## Agrientfural.

The Farmer's Song. A.7-" THE SEA." A life on my native soil,-

A home in a farmer's cot,-. L'il never at labor recoil, And ask for no happier lot. The civ has not a charm, Wab its turmoil, and noise and strife O, give the a strug little farm. With a kind and notable wife.

A ! fe on my native soil,---A home in a farmer's cot,-With my faithful team will I toil, And ask for no Lappier lot, Gre up !-- Gee up !--Gee up, gee up, and gee O !

On my native soil here I stand. 'Midst blossoming fields around: Where the air is pleasant and bland, And the hills with cattle abound ! The river is flowing by ; The boatmen singing we hear; And the laborers, how they p.y

White echo sends round their cheer How cherrful it is to view Whole valleys of waving grain, And the husbandmen's jovial crew, With sickles pro-traing the plain ! O, the song of my heart shall be, Wirde earth her sweet products shall yield. The loss of a farmer for me, A home in the forest and field.

### On Bees, Ac.

BY L. G. K'LLY, OF NEWBURYPORT, MASS.

ty box and placed over a small, swarm, with No department of agriculture seems somuch ( a sheet from plate drilled full of holes between neglected at the present time as this; whilst them. At night, after the atmosphere of the the same amount of capital invested in any two was sufficiently commingled, the divider other branch yields less. Notwithstanding the of the two was removed, and the swarms unit-Lige importations of honey and way, at only fed. CHOLERA, SUMMER COMPLAINT, DIARRHŒA Dysentery, and all other Derangements of the Stomach and Bowels, cured by Dr. D. JAYNE'S CARMINA-TIVE BALSAM.

NEW. YORK, 8th month 1st, 1838. FRIEND DR. JAYNE-It gives me much pleasure to inform thee of the result of a case in which I administered thy Carminative Balsam, and I consider it to be a matter of duty due thee and the public, to give the following statements :- Being called to visit a patient a few days since. I found he was yomiting and purging mos violently, with severe Tormina and Cramps in the upper and lower extremities, and also in the abdominal parieties. The Cramp was so violent, that it took four men to rub him incessantly, to keep down the spasm, and to use his own words, he said it seemed to him as if his bones would snap in two. There were also violent cholic pains around the ubilical region, attended with very distressing nausea. In short, I considered it to be a case of genuine cholera, I found on inquiry, the pai thad been unwell the day previous, with a looseness t the bowels. That six hours before I saw him, he was seized with the complaint, and had gradually got worse. The extremates were cold, and he was nearly pu seless. I immediately gave him a spoor ful of thy Balsam, which giving it a few times, the stomach became settled, and he expressed himself much relieved. I then gave him a calomel and optum powder. In two hours from the time I saw him he felt quite easy, and fell asleep, and slept well for five hours; but on waking, the symptoms again returned. I directed more of the Balsam to be given him, when the disease subsided, and the patient "subtended" or section have, consisting of was convalescent. It took only one bottle to effect a cure boxes a foot square, inside measure, placed I have also so often witnessed the beneficial effects of with the Carminative Balsam in Summer Complaints and Diarrhoea, that I would not be without it for its weight

the bees busily at work. On the 12th of weil and frequently better, than an bees and comb; the old hive was at once reond have or box, and then shut up for twentyer, and the bees confined thirty-six hours -New comb was rapidly formed in the second swarm was driven into a third box, leaving 50 lbs, of honey. A drought soon checked - the usual supply of notsture, so that the secend and the transferred swarms required feeding for their winter store. I divided a second the lower have contained any brood comb, I hive into an empty one, using tepid water in much as the seed.

order not to mare the young bees, which it contained in anundance. This brood-comb being in a large old-fashioned hive, was ent down to 12 inches square (the size of the new ones.) and arranged in two of these. One was set over the transferred swarm, which immeduitely ascended, and, having a queen, took quiet possession. After twenty-four fidors tary were allowed to roam abroad, returning to their new home, ten feet from their former and a communication opened. They reared a queen in due true, as did also the two that had been separated from the first luve, the cells o

which were distinctly seen in each.

It is not uncommon for one swarm to rob another, especially in an unproductive season. In this respect I was vexed for weeks, through circlessness in exposing honey in the comb to diminished by the combat, and perhaps by -Am. Ag. being entired away. Early the next morning the robbers returned in great numbers, meet-

in this town before the first August, after which they are worthless. While my neighbors were in duly expectation of swarms in the usual way, with their drawers closed till too let to obtain much honey. I had two or three stock-hives arranged over empty hives, and the best during the fax is usually destroyed, the the set data and frequently better, than any other other June, a young brood was discovered in one crop. The flax is considered of no value from of the bee-hives, then two-thards filled with the fact, that the expense of pulling, rotting, dressing and preparing for market, over-balanmoved to another stand, still placed over a sec- ces its worth, and hence farmers have resorted to the most expeditious modes of getting rid four hours. A cover was secured upon the oth. of it, such as burning it, throwing it into wet marshy places, &c. I have recently had conv-reations with several farmers, who have for bunder box, and the old one was again removed the list two years engaged quite largely in raisa ta like manner. On the 4th of July the old ing it, who assure me that if the flax is cut before it comes "dead ripe," by paying the same attention to it in curing it, that is usually bestowed upon the securing of hay, cattle, will not only eat it readily, but are very fond of it; besides it keeps them in a very thriving, heal stock the 2 ah of July; but being in doubl of thy condition. Those persons with whom I conversed, agreed in their belief, that the flax a numediately expelled the bees from the stock thus secured, is worth almost, if not quite, as
