The old man placed his hands on her head, With a tear on his wrinkled face; He thought how often her mother dead Had sat on the same, same place, As the tear stole down from his half shut eye, "Don't smoke," said the child, "how it makes you cry.

The house-dog lay stretched out on the floor, Where the sun, after noon, used to steal, The busy old wife by the open door, Was turning the spining wheel-And the old brass clock on the mantel-tree Had plodded along to almost three:--

Still the farmer sat in his easy chair, While close to his heaving breast, The moistened brow and the heaving breast, Of his sweet grand-child were pressed! His head, bent down, on her soft hair lay-Fast asleep were they both on that summer day!

Fattening Hogs.

It has been demonstrated that in fattening hogs, a great saving of food is made by cooking; and we believe that a very considerable improvement in the quality of pork is likewise effected by that process. From experience, we should altogether prefer pork, either for eating fresh or salting, that had been fattened on dairy-slops, with cooked potatoes, pumpkins, or apples, mixed while but with a portion of meal, either of corn, rye, or barley, oats and peas, or buckwheat. We know the idea is prevalent that the best pork is made from " hard corn and cold water ;" some indeed who allow their hogs vegetables and slops during the first part of their fattening, confine them wholly to com for a short time before they are killed, in order as they say, to " harden" the pork. We are convinced this is erroneous. In the western port of the country, where in many cases nothing but corn is fed to hogs from the time they are able to swallow it till they are slaughtered, the pork is notoriously more oily, and not as well tasted as that which is made in sections where a variety of food is used.

In feeding store swine, the advantage of cooked food is not so obvious. The digestive organs can manage a small quantity of raw food. even though it be Indian corn, and are probably able to extract the nutriment fully from it; but if the raw food is increased beyond a certain amount, it will not be thoroughly digested. We have heard it, argued that if it were necessary to restrict hogs to a short allowance, it would be best to give the food raw. because the longer time required for its digestion. kept the animals longer free from the pangs of hunger. It must be a belief similar to this. or the result of actual experience, which induces the Irish people, (according to Mr. Colman,) to cook their potatoes so slightly as to "leave a stone in the middle." We confess the idea is not to us unreasonable. But when it is wished to fatten animals it becomes an object to have them consume as great a quantity of food daily as can be perfectly digested becauses the so ner they consume a given amount, the greater will be the proportion of flesh accumulated. Cooking does the work in part, of digestion, and by thus assisting the functions of the animals, enaples it to dispose of a larger quantity, while at the same time, it is disposed in the manner most profitable to the feeder.

From the middle of September to the middle of November, the pumpkin in one of the best articles of food for hogs which the farmer can have. By the way we deem the pumpkin crop of the most profitable that can be grown. For the production of rich butter, we know of nothing equal to it. and it comes in just when there is usually a deficiency of grass-feed. For fully two months they may be used to excellent advantage and with but little trouble. For cows it is only required to cut them and feed them in their managers, or break them in pieces on clean sward ground. For hogs they should be boiled in as little water as will answer to cook them. and when soft they sould be mashed fine, and about one-fourth of their bulk of meal internately mixed in. Good, ripe, sweet pumpkins, cook ed in this way, with a little whey or skimmed milk, will make hogs fatten as fast as any food we have ever used.

But hogs, like other animals, require a variety

of food: they will not do as well confined to one kind, however good it may be; it is best therefore, to vary their diet frequently, or to incorporate seferal articles into a mass, occasionally changing the relative proportions.

Hogs sliveld be kept dry and comfortably

warm, while fattened. They should be fed in clean troughs, and the appetite should be so closely watched that no food is given them to be left from one meal to another. Nothing should be admitted which will promote their quietude. for on this greatly depends the accumulation of fat. The nervous system has such a connexion with the secretive organs, that an animal which is constantly restless cannot be fattened

A plentiful supply of charcoal should be allowed to hogs while futening; it is a good preventive against dyspepsiaea disease which is not confined wholly to the highest order of animals. The corrects the acidity of the stomach, and greatly promotes digestion.

Soap.-Every farmer should make a supply of soap for his own family use. The house ashes, and the kitchen grease will be sufficient for this. The ashes when leached should be mixed with one bushel of fresh quick lime to ten bushels of ashes. When the first leys come down from the leach, pour them again upon the leach, until they run clear. Heat the leys over a slow fire, and when hot add the grease, a little at a time, as long as the leys will abarcel of first quality, soft the states. If it is too weak add more fresh leys, with a lamp and an old brown pitcher, on a side of the public aguare, lately occupied by A.M. Coc, and having made entirely new arrangements, is now arrangements, is now arrangements. It is also a convenient medicine to take, and having made entirely new arrangements, is now arrangements. Hell Directed Table!

"What great effect from little causes spring,

What wealth does labor well directed bring." A single struke of air axe is of little conseque ce : yet by the continual application of that small power, properly directed, what amazing effects are produced! The stordy oak and lofty pine do not simply own its power, but whole forests bow before it. & the wilderness becomes a garden. Industry well directed, will give a man a competency in a few years. The greatest lindustry

misapplied is useless.

As an example, there is my neighbor. Seth Steady, the Blacksmith, is not only an induscious man, but his industry applied to one object, His hammer is heard at dawn of day, and the fire blazes in his shop during the evenings, from the 20th of September to the 20th of March.
Go to this shop at any time of the day, for any kind of work, you are sure to watted upon.-The consequence is, his purse is filled with dollars, and his cellars well filled with provisions, and that's what I call quite comfortable. A though suitably liberal, and enjoying the good thing of life as he goes on, ten years of health will enable him to purchase a good farm.,

As a contrast, there is my friend Nat Notion al, the busiest and most industrious mortal in existence; as the old saying is, " he has to many irons in the fire." and with all his industry he goes behind-hand:

He has a fine farm, but instead of pursuing the cultivation of it, he flies and seizes on every new project that occurs.

A few years ago he concluded to give up the dairy business, in consequence of the low price of butter and cheese; sold his cows at a low figure, and purchased sheep at a high rate, for wool then commanded a high price. By the time he got fairly into the raising of wool, down went the price of wool, and up went the price of butter, & chrese. He then sold his sheep and purchased cows again, for cheese was up and wool waswas down. Last year after sowing a number of acres of grain, he resolved to rent his farm, sell the grain on the ground, and go to hauling; for by a nice calculation, he had proved that money might be made by it. A team was procured; but after one or trips; he concluded to sell his team, build a saw-mill, and go largely in o lumbering. The dam was completed. the irons procured, and three-fourths of the expence incurred when by a nice calculation, (for they are intended, that I have yet seen. I seldom tak no one makes nicer calculations.) he found that an oil-mill would afford the best profit; and to work he went with great industry, building an oil-mill.

I hope they will continue to which other pills are liable. I hope they will continue to be a source of profit to you, as I doubt not they will be means of relief to the afflicted on a large wealth. Yours truly, I GREEN.

I happened to go there a few weeks after wards and the whole organization of the mill was undergoing an alteration, to fit it up for a otton and wollen manufactory.

A quizzical friend intends to propose to him abandon that project and enter largely into the manufacture of flour, and I have no doubt that he will all readily accede to the proposal So with all his industry and expense, he is neither benefitting himself nor the public.

Good Advice .- Never believe, much less propagate an ill report of your neighbor, without od evidence of its truth.

Never listen to an infamous story handed to you by a man who is a known enemy of the person defamed, or who is himself infamous for defaming his neighbors, or who is wont to sow discord among brethren and excite distur pances in society.

Never utter the evil which you know or uspect of another, till you have an opportunity to expostulate with him.

Never speak evil of another, while you are nder the influence of envy or malevolence, but wait till your spirits are cooled down, that you may better judge whether to utter or suppress Never express the evil which you would say

of your neighbor in terms too alrong, or in lateguage which would convey an exaggerated idea of his conduct.

Never throw out against a man broken bints and dark inuendoes, which would leave the

hearers to suspect any thing and every thing that ill nature can suggest.

Never speak evil of your neighbor to his nown enemy, wishes for an occasion of slander; for he will certainly paint the image anew, and

touch it off with bolder colors. In short, never speak ill of a man, when your probably not possibly do any good.

"ALL OF THE OLDEN TIME."-In these days of speculation, plunder and degenerated morals, a recollection of the worth of the highminded founders of our government is to me like the gushing of the cool spring to the midday traveler in the heated desert. A friend relates the following anecdote of his boyish

Having occasion to write, he thought to supply himself with a sheet of letter paper from he desk of his grandfather, who at the time had an office under the Federal Government. "What are you doing there?" said the old gentleman.

" Getting a sheet of paper, sir." "Pnt it back, sir. put it back's that paper belongs to the government of the United

This old gentleman had the courage to affix his name to a certain document, pledging "his honor and his fortune " for its support, but he lacked the courage to appropriate to his private use the property of the Government. How droll would be appear were he among us now.

THE BORER IN APPLE TREES .- W. Buck minster, at an agricultural meeting at the State House, Boston, stated that the borer, which is a fly in its perfect state lays ten eggs on the tree near the ground; that they hatch young worms and enter the bark the first year; the next, they est into the wood and ascend; the third come out and change into the perfect insect. . He says the best remedy is to wash the trees with strong

frosty evening; and his feet slipped from the first step, he was precipitated to the bottom! His wife, a nice old lady, hearing the mise, ran to the cellar door and called out. • Why.

Malear Coated Pilla! - Many - Caption !

THE increasing popularity of Dr. G. HENN.

SMITH'S IMPROVED INDIAN VEGETABLE SUGAR COATED PILLS, has induced a
number of periods to make something they call viriaand coat them with sugar, in order to self them for the
grouine, while they do not possess a particle of tiegoodness, nor even assimilate in appearance to the
original, Dr. Smith's Pilla. Id short, they are an intended FRAID meen the community. A minister original, Dr. Smith's Pills. Id short, they are an intended FRAUD upon the community. A minister who at first had an interest in an imitation Sugar Coates. Pill, manufactured in Albany, N. Y., has given them up, as he says, on account of the miserable dishonest up, as he says, on account of the miserable dishoness parties concerned in manufacturing them... The auments of the concerned in manufacturing them... The auments calculated to injure Dr. Smiths and to affect the reputation of his valuable pills; but rather than notice them in public, Dr. Smith is about to institute legal proceedings against them for their alanders, as he hash another case against a similar party, in which he recovered a large amount of damages. These miserable imitators have to resort to the most abominable means to palm off their counterful pills, as the public know that Dr. Smith's are the original and genuine. Several instances have come to public and genuine. Several instances have come to public notice in which life harbeenendangered by the unfortunate use of the counterfeits. It is Dr., Smith's Pills that are doing so much good in the country—as the following plainly show.

MORE MINISTERS.

Use and Recommend Dr. Smith's Pills then all others.
This is to certify that I have used the Sugar Coated
Pills manufactured by G. Benjamin Smith, of New York, for some time, and believe them to be a good medicine; and also, from inquiry in that city. I am persuaded that he is the original inventor, and therefore is entitled to the benefit of the invention.

S. WILLIAMS,

Pastor 1st Baptist Church, Pittsburgh.

From the Blue Hen's Chieken, (Del.) We call the attention of our readers to the certificate of Rev. S. Williams, Pastor of lat Baptist Church, Piutsburgh, in relation to Dr. Smith's Pills. We can ourselves bear testimony to the excellence of these Pills, one of us having used them and experienced great relief

The above is the best paper in the State of Delaware

The "IMPROVED INDIAN VEGETABLE PILLS," (Sogsi Coated.) are certainly doing much good in the whole country, and are highly estremed, if one half is true that secople write and say about them. They are so easy a their operation that all like them. The editor of the Northern State Johrnal, (one of the largest and best papers in the State of N. Y.,) writes as follows; Waterlown, May 31, 1846.

Dr. G. Benj. Smith-Dear Sir. I was laid up with a bad cold some tim since my return from N. Y., and during my, illness I made trial of your pills, and I must say I found them excellent. They are the best medicine for the purpose

Tonawanda, Pa, Sept, 18 1846.

Dr. G. Benj. Smith—

Dear Sir: Your agent left with me a lot of your SUGAR COATER PILLS, and I have but a few hoxes left. Every box I have sold has given entire satisfaction. I taken them myself and I consider them the best pills I have ever used, and I am not afrail to recommend them to the public. I wish a further supply. Yours respectfully. JACOB KIBLER, P. M. at once.

Dr. Smith-

Hantington Ind., June 21, 1646.

Sugar Coaren Prices," and find them, selling so, fast that I think you had bettersend me two gross immediate ly. They give such general satisfaction that prophe at least twenty miles for them, and as it is generally known. I am agent for them, I would be very sorry to get out. Yours respectfully, SAML. MOORE & CO.

Counterfeet.

Principal Office 179 Greenwich Street, large brick block, N. V. Price 25 cents a box.

DR. WOOD'S SARSAPARILLA AND WILD CHERRY BITTERS. FOR the permanent removal of all such diseases as take their rise in an Impute Blood, Impaired Di-

gestion, Morbid state of the Liver and Stomach, Weak-ness of the Nervous System, and a Disorded habit of Constitution generally,
Dr. Wood's Sarsaparilla and Wild Cherry Bitters
have already, by their substantial excellence, woo a
degree of public favor and patronage which puts them evend the need of recommendation. Being faithfully prepared of the most excellent materials, they can be fully confided in by all in need of a tonic, sperient o

alternative remedy.

This preparation will be found on trial to be a sure and speedy remedy for the diseases onumerated above. They purify the blood, secure regular digestion, promote a healty action of the Liver and Stomach, and strengthen whole system. In all cases of despondency, arising from indigestion or nervous irritation, they have been used with remarkable success; nor are they less useful as a remedy for Headache, Flatulency, loss of Appetite and a general prostration of the system. At the same time it must be stated that they are neither violent nor and it must be stated that they are negative them and at all dangerous in their operation, securing as they do the desired end, by a steady, regular and easy influence. Taken daily, in doses precribed, they will be found to operate in that gentle and salutary manner, which is, in fact, their highest recommendation. That prejudice usually existing against advertised medicines, would not be merited if hestowed on this. The wonderful cures it has performed and the acknowledged celebrit of its principals constituents, should at once commen

it to the public favor. RECOMMENDATIONS, Mr. Philp Wilcox, New Bedford, was entirely cure of a confirmed cancer of the stomach, throat and mouth of a configued cancer of the stomach, throat and mouth, and his general health much improved by the use of only one bottle. Fol. John Baylies, Bristol, Mass, has voluntarily certified that he was coved by the Bitters, of Jaundice, Indigestion, Headache sand Vertigo.

J. P. Perlins, Esq., New Bedford, was cured of an

ruption of the face.

Dr. W. H. Miller of N. Y., testifies that many o his patients have been benefitted by the use of the Bitters and in every case they have given the most perfec

astisfaction.

A CERTAIN CURE FOR PILES!

Dr. A. Upham's Vegetable Electuary, AN INTERNAL REMEDY, INVENTED BY DR. A. UPHAM a distinguished Physician of New York city, is the only real successful remedy for that dangerous and distressing complaint—the PILES ever offered to an American public.

Mark this. It is an INTERNAL REMEDY—and

not an external application, and will cure every case of Piles, either bleeding or blind, internal or external, and probably the only thing that will. There is no mistake about it. It is a positive cure—speedy and permanent. It is a convenient medicine to take,

ture of the disease, inconvenient in their effects. This medicine attacks the disease at its source, and removing the cause, genders the cure certain and permanent. To MARRIER LADIES.—Married Isdies are almost invariably subject to that painful and injurious disease. the Piles, with consequent inflammation of the stomac bowcle and spine, weakness of the back, flow of blood to to this head, 46. The Electuary is perfectly safe for preguant ladies, and the most useful cathartic that con

program lades, and the most useful canada that can possibly bused; as it not only removes the Piles and all inflammory diseases without pain or irritation, but will irrept an easy time, a sale delivery and a sound constitution in the offspring. oes, calternith or gamboge, or other powerful and irrita-

OLOGICS AND WATCHES.

HE subscriber not being in full communion with the firm of M hie is not prepared to hoast of he largest assortment of JEWELRY out of Jail : and having never learned the Cabinet making business,— he is not prepared to do, any work in that line; bu having served a regular apprentice the (1) in the watch repairing haviness, and the experience of 16 years, has no hesitation in saying that all work entrusted to him shall be done in a workmanlike manner, promptly and second heat to none west of that city from whence came that might; such of Gold Levelry!

Now my friend in all your gettings don't forget to get your watches fixed at old No. 100 opposite the

CLEAR THE WAY

And make room for the Sovereign Balm Pills

And make room your years since Dr. E. L. Soule for introduced the Oriental or Sovereign Balm Pills to the control of the Contr infroduced the virtuals of covering rain file to the public, and we venturate say, that no other notifications has given such universal satisfiction; and the site crease so fast, for with very little exertion or education the demand has increased to cover 1000 boxes per day.

They are intirely vegetable, and cause no pain is that They are intirely vegetable, and cause no pain in the operations, being perfectly safe for young or eld, and those of debilitated constitutions, and as a family and icine, have no equal. They are an effectual ready for diseases of this climate, such as billous diseases in all their various forms. Fever, Old Liver Complaints Hednehes, Coughs, Colds; Costiveness & Co. We have warranted them in over 100 cases of Fever and Age, and have never known them to fail in removing it is from one to six days, when taken according to disti-tions. They never leave the bowels coative, being very different from any other Pills in use, which has howels costive, and one dose only creates the necessity ty for another. In nervous debility and female westers ty for another. In nervous occurry and sense westers their effects have been truly astonishing. They have restored a large number of such cases after they had been confined to their beds, and given up by their physicians. The certificates a few of which may be seen in our de-

The certificates a few of which may be seen in our or culars, which may be had of our agents gratis. They quiet the nervous system, and remove the cause of nervous irritation. In short they strengthen and remove the whole system. In cases of Dyspepsis and continues they have worked wonders: Thousands have been nestored from all the horrors of the above diseases, and a strength of them in Syracuse, and in this court. For particulus see circulars.

We have always taken great care in selecting to compounding our medicines, which has been done to Dr. Soule in person, as may be seen by the following For particulars see circulars.

certificate.
We have acted as agents for Dr.E.L.Soule for the last four years in purchasing most of the medicines used in the composition of his pills.—During that time some of the articles have advanced nearly an hundred process. He has not varied his proportions, and has at noting used any but the best qualities of medicines. We have also acted as agents in selling his Sovereign Bala Fills, and from the universal satisfaction given, we consider they rank among the best pills now before the police. Dr. Soule is the person who first introduced then to this country, and has continued the manufactor

of them ever since.

T.B. Fires & Co.

Syracuse, February 23, 1840.

None are genuine, except those bearing the mass.
