### Improvement of Stock.

This subject is growing in interest and importance from year to year, especially in these sections of our country better adapted to rearray cattle than raising grain. Much has been done already by our agricultural societies and individuals to improve our stock; and much remains yet to be done. , It is the duty, as well as the interest, of every friend of agriculture, to do all he can to elevate the standard of this important branch of farming. I cheer fully grant that the efforts of the past have to some extent been crowned with success. But have not those improvements been too much confined to a certain class of our scientific farmers, whose tank and pecuniary circumstances will consistently admit of a large expenditure for such improvements. This appears from the fact, that the greater amount of over all other medicines is, that while it credicates the and pecuniary circumstances will consistently admit premiums on stock awarded by agricultural socielies, are to ; Colonel A., Major C., the Hon. C., Esq., or Judge D., or some other personage of high rank and affluent circumstances : while the great mass of farmers are living on from year to year with but little or no improvement of their stock. Truly, such than 100,000 cures of severe cases of disease; at least things ought not so to be. This is confining the benefits of such improvements within too narrow limits. Something more should be done to awaken 10,000 cases of General Debility and want of Energy. the interest and attention of the agricultural community to this important subject, that all may in a few years have the privilege and satisfaction of tion committed in youth, or the excessive indulgence of looking around on their choicest specimens of ini-line passions, and brought on a general physical prostraproved stock.

One cause of this evil may be, that there is a This may be remethed by a wider circulation of illa is far superior to any Invigorating Cordial, as such valuable agricultural publications as the Cultivator, which cannot fuil to cleate a laudable anbition, and to stimulate to activity every farmer who reads them. But the most prominent cause is, that many of our farmers, who may be more or less in debt for their farms think they cannot afford to make such investments as are necessary to purchase those improved breeds of cattle so highly been and can be cured. and justly recommended.

But how shall this be remodied, is a question more easily asked than answered. In locking over the May No. of the Cultivator, I noticed, in the communication of E. Holbrook, that the ... Massachusetts Sociely for promoting agriculture," has hit upon a plan which I think would in a great measure remove this cause.

Of a multithis. Society has set us an example worthy of all unitation . If the agricultural enciety - thankful for these results. of this state, as well as the several county societies would expend a portion of their funds in punchasing the best breeds, to be distributed for improving of stock, subject to such regulations as would benefit our formers generally, we should see that a new a impulse would be given to the agricultural interests of this State.

I am aware that this subject is an important one, and having with much diffidence submitted the enlarged upon by thora-bener qualified to do it justice. Low II. Exeter, Olsego. May 23 1848.

ADVANTAGE OF WATER IN BARN YARDS .- By reading the able communications that have from time to time appeared in the Cultivator, I had formed a favorable opinion of the advantage of having running water in my cattle and sheep yards. Although I had a supply of water within ten or fifteen rods of my barn, I determined to fetch a spring that was situated nearly half a mile off, and I will now sny, that after a trial of several months, it has more than realised my highest expectations. I am satisfied that I shall save at least one cart load of man - directly, for which I assure you I 'ectivery grateful. ure from every ox or cow that I feed in my yaud more than I did when they had to go to the river to brink. Then they would seldom go but once in a day, and in storniy or bad weather, not so plien ; consequently, when they did go they would drink so much as to render them uncomfortable for several hours. 'Now they will drink on an average about five times a day. I am satisfied that they will keep in better condition on less feed than formerly. I think that in the item of manure, it will pay the expense, to say nothing of the comfort of not being obliged to go ten or fitteen rods in cold and stormy wonther to water horses; and it is often difficult when the ground is slippery, to get cattle to go a few rols to get their water. There are very many situations, where, with a tritling expense, persons could have water in their yards at all times; and I am satisfied, that if they once knew the advantage of houses also, they would not do without il again ter will answer for a large family, and will save

It has been proved that nearly every disease to which the human frame is subject, originates from Ampurities of the Blood or Derangements of the Digestive Organs; and to secure Health, we must remove those obstructions or restore the blood to its natural state. This fact is universally known, but people have such an aversion to medicine, that, unless the case is argent, they prefer the disease to the cure, until an impaired Constitution or a fit of sickness rebakes them for the folly of their conduct. Still they had some excuse, for heretofore, medicine in almost all its forms, was pearly as disgusting as it was beneficial. Now, however, the evil is most effectually removed ; for Clickener's Vegetable Purgative Pills, being completely enveloped with A COATING OF PCBE WRITE EUGAR (which is distinct from the kernel) have no taste of medicine, but are as easily swallowed as hits of candy. Moreover they do not nauseale or gripe in the slightest degree, which is occasioned by the fact that are compounded on scientific principles, and operate equally on all the diseased parts of the system, instead of confining themselves to, and racking any particular region, (which is the great and admitted ovil of A Baker, John Doolittle, every other purgative.) Hence, they strike at the root of Disease, remove all impure humors from the blood, open the pares externally and internally, promote the Insensible Perspiration, obviate flatulency, Headache Ac.-separate all foreign and obnoxious particles from chyle, so that the blood, of which it is the origin, must be thoroughly pure-secure a free and healthy action to the Heart, Lungs and Liver, and thereby restore health even when all other means have failed. OLD FASHIONED THEOLOGY .- The following remonstrance against mechanical improvement exhibits the light in which the first introduction of the fanning mill was viewed by some persons, at the time when sifting , it in a current of wind was the only known way of expurgating the chaff.

"Your Ladyship and the steward has been pleaed to propose that son Cuddie should work in the barn wi's new fangled machine for dighting the com from the chaff, thus impiously thwarting the will of Divine Providence by raising wind for your ladyship's own particular use, by human art."

IRON AND GALLIC ACID .-- When a piece of iron is driven into a stick of green oak, a blue colored stain -is frequently seen on the wood. This is caused by a union of the gallic acid of the oak with pajticles of iron. It is in fact, genuine ink, and only needs to be combined with a little gum ambie to give, it a body, to be used in writing.

PRECISION .- In Kentucky, a "barrel" of com is this medicine, many severe and painful surgical operafive bushels of the shelled grain. In New Orleans tions may be provented. OPINION OF PHYSICIANS. it is a flour barrel full of ears. A barrel of flour is seven quarters of a hundred weight, or 166 lbs. A barrel of tar is 20 gallons. der its influence. It immediately-contracts the nerveesaners of the female frame, which is the great cause o Barrenness. It will not be expected of us, in cases of so delicate a nature, to exhibit certificates of cures performed but we can assnre the afflicted, that hundreds of cases have been reported to us. Thousands of cases where families have been without children, after using a few bottles of this invaluable medicine, have been blessed with fine, healthy offspring.

TO MOTHERS AND MARRIED LADIES. This Extract of Sarsaparil's has been expressly prepared in reference to female complaints. No female who has reason to suppose she is approaching that cutical period, " The turn of life ." should neglect to take it, as it is a certain proventive for any of the numerous and horrible disesses to which females are subject at this time of life. This period may be delayed for several years by using this medicine. Nor is it less volusion

or those who are approaching womanhood, as it is calculated to assist nature, by quickening the blood and invigorating the system. Indeed, this medicine is in-valuable for all the delicate diseases to which women

are subject. It braces the whole system, renews permanently the natural energies, by removing the impurities of the body, not so far stimulating as to produced subsequent relaxation, which is the case of most medicined taken for fe-male weakness and disease. By using a few bottles of
