OF THE North American College of fleatth.

These extraordinary Pills are composed of plant which grow spontaneously on our own soil, and are therefore better adapted to our constitutions, than Medi cites concocted from foreign drugs, however well they may be compounded ; and as WRIGHT'S INDIAN VEGETABLE PILLS are founded upon the principle that the human heads that the human body is in truth SUBJECT TO BUT ONE DISEASE,

The republication of this valuable work has been undertaken partly on account of the high favor with which it has been received in England, but chirfly in consideration of its intrinsic value, orising from the felicitous adaption of the plan to a want that has been long and generally felt and from the judgment and fidelity manifested in its execution. The idea of giv-ing in a single work, of no very formidable dimensions, In a sufficient outline of the world's whole history, and similar outlines of the bistory of every nation, is so obvious, judicious and appropriate as to require no cologium. Every parson who cares at all for the acquisition of useful knowledge must desire to posses such a general knowledge of past events, not only in his own country but in all countries, as shall enable him to understand the perpetually recurring allusions that are found in almost any course of general reading; because for want of such understandung there is always a serious diminution both of pleasure and profit even in the parusal of such works as are designed chiefly for annuse-ment. For instance, most of Sir Walter Scott's no rels are founded upon history, and abound with reference to bistoral events and personages, a want of some acquainsufficient outline of the world's whole history, and historal events and personages, a want of some acquain-tance with which detracts seriously from the interest and delight they are so well qualified to awak a ; and so of the provide the second second
