This time has come, the means are supplied; this GRAND AND UNEQUALLED PREPARATION or means are supplied; this a manufactured on the inreat scale, and is called for through out the length and breadth of the land, especially as it is found incamble of degeneration or dietriviration.

Unlike young S. P. Townsend's, it improves with age, and never changes, but for the better; because it is prepared on accentific principles by a scientific wear. The highest knowledge of Chemistry, and the latest discoveries of the art, have all been acquight not regulation in the manufacture of the 10th Dr's Sarsaparilla. The farraparilla rowt, it is well known to inserted the men, contains many mediciant properties, and some properties which are inert or useless, and others, which if returned in preparation is for two, produce fermentation and soid, which is injurious to the system. Some of the properties of Sarsaparilla are so weletife, that they entirely evaporate and are lost in the preparation, if they are not measured by a scientife proceed, known only to those experienced in its manufacture. Moreover these solutie principles, which ify off in vapor, or as an exhalation, under heat, are the very essential medical properties of the sont which rive to it all its value.

Any person can boil or stew the root till they get a dark colored inquid, which is more from the coloring matter in the root than from any thing else; they can then brain this instyld or vapidiquid, sweeten with sour molasses, and then call it "SAR-SAPARILLA EXTRACT or SYRUP." But such is soot the strice known as the

This is so prepared, that all the inert properties of the Sar saparilla root are first resmoved, every thing capable of becoming acid or of fermentation, is extracted and rejected; then every particle of medical virtue is secured in a pure and concentrated force; and time if is rendered incapable of looing any of its valuable and healing properties. Prepared in this way, it is made the most powerful agent in the

It has not its equal in Colds and Complay; and promotes easy expectoration and service perspiration, relaxing stricture of the lungs, throat and every other part.

purities of Indigestion. It has been proved that nearly every disease to which the human frame is subject, originates from impurities of the Blood or Derangements of the Digestive Organs; and to secure Health, we must remove those obstructions or restore the blood to its natural state. This fact to universally known, but people have such an aversion to medicine, that, unless the case is argent, they prefer the disease to the cure, until an impaired Co or a fit of sickness rebukes them for the felly of their conduct. Still they had some excuse, for hereinfine, medicine in almost all its forms, was nearly as disgusting as it was beneficial. Now, however, the evil is most el fectually removed ; for Clickener's Vegetable Purgative Pills, being completely enveloped with A COATING OF FURE WEITE STOAR, (which is distinct from the kernel) have no taste of medicine, but are as easily swallowed as bits of candy. Moreover they do not nauscate or gripe in the slightest degree, which is occasioned by the fact that are compounded on acientific principles, and operate equally on all the discased parts of the system, instead of confining themselves to, and racking any particular region, (which is the great and admitted evil of every other purgative.) Hence they strike at the root of Disease, remove all impure humors from the blood, open the pores externally and internally, promote the Insertsible Perapiration, obviate flatulency, Headache, dec .-- separate all foreign and obnexious particles from chyle, so that the blood, of which it is the wigin, must be thoroughly pure secure a free and healthy action to the Heart, Lungs and Liver, and thereby restore health even when all other means have failed.

THE GREATEST FEMALE MEDICINE NOW

We cannot, of course, exhibit certificates to any extent in this class of complaints, but the two following extructs of letters recently received, indicate sufficient ly the great virtue of the medicine as a remedy for the sesses referred to.
