It has been proved that nearly every disease to which he human frame is subject, originates from impurities of the Blood or Derangements of the Digestive Organs; and to secure Health, we must remove those obstructions or restore the blood to its natural state. This fact is universally known, but people have such an aversion to medicine, that, unless the case is urgent, they prefer the disease to the cure, until an impaired Constitution or a fit of sickness rebukes them for the folly of their conduct. Still they had some excuse, for keretofore, med-rine in almost all its forms, was nearly as disgusting as it was beneficial. Now, however, the evil is most ef-fectually removed; for Clickener's Vegetable Purgutive Pills, being completely enveloped with a coating of tune white sugar. (which is distinct from the kernel) have no taste of medicine, but are as easily swallowed is hits of early. Moreover they do not nauseate or ripe in the slightest degree, which is occasioned by the fact that are compounded on scientific principles, and operate equally on all the diseased parts of the system, instead of confining themselves to, and racking any par scular region, (which is the great and admitted evil o every other our satise.). Hence they strike at the roa of Disease, remove all impure humors from the blood, pen the pores externally and internally, promote the nsensible Perspiration, obviate flatuleucy, Headache, kr.—separate all foreign and obnuxious particles from hyle, so that the blood, of which it is the eigin, must he thoroughly pure—secure a fire and healthy action to the Heart, Longs and Liver, and thereby restore health
