## Agricultural.

[From Neave Saturday Gazette.] Toil On. BT RICHARD.

A cloud may pass above the stream, And dim its sparkling brightness; -A tempest stay the sun's mild beam, As it descends with lightness.

The flower may close its leaves beneath The moon's cold light in sadness ;---The sorrowing bird may cease to breathe Its notes of joy and gladuese.

And thus your hopes may sometimes be By Life's dark ills enshrouded ;--But patient toil, and you shall see

Their light again unclouded. Then brighter will your spirit glow When fortune's suiles attends you ;-

Adversity, not as a for, But as a friend, God sends you,

For difficulties but excite The noble soul to action ; And obstacles make glory's light,

Resistless in attractio Then up and labor undismayed ;

Success must crown endeavor ; By doubt and fear be not betrayed; Press onward, upward, ever.

### Agricultural Meetings in Boston.

At a late Legislature Agricultural Meeting, held at the State House, the subject discussed was the " Rearing and Management of Horned Cattle." Mr. Buckminister, editor of the Ploughman,

thought the subject one of much importance, and that farmers should pay more attention to breeding suitable cows for the dairy. The European breeders look more to fine forms than to the milking qualities. The imported stork has not excelled for milking, although some crosses had proved very fair milkers. If the best milkers are selected to breed from, the

stock will improve from year to year. As evidence of the inferiority of the Euro. pean stock, Mr. Buckminister quoted the writings of M Colman, the Agricultural Commissioner to Europe, who states that the European farmers estimate that sixteen quarts of milk will make one pound of butter. In this State the common estimate is ten quarts of milk for a pound of butter. The great trouble here is that i we kill our young cattle 'too indiscriminately and most farmers prefer purchasing to raising. We should select the best cattle and raise their best calves.

Mr. Brooks, of Princeton, stated his method that time calves will be hardy. If they nurse or the raising of a cabbage knew no more than beyond that time they will lose more flesh on a dandy." The old farmers looked upon the raising a calf in this section of the country as were, nevertheless, curious to see how the nev sequent years. Mr. Brooks said that he has four half Ayr-

four native cows, which gave about the same Ah, ha! sair, 'zat is yon grand lifea. He plant his fait with a sair, 'zat is yon grand lifea. proportion of cream to their milk.

For making butter. Mr. Brooks prefers a cow which gives from twelve to sixteen quarts of milk to one that gives more. They will that the native cattle are the best, though he thought well of the half breed Ayrshires.

In answer to inquires, Mr. Brooks sta

will fatten better than any other. The reason that there is so much difficulty in obtaining good milkers with certainty from native cattle, is because they are crossed so frequently. Mr. Merrimam, of Tewskbury, said that he did n t believe the production of good cattle depended upon chance, but thought it was based onflundamental rules. It depends on the blood, and is probably owing to the crosses that so many cattle prove poor milkers. He thought that farmers should adapt their

stock to the condition of their farms and feed. The improvements in stock can never be in advance of the condition of agriculture. The Durhams, heipg a heavy stock, will not fare well on fight, thin soil. He was of opinion that a cow which gives twelve quarts of milk per day, would yield as much butter as one which gives sizieen. The State. Agricultural Society have a stock of pure breed imported cattle, which they wish to distribute in such a

number as to improve the stock throughout the State as much as possible. They are now somewhat embarrased to know how to dispose of them so as to secure that end, and will doubtless he glad to receive suggestions on the

subiect. Mr. Merriam thought that good milkers could be obtained with as much certainty as fine or warse wool can be produced by crossing. The blood should be kept pure. The native cattle ometimes prove exceedingly good milkers, but is frequently found that the so called natives have a good deal of foreign blood, and they get the credit of what properly is the result of their foreign blood. In breeding, if we start with good milking blood, and cross with none but those which are of that kind, a race will be

produced from which the calves may be depended upon as good milkers. He had some pure blood cattle, which sell at high prices, from which he had never resised a heiter. He keeps these cattle because they are more profita

ble to him. The Hon. Mr. Calhoun, the President of the meeting, stated that in the western part of the State, fine blood animals are occasionally introduced. An improvement commences but i does not go on. The animals are removed u other countries, their off-prings, are crossed

with other breeds, the improvements stops, by breeding out the good blood which has been introduced., In no part of the State has any im provement in stock been completed. He thought the native stock the most to be relied on, if proper care is taken to have good animals o both sides. Another difficulty is we do not know how to train animals of various bloods. -Boston Journal.

> The First St. Louis Agricultural Society. BT SOLITARE.

The first St. Louis Agricultural Society, as of raising calves. He thought it best for the near as I can discover, was started by three calves to nurse until five or six weeks old- amateur farmers, who, although they were gifthen take them away and wean them on a lit- ed with an abundance of the theory of cultivation, tle milk, or milk, and water. When weared at yet they had "never set a potato in the field, wearing. When weared, they should be turn-ed into the pasture. He estimated the cost of projects, gave it the "cold shoulder;" but they follows : The original cost of calf five weeks system of farming by science would succeed, old is eight cents per week; the second year The founders stood alone, but they resolved 12 cents i, and the third year 15 cents. At this to go ahead; so they elected each other to the The founders stood alone, but they resolved rate, the cost of a calf two years and a half old, different offices, and put trust in time, and their would be \$12 82, adding twelve per cent for in- experiments in farming, to convert members. terest. The calf at that age will bring \$22 for The progress of the President was often hubeef. The same relative value in proportion to morously related, by his father in-law, a venethe expense of raising, will hold good for sub- rated deceased citizen, something in this wise : "Ah, sair, do you know my son-in-law !-

SCARPA'S

ACOUSTIC OIL!

THE ONLY CURE TOA F OR the cure of DEAFNESS, pains, and the dis-charge of matter from the ears, Also all those dis-agreeable sound, like the buzzing of is seets, falling o agreeable sounds, like the buzzing of wheets, haining or water, whiczing of ateam, dec., dec., which are symp-toms of approaching deafness, and also generally attea-dant with the disease. Many persons who have been deaf for ten, fifteen, and even twenty years, and were obliged to use ear trumpets, have, after using one or two bottles, thrown aside their trumpets, being mude perfec ly well. Physiciaus and Surgeons highly recommen

The very great number of happy results that have fol-owed the use of SCARPA'S ACOUSTIC OIL; have who were deaf from birth, have been so much improved

as to hear common conversation very readily. It would be the height of presumption to warrant a cure in all cases, but in nhe cases out of ten of recen-date, there is a certainty that the results will be most happy and satiscfatory to the patient. The application of the oil produces no pain, but on the contrary an agree-able and pleasant sensation. The recipe for this medi-cine has been ostained frim an Aurist of great reputam, who has found that deafness, in nineteen cases ou tion, white has found that dearness, in interest asks out of twenty, was produced from a want of action in the nerves of hearing, or a dryness in the ears; his object therefore was to find something which would create a healthy condition in those parts. After a long series of experiments his efforts were at last crowned with success, in the discovery of this preparation, which has re-ceived the name of SCARPA'S COMPOUND ACOUS TIC OIL. A long list of certificates might be given hut such is the confidence in the medicine, and so high has been its reputation, that but one of them will be at privent published: Most Extraonorsant Coast-A 1 dy in Smith

field, Brad. Co., ??a., and now about eighty years of age, had been gradually getting deaf for more than 40 years, so that it was next to impossible to make her hear conversation in the loudest tone of voice. Last winter she was induced to try "Scarpa's Oil for Deafnoss," It is only necessary to add that she used two bottles, and is perfectly restored—she is cured. Any information regard to the case may be obtained at the store of Dr Jayne, No. 8, South Third street, Philadelphia

that he usually caused two calves to be nursed by one cow. It is better for them not to have quite enough than to be over fed. He gave his experience in relation to the new method discovered by the French cattle breeder, Guinon, by which it is asserted the milking qualities of cows can be readily ascertained by certain marks. He said that he had carefully studied he commenced, and they daily grew thinner. In passing, one day, by a Kentucky neighbor, his book, and had not made ten mistakes in telling within two quarts how much milk a cow would giv, and within a pound or two how much butter she would yield in a week. He was fully convinced that there was a great deal of truth in the plan recommended, and that the of kink. directions are so certain, that no one need buy a bad cow. Some of the marks noticed by bor, "How can that be ?" inquired the Secretary, Guinon he had himself noticed before reading the work. Guinon says the marks are develop ed when the calves are six months old, but Mr. and good corn ! Brooks said he was satisfied that the qualities of a calf can be predicted with tolerable certainty, when but four or five weeks old. The work in question is very cheap, costing but 37 } cents, and should be in the hands of every farmer. Mr. Denny, of Westboro', alluded to the

Secretary's chemical mixture. He thought, it publication mentioned by Mr. Brooks. He administered in large doses, the effect would be said he had distributed twenty or twenty-five more rapid, and, to fully test its power, he tricopies among the most experienced breeders of ed it upon a pair of fine oxen. Taking his cattle, and they had informed him that the theory of the author is correct. He thought that every one who has or expect to have a cow, should have a copy of this work.

ed upon the experimental food-Mr. French, of Braintree, tho't any one who would take the book in question, and give it a thorough perusal, would come to the conclusion its influence." that the author must be right. The diffusion of this work will perhaps change the character is high." of the stock throughout the Union. The knowledge which it imparts, will give purchasers more confidence in purchasing, and insure better stock. Mr. French was of opinion that, obtaining good milkers from cows is a mere matter of chance. He did not think that more than one in five of the calves of imported stock, however pure the blood, prove fair mi kers .-Breeding cattle for their fattening qualities i em berry dead, too !" more sure. In conclusion, Mr. French alluded to a Dutham cow, with no pecigree, which was his neighbor Lue for service rendered. The brought from England by the captain of a vessel, and sold to Mr. Swift, the Mayor of Brooklyn, latter looked it over and expressed much surprise at the amount. which yielded on an average, twenty-seven quarts of milk ner day for ten months. out a pretty round bill here; ch?

Mr. Brooks, in an answer to an inquiry, estimated the yield of milk of ordinary cows t about five quarts per day during the year. though he had nothing on which to base the calculation, as he had never measured the year ly product. The reason that the English cattle are no better milkers is because they breed for son why he did so, when he replied, "I am shape, size and fat, rather than for milking to sing bass to-morrow, and am now endeavoring to take a cold in order to prepare my qualities. He had rarely known a good milking cow to be a good fatter. The Ayrshires [voice."

Use and Recommend Dr. Smith's Pills than all others This is to certify that I have used the Sugar Coated Pills manufactured by G. Benjamin Smith, of New- $(\mathcal{J} \mathbf{N}, \mathbf{B}, -\mathbf{I})$  pledge myself to do my work right. All work warranted one year and the money refunded if it does not perform according to agreement. Stick a P.O. York, for some time, and believe them to be a good medicine; and also, from inquiry in that city, I am persuaded that he is the original inventor, and therefore s entitled to the benefit of the invention.

S. WILLIAMS. Pastor 1st Baptist Church, Pittsburgh.

From the Blue Hen's Chieken, (Del.) We call the state incluse for a Concrete, (Det.) We call the statements of our readers to the certificate of Rev. 8, Williams, Pastor of 1st Baptist Church, Pittsburgh, in relation to Dr. Smith's Pills. We can

ourselves bear testimony to the excellence of these Pills one of us having used them and experienced great relia from them. The above is the best paper in the State of Delsware

The "IMPROVED INDIAN VEGETABLE PILLS." (Suga Coated, are certainly doing much good in the whole country, and are bighly estcemed, if one half is true that people wile and say about them. They are so casy, in their operation that all like them. The editor of the Northern State Journal, (one of the targest and best papers in the State of N. Y.,) writes as follows;

since my return from N. Y., and during my illness I made trial of your pills, and I must say I found them excellent. They are the best medicine for the purpose they are intended, that I have yet seen. I seld pills, but I found yours entirely free from the objections to which other pills are lisble. I hope they will continue Clocks, Watches, Jewelry & Silverware, to be a source of profit to you, as I doubt not they wil be means of relief to the afflicted on a large scale. Yours truly, J. GREEN.

Tonawanda, Pa, Sept. 18 1846.

Dr. G. Benj. Smith-

SUGAN COATED PILLS, and I have but a few boxes left. Every box I have sold has given entire satisfaction. I have taken them myself and I consider them the best pills I have ever used, and I am not afraid to recommend them to the public. I wish a further supply pills I have ever at once.

Dr. Smith-

Huntington Ind., June 21, 1646.

Is. They give such general satisfaction that people at least twenty miles for them, and as it is generally known I am sgent for them, I would be very sorry to get out. Yours respectful BAML.
