# The Planting and Preparation of Seed Corn.

Management of Pasture Lands.

[From the Maine Cultivator.]

ly three or four kernels of corn to the hill- unskilful in the management of pasture lands. others are more generous, and bestow their seed Suppose a farmer has a large pasture of 70 or with a liberal hand. As corn is liable to many accidents during its infancy, it is always an ex-cellent plan to plant " seed enough." so that if a portion of the blades should be destroyed, the dairy? We will suppose he keeps eight cows, vation, and ensure the realization of a remuner- his family, in favorable seasons. ating crop. It sometimes happens that a portion of the seed corn is imperfect, owing to certain causes operating either on the crop in autumn, ot from careless and improper management after its removal to the bin. Sometimes a two hundred dollars. Let him sell, say two portion of the grain on the cob fails to vegetate, while the remainder proves sound and good .-And it is often the case that worms and other lent fence, which will give the remaining six enemies enter the field-all of which causes cows the exclusive right to fifteen or twenty should be taken into consideration, and their ef-

seed . enough." If a liberal bestowment of seed be accorded, grass two or three inches in height, in a short and no unlucky contingencies occur to lessen the space of time, without ranging over a large exproduce, during the infantile stages of vegeta- | tent of ground and thus injuring the grass by tion, the supernumeratics may be easily remov-treading. A good cow, having a full supply ed, and the excess limited at the first hoeing; of the rich food, will constantly yield a rich or it may be deferred until such time as all dan- profit. But, indeed, it has been said that lands ger of loss from such causes shall have been kept constantly in pasture will become improvremoved. An old farmer informs us that for ed in fertility. Grass lands will, however, the last twenty years he has made it an invaria- bind out if not occasionally plowed. ble rule to flant ten kernels to the hill, which A farmer cannot invest money more profita-is just twice the number he permits to grow, and bly than in the improvement of his own cow that he rarely, if ever, has to take out more than three or four blades at hoeing time-the rest being generally imperfect seed, or destroyed by worms, crows, or other enemies that infest his ing, and thus increase the fertility of his cow fields. The cost of a few quarts of extra seed corn, is of very little consequence to the farmer, and the labor of thinning, even where all the corn germinates, is still less.

ANOTHER SOAK FOR CORN .- Dr. Samuel has published in the New England Farmer, a there cannot be a greater folly than to overcommunication detailing the result of certain ex-periments which he made last year, in sosking corn-the substance of which we will condense for the benefit of our readers; deeming his experiment worthy of note at this particular time.

Some time last May, the doctor accidentally saw a notice of some mode of preparing seed for crops, even upon poor and barren land, at a triffing cost. What the preparation was, the discoverer refused to make known. While thinkammonia of the druggist-hartshorn-might answer well for the purpose required, both from the nature of its base and its acid, and he determined to try the experiment of using it.

He accordingly dissolved a small piece, weighing by estimate four or five grains, in about half coffee cup of water. Into that he put a small handful of seed corn, and suffered it to remain four or five hours, and then planted it. By the side of each hill, at a proper distance, he planted another hill with corn from the same ear, but unsoaked. Generally at each spot but one hill was planted ; but in one place a hill of the soaked corn was planted on each side of the unsoaked. No. 1, was planted in good, light soil, into which a fair dressing of coarse long stable manure had been ploughed-five kernels planted to

each hill. Result-the soaked corn produced eight ears, six good and two small; the unsoaked, four ears. No. 2, hills-two of soaked and between

them one of unsoaked corn. Soil dry, sandy, and close to the edge of a path where little or no manure fell in the spreading of it. Result the soaked hills gave five ears, three of them good ; the unsoaked, three good ears.

The doctor tried six experiments in all, and each of the other four with corresponding results with the above, which shows a very large increased product in favor of the soaked corn. which as the treatment of the soil and culture of all were alike, must be ascribed to the virtue of the ammonia.

As the experiments tried by Dr. Webster with oughly rotted.

# Every good farmer wishes for a liberal sup-Beed Exonger."-Many farmers plant on- kinds. The most farmers are, however, very 80 acres, in which are kept the oxen, sheep, horses and cows. The question might be ask-

remainder would be worth the trouble of culti- and makes butter and choese enough to supply Now, Farmer Thrifiy will put this man upon a tract that will annually put one hundred dollars into his pocket; with a fair prospect to. increase the sum to one hundred and filty or of his prorest cows, and the price of these will well nigh purchase the materials for an excel-

acres. We must have one lot that can be fects obviated, as far as practicable, by planting seed " enough."

pasture. A farmer of small capital may turn over an acre or two every year, and sow grass seed, without any additional expense in fencpasture. Or he may fence off a portion each year and convert the same to tillage, always applying a proper quantity of manure, so that the soil may become improved and not exhaus-

ted. The farmer who manages his cow pasture in the best possible manner, may, in due Webster, of Charlestown, New Hampshire, time increase the number of his cows; but

To MARE FRUIT TREES THRIFTY .--- In the spring wash them as high as a man can reach with one quart whale oil soap, diluted in fifteen gallons of water ; and if in April there are caterpillars, give them another dose ; then put round the roots of the apple and pear trees two or three planting in Germany, which was to ensure good shovels of charcoal or anthracite ashes ; to the peach, plum and nectarine trees I have tried various experiment\*, yet have hitherto been most coverer refused to make known. While think- pleased with tobacco stems, which are purchasing over the various substances that had been ed at two cents per bushel. Half a peck of or might be used with advantage, it occurred to stems around each tree is sufficient. The roots him that muriate of ammonia, the common sal are first laid bare ; the tobacco is then placed over them and covered with soil. 'To this three or four shovels full of anthracite ashes may be added with advantage. The past spring I have

tried on all, save peach and nectorine treeswhich were so diseased with worms that I ordered them cut up-an application of warm (not hot) coal tar from the gas house. We first re moved the earth from the roots, picked out the worms, and then, with a painter's brush, covered the trunk of the tree eight inches up from the roots. After this soil was immediately replac-ed around the tree. The effect was astonishing. In May we applied half a pint of guano as a top dressing to each tree, and thriftier trees, fuller of fruit, and with a deeper, richer green foliage, cannot be seen. I mean to treatall my peaches this way, as the cheapest and best manner of protecting them. Two peach trees I gave up last fall as past hope of saving. On these I tried an experiment of putting to each fifteen gallons of urine neutralized with a peck of Plaster of Paris. The trees are now living, and the leaves are green ; but whether they will thrive well remains to be seen. I think, however, the dose will effect a cure; and if so, it worth knowing. You shall have the result hereafter.

#### R. I. COLT. Patterson, N. J., June 5, 1845.

APPLE TREES .- All hardy fruit trees, more especially apples, will bear a considerable portion of manure in the soil, provided it has been previously intermixed with the soil, and thor-A very successful experiment was made two ful of corn, to save our readers the trouble of a years ago, by the writer, the results of which calculation as to quantities, we will make one are now very striking, by digging very large ready to their hands. Presuming that the doc- holes for apple trees, and filling them with a tor's "s:nall handful" may have contained a gill mixture of soil and rotted manure. A thorough of corn, as five grains served that quantity of intermixture of the soil and manure was effect-seed, and there are 5,769 grains in a pound of ed as they were gradually filled in. by means ammonia, that quantity would answer, when dissolved, as,a soak for  $4\frac{1}{2}$  bushels of corn. Now then, as ammonia is a very cheap drug. In setting out the trees, common garden earth and the mode of using it very simple, may we only was placed in contact with the roots, con-not ask some of our enterprising farmer readers sequently the effect of the mixed rotted manure was not visible the first year. The present year, however, its influence has been most obvious in the rapid growth of the shoots, and periment would not cost them 50 cents, and if in the uncommonly dark and rich hue of the It is hardly necessary to add that the soil, as a matter of course, was kept clean and in a mellow state, and that the trees were tied to an upright stake, driven into the hole before filling, to prevent shaking and loosening by the wind. ALTERNATE CROPS .- The greatest quantity of grain produced in a rotation, is not alone a proof of its being the best system; a large quantity of meadow would vield much hay It is a sin against good husbandry to sell off the hay from a farm, unless it be with great caption, where the farm is near a large town, from whence, or otherwise, it can be plentifully supplied with manure. Numbers of cattle well-fed and well-littered, give the manure, in addition to other manures, requisite for invigo-GRAFTING GRAPE VINES .- The following is | rating the soil : but numbers of cattle cannot the mode practiced by the late Mr. Herbemont, be kept in good condition throughout the year, of South Carolina. " Take away the earth unless clover and grass; as well as hay and around the vine to the depth of four or five inch-| straw, abound. The summer and winter foods es-saw it off about two or three inches below | must have a due proportion to each other, and the surface of the ground. Split it with a knife the fields of grain are not to exceed the fields or chisel and having tapered the lower end of of meliorating crops,-these preserve the soil, the scion in the shape of a wedge, insert it in as well as produce crops. Aim at income the cleft stock, so as to make the bark of both from *live stock*, which *improves*, rather than coincide, (which perhaps is not neccessary with from grain which impoverishes your land .---Bordley.

# TO THE PUBLIC.

To THE PUDLIC. REFERENCE to the very many numerous testi-monials of well-known and in some instances distinguished individuals, need not be again repeated to induce the public to place greater confidence in this now justly celebrated medicine, the peculiar operation of which, together with the mildness and unparalleled effects in removing all obstructions, and restoring will of which, togener with the mininess and unparameter efficacy in removing all obstructions, and restoring ull functional derangements of the Stomach, Liver and oth-er digestive organs; purifying the blood, strengthening the whole system, uproving the most insidious local and chronic diseases, healing and restoring the internal organs, with their convenience, certainty and cheapness render them the most usefui general and family medi-tion of the found

The great variety of cores which have been made, The great variety of cores which have been made, have opened a field for war, and every means have been boldly recorded to by the old pill venders to crush these goahead' pills. The first lander runs thus: New-York, July, 1844.

"We, "Physicians of this city, feel it our duty to state, that we believe the pills known as Dr. Smith's Sugar Coated Improved Indian Vegetable Pills," are

- mainly composed of mercury." J. M. Morr, M.D. Physician, N. Y. J. M. MOTT, M.D. Fuystan, K. T. L. S., HART, M. D. do do J. W. HUXTER, M.D. do do F. ANDERSON, M. D. do do W. HART, M. D. L. M. NYE & CO., would re

only five grains of ammonia, and a small hand-

to make an experiment of two acres of cornone acre of seed soaked in a solution of ammonia. and the other with unsoaked seed ? The exby so cheap a process, they can add from 50 to large and luxuriant folinge. 75 per cent, to the products of their corn crop, surely it is worthy of a trial. We would, were we about to test the effcacy of the doctor's soak. roll the seed just before planting in plaster, so as to impart fixidity to the ammonia, and thus longer continue its nutrient properties to the corn plant, during the period of its growth ; and, in order to fully test the experiment, we would plant one acre with seed soaked in a solution of ammonia, unplastered -one acre of seed soaked and plastered, and one acre with seed unsoaked ; we would mark out the three acres in the same field, manure and cultivate each alike, and measure the produce of each acre separately. By pursuing this course, the result would not only prove the value of the ammonial soak, but that of plaster as an absorbent .- American Farmer,

the vine ;) tie it with any kind of a string merely to keep the scion in its place, so as to leave only one bud of the graft above the ground, and the other just below the surface, and, it is done."

CURIOUS F:CT .- A larmer in Vermont, last season was behind all his neighbors in cutting the grass in his meadows. At night, some waggish hoys went into one of his meadows and cut down all the grass in it. They also went into his potato patch and cut a few swathes through cut off the tops ; and there they were all found

SUBSOIL PLOUGHING -Have you a five scre lot near the house that you intend for corn this

season ? Yes. Then I am glad to hear it .---Why so? Because I wish to give subsoil ploughing a fair trial. Subsoil the one half of it, and plough the other half in the ordinary way; manure each part slike, plant the whole in corn, and cultivate each part alike, and we will bet you a moss rose that the part it. At the time of digging the potstoes they subsoited will yield one third more corn than bighly recommended, as, by combining aromatic, and were found rotten, except where the boys had the other. We feel particularly anxious that aperient properties, they remove all oppressive accumulaseveral gentlemen in each neighborhood should good and sound. This would seem to show try the experiment, in order that the virtues of that the disease begins in the tops, and it sug- subsoil ploughing should be put to the severest gests as a means of saving a crop the cutting test, and its utility or instillity be placed beyond off the tops so soon as the tops begin to die. all eavil and all doubt. ......

new rolling. These files always cure couples and colds immediately. Price 25 cents per box. For sale by E. H. Mason, A. S. Chemberlin, Tow-suda; Robert Spabling, J. Holcomb. Wysor; Henry Gibbs, Orwell; C. H. Herrick, Athens; G. F. Redington. Troy ; authorized agents for Bradlord county. • There are no Physicians in New York of the above names, hence the imposition.

#### CANCER, SCROFULA AND GOITHE.

Ample experience has proved that no combination of medicine has ever been so efficacious in removing the above diseases, as Dr. JAYNE'S ALTERATIVE, of Life Preservative. It has effected cures truly aston Lite reservance. It has energies truly axioman-ing, not only of CANCER, and other diseases of that class, but has removed the most stubborn Diseases of the Skin, Dyspepsia, dc., dc. This medicine enters into the circulation, and eradicates diseases wherever located, It purifies the blood and other fluids of the body, removes obstruction in the pores of the skin, and reduces moves obstruction in the pores of the skin, and resucces enlargements of the glands or bones. It increases the appetite, removes headache and drowsinces, and invigo-rates the whole system, and imparts animation to the diseased and dehilitated constitution. There is nothing uperior to it in the whole materia medica. It is perctly safe and extremely pleasant, and has nothing of

the disgusting nausen accompanying the idea of swallow-Prepared and sold at No. 8 South Third Street, near

Oh Gosh !! What Proverbs !!

Try it again Master G., You may wake up old no. 3.

If has long since ceased to be necessary. For no, 3 to say they they have the largest and bes stock of Goods in Towanda, for that has long been "A Рпотекв."

PROVER B." It has long since ceased to be necessary. For no. 3 to say they buy goods for cash and buy them 10 per cet cheaper than most of their neighbors, for that too h long been "A PaovERB." It c. long since ceased to be necessarry. For no. to say they are selling and will sell goods cheaper ...an any establishment in Towards, for that too has long been "A PriovERS." It never has been necessary. For no. 3 to say they would sell goods for "12j per cent profit ---" ior we can do that end then sell at a price less than many of our neighbors, pay for the same

price less than many of our neighbors pay for the same goods in the city-and that foo has long been "A Parverb."

VERD. We trust that it never toull be necessary. For no. 3 to hoast of "ruining" any body by selling goods cheap either in " Brick Row" or Wood Row" we sell goods cheap to benefit community and not the ruin them, this too has also long been " A PROVIES."

Li is no whisper-But in the mouth of every body, even the little boys in the streets proclaim it aloud, that no. 3 are selling "kd-ter goods and more of them" than any other establishment in Town,-wonder how long since some of our neighbors found out this was "A PROVIER !"

THERE IS A WAY TO TEST THE ABOVE: Just continue your old prectices, drop in at no 3 before you buy, where no charge is imade for exhibiting goods Nov. 25, 1845, W.H. BAIRD & CO.
