transition from heat to cold, the pores are stopped, the perspiration ceases, and disease begins at once to develope itself. Hence, a stoppage of this flow of the juices, originates so many complaints. It is through the surface that we imbibe nearly all our ills. It is stopping the pores, that overwhelms mankind with coughs, colds, and consumption. Nine tenths of the world die from diseases induced by stoppage of the nsensible perspiration. It is easily seen therefore, how accessary is the flow of this subtle humor to the surface, necessary is the now of this subtle numer to the strace, to preserve health. It cannot be stopped; it cannot even be checked, without producing disease. The blood and intestines coust relieve themselves of all their wormout particles, and poisonous humors, and they must go

through the pores as nature designed.

Let me ask now, every candid mind, what course Let me ask now, every candid mind, what course seems the miost reasonable to pursue, and unstop the pores, after they are closed and let the perspiration flow, that the blood may relieve itself of its impurities? Would you give physic to unstop the pores? Or would you apply something that would do this upon the surface, where the clogging actually is? Would not this be common sense? And yet I know of no physician who makes an internal application to effect it. The reason I mon sense? And yet I know of no physician who makes an internal application to effect it. The reason I assign is, that no medicine within their knowledge, is capable of doing it. Under these circumstances, I present to physicians and to all others, a preparation that has this power to the fullest extent.—It is McAllister's All-Healing Ointment or the World's Salve. It has power to restore perspiration on the feet, on the head, around oldsores, upon the chest, in short, upon any part of the body, whether diseased slightly or severely. When the perspiration is restored, it has power to penetrate the o the surface.

It is a remedy that sweeps out the whose catalogue of cutaneous disorders, and restores the entire cuticle to its healthy functions.

It is a remedy that forbids the necessity of so many and deleterious drugs taken into the stomach.

It is a remedy that neither sickens, gives inconveni-

It is a remedy that neutron siecens, gives inconvenience, or is dangerous to the intestines.

This temedy is probably the only one now known, that is capable of producing all these great results. Its great value is in restoring at once, the circulation of the juices when checked, or disarranged by cold or other causes. It preserves and defends the surface from all durangement of its functions, while it keeps open the channels for the blood to avoid all its impurities and dispose of all its useless particles. There is a connection, harmony, and feastbility in all that defies contradiction. It is a simple, but wonderful principle that preserves in healthy operation the entire machinery of our being. It indissolubly holds together the surface and the internal

riscera, the internal viscera and the surface. They are inseparably connected and cannot be disjoined. The surface is the outlet of five-eights of the bile and used up matter within. It is pierced with millions of openngs to relieve the intestines. Stop up these pores, and leath knocks at your door. It is rightly termed All-Healing, for there is scarcely a disease, external or in-ternal, that it will not benefit. It will be found the most aseful as well as the cheapest family medicine in the world. I have used it for the last fourteen years with success without a parallel. I have used it for all disease of the chest, consumption, liver, and the most dangerous of internal maladies. I have used it in cases of extreme peril and hazard, involving the utmost danger and reponsibility, and I declare before Heaven and man, that ot in one single case has it failed to benefit, when the

patient was within the reach of mortal means.

I nover, to my recollection had more than five or six
among the thousands who have used it, say that it was
not favorable to their complaint. On the contrary I have had hundreds return voluntarily, and in the warmest and most pathetic language speak in its praise. I have had physicians, learned in the profession; I have had misters of the gospel, Judges on the beach, altermen and lawyers, gentlemen of the highest crudition and multitudes of poor, use it in every veriety of way, and there has been but one voice, one united, universal voice saying "McAllister your ointment is good."

Consumption.—Of all diseases, we find this the most important, and concerning which we meet with the most opposition. It can hardly be credited that a salve can ave more effect upon the lungs, seated as they are withn the system. But we say once for all, that this ointment will reach the lungs quicker than any medicines that can be given internally. Every hody consents to the fact, that if healing medicine could be applied on the lungs, there would be great hopes of recovery. The difficulty is to get the medicine there. Now the Salve has the wouldeful virtue of extracting the putrid human for all extracting the putrid humans from all extractions are set that the second of the putricular extraction and the putricular extractions are set to be a second of the putricular extractions and the putricular extractions are set to be a second of the putricular extractions and the putricular extractions are set to be a second of the putricular extractions and the putricular extractions are set to be a second of the putricular extractions and the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a second of the putricular extractions are set to be a secon THE SUBSCRIBER, having for a partner has the wonderful vittee of extracting the putrid hubiness at his brother, continues to carry on the business at his brother's new stand, east side of. Main street, wouth part of the borongh, where he is prepared to execute all orders for Horse shoeing, Carriage & the street. Thus with consumption, if placed upon the chest it constructed firstly to the lungs supervised. the chest, it penetrates directly to the lungs, separates the poisonous particles that are consuming them and ex-pels them from the system.

It is the simplest and most rational process in creation,

fone has the medicine capable of doing it. The Alldealing Ointment possesses this power to the ullest

extent. I need not say that it is curing persons of Connumption continually, although we are told it is foolish sumption continuously, situotign we are total it is 10011sh
ness. I care not what is said, so long as I can cure several thourand persons yearly. If this medicine was in
the hands of some patent medicine brawlers, they would make an uproar through the country that would be in

supportable.

Scrofula or King's Evil.—This disease is really inveterate, and hard to be suidured. It is generally seated in the sides of the neck, behind the cars and under the in the sides of the neck, behind the cats and under the chin, yet scarcely any part of the body is exempt. It sometimes falls upon the lungs and produces consumption. It is a dreadful circumstance, that this disease is transmitted from parents to children. The Salve will extract all the morbid matter by causing the sores to discharge; and then let then the Solar Tincture be used to discharge; the one point which does a confinement of the solar transmitted to the solar transmit. charge; and then let then the Soiar Inforuse be used to drive it to one point, which done, a confinuance of the Ointment will completely remove this disorder. This is the safest and most effectual of any method. It should be adopted without a moment's besitation.

Erysipelas -This complaint arises from impurities being driven out to the surface by means of the insensible perspiration; and lodging in the cuticule, forms sores, pimples &c., it being of a caustic, acrid purifying nature. It only requires that it should discharge its virulent particles through the skin, and the difficulty will pass off. If suffered to remain, and driven inwards it is frequently fatal.

Let the Salve and Solar Tincture be used as in scrofula and the patient will soon get well.

Salt Rheum.—This is another obstinate disease but can be cured effectually as the scrofula. There is no

can be cured effectually as the scrolula. There is no difficulty in this disease.

Head ache, Ear ache and Deafness.—The Salve has cured persons of the Head-Ache of 12 years standing and who had it regularly every week, so that vomiting often took place. It cured the wife of a man who laughed in my face for proposing such a cure, and who now would not be without it for the best farm in the State. If my one will take the trouble to call I will give his name.

Deatness and Ear-Ache are helped with the like suc-

cess as also Ague in the face.

Culd Feet.—Consumption, liver complaint, pains in the chest or side, falling of the hair, one or the other stagnant or infected, is toopen the pores, and it relieves always accompanies cold feet. It is a sure sign of dis-itself from all impurity instantly. Its own heat and vi-tality are sufficient, without one particle of medicine, totally unable to get them warm, and endure much suf-

thus cure every case. It is infallible for this.

Asthma, Tightness of Breath.—If this disease is not hereditary and produced by the malformation of the chest,

the salve will cure it. Dyspepsia.—One would suppose a salve would not effect this disease much but the All-Healing Ointment will cure two sooner than any internal remedy will cure

Sure Eyes.—The inflamation and disease always lies back of the ball of the eye in the socket. Hence the utility of all remedies that are used upon the lids. The virtue of any medicine must reach the seat of inflam-mation or it will do little good. This salve if rubbed on the temples will penetrate directly into the secket and infuse all its virtues upon the disorder. The pores will be opened, a proper perspiration will be created and the disease will soon pass off to the surface. How asy and how natural! It is as perfect and valuable as

t is simple and philosophical.

Sore Lips, Chapped Hands &c.—I sell a great deal of salve to Seamen, who say it is the only thing they can depend on to cure their raw hands, when exposed o the weather at sea. It acts like a charm in these complaints. Two or three applications cures.

Pumples on the face, freekles, tan, masculine skin, gross surface.—Its first action is to expel all humor. It will not cease drawing till the face is free from any mat-ter that may be lodged under the skin and frequently breaking out to the surface. It then heals. When there is nothing but grossness, or dull repulsive surface, it begins to soften and soften until the skin becomes as oft and delicate as a child's. It throws a freshness and blushing color upon the now white transparent skin that is perfectly enchanting. Sometimes in case of Freckles it will first start out those that have lain hidden and seen but seldom. Pursue the salve and all will soon dis-

appear.

The reason for this wonderful change in a lady's face is that it excites into natural and healthy activity the Insensible Perspiration, while it renovates and renews the surface, and leaves the skin in as lively and delicate a condition as the most fastidious could desire. It is put up in fine jars and beautifully scented on pur-pose for the toilet.

pose for the toilet.

Burns.—Life can always be saved if the vitals are not injured. I have so many testimonials for the cure of this complaint that I could fill a book. I suppose these is not a family in the United States, that would there is not a family in the United States, that would consent to be without this solve a single day if they knew it's halm in healing Burns alone. It extracts the

knew its baim in healing Burns alone. It extracts the pain and leaves the place withouts scar.

Quinsy sore throat, Influenza, Bronchitis.—There is not an internal remedy in existence that will cure these disorders as quick as the salve. It upons the pores on the neck and draws off all the inflammation and impure juices, and a few days will see the patient well. It is sovereign in these cases.

Piles.-The salve acts upon the piles as upon sore

eyes. There is an inflammation which must be drawn from the parts. The salve does this. Hérnia or Rupture.—This salve has cured some very bad cases of rupture, and although it might not all, yet it would be wise to try it. It is a peculiar complaint, but of the body, whether diseased slightly or severely. When the perspiration is restored, it has power to penetrate the lungs, liver, or any part of the human-system, and to act upon them, if they be diseased, by separating the inflamed morbid particles therefrom, and expelling them if the trial was made, who believe no medicine of the least benefit.

to the surface.

It has power to cause all external sores, scrofulous humors, skin diseases, poisonous wounds to discharge their puttid matter, and then heals them.

It is a remedy that sweeps off the whole catalogue of disease caused the death of the late H. S. Legare, Attention o torney, General and acting Secretary of the United St It is the stopping up of the smaller intestines, and some times the twisting of them. It is brought on by a negtimes the twisting of them. It is brought on by a neg-lect of the daily evacuations, or from incarcerated Her-nia. The pains are awful, and unless help comes spee-dily, the sufferer soon dies.

The All-Healing Ointment would have saved the life

of Mr. Legare and all others under similar circumstances Corns.-If the salve is used according to directions people need never be troubled with corns—especially cut out by some trivelling mountebank who knows he is doing more mischief than he can possibly repair. A little of this ointment put on now and then will always

keep them down. Indeed there are few complaints that it will not benefit. It is a Family Salve of untold value. As long as the sky rolls over one's head and grass grows upon the earth, it will be sought after, used and valued. As there is no mercurial substance in it, but composed entitled in the control of the c tirely of vegetables it gives no good ground for appre-

We have full certificates, from all the persons whose names are here given, but not having room for them, we merely give their names, Nos. and the disease of which they were cured.

TOWANDA ACADEMY HE next academic year of this institution, and commence on Monday, the first day of Septen next, under the superintendence and management, Mr. J. C. Vandercook, as Principal, JNO. P. WORTHING, ASSISTANT.

Miss Sarah F. Worthing, Preceptress.

Mr. Vandercook has been successfully engaged MY. Vancercook has been been such a specified in teaching for ten years past; he has much experience in this important and truly elevating department of huma-enterprise and benevolence, and brings testimonials from various sources of good moral character, and excellent scientific and literary attainments.

scientific and literary attainments.

Mr. Worthing is a gentleman of very excellem attainments, experience and skill in teaching, and came fail to do much for the salvancement of the students.

the prosperity of the institution.

Miss Worthing, the Preceptress of the Female De-Miss Worthing, the Preceptress of the Female Department, has alreacy, by her devotion to literature, and her superior virtues, obtained the unqualified confidence of the community, and the esteem and affection of her numerous pupils. Young ladies will schlom find an instructress better qualified to meet all the wents of the student, not only as a tercher, but as a goardian friend and associate. They cannot but be improved by her cannot be the proven by the control of example and society, as well as by her engaging instruc-

TUITION will be as follows, in all the departments Primary and common English studies, with Penmanship, composing and speaking, \$2 Natural, intellectual and moral science, hotany, chemistry, history, astronomy, rhetoric, logic, book-keeping, drawing, painting, &c., \$2 50

book-keeping, drawing, painting, &c.,
Mathematics and the languages,
Incidental expenses, per term, during winter,
No student will be received for less than half a torn,
and no deduction will be made for absence, except n

cases of illness or other unavoible causes.

The Academic year will be divided into four terms of eleven weeks each. There will be a vacation of one

week after the first term; also one week after the thir the barvest season. We desire to make the Towarda Academy an agre-ble and desirable resort for students from abroad as well be and destraine resort for stude his non solution, as get as those at home; a place where the purest virtues shall be cultivated, and the germs of science firmly set in the youthful mind. For this great object, no care or labor will be spared on the part of teachers or trustees. The

Principal should be consulted before purchasing hould as several changes are contemplated in the text-book of the School.

Students from abroad can find board with the Prince pal or others, on reasonable terms. Lectures will be given regularly by the Principal and society organized for the especial benefit of young real. There will be two examinations and exhibitions during the year, the time to be determined by the teacher at trustees.

HIRAM MIX, President.

David Cash, Burton Kingsbery, H. S. Mercur, William Elwell. John F. Means. Towanda, July 31, 1845.
