DR. TOWNSEND'S RABBAPARILLA.

There probably has never been so popular a remedy, or patent medicine, as Dr. Townsend's Sarsaparilla, which was originally, and continues to be manufactured in this city, at first by the Doctor himself, and afterwards for several years, and to the present time by Clapp & Townsend, the present proprietor. Since the partnership was formed, the Doctor has resulded in New York, where he keeps a store, and attands to the fusioness that accumulates at that point. The manufactured to the fusioness that accumulates at that point. The manufactured.

Fix of our citizens have any idea of the amount of this medicine that is manufactured and sold. Besides the sales in this country, it is shipped to the Canadas. West India Islands, South America and even to Europe, in considerable quantities. At the manufactory they employ a steam-nagine, besides a large number of men, women and pirls, in the pre-paration of the modicine, making boxes, printing, &c. &c. and turn out, ready for shipment, over 400 dozes per day or nearly 200 hottles. This is an enormous quantity.

The great sale the medicine has acquired, has induced a number of men to fet up imitations and there is at the present time, other medicines for sale, that are called "Br. Townsend's Sarsaparilla," and apparently with a view by duit of adverting again the towal agence respected to in such efforts, to appropriate the name of Dr. S. P. Da. Townsends extraordinary alwatusement, which occupies an entire page of the Sux, will not escape nesses.

Dr. S. P. Townsend, who is the original proprietor of Dr. Townsend's Saraaparilla, and whose office is next door to serk where he has been for several years, is driving an immense business. He receives no less than four hundred dozen of Saraaparilla per day, and even this onermos squantity does not tupply the demand. No medicine exergisined so great a pepsalarity as his preparation of the Saraaparilla. His edition of Almanara for 1840 cost. \$22,000, and he has paid the New York Sun for advertising, to the last four years, owe \$10,000, and he ack nowledges that it is tuncheapest advertising he has had done. This medicine is exported to the Canulas, Wost Indies South America and Europe in considerable quantities, and is coming into general use in those countries, as well as here.

DELECTION

In our opinion, any Druggist or shop-keeper who would sell the spurious Baranparilla, because they can make a greater profit by it than they can by selling the gunune, and sell it for the original and genuine Dr. Townsend's Saranparilla, and deceive their customers would commit any fread for money. Such men have no honor and should not be trusted.

TERE CHOLLERA.

This disease, at the present, is regarded with intense interest, as it is acknowledged to be in our immediate vicusity. Here, as in Europe, almost every physician has an infallable remedy for the disease, yet all are different in their effects and results. And it will prove here as in Europe, that at least twe thirds of all confirmed cases die-send that it is a fact that cannot be controverted, that there is no knewn remedy for this fatal accurge. One physician says that it is easily cured, by mild evaceath: another says that it requires powerful cathartics; one, that bleeding to faintness, is the only remedy; others maintain blood-letting is certain to kill, some physicians avoid all smitulants; and others say that Brandy is certain to care; whilst the Quacks declare their Pills to care the Cholera in any of its stages—which would, if takes as prescribed, be certain to kill any man or beast. The Cholera seems to be sent by Providence to force the people of the earth to be cleanly and evitases. These are the only great such as hould be cionneed, and that personal eleasilipose is indispenseble—but to insure seafety, the internal system, the most wunderful, beautiful and delicate mecking, and especially

PR. S. P. TOWNSKINDS EARSAPARILLA

DR. S.-P. TOWNS-END'S SARSAPARILLA will do this effectually. It not only cleanees and strengthers the system, but creates rich and pure bleed,—the Lequer of Life. We do not say that this Sarsaparilla will cure the Cholera but prevent it. This medicine has by its exfraordinary and worderful effects upon disease; gained a reputance over nearly one-helf of the globe, that is unprecedented. It is always safe and beneficial to the sick and well, and is especially necessary at this particular time, to prevent the Cholera.
